

Salesforce Certified Platform Administrator II

Question 1

A sales user is assigned to a permission set group that gives them Modify All access to Accounts. An administrator assigns the same user to a muting permission set that mutes Delete access on Accounts. What level of access will the sales user have on the Account object?

- A. Read, Create, and Edit
- B. Modify All
- C. Read-Only
- D. No Access

Question 2

What would prevent a user from syncing a quote with an opportunity?

- A. The quote has already passed its expiration date.
- B. Another quote is already synced with the opportunity.
- C. The quote has a validation rule preventing it from being updated.
- D. Another quote is already synced with the opportunity and is awaiting approval.

Question 3

How should an administrator support a finance team that is trying to use Opportunity data to keep an eye on their pipeline rather than manually calculating anticipated income for the quarter?

- A. Run a report at the end of each quarter to update the finance team on pipeline status,
- B. Set up collaborative forecasting to view quota against the open pipeline.
- C. Show the finance team how to use the Opportunity Kanban List View.
- D. Create a custom Forecasting object to inform the finance team on the status of deals.

Question 4

Choose 2 answers

AW Computing has been advertising new keyboard that was released at the beginning of the month. The sales team has an additional incentive to add the keyboards to every sale. The administrator already added the product to Salesforce but the reps are unable to select the product on the opportunity. Which two options should an administrator check to ensure the product is available?

- A. Make sure the price book is in the company currency.
- B. Ensure the product is associated with the correct price book.
- C. verify the product has a start date entered.
- D. Confirm the correct price book is selected on the opportunity.

Question 5

Dream House Realty recently learned that the major listing service it utilizes can accept messages to a specific endpoint. The realtors want to utilize this to be able to quickly update the listing price on properties after it has been approved. What automation tool should the administrator configure?

- A. Flow
- B. Email Alert
- C. Process Builder
- D. Platform Event

Question 6

Choose 2 answers

When configuring a change set, which two practices, should an administrator adhere to In order to ensure a successful deployment to production?

- A. When deploying a new record type, ensure the new record type is the only component in the change set.
- B. Clone a change set to add forgotten dependent components to an uploaded change set.
- C. Run deployment validations on the change set in the sandbox prior to uploading to production.
- D. Add permissions and access settings to outbound change sets In addition to the dependent component list.

Question 7

Choose 2 answers

At Ursa Major Solar, several different planetary teams handle leads depending on which planet the lead is coming from. While most of the teams only need a few fields filled out to work the lead, the Jupiter

team requires additional information to be filled out, such as which team the lead is coming from. The administrator needs to automate which team is allocated the lead record based on the planet and ensure that every team has all of the information they need. Which two features will satisfy these requirements?

- A. Workflow Rules
- B. Matching Rules
- C. Assignment Rules
- D. Validation Rules

Question 8

Choose 2 answers

Ursa Major Solar has a training sandbox with 160MB of test data that needs to be refreshed every other day. Which two sandboxes should be used in this instance?

- A. Full
- B. Developer Pro
- C. Partial
- D. Developer

Question 9

Choose 2 answers

Cloud Kicks needs to automate several updates to lead records and update unrelated records. Select changes should happen every time a record is created or updated, but other changes should only happen when the record is updated. Which two options should the administrator use to automate these updates? Choose 2 answers

- A. Create a flow that runs when a record is created or updated.
- B. Create a Process Builder that runs when a record is changed.
- C. Use a Decision element with the "Only If the record that triggered the flow to run is updated to meet the condition requirements" option.
- D. Use "formula evaluates to true" workflow rule with the ISCHANGED function to make changes when the record is updated.

Question 10

Choose 2 answers

An administrator at AW Computing is trying to track the login history for a specific user. The AW Computing org has 150,000 users and multi-factor authentication (MFA) is enabled and enforced for all users. In reviewing the Identity Verification History data, the administrator is unable to find any information for the mentioned user. The user used to log in regularly but has been inactive this quarter. Which two reasons explain why the user's data is missing from Identity Verification History?

- A. User belongs to a specific role for which identity verification data is not stored.
- B. Identity Verification History stores the last year's worth of data.
- C. The last 6 months worth of data is stored in the Identity Verification History.
- D. Up to 20,000 records of users' identity verification attempts are stored.

Question 11

An administrator created and activated several record-triggered flows that are configured to run before the record is saved on the same object. What should the administrator consider about the order of execution for flows?

- A. The flow type will determine the order of execution.
- B. The order of flow execution is unpredictable.
- C. The last created date of the flow will determine the order.
- D. The flows will execute in alphabetical order based on their names.

Question 12

The Cloud Kicks administrator wants to open up opportunity sharing to directors who oversee regional managers so they can access records to assist regional managers. What sharing mechanism should be used?

- A. Sharing Settings
- B. Manual Sharing
- C. Organization-Wide Defaults
- D. Role Hierarchy

Question 13

The administrator at Cloud Kicks needs to import a batch of person accounts into Salesforce. What tool should the administrator use?

- A. Data Import Wizard
- B. Bulk API

- C. Quick Create
- D. Mass Update

Question 14

An administrator at Cloud Kicks has been asked to reduce the file size of full data exports in order to have quicker exports. Which three recommendations should the administrator make?

Choose 3 answers

- A. Deselect 'Include images, documents, and attachments' in the export.
- B. Request a backup file every 5 days.
- C. Unselect the recycle bin in the object export option.
- D. Keep deleted record counts to a minimum.
- E. Reduce the amount of objects per export.

Question 15

Northern Trail Outfitters requires the sales user to input a use case before moving the opportunity stage to qualified. A consultant has reviewed the business requirement and ran a report to check the state of data completion. When pulling a report for opportunities in the qualified stage or beyond, it appears that only 30% of records have a use case filled out with varying text strings. What should the administrator recommend?

- A. Make the Use Case field required on the master Opportunity layout.
- B. Write a record-triggered flow that populates the Use Case field when an opportunity is closed.
- C. Create a validation rule and add the Use Case field to the Stage Guidance in Path.
- D. Use a quick action with the Use Case field in the layout, and add it as a Lightning component.

Question 16

After setting up field history tracking on the Account object, the administrator for AW Computing wants to retrieve the field history data for analysis. How should the administrator acquire this data?

- A. Create a report of Accounts and export it to Excel.
- B. Use the Data Export Service in Setup.
- C. Create a list view of Account History and print using the Printable View action.
- D. Query and export the AccountHistory object using Data Loader.

Question 17

The administrator at Cloud Kicks recently replaced several case workflow rules with a single before save flow. Since this change, some cases are routing in unexpected ways. What could be the cause of the changes to routing?

- A. The flow precedes assignment rules; workflow rules are after assignment rules.
- B. Assignment rules no longer reference the correct fields.
- C. The old workflow rules are still active and impacting routing.
- D. Multiple automation tools have been used and the automation is executed in a different order,

Question 18

Northern Trail Outfitters has many users set up as system administrators to perform Salesforce Administration. Which two functions would a delegated administrator be able to perform in order to help the existing Salesforce Administrator?

Choose 2 answers

- A. Make updates to permission set configurations.
- B. Configure updates to sharing rules.
- C. Manage custom objects and customize nearly every aspect,
- D. Set up users and password management.

Question 19

Ursa Major Solar has a junction object that connects Bots with Solar Panels. The administrator needs users to be able to see all the solar panels that a bot is related to. Users already have access to the Bot and the junction, but not the Solar Panel object. What access does the user need to be able to see the solar panel records?

- A. Read permission is required on both master records.
- B. Read permission is required on at least one master record.
- C. Access permission is not required on either master record.
- D. Create permission is required on both master records.

Question 20

Cloud Kicks needs to track government-issued identification numbers for its customers. The security team requires that the identification number cannot be changed by users and must be masked when

displayed, except the last two digits. Which two recommended configurations should the administrator create?

Choose 2 answers

- A. **Enable Shield Platform Encryption.**
- B. Set Read-Only Field-Level Security in the user Profile.
- C. Use a field with Classic Encryption.
- D. **Configure a Field Encryption Policy.**

Question 21

Universal Containers' support team wants to use Salesforce Knowledge to allow customers and the support team to have access to the product documentation. There are many different types of documentation with usage across the globe. What feature should the administrator configure?

