

Question 1 of 65

Choose 1 option.

The Service team at Cloud Kicks needs a way to show the current status from the Account on the Case. This value should be on the page and is used in validation rules.

What should the administrator recommend to solve this?

- ☐ A. Make a Rollup Summary.
- ☒ B. Create a cross-object formula.
- ☐ C. Add a lookup field to Account.
- ☐ D. Use a picklist field.

Question 9 of 65

Choose 1 option.

DreamHouse Realty manages its accounts and contacts in Salesforce using a B2C account model. The business has requested that third-party loan advisors be tracked in Salesforce along with the customers they work with.

How should the administrator track third party financial advisors and the customers they work with?

- ☐ A. Use a Hierarchical lookup on Contact to track loan advisors' customers.
- ☐ B. Create a Hierarchical lookup on Account to track loan advisors' customers.
- ☐ C. Use a B2B Account Model to track loan advisors' customers.
- ☒ D. Set up Contacts to Multiple Accounts for loan advisors.

Question 10 of 65

Choose 1 option.

Cloud Kicks uses a Review junction object to track product reviews by account. The Review object has a Master-Detail relationship to Account and a Master-Detail relationship to a customer Product object. A user accidentally deleted the Account, Product, and related Review records.

How should the deleted Review records be restored?

- ☒ A. Restore both the Account and Product master records from the Recycle Bin.
- ☐ B. Restore the Review junction object record from the Recycle Bin.
- ☐ C. Restore either the Account or Product master records from the Recycle Bin.
- ☐ D. The Review object records are permanently deleted without the ability to restore.

Question 11 of 65

Choose 1 option.

DreamHouse Realty has created a custom object to track its Open Houses with a master-detail relationship up to a custom object for Properties. Agents need to quickly calculate the number of Open House records in a status of Pending so they can see the value from the Property record.

What feature should the administrator implement?

- ☐ A. Formula Fields
- ☒ B. Roll Up Summary
- ☐ C. Lightning Component
- ☐ D. Visualforce Page

Question 12 of 65

Choose 2 options.

Ursa Major Solar uses the custom object Product Development to track ideas R&D is working on. A former administrator added the custom object Potential Name with a lookup to Product Development to allow R&D to track names under consideration for those products. The R&D manager recently ran a report and noticed several potential names where the relationship to the Product Development record was missing. The current administrator needs to change this relationship to master detail to ensure a potential name only exists when there is product development.

Which two options are available for altering the existing Potential Name records for the deployment of this change to be successful?

- ☒ A. Assign any Potential Name records with blank lookup fields to an existing record from Product Development.
- ☒ B. Move any Potential Name records with blank lookup fields to the recycle bin.
- ☐ C. Remove any existing data in the lookup field in Potential Name records.
- ☐ D. Remove the lookup field from the page layout so the data is maintained without changes.

Question 13 of 65

Choose 1 option.

Users at AW Computing are receiving a duplicate message when they enter contacts with common first and last names. Management wants to improve the user experience but also keep the data integrity of contacts.

What should an administrator implement for this issue?

- ☐ A. Create a custom validation to check for duplicates when creating new contact records.
- ☒ B. Include the customer Email field to the existing matching rule for a more exact match.
- ☐ C. Change the duplicate rule to report instead of alert to limit duplicate messaging.
- ☐ D. Create a secondary matching rule to the duplicate rule to match on the associated customer.

Question 14 of 65

Choose 1 option.

Cloud Kicks (CK) has a sneaker maintenance plan that it includes with all orders for its new line of Bluetooth-enabled custom sneakers. The sneaker maintenance plan gives each customer 6 months of phone support in case they have issues with their new sneakers. The administrator at CK is having a hard time keeping up with the work associated with managing the maintenance plan.

What should the administrator do to help manage the plan?

