10 of 65. A Marketing Cloud Account Engagement administrator wants to export a .csv of prospects who purchased a certain product within the last year. The product is captured in a Product Name field on the prospect record. The company's product will soon be changing names, therefore they need a one-time export of all prospects that have this specific product currently listed in the Product Name field.

What would be the recommended way to identify these prospects to export to .csv?

- A. ☐ Create an automation rule based on Product Name.
- B. ☐ Create a completion action based on Product Name.
- C. ☐ Create a dynamic list based on Product Name.
- D. ☒ Create a segmentation rule based on Product Name.

8 of 65. An engagement studio program is enabled to repeat. The prospects are eligible to repeat after one day and can repeat three times.

If a prospect remains on the program recipient list, what would happen to that prospect once they hit the End step after processing through the program once?

- A. ☒ The prospect will start the program over at the beginning after waiting one day.
- B. ☐ The prospect will start the program over at the beginning immediately.
- C. ☐ The prospect will not restart the program; they have reached the maximum number of repeats.
- D. ☐ The prospect will not restart the program; prospects can only process through once.

5 of 65. An administrator wants to create a list that contains all prospects who complete the Contact Us form, but will later remove any prospects if they become marked as opted out. If a prospect later opts back in, they should be added back to the list.

How should the list be created?

- A. ☒ Use a dynamic list to automatically add or remove prospects based on the form completion and their opt out status.
- B. ☐ Use an automation rule to automatically add or remove prospects to the list if they submit the form, but aren't opted out.
- C. ☐ Use a completion action on the form to automatically add anyone who completes it to the list.
- D. ☐ Use table actions to add prospects to the list if they've filled out the form, but haven't opted out from communications.

4 of 65. A marketer wants to create different Marketing Cloud Account Engagement lists to correspond with the different stages of the buying cycle. When an Opportunity stage changes in Salesforce, the prospect list membership automatically updates to reflect that in Account Engagement. For example, if an Opportunity moves from Negotiations to Closed Won, the prospects associated with that Opportunity should be removed from the Negotiations list, and added to the Closed Won list.

What should the marketer use to accomplish this?

- A. ☐ Page Actions
- B. ☒ Dynamic Lists
- C. ☐ Completion Actions
- D. ☐ Automation Rules

1 of 65. LenoxSoft has 3 product lines. In Marketing Cloud Account Engagement, each product line has its own folder containing all of the assets for that product line. An administrator would like to score prospects separately based on their interactions with each product line.

How can the administrator accomplish this?

- A. ☒ Assign a scoring category to each product line folder.
- B. ☐ Create two new default scoring models to have one for each product line.
- C. ☐ Edit the score field on the prospect's record to display multiple score values.
- D. ☐ Edit the default scoring model to score differently for each product line.

☐ Mark this item for later review.