- A. Enable the Case Feed.
- B. **Define data categories and visibility.**
- C. Create article types.
- D. Setup record types and page layouts.

Question 22

Sales reps at Ursa Major Solar often give discounts depending on the configuration of the solar panel system. Customers want to know what the different configuration options are. Sales management wants to ensure the opportunity pipeline is as accurate as possible. What should sales reps do to ensure their quotes and opportunities reflect their sales?

- A. Create new opportunities for each quote request. Change the forecast category to omitted for all except the most likely to be purchased.
- B. Use the products related list to associate the different configurations with the opportunity. Update the Amount field with the most likely purchase price.
- C. Create a new quote record for each of the different product configurations. Sync the most likely to be purchased back to the opportunity.
- D. **Update the quote record each time the customer requests a different product configuration, and click the sync button to update the opportunity.**

Question 23

Cloud Kicks (CK) has an email parsing tool. CK wants to ensure that when certain fields are updated, the Case Owner is notified by email. What should the administrator use to email the Case Owner?

- A. Email-to-Case
- B. After Save Flow
- C. Before Save Flow
- D. Outbound Message

Question 24

Cloud Kicks needs to create 10 separate environments for various projects. A developer sandbox has been created with the necessary configuration and data. The administrator needs to create 10 new environments with the same metadata and data for each user. What should the administrator do to meet the requirements?

- A. Use clone a sandbox option from the existing sandbox.
- B. Use the existing sandbox as a sandbox template.
- C. Use a scratch org definition to copy the existing sandbox.
- D. Use refresh sandbox without Auto Activate.

Question 25

Ursa Major Solar customer records have a lot of fields and Lightning components to give users a variety of information and available functions. Recently, users have noted that their pages take a long time to load and it's starting to negatively impact their experience. What should the administrator do to help diagnose where improvements can be made?

- A. Click Analyze from the Lightning App Builder toolbar.
- B. Use the Apex debugger while loading a customer record.
- C. Review the debug logs from the Developer Console.
- D. Check the debug logs found in the Environment section of Setup.

Question 26

Which two ways can an administrator review the page performance for a Lightning record page?

Choose 2 answers

- A. Analyze Button
- B. Pages Menu
- C. Activation Button

- D. Lightning Usage App

Question 27

The sales team at Cloud Kicks is noticing that sales reps are misusing the new Screen Flow tool for data entry, since they are kicked back to the initial screen after clicking finish. What should the administrator do to fix this?

- A. Create a new flow to redirect the user when the other flow finishes.
- B. Update the flow with a local redirect action.
- C. Use a Lightning action to redirect the user,
- D. Add a trigger to redirect the user to a new page.

Question 28

The administrator at Cloud Kicks noticed that a before trigger, which handles saving the original version of a record to an external database, fails. However, a flow configured for fast field updates runs successfully. How should the administrator advise the developer?

- A. The code could be trying to create duplicates in the archive when it is unable to.
- B. validation rule could be preventing records from ever meeting the conditions in the trigger.
- C. The trigger is writing the data to the wrong place in the external data archive.
- D. Record-triggered flows that are configured to run before save execute prior to all before triggers.

Question 29

Ursa Major Solar allows accounts to apply for loans to purchase solar panels. Financial information will be stored in a custom object. Only finance team members should see the related financial information about the account. What kind of field should the administrator create in the custom object?

- A. Master-Detail Relationship
- B. Hierarchical Relationship
- C. External Relationship
- D. Lookup Relationship

Question 30

The administrator at Cloud Kicks (CK) is troubleshooting why users are missing expected email alerts from an automated process. The investigation shows that CK is hitting its daily limit. What should the administrator review to resolve the issue?

- A. Email Logs
- B. Notification Delivery Settings
- C. HTML Email Status Report
- D. Outbound Messages

Question 31

An administrator wants to determine if brute-force password attacks are being used against the org. A brute-force attack is when multiple password combinations are attempted in a short time period. Where should the administrator look for more information?

- A. Login Forensics
- B. Connected Apps OAuth Usage
- C. Event Manager
- D. User Field History Tracking

Question 32

Cloud Kicks (CK) has deployed several new custom apps that use Lightning web components. The administrator is now concerned that they may need to make some adjustments to CK's org to make it more secure. Which tool should the administrator use to expose possible security risks within a Lightning web component?

- A. Health Check
- B. Self-signed Certificates
- C. Master Encryption Keys
- D. Salesforce Optimizer

Question 33

Cloud Kicks wants its sales reps to always use the same full zip code format with a hyphen where applicable. What should the administrator implement to help ensure consistent formatting?

- A. Edit the standard field length to five characters.
- B. Create a REGEX formula to use in a validation rule on the field.
- C. Add a help text instructing the sales rep on how to enter this field.

- D. Add a quick create function for the sales reps to use.

Question 34

Cloud Kicks (CK) has introduced its new Alpha Shoe line. Customers create cases from CK's website. Managers receive a report of all cases created last week. Managers would like a way to easily see in the report if the customer refers to the new shoe line in the case subject. How should the system administrator modify the report to meet this request?

- A. Change the format to a joined report.
- B. Add a cross-filter and a 'with' sub-filter.
- C. Build a row-level formula
- D. Include a 'contains' filter on Subject.

Question 35

AW Computing wants to embed a report chart on the Account record page that shows the value of closed sales for that account. The chart should be limited to users in the Sales Manager role on the Account record pages. How should this be accomplished?

- A. Filter component visibility for the Account 1D,
- B. Create a new report and assign it to the component.
- C. Filter component visibility for the Sales Manager role.
- D. Create a new page layout for the Sales Manager role.

Question 36

At Ursa Major Solar, there is an account owned by a user with the role of Galaxy Manager. Two users with the same profile are both assigned to the sub-role, Galaxy Subordinate. However, only one can access the account. What is the reason only one user can see the account record?

- A. Workflow Rule
- B. Manual Sharing
- C. Role Hierarchy
- D. Queues

Question 37

Cloud Kicks (CK) has a backup team of employees that helps short-staffed departments. These users could be working with sales one day and service the next. CK is implementing new Lightning record pages for each department so that they view records in a way that makes sense for each department. How should the administrator ensure this is configured correctly?

- A. Create permission sets for each department and assign them to the backup team users.
- B. **Configure one app per department and activate record pages for each app.**
- C. Adjust the profile of the backup users each day to align with the proper access they require.
- D. Allow the backup team users to update their own profile with Delegated Administration.

Question 38

An administrator at Cloud Kicks recently built a screen flow in a sandbox that creates a case and follow-up task. When the flow runs in the sandbox, it works just as expected. When tested in production, the flow errors when creating the records. Which two ways should the administrator troubleshoot this issue?

- A. Change the Default Case Creator to the user's manager.
- B. Change the user experiencing the issue to the System Administrator profile.
- C. **Log in as another user and run the flow.**
- D. **Open the flow in Debug mode and Run the Flow as another user.**

Question 39

The security department at AW Computing wants to prevent users from exporting more data than they need. Included in this request is limiting records containing sensitive information, such as bank accounts and Personal Identifiable Information (PII). Which feature should an administrator recommend to help limit what data is exported?

- A. Export Data Settings
- B. Salesforce Platform Encryption
- C. Muted Permission Sets
- D. **Salesforce Shield**

Question 40

The distributors at Cloud Kicks are eligible for support based on a specific service contract. How should the administrator show this in Salesforce?

- A. **Use entitlement management.**

- B. Add a service contract to the record.
- C. Build a new custom object.
- D. Turn on Service Cloud.

Question 41

AW Computers has created a custom field called Government ID on a custom object. Most users with a custom Sales profile should be unable to access this field. A select group of Sales users called the Institutional Team should be able to access the Government ID field via reports. How should an administrator accommodate this request?

- A. Mark the field as Read Only on the sales profile. Create a permission set to re-enable reporting for the Institutional Team.
- B. **Configure a report type with the Government ID field. Assign this report type to the Institutional Team via a permission set.**
- C. Make a report with the Government ID field included. Share this report to the Institutional Team in a public reports folder.
- D. Create a permission set with Read access to the field. Assign the permission set to the Institutional Team.

