

EXAM: Salesforce Certified Platform Administrator II

GRADE: Pass

The report below shows the percentage of questions in each section that you answered correctly for the Salesforce Certified Platform Administrator II exam. You will receive this information in your exam results email and can also access it via My Dashboard in Trailhead Academy.

SECTION NAME:	PERCENT CORRECT:
Security and Access	100%
Objects and Applications	82%
Auditing and Monitoring	83%
Cloud Applications	100%
Data and Analytics Management	88%
Environment Management and Deployment	100%
Process Automation	92%

Question 65 of 65

Choose 1 option.

An administrator at Universal Containers has been asked to configure product schedules.

What should the administrator consider before enabling this feature?

- ☒ A. Line Item Schedule is unavailable in Process Builder and Workflow.
- ☐ B. The Product Schedule is unavailable in Process Builder and Flow.
- ☐ C. Customizable product schedule page layouts cannot be modified.
- ☐ D. To remove a product schedule completely, remove it from the standard price book.

Question 64 of 65

Choose 1 option.

DreamHouse Realty (DR) wants to ensure that its data is protected. There have been several recent attempts to phish employees.

What should DR do to help ensure that the user that is logged in is the right user when the running user is trying to view reports and dashboards?

- ☐ A. Require a Username, Password, and Security Token when logging in.
- ☒ B. Require a high assurance session when exporting or printing reports and dashboards.
- ☐ C. Require MFA when users need to view and export dashboards and reports.
- ☐ D. Set up an authentication provider for reports and dashboards.

Question 63 of 65

Choose 1 option.

The administrator at Ursa Major Solar has set up IT policies for all user passwords to be a minimum length of 8 characters and have an expiration period of 90 days. The security team recently decided that administrators of any system should have a 15-character minimum password with a 30-day expiration period.

Where should the administrator make this change?

- ☐ A. Password complexity requirements on the permission set
- ☐ B. Session Settings on the User record
- ☐ C. Organization-wide password policies
- ☒ D. Password Policies on the System Administrator profile

Question 62 of 65

Choose 1 option.

DreamHouse Realty currently deals only with single-family homes but is expanding its business to include condos in large cities. There are some features and amenities that only apply to condos, such as the amount of a deposit and concierge services.

How should an administrator configure the Opportunity object to ensure that only relevant fields are displayed on the record?

- ☐ A. Build a Lightning component to display fields that only apply to condos.
- ☐ B. Make a custom Lightning page to display specific fields based on the type of property.
- ☒ C. Create a Record Type for the type of property and custom page layouts for each.
- ☐ D. Configure a validation rule to display fields based on the type of property the user is viewing.

Question 61 of 65

Choose 1 option.

An administrator created a new custom object. When trying to upload new records to the custom object using Data Loader, they are unable to see the new custom object in the list of available objects.

What should the administrator do to resolve the issue?

- ☒ A. Confirm the object is marked as deployed and not in development.
- ☐ B. Assign a permission set to give them access to the new object.
- ☐ C. Check the Field-Level Security of the new custom object's Name field.
- ☐ D. Ensure Allow Sharing is checked on the custom object.

Question 60 of 65

Choose 2 options.

Cloud Kicks wants to implement multi-factor authentication (MFA) to help better secure its Salesforce org.

Which two options should the administrator consider to use MFA?

- ☒ A. A Username and Password
- ☐ B. A Security Token
- ☒ C. An Authentication App
- ☐ D. An Encryption Key

Question 59 of 65

Choose 1 option.

The sales agents at DreamHouse Realty have a profile that allows them to import records for a custom object called House. The agents only need to make imports occasionally and typically import around 100 new records at a time.

What tool should the sales agents use to upload records?

- ☐ A. Bulk API
- ☐ B. Apex Code
- ☐ C. Data Loader
- ☒ D. Data Import Wizard

Question 58 of 65

Choose 2 options.

When an Account has more than five open opportunities over US\$10,000, the sales rep should have an option on the Account page to start the escalation process to allocate additional resources.

Which two configurations should the administrator create?