- ☐ A. Create a support process for the maintenance plan.
- ☒ B. Set up and configure entitlement templates.
- ☐ C. Use Flow to automatically create and assign entitlements.
- ☐ D. Ensure milestones are in place for the maintenance plan.

Question 15 of 65

Choose 1 option.

Cloud Kicks uses a Lightning web component to provide instructions to sales reps. An administrator needs to correct a spelling error in the displayed text in one of the Lightning web components.

What is the recommended tool to make the change?

- ☒ A. VisualStudio Code
- ☐ B. Developer Org
- ☐ C. Salesforce Lightning Inspector
- ☐ D. Developer Console

Question 16 of 65

Choose 2 options.

Universal Containers has found duplicate contacts in Salesforce. The sales team has requested that the administrator prevent duplicate records from being created.

Which two ways should the administrator customize duplicate management?

- ☒ A. Configure custom duplicate rules.
- ☒ B. Create custom matching rules.
- ☐ C. Create custom validation rules.
- ☐ D. Create custom sharing rules.

Question 17 of 65

Choose 1 option.

Users at AW Computing use a custom object to manage orders. All profiles share a single page layout. Customer Service and Sales users express frustration overseeing actions that do not always apply to their situation on the page layout.

What should an administrator recommend?

- ☐ A. Make two separate Lightning record pages and assign them to the applicable profiles.
- ☒ B. Use Dynamic Actions and conditional visibility to show the appropriate actions to the applicable users.
- ☐ C. Create separate record types for the Customer Service and Sales users' records.
- ☐ D. Configure two separate permission sets and assign the appropriate permissions to each user.

Question 18 of 65

Choose 1 option.

Select power users want the ability to make configuration changes to a specific custom object.

What tool should the administrator assign to the power users to enable this?

- ☐ A. Modify All Data
- ☐ B. Sharing Rule
- ☐ C. View Setup and Configuration
- ☒ D. Delegated Administration

Question 2 of 65

Choose 1 option.

Cloud Kicks has two record-triggered flows on the same object. One flow creates a child record when criteria are met. The second record-triggered flow is based on criteria to check if the child record exists and updates a field. The field on the child record that needs to be updated is still null after the second record trigger.

What should the administrator do to resolve this issue?

- ☒ A. Combine the two flows into one with checks to see which part of the flow needs to be run.
- ☐ B. Have the record triggered flows fire on create or edit to update the field.
- ☐ C. Make a new record-triggered flow on the child object to update the field on the parent record.
- ☐ D. Turn the flows into schedule flows and have them update the field.

Question 19 of 65

Choose 2 options.

When configuring a change set, which two practices should an administrator adhere to in order to ensure a successful deployment to production?

- ☐ A. Add permissions and access settings to outbound change sets in addition to the dependent component list.
- ☒ B. Clone a change set to add forgotten dependent components to an uploaded change set.
- ☐ C. When deploying a new record type, ensure the new record type is the only component in the change set.
- ☒ D. Run deployment validations on the change set in the sandbox prior to uploading to production.

Question 20 of 65

Choose 1 option.

A previous consultant helped Universal Containers automate many of its business processes. The administrator changed the email address on the consultant's user record and deactivated it. The consultant called to say they continue to get email messages from failed flows and processes.

What steps should the administrator perform to stop the fault messages from going to the consultant?

- ☐ A. Export Flow Interviews filtered by LastModifiedBy.email using Data Loader. In the .csv file, change LastModifiedBy to the System Admin and upload changes with Data Loader.
- ☒ B. Set 'Send Process or Flow Error Email' to 'Apex Exception Email Recipients' in Automation settings. Add the System Admin's email to the Apex Exception Email page in Setup.
- ☐ C. Create a custom metadata type and associate the LastModifiedBy field. Write a flow that updates the field in any flows or processes equal to the consultant's name.
- ☐ D. Request an Email Log from Email Log Files in Setup and filter the request by the consultant's email. Manually update any flows or processes listed on the log.