Question 42

The administrator at Cloud Kicks needs to set up automation to update three fields on the Shipment custom object. Because of the effect these updates will have on some programmatic customizations, they need to happen in a very specific order. How should the administrator configure the field updates to ensure the proper order?

- A. Create a single flow and perform the updates in the correct order.
- B. Use Workflow for the first, process for the second, and flow for the final update.
- C. Create a workflow rule with three field updates entered in the correct order.
- D. **Create a process with three criteria nodes and stop after each action.**

Question 43

Sales reps and partner consultants at Cloud Kicks work on the same kinds of shoe deals. The administrator has been asked to ensure that the Profit field on the Opportunity object is available to sales reps and is hidden from partners using Field-Level Security. Which two features should the administrator use to fulfill this request?

Choose 2 answers

- A. Record Type
- B. Permission Set
- C. Organization-Wide Defaults
- D. profiles

Question 44

The operations team at Ursa Major Solar (UMS) currently tracks installations using a spreadsheet. The information captured includes customer name, address, purchase and installation dates, configuration specs, and additional installer instructions. UMS's CEO would like to utilize Salesforce to track this information instead. Which action should the administrator take to meet this requirement?

- A. Use Salesforce REST API to create the object and also import the data
- B. Use Lightning Object Creator to create the object and also import the data
- C. Use Schema Builder to create the object and also import the data
- D. Use Object Manager to create the object and also import the data.

Question 45

What should an administrator do to keep secure fields protected in email templates?

- A. Set up an approval process for email alerts.
- B. Remove the fields from the email.
- C. Use classic encrypted fields.
- D. Implement GDPR.

Question 46

The administrator at Cloud Kicks built a flow in a sandbox. After testing and validating the flow, the administrator plans to promote the flow to the production environment with a change set. Which three considerations should the administrator be aware of when moving flows with a change set?

Choose 3 answers

- A. Deploying or redeploying a flow with change sets creates a version of the flow in the destination org.
- B. Flows are automatically activated upon deployment.
- C. Flows deployed are inactive and need to be manually activated.
- D. All flow dependencies are automatically added to the change set.
- E. Flow allows only one version of the flow when deployed with a change set.

Question 47

When should an administrator apply a permission set to a user or group of users versus configuring the user's profile with the necessary access?

- A. When a user is part of a team with an assigned profile that covers the majority of their needs but requires more access than the rest of their team.
- B. When an organization's sharing model is too broad and they need to restrict access beyond what their sharing model and existing profiles provide.
- C. When a user is part of a team with an assigned profile that covers the majority of their needs but requires just a little less access than the rest of their team.
- D. When an organization has opted out of using the standard profiles and creates custom profiles.

Question 48

Northern Trail Outfitters (NTO) has a private sharing model for records containing a customer's credit information. These records should be visible to a sales rep's manager but hidden from their colleagues. How should an administrator adjust NTO's sharing model to ensure the correct amount of confidentiality?

- A. Add View All access for the object via the manager's profile.
- B. Create sharing rules for each manager based on the record owner.
- C. Use validation rules targeting the logged-in user.
- D. Grant access using hierarchies via the sharing settings.

Question 49

An administrator has been tasked with creating a new custom field on the Account object called Government Number. The compliance department has determined that this field contains sensitive information and needs to be encrypted using Classic Encryption. How will this impact users when reading, editing, or reporting on Accounts?

- A. Encrypted fields can be added to a list view and rule filters.
- B. Encrypted fields are unable to be used in report criteria or list views filters.
- C. Users will need the View Encrypted Data permission to edit the field.
- D. Users with the View Encrypted Data permission can see the field, regardless of Field-Level Security.

Question 50

AW Computing is conducting an audit and wants to understand how many objects have been shared as public externally. Which tool should the administrator use to quickly obtain this detail?

- A. Setup Audit Trail
- B. Object Manager
- C. Session Security Settings
- D. Security Health Check

Question 51

The sales manager at Cloud Kicks wants a way to report on information from a form their clients fill out during the sales cycle. Once a form has been submitted, the client is unable to access it. This form may need to be filled out more than once during the sales cycle. There are more than 30 fields on this form, and the sales team needs to be able to see what changed from one submission to the next. Which two options should an administrator use to solve this scenario?

- A. Make custom fields.
- B. Create a custom object.
- C. Add forms as attachments.
- D. Turn on Field Tracking.

Question 52

Cloud Kicks has Service and Sales Manager roles that need to be able to see all Accounts. Currently, they each have their own custom profile. The organization-wide defaults are set to Private and a sharing rule share access to Accounts to the sales and service teams based on criteria. What should the administrator do to allow the Service and Sales Manager to see all Accounts?

- A. Move the Service and Sales Managers higher in the role hierarchy.
- B. Configure a custom profile for each manager that gives them View All on Accounts.
- C. Set the organization-wide default for Accounts to Public Read Only.
- D. Create a permission set with View All to Accounts and assign it to the Service and Sales Managers.

Question 53

An administrator is using the Dev Console Log Inspector to troubleshoot a Process Builder. What event type should the administrator look for in the event column?

- A. Event types beginning with AUTOMATED_
- B. Event types beginning with WORKFLOW_
- C. Event types beginning with FLOW_
- D. Event types beginning with PROCESS_

Question 54

Choose 1 option.

An administrator has a request to create a Next Steps field for users to document what they need to do next on a lead. The field should allow users to format the text and be mapped to an opportunity when converted.

What type of field will satisfy these requirements?

- A. Text Area (Long)
- B. Text Area (Rich)
- C. Formula (Text)
- D. Text Area

Question 55

Choose 1 option.

On the Contact record, if a contact has the value of 'CEO' in the Title field, the administrator wants to require the users to also put a phone number in the Phone field.

What formula should the administrator put in the Error Condition Formula of a validation rule to enable this?

- A. Title <> 'CEO' && ISBLANK(Phone)
- B. Title = 'CEO' && ISBLANK(Phone)
- C. Title = 'CEO' && NOT(ISBLANK(Phone))
- D. Title <> 'CEO' && NOT(ISBLANK(Phone))

Question 56

Choose 3 options.

Cloud Kicks has just released a new Process Builder on the Account in production. The end users keep getting error messages that prevent them from completing their updates to the Account.

Which three things should the administrator do to resolve this issue?

- A. Manually make the updates to the Account as the logged-in user.
- B. Have the users refresh the Account page so they get the current Process Builder.
- C. Deactivate the Process Builder in production.
- D. Review the Error Email for the Process Builder and rectify the issues.
- E. Fix the Process Builder in a sandbox and migrate the change to production.

Question 57

Choose 1 option.

An administrator would like to know if any other administrators or delegated administrators are using the Log In As a User feature.

Where should the administrator look?

- A. Grant Account Login Access
- B. Connected App Usage
- C. Login History
- D. Setup Audit Trail

Question 58

Choose 1 option.

A sales manager at AW Computing has created a contact record but is missing some of the information to complete the record. The organization-wide default for Accounts is set to Public Read Only, and Contacts are controlled by parent.

Who will be able to edit this new contact record?

- A. Sales manager and system administrator
- B. All users in the organization
- C. Users above the sales manager in the role hierarchy
- D. The owner and users below the owner in the role hierarchy

Question 59

Choose 2 options.

Ursa Major Solar (UMS) wants to improve its customers' ability to search for knowledge articles. UMS has already created categories for articles.

Which two additional changes should be made to improve search capabilities?

- A. Configure Global Search for specific search terms.
- B. Configure Einstein Search for specific search terms.
- C. Create synonyms for specific search terms.
- D. Promote specific search terms for specific articles.

Question 60

Choose 1 option.

The sales agents at DreamHouse Realty have a profile that allows them to import records for a custom object called House. The agents only need to make imports occasionally and typically import around 100 new records at a time.

What tool should the sales agents use to upload records?

- A. Apex Code
- B. Bulk API
- C. Data Loader
- D. Data Import Wizard

Question 61

Choose 1 option.

DreamHouse Realty recently learned that the major listing service it utilizes can accept messages to a specific endpoint. The realtors want to utilize this to be able to quickly update the listing price on properties after it has been approved.

What automation tool should the administrator configure?