- ☐ A. Dynamic Forms
- ☒ B. Roll-Up Summary field
- ☒ C. Component Visibility filter
- ☐ D. Formula field

Question 57 of 65

Choose 1 option.

Cloud Kicks has a Process Builder which should trigger upon a status change from an approval process. The Process Builder triggers if the status is updated manually, but not as a result of the approval process update.

What could the administrator do to troubleshoot the issue?

- ☐ A. Change the value with a Specific New Field Value so the Process Builder knows what value to look for.
- ☒ B. Check the Re-evaluate Workflow Rules After Field Change box on the Approval Process Field Update Action.
- ☐ C. Check the Approval Process to make sure it is on the correct version.
- ☐ D. Turn Recursion the Process Builder under the Advanced Settings so the Process Builder fires again.

Question 56 of 65

Choose 1 option.

At Ursa Major Solar, there is a custom object called Galaxy. The sales director wants users to only see certain fields when the Binary Cluster checkbox field is marked.

What Lightning component will satisfy this requirement?

- ☐ A. Path Component
- ☐ B. Highlights Panel Component
- ☒ C. Fields Component
- ☐ D. Record Detail Component

Question 55 of 65

Choose 1 option.

A developer is getting errors for Production deployment. The test deployment in the Full sandbox, which included a local test run, was successful. The Full sandbox was last refreshed 2 weeks ago.

Where should the administrator check to see what was recently changed?

- ☒ A. Setup Audit Trail
- ☐ B. Field Audit Trail
- ☐ C. Developer Console
- ☐ D. Field History Tracking

Question 54 of 65

Choose 1 option.

DreamHouse Realty recently learned that the major listing service it utilizes can accept messages to a specific endpoint. The realtors want to utilize this to be able to quickly update the listing price on properties after it has been approved.

What automation tool should the administrator configure?

- ☐ A. Platform Event
- ☒ B. Flow
- ☐ C. Email Alert
- ☐ D. Process Builder

Question 53 of 65

Choose 1 option.

Support staff at Cloud Kicks work on multiple accounts and opportunities at the same time. Currently, they are switching between browser tabs, which is tedious and confusing. Support managers put in a request for a better agent experience.

What should an administrator recommend?

- ☒ A. Implement Service Console.
- ☐ B. Enable Subtab Record Browsing in the Setup menu.
- ☐ C. Configure Split List Views.
- ☐ D. Create a screen flow to pull all related opportunities onto one page.

Question 52 of 65

Choose 1 option.

An administrator has a request to write a report listing accounts that have sales from this year and that have a completed activity in the last 30 days.

What reporting feature should the administrator employ to provide only the list of accounts, without listing the details of the opportunities?

- ☒ A. Cross-Filter
- ☐ B. Joined Report
- ☐ C. Summary Report
- ☐ D. Filter Logic

Question 51 of 65

Choose 1 option.

Sales managers at Ursa Major Solar have asked for some additional automation around opportunity reminders. If the opportunity is in the Proposal stage a week before the close date, they want an email sent to the opportunity owner and manager. If the Budget Approved custom field is checked, the managers want to be notified immediately.

How should these requirements be met without using code?

- ☐ A. Create a record-triggered flow with scheduled paths. Configure the flow to run after the record is saved.
- ☒ B. Create a schedule-triggered flow. Specify the object and filter conditions that each record must meet.
- ☐ C. Create a record-triggered flow with scheduled paths. Configure the flow to run before the record is saved.
- ☐ D. Create a schedule-triggered flow. Specify the object and set the schedule frequency to run daily.

Question 50 of 65

Choose 2 options.

Which two tools should an administrator use to require data to be entered in a field and improve data quality on a record in Salesforce?

- ☒ A. Page Layouts
- ☐ B. Dashboards
- ☒ C. Validation Rules
- ☐ D. Workflow Rules

Question 49 of 65

Choose 2 options.

An administrator needs to create a junction object called Account Region to link the standard Account object with a custom object called Region.

Once the junction object is created, what are the next two steps the administrator should take?