Question 21 of 65

Choose 1 option.

How should an administrator support a finance team that is trying to use Opportunity data to keep an eye on their pipeline rather than manually calculating anticipated income for the quarter?

- ☐ A. Show the finance team how to use the Opportunity Kanban List View.
- ☒ B. Set up collaborative forecasting to view quota against the open pipeline.
- ☐ C. Run a report at the end of each quarter to update the finance team on pipeline status.
- ☐ D. Create a custom Forecasting object to inform the finance team on the status of deals.

Question 22 of 65

Choose 1 option.

An administrator recently implemented multi-factor authentication (MFA) with a standard security level selected. They are receiving cases that users are unable to log in.

What should the administrator do to troubleshoot?

- ☐ A. Change MFA to High Assurance.
- ☐ B. Reset the user passwords and ask them to try again.
- ☐ C. Temporarily disable MFA.
- ☒ D. Check the session security level required at login on the user profile.

Question 23 of 65

Choose 1 option.

AW Computing wants to enable a backup resource to assign permissions while restricting the backup resource's ability to create or modify permission sets.

Which feature should be employed to accomplish this request?

- ☐ A. Assignment Rules
- ☐ B. View All Users Permission
- ☐ C. Customize Application Permission
- ☒ D. Delegated Administrator

Question 24 of 65

Choose 1 option.

What should an administrator do to keep secure fields protected in email templates?

- ☐ A. Remove the fields from the email.
- ☒ B. Use classic encrypted fields.
- ☐ C. Set up an approval process for email alerts.
- ☐ D. Implement GDPR.

Question 25 of 65

Choose 1 option.

Ursa Major Solar allows its scientists to log new stars as they find them, but on occasion, they log the same star by mistake. The administrator wants scientists to be notified when a record is deleted and by whom, and to maintain their own discovery information.

What automation solution should be used to send the notification?

- ☒ A. Flow Builder
- ☐ B. Process Builder
- ☐ C. Schema Builder
- ☐ D. Lightning App Builder

Question 26 of 65

Choose 1 option.

A sales user is assigned to a permission set group that gives them Modify All access to Accounts. An administrator assigns the same user to a muting permission set that mutes Delete access on Accounts.

What level of access will the sales user have on the Account object?

- ☐ A. No Access
- ☐ B. Modify All
- ☐ C. Read-Only
- ☒ D. Read, Create, and Edit

Question 27 of 65

Choose 1 option.

A sales rep at Ursa Major Solar realized that the wrong price book was selected for an opportunity.

How can the sales rep change the price book on the opportunity?

- ☐ A. Once selected, the price book is locked on the opportunity.
- ☒ B. The change can be made through the desktop site.
- ☐ C. The change can be made through the mobile app.
- ☐ D. Once selected, the price book can be updated via the forecasting tab.

Question 28 of 65

Choose 1 option.

AW Computers is looking to enhance Salesforce to track conference rooms and IT equipment. An administrator has created a custom object called Room. The administrator also created a custom object called Equipment. This object has two fields: a currency field Price, and a lookup relationship to Room. While performing user acceptance testing, management requested to roll up all the Price values and display them on the corresponding Room record.

How should an administrator accomplish this?

- ☐ A. Configure a roll-up summary field on Equipment.
- ☐ B. Create a roll-up summary field on Room.
- ☒ C. Make record-triggered flows whenever Equipment records are created, modified, or deleted.
- ☐ D. Write record-triggered flows whenever Room records are created, modified, or deleted.

Question 3 of 65

Choose 3 options.

An administrator has found a free app on the AppExchange and would like to install it.

Which three items should the administrator take into consideration before installing the managed package?

- ☐ A. Managed apps do not undergo a formal security review by Salesforce.
- ☐ B. Apps must be installed in production before the app can be installed in a sandbox.
- ☒ C. Custom objects and custom fields used by the app count against the org's limits.
- ☒ D. Apps may require certain Salesforce editions or features to be enabled.
- ☒ E. Apps may require external, third-party web services to function properly.