- A. Platform Event
- B. Process Builder
- C. Email Alert
- D. Flow

Question 62

Choose 2 options.

Northern Trail Outfitters has many users set up as system administrators to perform Salesforce Administration.

Which two functions would a delegated administrator be able to perform in order to help the existing Salesforce Administrator?

- A. Configure updates to sharing rules.
- B. Manage custom objects and customize nearly every aspect.
- C. Make updates to permission set configurations.
- D. Set up users and password management.

Question 63

Choose 1 option.

Cloud Kicks users report receiving an "Apex CPU time limit exceeded" error message when attempting to close certain opportunity records. This does not occur on every opportunity record change or for every user.

What is the recommended method for the administrator to identify the cause?

- A. Review the Setup Audit Trail.
- B. Enable Debug Logging for users.
- C. Monitor with Login Forensics.
- D. Set up Apex Exception Email alerts.

Question 64

Choose 2 options.

Cloud Kicks (CK) does business directly with individual consumers (B2C) and large businesses (B2B). Some of CK's B2C customers are employed at its larger customer accounts and should be tracked under both.

Which two options will CK need to use to manage its customers' accounts?

- A. Opportunity Contact Roles
- B. Leads
- C. Contacts to Multiple Accounts
- D. Person Accounts

Question 65

Choose 1 option.

A custom object called Item has a many-to-many relationship with the Account and Quota objects. At Cloud Kicks, account owners are changed frequently while ownership of Quota records remains unchanged. When an account owner is updated, the new account owner can only see Item records if they are also the owner of the Quota record.

What step should the administrator take to give access to all Item records?

- A. Create a Quota criteria-based sharing rule using ISCHANGED for the Account Owner field.
- B. Give the account owner Read access to both the Account and the Quota objects.
- C. Re-assign the Quota master-detail to the primary and the Account master-detail to secondary.
- D. Change the data format of the Quota relationship field from master-detail to lookup.

Question 66

Choose 1 option.

On the Planet custom object, Ursa Major Solar's sales director wants only certain action buttons to appear depending on if a given planet is defined as gaseous.

Which Lightning component should the administrator define dynamic action buttons?

- A. Related Lists
- B. Highlights Panel
- C. Activities
- D. Record Detail

Question 67

Choose 1 option.

AW Computing has a new requirement from its security team where audit information relating to an account must be recorded in a new custom object called Audit. Audit records need to be preserved for 10 years and only accessible by the audit team.

What relationship should be used to relate the Audit object to the Account object?

- A. Self
- B. Master-Detail

- C. Many-To-Many
- D. Lookup

Question 68

Choose 1 option.

Cloud Kicks (CK) completed a project in a sandbox environment and wants to migrate the changes to production. CK split the deployment into two distinct change sets. Change set 1 has new custom objects and fields. Change set 2 has updated profiles and automation.

What should the administrator consider before deploying the change sets?

- A. The Field-Level Security will not be deployed with the profiles in change set 2.
- B. Automations need to be deployed in the same change set in order to be activated.
- C. Both change sets must be deployed simultaneously.
- D. Change set 2 needs to be deployed first.

Question 69

Choose 1 option.

Cloud Kicks has a Process Builder which should trigger upon a status change from an approval process. The Process Builder triggers if the status is updated manually, but not as a result of the approval process update.

What could the administrator do to troubleshoot the issue?

- A. Check the Approval Process to make sure it is on the correct version.
- B. Change the value with a Specific New Field Value so the Process Builder knows what value to look for.
- C. Turn Recursion the Process Builder under the Advanced Settings so the Process Builder fires again.
- D. Check the Re-evaluate Workflow Rules After Field Change box on the Approval Process Field Update Action.

Question 70

Choose 2 options.

Cloud Kicks would like to reassign ownership of all leads that are open and more than 60 days old. The system administrator has written an assignment rule to distribute these leads to the correct owners or queues.

Which two tools should the administrator use to update the owner of these leads?

- A. **Dataloader.io**
- B. Mass Update
- C. Bulk API
- D. **Import Wizard**

Question 71

Choose 1 option.

Cloud Kicks uses a dashboard with multiple components based on Account, Case, and Opportunity reports. The system administrator adds a dashboard filter on Account Owner. When filtering the dashboard by Account Owner, records are now missing from several Opportunity components.

What is the recommended way for the system administrator to resolve this issue?

- A. Update the equivalent field to Parent Account on the Opportunity components.
- B. Use a custom report type for Accounts with or without Opportunities.
- C. Create a joined Accounts and Opportunities report for the components.
- D. **Add a cross-filter to the Opportunity source reports.**

Question 72

Choose 1 option.

The AW Computing administrator team does significant amounts of work around process automation and ensuring data integrity. When an administrator created a new validation rule in production, the development team complained that their deployment to production failed.

What should be implemented to prevent this conflict from happening?

- A. Refresh the full copy sandbox daily.
- B. Build automation and validation rules using screen flows.
- C. **Test changes in a shared sandbox.**
- D. Review the setup audit trail prior to changes.

Question 73

Choose 1 option.

The administrator at Universal Containers recently rolled out Email-to-Case functionality. Even though a new record type was created and specified in the Email-to-Case settings, all incoming cases are receiving a different record type.

What is likely causing the record type discrepancy?

- A. The Automated Case User needs permissions to the new record type.
- B. The new Case Owner needs permissions to the new record type.
- C. A Case assignment rule is preventing the record type from being updated.
- D. A validation rule is preventing the record type from being updated.

Question 74

Choose 1 option.

Users at AW Computing use a custom object to manage orders. All profiles share a single page layout. Customer Service and Sales users express frustration overseeing actions that do not always apply to their situation on the page layout.

What should an administrator recommend?

- A. Create separate record types for the Customer Service and Sales users' records.
- B. Use Dynamic Actions and conditional visibility to show the appropriate actions to the applicable users.
- C. Configure two separate permission sets and assign the appropriate permissions to each user.
- D. Make two separate Lightning record pages and assign them to the applicable profiles.

Question 75

Choose 2 options.

A user at Cloud Kicks has informed the administrator that they are unable to log in to Salesforce via multi-factor authentication.

Which two areas should the administrator review to understand potential root causes?

- A. Debug Logs
- B. Login History
- C. Setup Audit Trail

D. Identity Verification History

Question 76

Choose 1 option.

The support operations team has noticed some invalid data in the custom Primary Issue picklist field on case records. They are unsure of what the issue is since the field is being updated by an automated procedure and there is a validation rule to ensure clean data on case records.

Why are records being updated with data that violates the validation rule?

- A. The field is being updated by a workflow field update.
- B. The user has the Modify All Data permission on the object.
- C. The field is being updated by an Apex before trigger.
- D. The data change is triggered by an update record Flow element.

Question 77

Choose 3 options.

An administrator is planning the release process for the year. The team will be using change sets to process deployments to production.

Which three best practices should be considered?

- A. Make sure to deploy all dependent components.
- B. Make sure change sets are limited to 10,000 files.
- C. Be sure to test only after business hours the day after deployment.
- D. Use matching names for global publisher layouts and Outlook publisher layouts.
- E. Plan your deployments around the production and sandbox maintenance schedules.

Question 78

Choose 1 option.

At Cloud Kicks, the sales team uses a specific dashboard to see how they are doing daily. The team has asked the administrator for an easier way to see this dashboard.

- A. What should the administrator recommend?
- B. Email the dashboard to the sales team every morning.
- C. Ask the sales team to subscribe to the dashboard.

- D. Add the dashboard to the sales team's home page.
- E. Update the sales team's app with a new dashboard.

Question 79

Choose 2 options.

When an Account has more than five open opportunities over US\$10,000, the sales rep should have an option on the Account page to start the escalation process to allocate additional resources.

Which two configurations should the administrator create?

- A. Dynamic Forms
- B. Roll-Up Summary field
- C. Component Visibility filter
- D. Formula field

Question 80

Choose 2 options.

AW Computing wants to create a process to assign accounts to different salespeople based on the annual revenue of the company. The administrator has decided to create a flow.

Which two considerations should the administrator make sure to remember when creating the flow?