- ☐ A. Create a master-detail relationship field on the Account object to the junction object.
- ☒ B. Configure a master-detail relationship field on the junction object to the Account object.
- ☐ C. Build a master-detail relationship field on the Region object to the junction object.
- ☒ D. Make a master-detail relationship field on the junction object to the Region object.

Question 48 of 65

Choose 2 options.

Ursa Major Solar (UMS) wants to improve its customers' ability to search for knowledge articles. UMS has already created categories for articles.

Which two additional changes should be made to improve search capabilities?

- ☐ A. Configure Einstein Search for specific search terms.
- ☐ B. Configure Global Search for specific search terms.
- ☒ C. Promote specific search terms for specific articles.
- ☒ D. Create synonyms for specific search terms.

Question 47 of 65

Choose 1 option.

The Cloud Kicks online Lead Intake form was recently updated to allow for new choices on some older picklist fields. The leads are all being created properly in Salesforce, but reps are getting errors as they try to work the leads.

What tool should the administrator use to evaluate what is causing the errors?

- ☒ A. Debug Log
- ☐ B. Field History Tracking
- ☐ C. Record History
- ☐ D. Setup Audit Trail

Question 46 of 65

Choose 1 option.

Cloud Kicks uses a dashboard with multiple components based on Account, Case, and Opportunity reports. The system administrator adds a dashboard filter on Account Owner. When filtering the dashboard by Account Owner, records are now missing from several Opportunity components.

What is the recommended way for the system administrator to resolve this issue?

- ☐ A. Create a joined Accounts and Opportunities report for the components.
- ☐ B. Update the equivalent field to Parent Account on the Opportunity components.
- ☐ C. Use a custom report type for Accounts with or without Opportunities.
- ☒ D. Add a cross-filter to the Opportunity source reports.

Question 45 of 65

Choose 1 option.

At Cloud Kicks, the sales team uses a specific dashboard to see how they are doing daily. The team has asked the administrator for an easier way to see this dashboard.

What should the administrator recommend?

- ☒ A. Add the dashboard to the sales team's home page.
- ☐ B. Ask the sales team to subscribe to the dashboard.
- ☐ C. Update the sales team's app with a new dashboard.
- ☐ D. Email the dashboard to the sales team every morning.

Question 44 of 65

Choose 1 option.

AW Computing sells a variety of software programs for its customers to choose from. Management wants to ensure that the customer automatically receives phone support when they purchase photo editing software.

How should an administrator meet these requirements?

- ☐ A. Create a flow to attach an entitlement to the asset upon purchase.
- ☒ B. Add an entitlement template to the product for phone support.
- ☐ C. Include a milestone to the product with a term of 365 days for phone support.
- ☐ D. Configure a flow to create a milestone to the asset upon purchase.

Question 43 of 65

Choose 1 option.

An administrator would like to know if any other administrators or delegated administrators are using the Log In As a User feature. Where should the administrator look?

- ☒ A. Grant Account Login Access
- ☐ B. Connected App Usage
- ☐ C. Setup Audit Trail
- ☐ D. Login History

Question 42 of 65

Choose 1 option.

AW Computing organizes its sales regions as East, Central, and West. Each region has sales reps, a sales director, and sales operations members. The organization-wide default for all objects is set to Private. Members of the operations team for the East region need access to all the accounts and opportunities in the region.

How should the administrator configure this requirement?

- ☐ A. Instruct the operations team members to add themselves to the account teams.
- ☐ B. Share an Opportunity sharing rule with a public group containing the East operations profile.
- ☐ C. Assign to a role in the role hierarchy positioned above the East sales director.
- ☒ D. Utilize territory management to add the operations team to the East territory.

Question 41 of 65

Choose 2 options.

Cloud Kicks (CK) does business directly with individual consumers (B2C) and large businesses (B2B). Some of CK's B2C customers are employed at its larger customer accounts and should be tracked under both.

Which two options will CK need to use to manage its customers' accounts?