Question 29 of 65

Choose 2 options.

An administrator at AW Computing is trying to track the login history for a specific user. The AW Computing org has 150,000 users and multi-factor authentication (MFA) is enabled and enforced for all users. In reviewing the Identity Verification History data, the administrator is unable to find any information for the mentioned user. The user used to log in regularly but has been inactive this quarter.

Which two reasons explain why the user's data is missing from Identity Verification History?

- ☐ A. User belongs to a specific role for which identity verification data is not stored.
- ☒ B. Up to 20,000 records of users' identity verification attempts are stored.
- ☐ C. Identity Verification History stores the last year's worth of data.
- ☒ D. The last 6 months worth of data is stored in the Identity Verification History.

Question 30 of 65

Choose 1 option.

The administrator at Cloud Kicks has been asked to delete a large number of quote line items. They receive a .csv file with the record IDs to be deleted. The administrator uses Data Loader to delete them and selects Use Bulk API. When the job runs, every record shows an 'entity is deleted' error in the error file that is created.

What is the reason for the error?

- ☐ A. Deleting with Data Loader can only be done in Batch API mode.
- ☒ B. One of the IDs in the batch referenced a record that was in the recycle bin.
- ☐ C. This is the standard error message when records are deleted using Bulk API.
- ☐ D. The batch size selected was greater than the 200 record limit.

Question 31 of 65

Choose 1 option.

What would prevent a user from syncing a quote with an opportunity?

- ☐ A. The quote has a validation rule preventing it from being updated.
- ☒ B. Another quote is already synced with the opportunity and is awaiting approval.
- ☐ C. Another quote is already synced with the opportunity.
- ☐ D. The quote has already passed its expiration date.

Question 32 of 65

Choose 1 option.

Cloud Kicks is looking for a way to back up its data daily.

What should the administrator recommend?

- ☐ A. Set up Salesforce's Data Export Service and store the data in the target destination.
- ☐ B. Extract the data with the Import Wizard and push it to the target destination.
- ☐ C. Schedule a report and have the data emailed to the admin to put in the target destination.
- ☒ D. Use an ETL tool that can be scheduled to extract the data and push it to the target destination.

Question 33 of 65

Choose 1 option.

An administrator at Cloud Kicks has built a flow that delivers status update emails to customers. Recently, there's been an increase in support cases from customers reporting they had not received the email.

Where should the administrator look to investigate the issue?

- ☐ A. Paused Flow Interviews
- ☐ B. Setup Audit Trail
- ☐ C. Process Automation Settings
- ☒ D. Email Logs

Question 34 of 65

Choose 1 option.

The director of sales wants to make sure that every opportunity has either a sales engineer or an account executive assigned to the deal.

How should the administrator meet this requirement?

- ☐ A. Require the Sales Engineer and the Account Executive lookup fields on the opportunity page layout.
- ☒ B. Write a validation rule that checks if the fields are blank and requires that one of them be completed to save the opportunity.
- ☐ C. Create a different record type for opportunities with Sales Engineers and opportunities with Account Executives to capture one or the other.
- ☐ D. Add the Sales Engineer and Account Executive lookup fields to the Path settings for opportunities.

Question 35 of 65

Choose 1 option.

What should the administrator consider before enabling Person Accounts?

- ☐ A. Person Account can be included in the account hierarchy.
- ☐ B. Person Account can reference Contact formula fields.
- ☒ C. Person Account cannot be disabled after being activated.
- ☐ D. Person Account and Business Accounts cannot be in the same sharing model.

Question 36 of 65

Choose 1 option.

A request was made to import a spreadsheet of new Campaign Members. The system administrator started Data Import Wizard but the Campaign Members object was unavailable as a choice.

What is causing this to occur?