- A. Update Record elements should be placed inside the flow loop.
- B. Use a Get Records component instead of hard coding record IDs.
- C. The running user of a flow is the user that last saved the flow.
- D. Update Record elements should be placed outside the flow loop.

Question 81

Choose 1 option.

Users at Ursa Major Solar want to create complex dashboards with supporting charts based on data to come from a variety of sources, some of which live on the internal company shared drives.

Which product should the administrator recommend to meet the users' needs?

- A. Lightning Dashboard Builder
- B. Tableau CRM

- C. Report Builder
- D. OD. List Views

Question 82

Choose 1 option.

A user accidentally created a duplicate opportunity and is unable to delete the duplicate record.

What should an administrator do to troubleshoot this issue?

- A. Run a report of all opportunities to identify other possible duplicates.
- B. Change the user's profile to System Administrator, so they have full permission to delete object records.
- C. Create a permission set with edit access for the opportunity and assign it to the user.
- D. Check the user profile permissions on the Opportunity object to see if they have permission to delete.

Question 83

Choose 1 option.

The administrator at Cloud Kicks is evaluating the capabilities of Schema Builder to create custom objects and custom fields. The administrator likes the user interface of the Schema Builder, as opposed to the new object and field wizards, but also notices some limitations.

What needs to be configured from the object manager instead of Schema Builder?

- A. Enable field history tracking.
- B. Add custom fields to the page layout.
- C. Make available for Customer Portal.
- D. Allow Reports and Activities.

Question 85

Choose 1 option.

Ursa Major Solar has a global customer base. Recent issues with customs have greatly delayed shipping to Canadian customers. While the Country field is already on the page layout, the sales team wants Canadian customers highlighted as a potential challenge for fulfillment until the shipping issue is resolved.

How should the administrator solve this issue?

- A. Create an in-app guidance prompt for Canadian records.
- B. Create a new record type and page layout for Canadian customers, ensuring their pages look different.
- C. Add a rich text component to the Lightning page. Use conditional visibility to only show the component if the account is Canadian.
- D. Modify the page layouts to move the Country field into its own section.

Question 86

Choose 1 option.

A developer is getting errors for Production deployment. The test deployment in the Full sandbox, which included a local test run, was successful. The Full sandbox was last refreshed 2 weeks ago.

Where should the administrator check to see what was recently changed?

- A. Field Audit Trail
- B. Developer Console
- C. Setup Audit Trail
- D. Field History Tracking

Question 87

Choose 3 options.

Cloud Kicks (CK) wants the forecast numbers to be shown by territory regardless of who owns the record. CK also wants a way to forecast based on role hierarchy.

Which three options should an administrator recommend?

- A. Enable Territory Forecast.
- B. Modify the Territory Forecast to match the Hierarchy Forecast model.
- C. Make a custom field to track the amounts for Territory and Hierarchy Forecast.
- D. Enable Role Hierarchy Forecast.
- E. Have the user select the forecast type listed under the Forecast Type in the Display Settings.

Question 88

Choose 1 option.

The Cloud Kicks online Lead Intake form was recently updated to allow for new choices on some older picklist fields. The leads are all being created properly in Salesforce, but reps are getting errors as they try to work the leads.

What tool should the administrator use to evaluate what is causing the errors?

- A. **Debug Log**
- B. Record History
- C. Field History Tracking
- D. Setup Audit Trail

Question 89

Choose 1 option.

An administrator created a new custom object. When trying to upload new records to the custom object using Data Loader, they are unable to see the new custom object in the list of available objects.

What should the administrator do to resolve the issue?

- A. Ensure Allow Sharing is checked on the custom object.
- B. **Confirm the object is marked as deployed and not in development.**
- C. Assign a permission set to give them access to the new object.
- D. Check the Field-Level Security of the new custom object's Name field.

Question 90

Choose 1 option.

Support staff at Cloud Kicks work on multiple accounts and opportunities at the same time. Currently, they are switching between browser tabs, which is tedious and confusing. Support managers put in a request for a better agent experience.

What should an administrator recommend?

- A. Configure Split List Views.
- B. Enable Subtab Record Browsing in the Setup menu.
- C. **Implement Service Console.**
- D. Create a screen flow to pull all related opportunities onto one page.

Question 91

Choose 1 option.

DreamHouse Realty (DR) wants to ensure that its data is protected. There have been several recent attempts to phish employees.

What should DR do to help ensure that the user that is logged in is the right user when the running user is trying to view reports and dashboards?

- A. Set up an authentication provider for reports and dashboards.
- B. Require MFA when users need to view and export dashboards and reports.
- C. **Require a high assurance session when exporting or printing reports and dashboards.**
- D. Require a Username, Password, and Security Token when logging in.

Question 92

Choose 1 option.

An administrator at Cloud Kicks has been tasked by the compliance team to flag where sensitive information is stored in Salesforce.

What feature should the administrator use to fulfill this requirement?

- A. **Data Classification**
- B. Classic Encryption
- C. Field-Level Security
- D. Schema Builder

Question 93

Choose 1 option.

A user at Ursa Major Solar is experiencing a flow error while trying to process a record to the next status. The users with the same access can process records without any errors.

What should the administrator do to troubleshoot the issue?

- A. Use the flow debug option and set the selection to Run as another user.
- B. **Use the Setup Audit Trail to review the user's recent activity.**
- C. Grant the user more data access by moving them higher in the role hierarchy.
- D. Grant the user the Modify All permission to ensure they have full system access.

Question 94

Choose 2 options.

Which two tools should an administrator use to require data to be entered in a field and improve data quality on a record in Salesforce?

- A. Page Layouts
- B. Workflow Rules
- C. Validation Rules
- D. Dashboards

Question 95

Choose 1 option.

An administrator is asked to create a report to calculate the year-over-year change in the dollar amount of a company's opportunities.

What reporting tool should be used to complete this request?

- A. A custom summary formula with PARENTGROUPVAL function
- B. A row-level formula to compare amounts grouped by year
- C. A joined report with two report blocks for each year
- D. A custom summary formula with the PREVGROUPVAL function

Question 96

Choose 2 options.

Cloud Kicks wants to implement multi-factor authentication (MFA) to help better secure its Salesforce org.

Which two options should the administrator consider to use MFA?

- A. A Security Token
- B. An Encryption Key
- C. A Username and Password
- D. An Authentication App

Question 97

Choose 2 options.

AW Computing has been advertising a new keyboard that was released at the beginning of the month. The sales team has an additional incentive to add the keyboards to every sale. The administrator already added the product to Salesforce but the reps are unable to select the product on the opportunity.

Which two options should an administrator check to ensure the product is available?

- A. Make sure the price book is in the company currency.
- B. Verify the product has a start date entered.
- C. Ensure the product is associated with the correct price book.
- D. Confirm the correct price book is selected on the opportunity.

Question 98

Choose 1 option.

Cloud Kicks is a large company with many divisions. Some divisions have a higher turnover, so each division wants to be able to create and manage users only within their division.

What should the administrator do to set this up?

- A. Create a permission set group for the division leaders.
- B. Set up delegated administrators for the division leaders.
- C. Assign a flat territory role hierarchy for the divisions.
- D. Customize and assign profiles for the division teams.

Question 99

Choose 1 option.

An administrator at Universal Containers has been asked to configure product schedules.

What should the administrator consider before enabling this feature?

- A. Customizable product schedule page layouts cannot be modified.
- B. The Product Schedule is unavailable in Process Builder and Flow.
- C. To remove a product schedule completely, remove it from the standard price book.
- D. Line Item Schedule is unavailable in Process Builder and Workflow.

Question 100

Choose 1 option.

The finance director at Cloud Kicks asks the administrator for an exception report that shows all B2C accounts that are missing the credit card number. The credit card number is a classic encrypted field.

What action should the administrator take to meet this requirement?

- A. Create a summary report that includes a cross-filter to the Account object with a sub-filter for credit card number equal to null.
- B. Unmask the encrypted credit card number field to make it available and add a custom filter to a report where credit card number is blank.
- C. Build a custom checkbox called 'Has Credit Card' that Finance checks when a credit card is recorded and a tabular report filtered on the checkbox equal to false.
- D. Add 'View Encrypted Fields' to a permission set assigned to Finance and system administrators and a summary report filtered by credit card number.