- ☒ A. Person Accounts
- ☐ B. Opportunity Contact Roles
- ☒ C. Contacts to Multiple Accounts
- ☐ D. Leads

Question 40 of 65

Choose 1 option.

Cloud Kicks has created a new flow that deletes records.

What should the administrator consider when testing the flow?

- ☒ A. Even if the flow is inactive, debugging the flow will delete the test record.
- ☐ B. Flows with delete elements need to be inactive to ensure that the test record is not actually deleted.
- ☐ C. Flows with delete elements cannot be debugged by the Flow debugging tool.
- ☐ D. Records deleted by Flow when debugging are hard deleted.

Question 39 of 65

Choose 1 option.

The administrator at Cloud Kicks is evaluating the capabilities of Schema Builder to create custom objects and custom fields. The administrator likes the user interface of the Schema Builder, as opposed to the new object and field wizards, but also notices some limitations.

What needs to be configured from the object manager instead of Schema Builder?

- ☒ A. Add custom fields to the page layout.
- ☐ B. Allow Reports and Activities.
- ☐ C. Enable field history tracking.
- ☐ D. Make available for Customer Portal.

Question 38 of 65

Choose 1 option.

A sales manager at AW Computing has created a contact record but is missing some of the information to complete the record. The organization-wide default for Accounts is set to Public Read Only, and Contacts are controlled by parent.

Who will be able to edit this new contact record?

- ☐ A. Users above the sales manager in the role hierarchy
- ☐ B. All users in the organization
- ☒ C. Sales manager and system administrator
- ☐ D. The owner and users below the owner in the role hierarchy

Question 37 of 65

Choose 1 option.

A custom object called Item has a many-to-many relationship with the Account and Quota objects. At Cloud Kicks, account owners are changed frequently while ownership of Quota records remains unchanged. When an account owner is updated, the new account owner can only see Item records if they are also the owner of the Quota record.

What step should the administrator take to give access to all Item records?

- ☒ A. Create a Quota criteria-based sharing rule using ISCHANGED for the Account Owner field.
- ☐ B. Give the account owner Read access to both the Account and the Quota objects.
- ☐ C. Change the data format of the Quota relationship field from master-detail to lookup.
- ☐ D. Re-assign the Quota master-detail to the primary and the Account master-detail to secondary.

Question 36 of 65

Choose 1 option.

Cloud Kicks is a large company with many divisions. Some divisions have a higher turnover, so each division wants to be able to create and manage users only within their division.

What should the administrator do to set this up?

- ☐ A. Create a permission set group for the division leaders.
- ☐ B. Customize and assign profiles for the division teams.
- ☒ C. Set up delegated administrators for the division leaders.
- ☐ D. Assign a flat territory role hierarchy for the divisions.

Question 35 of 65

Choose 2 options.

AW Computing wants to create a process to assign accounts to different salespeople based on the annual revenue of the company. The administrator has decided to create a flow.

Which two considerations should the administrator make sure to remember when creating the flow?

- ☒ A. Use a Get Records component instead of hard coding record IDs.
- ☐ B. The running user of a flow is the user that last saved the flow.
- ☒ C. Update Record elements should be placed outside the flow loop.
- ☐ D. Update Record elements should be placed inside the flow loop.

Question 34 of 65

Choose 1 option.

Cloud Kicks has been tracking how many participants wear the company's shoes in each marathon. The administrator creates two custom objects: Races and Runners. There is a master-detail relationship between them as well as a Roll-up Summary field on the Races object to show the count of runners in each race. Requirements have changed, and the administrator wants to delete the Master-detail Relationship field without deleting the Runners records.

What action should an administrator take before the Relationship field can be deleted?

- ☐ A. Uncheck 'Delete this record also' to turn off cascading deletes.
- ☐ B. Select the 'Allow Reparenting' checkbox on the Master-detail field.
- ☐ C. Change the field type to a Lookup Relationship.
- ☒ D. Delete the Roll-up Summary field on the parent.

Question 33 of 65

Choose 1 option.