- ☐ A. The Campaign Member option is only available for Update.
- ☒ B. Import Wizard is only available for the standard objects Accounts, Contacts, and Leads.
- ☐ C. The Salesforce.Id field is required and was missing from the file.
- ☐ D. The Marketing User checkbox field on the admin's user record is unchecked.

Question 37 of 65

Choose 1 option.

The sales team at Universal Containers has asked the administrator to build functionality to automatically update the account checkbox field 'Opportunity Created' to checked when at least one related opportunity has been created.

What feature should the administrator recommend to build this functionality?

- ☐ A. Screen flow
- ☐ B. Workflow rule
- ☐ C. Assignment rule
- ☒ D. Record triggered flow

Question 38 of 65

Choose 1 option.

An administrator has been asked to enable permissions for users on the account services team to be able to edit and change ownership of Accounts owned by any of the team members.

What should the administrator configure?

- ☐ A. Enable Account Teams and grant Read record-level access to account team members for the Account object.
- ☒ B. Create a Sharing Rule on the Account object for all members of the account services role to have Read/Write access.
- ☐ C. Update the profile Account object to Modify All.
- ☐ D. Set organization-wide sharing for Account as Public Read Only.

Question 4 of 65

Choose 1 option.

A user is getting an error when attempting to merge two accounts. The administrator checks the profile to see the user has Read/Write permission on Accounts and is the owner of both records.

What is preventing the user from completing the merge?

- ☐ A. The Account matching rules are not set.
- ☒ B. The Delete permission is missing on the user for Accounts.
- ☐ C. Only administrators have permission to merge records.
- ☐ D. The user is assigned to the wrong territory.

Question 39 of 65

Choose 1 option.

As part of their yearly audit, the compliance team at Cloud Kicks would like to track when a user's profile has been changed and who changed the data.

What should the administrator review to meet this requirement?

- ☐ A. Analytic Snapshot
- ☒ B. Setup Audit Trail
- ☐ C. Field History Tracking
- ☐ D. Historical Trending

Question 40 of 65

Choose 1 option.

Sales reps at AW Computing have asked the administrator to help them close deals faster on the Salesforce mobile app when they're in the field. They want to be able to quickly close an opportunity and have key fields, like status, pre-populated to Closed Won.

What should an administrator create to achieve this?

- ☐ A. Global Quick Action
- ☒ B. Object specific Quick Action
- ☐ C. Enhanced Related Lists
- ☐ D. Lightning Component

Question 41 of 65

Choose 3 options.

An administrator is planning the release process for the year. The team will be using change sets to process deployments to production.

Which three best practices should be considered?

- ☒ A. Make sure to deploy all dependent components.
- ☐ B. Be sure to test only after business hours the day after deployment.
- ☒ C. Plan your deployments around the production and sandbox maintenance schedules.
- ☐ D. Use matching names for global publisher layouts and Outlook publisher layouts.
- ☒ E. Make sure change sets are limited to 10,000 files.

Question 42 of 65

Choose 1 option.

An administrator is receiving cases that users are getting logged out of Salesforce without notice.

What should the administrator do to address this issue?

- ☒ A. Deselect disable session timeout warning popup.
- ☐ B. Enable Remember me until logout.
- ☐ C. Remove the session timeout settings.
- ☐ D. Select force logout on session timeout.

Question 43 of 65

Choose 1 option.

The administrator at AW Computing implements multi-factor authentication using the Salesforce Authenticator app downloaded on company-provided iPhones. A sales rep breaks their phone and needs to update an opportunity record.

How should the administrator grant access for the sales rep?

- ☐ A. Add the sales rep's IP address to the trusted IP ranges.
- ☐ B. Delegate multi-factor identification to the sales rep.
- ☐ C. Instruct the sales rep to log in from the company's VPN.
- ☒ D. Generate a temporary identity verification code for the rep.