Question 101

Choose 1 option.

Universal Containers has a Private sharing model for Accounts and Opportunities. A new team is being created from within the sales team that will be assigned all renewal opportunities. These users will need to see all closed won opportunities while keeping the account private.

How should the administrator meet this requirement?

- A. Create a new profile for the renewals team with View All permissions enabled on Accounts and Opportunities.
- B. Update the organization-wide defaults on Opportunities to Public Read Only and add them to the opportunities team.
- C. Create a public group for the renewals team and create a criteria-based sharing rule on Opportunities.
- D. Create a permission set with View All enabled on Accounts and assign it to the new users.

Question 102

Choose 1 option.

The administrator at Ursa Major Solar has set up IT policies for all user passwords to be a minimum length of 8 characters and have an expiration period of 90 days. The security team recently decided that administrators of any system should have a 15-character minimum password with a 30-day expiration period.

Where should the administrator make this change?

- A. Password complexity requirements on the permission set
- B. Password Policies on the System Administrator profile
- C. Session Settings on the User record
- D. Organization-wide password policies

Question 103

Choose 1 option.

When should an administrator consider using Person Accounts?

- A. In a complex business model and all Case records need to include a separate Contact and Account.
- B. In a B2C business model and the consumer is the intended recipient of sales and marketing attention.
- C. In a complex business model and the users need to record all Opportunity information on Contacts.
- D. In a B2B business model, and the primary contact is the intended recipient of sales and marketing attention.

Question 104

Choose 1 option.

The administrator at Cloud Kicks has been requested to provide access to the Leads object to a contractor. The contractor currently has a profile that has access to a project management app within Salesforce. The contractor should only have View access to all of the Lead records.

How should the administrator handle this request?

- A. Assign a permission set that has View All on Leads.
- B. Add an app with the Leads tab to the user's profile.
- C. Assign the contractor to a public group with Lead access.
- D. Create a profile with Read Only for all Leads.

Question 105

Choose 1 option.

An administrator is trying to deploy a change set from a newly upgraded sandbox source org with new features to a destination sandbox org on a previous release. Some metadata in the change set cannot be deployed because they've changed between releases.

What should the administrator do to deploy the changes to a sandbox?

- A. Submit a ticket to Salesforce to update the source org to the latest release.
- B. Make the changes manually through the user interface in the source org.
- C. Create a new sandbox on the new release version and deploy the change set to the new org.
- D. Refresh the sandbox destination org and then deploy the change set.

Question 106

Choose 1 option.

AW Computing has a private sharing model for its accounts, but a sales rep occasionally needs assistance from an engineer.

What feature should be used to grant the engineer access to the necessary account, while maintaining the company's data security?

- A. Permission Set
- B. Custom Profile
- C. Account Teams
- D. Permission Set Group

Question 107

Choose 1 option.

An administrator has a request to write a report listing accounts that have sales from this year and that have a completed activity in the last 30 days.

What reporting feature should the administrator employ to provide only the list of accounts, without listing the details of the opportunities?

- A. Filter Logic
- B. Summary Report
- C. Joined Report
- D. Cross-Filter

Question 108

Choose 1 option.

What should an administrator use as an alternative to a Process Builder to expedite the time required to update the records?

- A. Batch Update
- B. Workflow Rule Field Change
- C. Screen Flow
- D. Before Save Flow Trigger

Question 109

Choose 1 option.

At Ursa Major Solar, there is a custom object called Galaxy. The sales director wants users to only see certain fields when the Binary Cluster checkbox field is marked.

What Lightning component will satisfy this requirement?

- A. Highlights Panel Component
- B. Fields Component
- C. Path Component
- D. Record Detail Component

Question 110

Choose 1 option.

Cloud Kicks has been tracking how many participants wear the company's shoes in each marathon. The administrator creates two custom objects: Races and Runners. There is a master-detail relationship between them as well as a Roll-up Summary field on the Races object to show the count of runners in each race. Requirements have changed, and the administrator wants to delete the Master-detail Relationship field without deleting the Runners records.

What action should an administrator take before the Relationship field can be deleted?

- A. Select the 'Allow Reparenting' checkbox on the Master-detail field.
- B. Delete the Roll-up Summary field on the parent.
- C. Change the field type to a Lookup Relationship.
- D. Uncheck 'Delete this record also' to turn off cascading deletes.

Question 111

Choose 1 option.

Cloud Kicks maintains inventory in a legacy application. Management wants the information to also be available to view and report on directly in Salesforce.

Which action should the administrator take to achieve this goal?

- A. Import the data into a custom object when needed; delete after it is used.
- B. Create an external object that maps to the inventory application.
- C. Build a Lightning component and use SFDX to connect to the inventory app.
- D. Upload an Excel spreadsheet with the data into the Files tab.

Question 112

Choose 1 option.

AW Computing sells a variety of software programs for its customers to choose from. Management wants to ensure that the customer automatically receives phone support when they purchase photo editing software.

How should an administrator meet these requirements?

- A. Add an entitlement template to the product for phone support.
- B. Configure a flow to create a milestone to the asset upon purchase.
- C. Include a milestone to the product with a term of 365 days for phone support.
- D. Create a flow to attach an entitlement to the asset upon purchase.

Question 113

Choose 1 option.

AW Computing organizes its sales regions as East, Central, and West. Each region has sales reps, a sales director, and sales operations members. The organization-wide default for all objects is set to Private. Members of the operations team for the East region need access to all the accounts and opportunities in the region.

How should the administrator configure this requirement?

- A. Share an Opportunity sharing rule with a public group containing the East operations profile.
- B. Utilize territory management to add the operations team to the East territory.

- C. Instruct the operations team members to add themselves to the account teams.
- D. Assign to a role in the role hierarchy positioned above the East sales director.

Question 114

Choose 1 option.

An administrator needs a business process automated, but only for certain users and profiles. The administrator will need to frequently update which users and profiles will use the process. After evaluating the declarative options, it was determined that this functionality must be done via an Apex trigger.

What software requirement should the administrator request so that process execution can be declaratively controlled?

- A. Use Process Automation Settings in Setup to set the appropriate users or profiles.
- B. Use a System permission that is assigned to the user or profile.
- C. Use a custom permission set that is assigned to the user.
- D. Use Apex Class Access to assign the Apex code to the user or profile.

Question 115

Choose 1 option.

A new administrator at Cloud Kicks has reported that they are unable to use outbound change sets as requested.

What permission should be reviewed to determine if it is missing from the administrator user or profile?

- A. Create and Upload Change Sets
- B. Modify Metadata Through Metadata API Functions
- C. Deploy Change Sets
- D. API Enabled

Question 116

Choose 1 option.

Sales managers at Ursa Major Solar have asked for some additional automation around opportunity reminders. If the opportunity is in the Proposal stage a week before the close date, they want an email

sent to the opportunity owner and manager. If the Budget Approved custom field is checked, the managers want to be notified immediately.

How should these requirements be met without using code?

- A. Create a record-triggered flow with scheduled paths. Configure the flow to run before the record is saved.
- B. Create a record-triggered flow with scheduled paths. Configure the flow to run after the record is saved.
- C. Create a schedule-triggered flow. Specify the object and set the schedule frequency to run daily.
- D. Create a schedule-triggered flow. Specify the object and filter conditions that each record must meet.

Question 117

Choose 2 options.

An administrator needs to create a junction object called Account Region to link the standard Account object with a custom object called Region.

Once the junction object is created, what are the next two steps the administrator should take?

- A. Make a master-detail relationship field on the junction object to the Region object.
- B. Build a master-detail relationship field on the Region object to the junction object.
- C. Configure a master-detail relationship field on the junction object to the Account object.
- D. Create a master-detail relationship field on the Account object to the junction object.

Question 118

Choose 1 option.

Cloud Kicks has created a new flow that deletes records.

What should the administrator consider when testing the flow?

- A. Even if the flow is inactive, debugging the flow will delete the test record.
- B. Flows with delete elements need to be inactive to ensure that the test record is not actually deleted.
- C. Flows with delete elements cannot be debugged by the Flow debugging tool.
- D. Records deleted by Flow when debugging are hard deleted.

Question 119

Choose 1 option.