The support operations team has noticed some invalid data in the custom Primary Issue picklist field on case records. They are unsure of what the issue is since the field is being updated by an automated procedure and there is a validation rule to ensure clean data on case records.

Why are records being updated with data that violates the validation rule?

- ☐ A. The field is being updated by an Apex before trigger.
- ☒ B. The field is being updated by a workflow field update.
- ☐ C. The user has the Modify All Data permission on the object.
- ☐ D. The data change is triggered by an update record Flow element.

Question 32 of 65

Choose 3 options.

Cloud Kicks (CK) wants the forecast numbers to be shown by territory regardless of who owns the record. CK also wants a way to forecast based on role hierarchy.

Which three options should an administrator recommend?

- ☐ A. Make a custom field to track the amounts for Territory and Hierarchy Forecast.
- ☒ B. Have the user select the forecast type listed under the Forecast Type in the Display Settings.
- ☐ C. Modify the Territory Forecast to match the Hierarchy Forecast model.
- ☒ D. Enable Role Hierarchy Forecast.
- ☒ E. Enable Territory Forecast.

Question 31 of 65

Choose 1 option.

Ursa Major Solar has a global customer base. Recent issues with customs have greatly delayed shipping to Canadian customers. While the Country field is already on the page layout, the sales team wants Canadian customers highlighted as a potential challenge for fulfillment until the shipping issue is resolved.

How should the administrator solve this issue?

- ☐ A. Create a new record type and page layout for Canadian customers, ensuring their pages look different.
- ☐ B. Add a rich text component to the Lightning page. Use conditional visibility to only show the component if the account is Canadian.
- ☐ C. Modify the page layouts to move the Country field into its own section.
- ☒ D. Create an in-app guidance prompt for Canadian records.

Question 30 of 65

Choose 1 option.

An administrator has a request to create a Next Steps field for users to document what they need to do next on a lead. The field should allow users to format the text and be mapped to an opportunity when converted.

What type of field will satisfy these requirements?

- ☐ A. Text Area (Long)
- ☒ B. Text Area (Rich)
- ☐ C. Text Area
- ☐ D. Formula (Text)

Question 29 of 65

Choose 1 option.

An administrator is trying to deploy a change set from a newly upgraded sandbox source org with new features to a destination sandbox org on a previous release. Some metadata in the change set cannot be deployed because they've changed between releases.

What should the administrator do to deploy the changes to a sandbox?

- ☐ A. Refresh the sandbox destination org and then deploy the change set.
- ☒ B. Create a new sandbox on the new release version and deploy the change set to the new org.
- ☐ C. Make the changes manually through the user interface in the source org.
- ☐ D. Submit a ticket to Salesforce to update the source org to the latest release.

Question 28 of 65

Choose 1 option.

Cloud Kicks maintains inventory in a legacy application. Management wants the information to also be available to view and report on directly in Salesforce.

Which action should the administrator take to achieve this goal?

- ☐ A. Upload an Excel spreadsheet with the data into the Files tab.
- ☐ B. Import the data into a custom object when needed; delete after it is used.
- ☐ C. Build a Lightning component and use SFDX to connect to the inventory app.
- ☒ D. Create an external object that maps to the inventory application.

Question 27 of 65

Choose 1 option.

What should an administrator use as an alternative to a Process Builder to expedite the time required to update the records?

- ☐ A. Workflow Rule Field Change
- ☐ B. Screen Flow
- ☒ C. Before Save Flow Trigger
- ☐ D. Batch Update

Question 26 of 65

Choose 1 option.

On the Contact record, if a contact has the value of 'CEO' in the Title field, the administrator wants to require the users to also put a phone number in the Phone field.

What formula should the administrator put in the Error Condition Formula of a validation rule to enable this?

- ☒ A. Title = 'CEO' && NOT(ISBLANK(Phone))
- ☐ B. Title <> 'CEO' && NOT(ISBLANK(Phone))
- ☐ C. Title <> 'CEO' && ISBLANK(Phone)
- ☐ D. Title = 'CEO' && ISBLANK(Phone)

Question 25 of 65

Choose 1 option.