Question 44 of 65

Choose 1 option.

Sales reps at AW Computing have been reporting that contact phone numbers sometimes revert back to an old value after being updated.

What should the administrator do to resolve this issue?

- ☒ A. Consolidate automation tools.
- ☐ B. Add an invocable process.
- ☐ C. Schedule Apex jobs.
- ☐ D. Delete all workflow rules.

Question 45 of 65

Choose 1 option.

Northern Trail Outfitters (NTO) wants to change the current master-detail relationship between Shipments and Opportunities to a lookup relationship. The system administrator has made the necessary changes in a full sandbox and has successfully tested them against NTO's data.

Now that the changes are ready to implement in production, what action should the system administrator take next?

- ☒ A. Add the components to an outbound change set and deploy it to production.
- ☐ B. Make the custom field type changes directly in the production org.
- ☐ C. Create an Unmanaged Package to distribute to production.
- ☐ D. Use Data Loader to export the changes to the production org.

Question 46 of 65

Choose 2 options.

At Ursa Major Solar, several different planetary teams handle leads depending on which planet the lead is coming from. While most of the teams only need a few fields filled out to work the lead, the Jupiter team requires additional information to be filled out, such as which moon the lead is coming from. The administrator needs to automate which team is allocated the lead record based on the planet and ensure that every team has all of the information they need.

Which two features will satisfy these requirements?

- ☒ A. Validation Rules
- ☐ B. Workflow Rules
- ☐ C. Matching Rules
- ☒ D. Assignment Rules

Question 47 of 65

Choose 2 options.

Ursa Major Solar has a training sandbox with 160MB of test data that needs to be refreshed every other day.

Which two sandboxes should be used in this instance?

- ☐ A. Partial
- ☒ B. Developer Pro
- ☐ C. Full
- ☒ D. Developer

Question 48 of 65

Choose 2 options.

Cloud Kicks needs to automate several updates to lead records and update unrelated records. Select changes should happen every time a record is created or updated, but other changes should only happen when the record is updated.

Which two options should the administrator use to automate these updates?

- ☒ A. Use a Decision element with the "Only if the record that triggered the flow to run is updated to meet the condition requirements" option.
- ☐ B. Create a Process Builder that runs when a record is changed.
- ☒ C. Create a flow that runs when a record is created or updated.
- ☐ D. Use "formula evaluates to true" workflow rule with the ISCHANGED function to make changes when the record is updated.

Question 5 of 65

Choose 2 options.

Cloud Kicks has organization-wide sharing defaults on the opportunity set to private. However, members of the finance team need to see closed won opportunities. The finance team members all have roles under the finance director, while the sales team members have roles under the sales manager.

Which two options should the administrator use to meet these criteria?

- ☒ A. Share with roles and subordinates of the finance director role.
- ☒ B. Create an owner based sharing rule where the won field = true.
- ☐ C. Share with roles and subordinates of the sales manager role where the won field = true.
- ☐ D. Create a criteria-based sharing rule where the won field = true.

Question 49 of 65

Choose 1 option.

An administrator created and activated several record-triggered flows that are configured to run before the record is saved on the same object.

What should the administrator consider about the order of execution for flows?

- ☐ A. The flow type will determine the order of execution.
- ☐ B. The last created date of the flow will determine the order.
- ☐ C. The flows will execute in alphabetical order based on their names.
- ☒ D. The order of flow execution is unpredictable.

Question 50 of 65

Choose 1 option.

Cloud Kicks has received feedback that customers are frustrated with the amount of time it takes to reach a support agent by area of expertise according to product information after a new case has been submitted.

Which feature should the administrator configure in order to improve the case management process?

- ☐ A. Macros
- ☐ B. Escalation Rules
- ☐ C. Knowledge Component
- ☒ D. Omni Channel

Question 51 of 65

Choose 1 option.