DreamHouse Realty currently deals only with single-family homes but is expanding its business to include condos in large cities. There are some features and amenities that only apply to condos, such as the amount of a deposit and concierge services.

How should an administrator configure the Opportunity object to ensure that only relevant fields are displayed on the record?

- A. Build a Lightning component to display fields that only apply to condos.
- B. Make a custom Lightning page to display specific fields based on the type of property.
- C. **Create a Record Type for the type of property and custom page layouts for each.**
- D. Configure a validation rule to display fields based on the type of property the user is viewing.

Question 120

Choose 1 option.

The Service team at Cloud Kicks needs a way to show the current status from the Account on the Case. This value should be on the page and is used in validation rules.

What should the administrator recommend to solve this?

- A. Make a Rollup Summary.
- B. **Create a cross-object formula.**
- C. Add a lookup field to Account.
- D. Use a picklist field.

Question 121

Choose 1 option.

DreamHouse Realty manages its accounts and contacts in Salesforce using a B2C account model. The business has requested that third-party loan advisors be tracked in Salesforce along with the customers they work with.

How should the administrator track third party financial advisors and the customers they work with?

- A. Use a Hierarchical lookup on Contact to track loan advisors' customers.
- A. Create a Hierarchical lookup on Account to track loan advisors' customers.
- B. Use a B2B Account Model to track loan advisors' customers.

- C. **Set up Contacts to Multiple Accounts for loan advisors.**

Question 122

Choose 1 option.

Cloud Kicks uses a Review junction object to track product reviews by account. The Review object has a Master-Detail relationship to Account and a Master-Detail relationship to a customer Product object. A user accidentally deleted the Account, Product, and related Review records.

How should the deleted Review records be restored?

- A. **Restore both the Account and Product master records from the Recycle Bin.**
- B. Restore the Review junction object record from the Recycle Bin.
- C. Restore either the Account or Product master records from the Recycle Bin.
- D. The Review object records are permanently deleted without the ability to restore.

Question 123

Choose 1 option.

DreamHouse Realty has created a custom object to track its Open Houses with a master-detail relationship up to a custom object for Properties. Agents need to quickly calculate the number of Open House records in a status of Pending so they can see the value from the Property record.

What feature should the administrator implement?

- A. Formula Fields
- B. **Roll Up Summary**
- C. Lightning Component
- D. Visualforce Page

Question 124

Choose 2 options.

Ursa Major Solar uses the custom object Product Development to track ideas R&D is working on. A former administrator added the custom object Potential Name with a lookup to Product Development to allow R&D to track names under consideration for those products. The R&D manager recently ran a report and noticed several potential names where the relationship to the Product Development record

was missing. The current administrator needs to change this relationship to master detail to ensure a potential name only exists when there is product development.

Which two options are available for altering the existing Potential Name records for the deployment of this change to be successful?

- A. Assign any Potential Name records with blank lookup fields to an existing record from Product Development.
- B. Move any Potential Name records with blank lookup fields to the recycle bin.
- C. Remove any existing data in the lookup field in Potential Name records.
- D. Remove the lookup field from the page layout so the data is maintained without changes.

Question 125

Choose 1 option.

Users at AW Computing are receiving a duplicate message when they enter contacts with common first and last names. Management wants to improve the user experience but also keep the data integrity of contacts.

What should an administrator implement for this issue?

- A. Create a custom validation to check for duplicates when creating new contact records.
- B. Include the customer Email field to the existing matching rule for a more exact match.
- A. Change the duplicate rule to report instead of alert to limit duplicate messaging.
- B. Create a secondary matching rule to the duplicate rule to match on the associated customer.

Question 126

Choose 1 option.

Cloud Kicks (CK) has a sneaker maintenance plan that it includes with all orders for its new line of Bluetooth-enabled custom sneakers. The sneaker maintenance plan gives each customer 6 months of phone support in case they have issues with their new sneakers. The administrator at CK is having a hard time keeping up with the work associated with managing the maintenance plan.

What should the administrator do to help manage the plan?

- A. Create a support process for the maintenance plan.
- B. Set up and configure entitlement templates.
- C. Use Flow to automatically create and assign entitlements.
- D. Ensure milestones are in place for the maintenance plan.

Question 127

Choose 1 option.

Cloud Kicks uses a Lightning web component to provide instructions to sales reps. An administrator needs to correct a spelling error in the displayed text in one of the Lightning web components.

What is the recommended tool to make the change?

- A. VisualStudio Code
- A. Developer Org
- B. Salesforce Lightning Inspector
- C. Developer Console

Question 128

Choose 2 options.

Universal Containers has found duplicate contacts in Salesforce. The sales team has requested that the administrator prevent duplicate records from being created.

Which two ways should the administrator customize duplicate management?

- A. Configure custom duplicate rules.
- B. Create custom matching rules.
- C. Create custom validation rules.
- D. Create custom sharing rules.

Question 129

Choose 1 option.

Users at AW Computing use a custom object to manage orders. All profiles share a single page layout. Customer Service and Sales users express frustration overseeing actions that do not always apply to their situation on the page layout.

What should an administrator recommend?

- A. Make two separate Lightning record pages and assign them to the applicable profiles.
- B. Use Dynamic Actions and conditional visibility to show the appropriate actions to the applicable users.
- C. Create separate record types for the Customer Service and Sales users' records.
- D. Configure two separate permission sets and assign the appropriate permissions to each user.

Question 130

Choose 1 option.

Select power users want the ability to make configuration changes to a specific custom object.

What tool should the administrator assign to the power users to enable this?

- A. Modify All Data
- A. Sharing Rule
- B. View Setup and Configuration
- C. Delegated Administration

Question 131

Choose 1 option.

Cloud Kicks has two record-triggered flows on the same object. One flow creates a child record when criteria are met. The second record-triggered flow is based on criteria to check if the child record exists and updates a field. The field on the child record that needs to be updated is still null after the second record trigger.

What should the administrator do to resolve this issue?

- A. Combine the two flows into one with checks to see which part of the flow needs to be run.
- B. Have the record triggered flows fire on create or edit to update the field.
- C. Make a new record-triggered flow on the child object to update the field on the parent record.
- D. Turn the flows into schedule flows and have them update the field.

Question 132

Choose 2 options.

When configuring a change set, which two practices should an administrator adhere to in order to ensure a successful deployment to production?

- A. Add permissions and access settings to outbound change sets in addition to the dependent component list.
- B. Clone a change set to add forgotten dependent components to an uploaded change set.
- C. When deploying a new record type, ensure the new record type is the only component in the change set.
- D. Run deployment validations on the change set in the sandbox prior to uploading to production.

Question 133

Choose 1 option.

A previous consultant helped Universal Containers automate many of its business processes. The administrator changed the email address on the consultant's user record and deactivated it. The consultant called to say they continue to get email messages from failed flows and processes.

What steps should the administrator perform to stop the fault messages from going to the consultant?

- A. Export Flow Interviews filtered by LastModifiedBy.email using Data Loader. In the .csv file, change LastModifiedBy to the System Admin and upload changes with Data Loader.
- B. Set 'Send Process or Flow Error Email' to 'Apex Exception Email Recipients' in Automation settings. Add the System Admin's email to the Apex Exception Email page in Setup.
- C. Create a custom metadata type and associate the LastModifiedBy field. Write a flow that updates the field in any flows or processes equal to the consultant's name.
- D. Request an Email Log from Email Log Files in Setup and filter the request by the consultant's email. Manually update any flows or processes listed on the log.

Question 134

Choose 1 option.

How should an administrator support a finance team that is trying to use Opportunity data to keep an eye on their pipeline rather than manually calculating anticipated income for the quarter?

- A. Show the finance team how to use the Opportunity Kanban List View.
- B. Set up collaborative forecasting to view quota against the open pipeline.
- C. Run a report at the end of each quarter to update the finance team on pipeline status.
- D. Create a custom Forecasting object to inform the finance team on the status of deals.

Question 135

Choose 1 option.

An administrator recently implemented multi-factor authentication (MFA) with a standard security level selected. They are receiving cases that users are unable to log in.

What should the administrator do to troubleshoot?

- A. Change MFA to High Assurance.
- B. Reset the user passwords and ask them to try again.
- C. Temporarily disable MFA.