An administrator needs a business process automated, but only for certain users and profiles. The administrator will need to frequently update which users and profiles will use the process. After evaluating the declarative options, it was determined that this functionality must be done via an Apex trigger.

What software requirement should the administrator request so that process execution can be declaratively controlled?

- ☐ A. Use a System permission that is assigned to the user or profile.
- ☐ B. Use Process Automation Settings in Setup to set the appropriate users or profiles.
- ☐ C. Use Apex Class Access to assign the Apex code to the user or profile.
- ☒ D. Use a custom permission set that is assigned to the user.

Question 24 of 65

Choose 1 option.

A user accidentally created a duplicate opportunity and is unable to delete the duplicate record.

What should an administrator do to troubleshoot this issue?

- ☒ A. Check the user profile permissions on the Opportunity object to see if they have permission to delete.
- ☐ B. Change the user's profile to System Administrator, so they have full permission to delete object records.
- ☐ C. Run a report of all opportunities to identify other possible duplicates.
- ☐ D. Create a permission set with edit access for the opportunity and assign it to the user.

Question 23 of 65

Choose 1 option.

Users at Ursa Major Solar want to create complex dashboards with supporting charts based on data to come from a variety of sources, some of which live on the internal company shared drives.

Which product should the administrator recommend to meet the users' needs?

- ☐ A. List Views
- ☐ B. Lightning Dashboard Builder
- ☐ C. Report Builder
- ☒ D. Tableau CRM

Question 22 of 65

Choose 1 option.

Users at AW Computing use a custom object to manage orders. All profiles share a single page layout. Customer Service and Sales users express frustration overseeing actions that do not always apply to their situation on the page layout.

What should an administrator recommend?

- ☐ A. Create separate record types for the Customer Service and Sales users' records.
- ☐ B. Configure two separate permission sets and assign the appropriate permissions to each user.
- ☐ C. Make two separate Lightning record pages and assign them to the applicable profiles.
- ☒ D. Use Dynamic Actions and conditional visibility to show the appropriate actions to the applicable users.

Question 21 of 65

Choose 1 option.

Universal Containers has a Private sharing model for Accounts and Opportunities. A new team is being created from within the sales team that will be assigned all renewal opportunities. These users will need to see all closed won opportunities while keeping the account private.

How should the administrator meet this requirement?

- ☒ A. Create a public group for the renewals team and create a criteria-based sharing rule on Opportunities.
- ☐ B. Update the organization-wide defaults on Opportunities to Public Read Only and add them to the opportunities team.
- ☐ C. Create a permission set with View All enabled on Accounts and assign it to the new users.
- ☐ D. Create a new profile for the renewals team with View All permissions enabled on Accounts and Opportunities.

Question 20 of 65

Choose 3 options.

An administrator is planning the release process for the year. The team will be using change sets to process deployments to production.

Which three best practices should be considered?

- ☐ A. Be sure to test only after business hours the day after deployment.
- ☒ B. Plan your deployments around the production and sandbox maintenance schedules.
- ☒ C. Make sure to deploy all dependent components.
- ☐ D. Use matching names for global publisher layouts and Outlook publisher layouts.
- ☒ E. Make sure change sets are limited to 10,000 files.

Question 19 of 65

Choose 2 options.

A user at Cloud Kicks has informed the administrator that they are unable to log in to Salesforce via multi-factor authentication.

Which two areas should the administrator review to understand potential root causes?

- ☒ A. Identity Verification History
- ☒ B. Login History
- ☐ C. Setup Audit Trail
- ☐ D. Debug Logs

Question 18 of 65

Choose 1 option.

Cloud Kicks users report receiving an "Apex CPU time limit exceeded" error message when attempting to close certain opportunity records. This does not occur on every opportunity record change or for every user.

What is the recommended method for the administrator to identify the cause?

- ☐ A. Review the Setup Audit Trail.
- ☐ B. Monitor with Login Forensics.
- ☒ C. Enable Debug Logging for users.
- ☐ D. Set up Apex Exception Email alerts.