Cloud Kicks has a custom object called Membership Details that records information about customers' preferences for their memberships. Depending on the membership level, different data needs to be displayed.

- When the running user has the Marketing profile, all data should be visible.
- When the running user has the Support profile, only the Support preference fields should be visible.
- Both Marketing and Support users should be able to report on all data.

How should the administrator deliver this solution?

- ☐ A. Create two record types and two page layouts.
- ☐ B. Make a permission set with a Muting permission.
- ☐ C. Use Field-Level Security to control data access.
- ☒ D. Set up Dynamic Forms to conditionally show data.

Question 52 of 65

Choose 2 options.

Cloud Kicks wants to force its users to set a value for a custom field called Tier by answering a series of questions.

What two functions should the administrator use to ensure that users cannot bypass answering these questions in order to determine their Tier value?

- ☒ A. Use a screen flow to ask the questions.
- ☐ B. Set up a restriction rule on the field.
- ☒ C. Make the field Read Only on the page layout.
- ☐ D. Set up a list view for the list of questions.

Question 53 of 65

Choose 1 option.

What should an administrator use as an alternative to a Process Builder to expedite the time required to update the records?

- ☒ A. Before Save Flow Trigger
- ☐ B. Batch Update
- ☐ C. Workflow Rule Field Change
- ☐ D. Screen Flow

Question 54 of 65

Choose 1 option.

AW Computing is running a special bundle deal on monitors and keyboards. Normally, discounts need VP approval, but this special bundle is pre-approved.

What should the administrator recommend for these requirements?

- ☒ A. Implement CPQ.
- ☐ B. Create a separate price book.
- ☐ C. Remove the approval process.
- ☐ D. Enable Subscriptions.

Question 55 of 65

Choose 1 option.

Northern Trail Outfitters (NTO) wants to start using Salesforce for its HR recruiting process. NTO needs to ensure that every application is linked to both a job posting and an applicant. Applicants can apply for more than one job posting, and each job posting can have more than one applicant.

How should an administrator configure the objects?

- ☐ A. Make Job Applications as a junction object with a master-detail relationship to Applicants and a lookup relationship to Job Postings.
- ☐ B. Create Applicants as a junction object with a master-detail relationship to Job Postings and a lookup relationship to Job Applications.
- ☒ C. Configure Job Applications as a junction object with master detail relationships to both Applicants and Job Postings.
- ☐ D. Add Applicants as a junction object with master-detail relationships to both Job Postings and Job Applications.

Question 56 of 65

Choose 2 options.

AW Computing uses a custom Invoice object to track invoices related to accounts. The administrator wants to use roll-up summary fields to view high-level information at a glance on the account record.

Which two considerations should an administrator remember about roll-up summary fields?

- ☐ A. Roll-up summary fields are created on the master side of a master-detail relationship.
- ☒ B. Roll-up types include COUNT, SUM, and AVG.
- ☒ C. Roll-up summary fields prevent the conversion of a master-detail relationship to a lookup.
- ☐ D. Rollup fields are calculated prior to save.

Question 57 of 65

Choose 1 option.

Cloud Kicks (CK) has a field called Shoe Type Preference. CK's product team wants to see a report that groups specific picklist values together into one of two lists.

What functionality should the administrator use to fulfill the team's request?

- ☐ A. Summary Formula
- ☐ B. PREVGROUPVALUE
- ☐ C. Matrix Report
- ☒ D. Bucket field

Question 58 of 65

Choose 1 option.

How should an administrator ensure the appropriate number of digits are entered into the custom encrypted field created to capture credit card numbers on the Opportunity object?

- ☐ A. Define the number of mask characters.
- ☐ B. Create a flow to update the masked characters.
- ☐ C. Use the credit card number mask type.
- ☒ D. Create a validation rule to ensure the length.

Question 5 of 65

Choose 2 options.