Question 17 of 65

Choose 1 option.

When should an administrator consider using Person Accounts?

- ☐ A. In a B2B business model, and the primary contact is the intended recipient of sales and marketing attention.
- ☐ B. In a complex business model and the users need to record all Opportunity information on Contacts.
- ☐ C. In a complex business model and all Case records need to include a separate Contact and Account.
- ☒ D. In a B2C business model and the consumer is the intended recipient of sales and marketing attention.

Question 16 of 65

Choose 1 option.

Cloud Kicks (CK) completed a project in a sandbox environment and wants to migrate the changes to production. CK split the deployment into two distinct change sets. Change set 1 has new custom objects and fields. Change set 2 has updated profiles and automation.

What should the administrator consider before deploying the change sets?

- ☐ A. Automations need to be deployed in the same change set in order to be activated.
- ☒ B. The Field-Level Security will not be deployed with the profiles in change set 2.
- ☐ C. Change set 2 needs to be deployed first.
- ☐ D. Both change sets must be deployed simultaneously.

Question 15 of 65

Choose 1 option.

AW Computing has a private sharing model for its accounts, but a sales rep occasionally needs assistance from an engineer.

What feature should be used to grant the engineer access to the necessary account, while maintaining the company's data security?

- ☐ A. Custom Profile
- ☐ B. Permission Set Group
- ☒ C. Account Teams
- ☐ D. Permission Set

Question 14 of 65

Choose 1 option.

The administrator at Cloud Kicks has been requested to provide access to the Leads object to a contractor. The contractor currently has a profile that has access to a project management app within Salesforce. The contractor should only have View access to all of the Lead records.

How should the administrator handle this request?

- ☐ A. Add an app with the Leads tab to the user's profile.
- ☐ B. Assign the contractor to a public group with Lead access.
- ☐ C. Create a profile with Read Only for all Leads.
- ☒ D. Assign a permission set that has View All on Leads.

Question 13 of 65

Choose 1 option.

The AW Computing administrator team does significant amounts of work around process automation and ensuring data integrity. When an administrator created a new validation rule in production, the development team complained that their deployment to production failed.

What should be implemented to prevent this conflict from happening?

- ☐ A. Refresh the full copy sandbox daily.
- ☒ B. Test changes in a shared sandbox.
- ☐ C. Review the setup audit trail prior to changes.
- ☐ D. Build automation and validation rules using screen flows.

Question 12 of 65

Choose 1 option.

A new administrator at Cloud Kicks has reported that they are unable to use outbound change sets as requested.

What permission should be reviewed to determine if it is missing from the administrator user or profile?

- ☐ A. API Enabled
- ☐ B. Modify Metadata Through Metadata API Functions
- ☐ C. Deploy Change Sets
- ☒ D. Create and Upload Change Sets

Question 11 of 65

Choose 2 options.

Northern Trail Outfitters has many users set up as system administrators to perform Salesforce Administration.

Which two functions would a delegated administrator be able to perform in order to help the existing Salesforce Administrator?

- ☐ A. Make updates to permission set configurations.
- ☒ B. Manage custom objects and customize nearly every aspect.
- ☐ C. Configure updates to sharing rules.
- ☒ D. Set up users and password management.

Question 10 of 65

Choose 1 option.

The finance director at Cloud Kicks asks the administrator for an exception report that shows all B2C accounts that are missing the credit card number. The credit card number is a classic encrypted field.

What action should the administrator take to meet this requirement?

- ☐ A. Add 'View Encrypted Fields' to a permission set assigned to Finance and system administrators and a summary report filtered by credit card number.
- ☐ B. Unmask the encrypted credit card number field to make it available and add a custom filter to a report where credit card number is blank.
- ☐ C. Create a summary report that includes a cross-filter to the Account object with a sub-filter for credit card number equal to null.
- ☒ D. Build a custom checkbox called 'Has Credit Card' that Finance checks when a credit card is recorded and a tabular report filtered on the checkbox equal to false.

Question 9 of 65

Choose 1 option.