Cloud Kicks has organization-wide sharing defaults on the opportunity set to private. However, members of the finance team need to see closed won opportunities. The finance team members all have roles under the finance director, while the sales team members have roles under the sales manager.

Which two options should the administrator use to meet these criteria?

- ☒ A. Share with roles and subordinates of the finance director role.
- ☒ B. Create an owner based sharing rule where the won field = true.
- ☐ C. Share with roles and subordinates of the sales manager role where the won field = true.
- ☐ D. Create a criteria-based sharing rule where the won field = true.

Question 59 of 65

Choose 1 option.

Ursa Major Solar's administrator has configured multiple record-triggered flows to run before or after the record is saved on the Account object.

What should the administrator consider when a record triggered flow executes first?

- ☐ A. The flow with the longest execution time will execute first.
- ☐ B. The flow with the shortest execution time will execute first.
- ☐ C. The order in which those flows are executed is not guaranteed.
- ☒ D. Assign the highest priority to the record triggered flow which should execute first.

Question 60 of 65

Choose 1 option.

An administrator has created a flow that sends platform events whenever an opportunity is updated. An Apex developer has been tasked to write code that listens for these events. When reviewing the debug logs for a user, the developer can see that the flow ran, but the debug information is missing.

What should the administrator recommend to assist with debugging?

- ☒ A. Set a debug log on the Automated Process entity.
- ☐ B. Platform events are unavailable for debugging.
- ☐ C. Search the AppExchange to find a tool that assists with debugging.
- ☐ D. Select the Debug Enabled checkbox on platform events.

Question 61 of 65

Choose 1 option.

An administrator has a request to write a report listing accounts that have sales from this year and that have a completed activity in the last 30 days.

What reporting feature should the administrator employ to provide only the list of accounts, without listing the details of the opportunities?

- ☐ A. Joined Report
- ☐ B. Filter Logic
- ☒ C. Cross-Filter
- ☐ D. Summary Report

Question 62 of 65

Choose 1 option.

An administrator is creating a custom Opportunity record page for Sales users for new logo opportunities. They need to control what fields display on the record when a sales user is viewing the opportunity.

Where should the administrator edit what fields display in the details of the record page?

- ☐ A. Custom Lightning Component
- ☐ B. Record Types
- ☐ C. Schema Builder
- ☒ D. Page Layout

Question 63 of 65

Choose 2 options.

A sales rep needs to help cross-sell an opportunity but is unable to make updates on the record or update the opportunity team.

Which two options would be required for a sales rep to add a rep to the opportunity team?

- ☒ A. A role above the Opportunity owner in the role hierarchy
- ☐ B. A role above the Account owner in the role hierarchy
- ☒ C. Transferred ownership of the Account to the sales rep
- ☐ D. Transferred ownership of the Opportunity to the sales rep

Question 64 of 65

Choose 1 option.

Cloud Kicks has a very large Knowledge base in Salesforce. Service reps are having a hard time finding the most relevant articles because there are too many search results.

What should the administrator do to help service reps quickly narrow down the number of articles?

- ☐ A. Delete and remove old Knowledge articles.
- ☒ B. Implement and configure Data Categories.
- ☐ C. Activate and configure Einstein Search.
- ☐ D. Update Knowledge to auto search the case's subject.

Question 65 of 65

Choose 1 option.

An administrator created a new custom object. When trying to upload new records to the custom object using Data Loader, they are unable to see the new custom object in the list of available objects.

What should the administrator do to resolve the issue?

- ☐ A. Ensure Allow Sharing is checked on the custom object.
- ☐ B. Assign a permission set to give them access to the new object.
- ☐ C. Check the Field-Level Security of the new custom object's Name field.
- ☒ D. Confirm the object is marked as deployed and not in development.

GRADE: Pass

The report below shows the percentage of questions in each section that you answered correctly for the Salesforce Certified Platform Administrator II exam. You will receive this information in your exam results email and can also access it via My Dashboard in Trailhead Academy.