The administrator at Universal Containers recently rolled out Email-to-Case functionality. Even though a new record type was created and specified in the Email-to-Case settings, all incoming cases are receiving a different record type.

What is likely causing the record type discrepancy?

- ☐ A. The new Case Owner needs permissions to the new record type.
- ☐ B. A validation rule is preventing the record type from being updated.
- ☒ C. The Automated Case User needs permissions to the new record type.
- ☐ D. A Case assignment rule is preventing the record type from being updated.

Question 8 of 65

Choose 2 options.

Cloud Kicks would like to reassign ownership of all leads that are open and more than 60 days old. The system administrator has written an assignment rule to distribute these leads to the correct owners or queues.

Which two tools should the administrator use to update the owner of these leads?

- ☒ A. Mass Update
- ☐ B. Dataloader.io
- ☐ C. Import Wizard
- ☒ D. Bulk API

Question 7 of 65

Choose 1 option.

A user at Ursa Major Solar is experiencing a flow error while trying to process a record to the next status. The users with the same access can process records without any errors.

What should the administrator do to troubleshoot the issue?

- ☐ A. Grant the user more data access by moving them higher in the role hierarchy.
- ☒ B. Use the flow debug option and set the selection to Run as another user.
- ☐ C. Grant the user the Modify All permission to ensure they have full system access.
- ☐ D. Use the Setup Audit Trail to review the user's recent activity.

Question 6 of 65

Choose 3 options.

Cloud Kicks has just released a new Process Builder on the Account in production. The end users keep getting error messages that prevent them from completing their updates to the Account.

Which three things should the administrator do to resolve this issue?

- ☒ A. Fix the Process Builder in a sandbox and migrate the change to production.
- ☐ B. Have the users refresh the Account page so they get the current Process Builder.
- ☒ C. Deactivate the Process Builder in production.
- ☐ D. Manually make the updates to the Account as the logged-in user.
- ☒ E. Review the Error Email for the Process Builder and rectify the issues.

Question 5 of 65

Choose 1 option.

AW Computing has a new requirement from its security team where audit information relating to an account must be recorded in a new custom object called Audit. Audit records need to be preserved for 10 years and only accessible by the audit team.

What relationship should be used to relate the Audit object to the Account object?

- ☐ A. Many-To-Many
- ☐ B. Lookup
- ☒ C. Master-Detail
- ☐ D. Self

Question 4 of 65

Choose 1 option.

An administrator at Cloud Kicks has been tasked by the compliance team to flag where sensitive information is stored in Salesforce.

What feature should the administrator use to fulfill this requirement?

- ☒ A. Data Classification
- ☐ B. Classic Encryption
- ☐ C. Field-Level Security
- ☐ D. Schema Builder

Question 3 of 65

Choose 1 option.

An administrator is asked to create a report to calculate the year-over-year change in the dollar amount of a company's opportunities.

What reporting tool should be used to complete this request?

- ☒ A. A custom summary formula with the PREVGROUPVAL function
- ☐ B. A joined report with two report blocks for each year
- ☐ C. A custom summary formula with PARENTGROUPVAL function
- ☐ D. A row-level formula to compare amounts grouped by year

Question 2 of 65

Choose 2 options.

AW Computing has been advertising a new keyboard that was released at the beginning of the month. The sales team has an additional incentive to add the keyboards to every sale. The administrator already added the product to Salesforce but the reps are unable to select the product on the opportunity.

Which two options should an administrator check to ensure the product is available?

- ☐ A. Make sure the price book is in the company currency.
- ☒ B. Confirm the correct price book is selected on the opportunity.
- ☐ C. Verify the product has a start date entered.
- ☒ D. Ensure the product is associated with the correct price book.

Question 1 of 65

Choose 1 option.

On the Planet custom object, Ursa Major Solar's sales director wants only certain action buttons to appear depending on if a given planet is defined as gaseous.

Which Lightning component should the administrator define dynamic action buttons?

- ☒ A. Highlights Panel
- ☐ B. Related Lists
- ☐ C. Record Detail
- ☐ D. Activities