- D. Check the session security level required at login on the user profile.

Question 136

Choose 1 option.

AW Computing wants to enable a backup resource to assign permissions while restricting the backup resource's ability to create or modify permission sets.

Which feature should be employed to accomplish this request?

- A. Assignment Rules
- B. View All Users Permission
- C. Customize Application Permission
- D. Delegated Administrator

Question 137

Choose 1 option.

What should an administrator do to keep secure fields protected in email templates?

- A. Remove the fields from the email.
- B. Use classic encrypted fields.
- C. Set up an approval process for email alerts.
- D. Implement GDPR.

Question 138

Choose 1 option.

Ursa Major Solar allows its scientists to log new stars as they find them, but on occasion, they log the same star by mistake. The administrator wants scientists to be notified when a record is deleted and by whom, and to maintain their own discovery information.

What automation solution should be used to send the notification?

- A. Flow Builder
- A. Process Builder
- B. Schema Builder
- C. Lightning App Builder

Question 139

Choose 1 option.

A sales user is assigned to a permission set group that gives them Modify All access to Accounts. An administrator assigns the same user to a muting permission set that mutes Delete access on Accounts.

What level of access will the sales user have on the Account object?

- A. No Access
- B. Modify All
- C. Read-Only
- D. Read, Create, and Edit

Question 140

Choose 1 option.

A sales rep at Ursa Major Solar realized that the wrong price book was selected for an opportunity.

How can the sales rep change the price book on the opportunity?

- A. Once selected, the price book is locked on the opportunity.
- B. The change can be made through the desktop site.
- C. The change can be made through the mobile app.
- D. Once selected, the price book can be updated via the forecasting tab.

Question 141

Choose 1 option.

AW Computers is looking to enhance Salesforce to track conference rooms and IT equipment. An administrator has created a custom object called Room. The administrator also created a custom object called Equipment. This object has two fields: a currency field Price, and a lookup relationship to Room. While performing user acceptance testing, management requested to roll up all the Price values and display them on the corresponding Room record.

How should an administrator accomplish this?

- A. Configure a roll-up summary field on Equipment.
- B. Create a roll-up summary field on Room.
- C. Make record triggered flows whenever Equipment records are created, modified, or deleted.
- D. O. D. Write record-triggered flows whenever Room records are created, modified, or deleted.

Question 142

Choose 3 options.

An administrator has found a free app on the AppExchange and would like to install it.

Which three items should the administrator take into consideration before installing the managed package?

- A. Managed apps do not undergo a formal security review by Salesforce.
- B. Apps must be installed in production before the app can be installed in a sandbox.
- C. Custom objects and custom fields used by the app count against the org's limits.
- D. Apps may require certain Salesforce editions or features to be enabled.
- E. Apps may require external, third-party web services to function properly.

Question 143

Choose 2 options.

An administrator at AW Computing is trying to track the login history for a specific user. The AW Computing org has 150,000 users and multi-factor authentication (MFA) is enabled and enforced for all users. In reviewing the Identity Verification History data, the administrator is unable to find any information for the mentioned user. The user used to log in regularly but has been inactive this quarter.

Which two reasons explain why the user's data is missing from Identity Verification History?

- A. User belongs to a specific role for which identity verification data is not stored.
- B. Up to 20,000 records of users' identity verification attempts are stored.
- C. Identity Verification History stores the last year's worth of data.
- D. The last 6 months worth of data is stored in the Identity Verification History.

Question 144

Choose 1 option.

The administrator at Cloud Kicks has been asked to delete a large number of quote line items. They receive a .csv file with the record IDs to be deleted. The administrator uses Data Loader to delete them and selects Use Bulk API. When the job runs, every record shows an 'entity is deleted' error in the error file that is created.

What is the reason for the error?

- A. Deleting with Data Loader can only be done in Batch API mode.

- A. One of the IDs in the batch referenced a record that was in the recycle bin.
- B. This is the standard error message when records are deleted using Bulk API.
- C. The batch size selected was greater than the 200 record limit.

Question 145

Choose 1 option.

What would prevent a user from syncing a quote with an opportunity?

- A. The quote has a validation rule preventing it from being updated.
- B. Another quote is already synced with the opportunity and is awaiting approval.
- C. Another quote is already synced with the opportunity.
- D. The quote has already passed its expiration date.

Question 146

Choose 1 option.

Cloud Kicks is looking for a way to back up its data daily.

What should the administrator recommend?

- A. Salesforce's Data Export Service and store the **data** in the target destination.
- B. Extract the data with the Import Wizard and push it to the target destination.
- C. Schedule a report and have the data emailed to the admin to put in the target destination.
- D. Use an ETL tool that can be scheduled to extract the data and push it to the target destination.

Question 147

Choose 1 option.

An administrator at Cloud Kicks has built a flow that delivers status update emails to customers. Recently, there's been an increase in support cases from customers reporting they had not received the email.

Where should the administrator look to investigate the issue?

- A. Paused Flow Interviews
- A. Setup Audit Trail
- B. Process Automation Settings
- C. Email Logs

Question 148

Choose 1 option.

The director of sales wants to make sure that every opportunity has either a sales engineer or an account executive assigned to the deal.

How should the administrator meet this requirement?

- A. Require the Sales Engineer and the Account Executive lookup fields on the opportunity page layout.
- B. Write a validation rule that checks if the fields are blank and requires that one of them be completed to save the opportunity.
- C. Create a different record type for opportunities with Sales Engineers and opportunities with Account Executives to capture one or the other.
- D. Add the Sales Engineer and Account Executive lookup fields to the Path settings for opportunities.

Question 149

Choose 1 option.

What should the administrator consider before enabling Person Accounts?

- A. Person Account can be included in the account hierarchy.
- B. Person Account can reference Contact formula fields.
- C. Person Account cannot be disabled after being activated.
- D. Person Account and Business Accounts cannot be in the same sharing model.

Question 150

Choose 1 option.

A request was made to import a spreadsheet of new Campaign Members. The system administrator started Data Import Wizard but the Campaign Members object was unavailable as a choice.

What is causing this to occur?

- A. The Campaign Member option is only available for Update.
- B. Import Wizard is only available for the standard objects Accounts, Contacts, and Leads.
- C. The Salesforce.Id field is required and was missing from the file.

D. The Marketing User checkbox field on the admin's user record is unchecked.

Question 151

Choose 1 option.

The sales team at Universal Containers has asked the administrator to build functionality to automatically update the account checkbox field 'Opportunity Created' to checked when at least one related opportunity has been created.

What feature should the administrator recommend to build this functionality?

- A. Screen flow
- B. Workflow rule
- C. Assignment rule
- D. Record triggered flow

Question 152

Choose 1 option.

An administrator has been asked to enable permissions for users on the account services team to be able to edit and change ownership of Accounts owned by any of the team members.

What should the administrator configure?

- A. Enable Account Teams and grant Read record-level access to account team members for the Account object.
- B. Create a Sharing Rule on the Account object for all members of the account services role to have Read/Write access.
- C. Update the profile Account object to Modify All.
- D. Set organization-wide sharing for Account as Public Read Only.

Question 153

Choose 1 option.

A user is getting an error when attempting to merge two accounts. The administrator checks the profile to see the user has Read/Write permission on Accounts and is the owner of both records.

What is preventing the user from completing the merge?

- A. The Account matching rules are not set.
- B. The Delete permission is missing on the user for Accounts.
- C. Only administrators have permission to merge records.
- D. The user is assigned to the wrong territory.

Question 154

Choose 1 option.

As part of their yearly audit, the compliance team at Cloud Kicks would like to track when a user's profile has been changed and who changed the data.

What should the administrator review to meet this requirement?

- A. Analytic Snapshot
- B. Setup Audit Trail
- C. Field History Tracking
- D. Historical Trending

Question 155

Choose 1 option.

Sales reps at AW Computing have asked the administrator to help them close deals faster on the Salesforce mobile app when they're in the field. They want to be able to quickly close an opportunity and have key fields, like status, pre-populated to Closed Won.

What should an administrator create to achieve this?

- A. Global Quick Action
- B. Object specific Quick Action
- C. Enhanced Related Lists
- D. Lightning Component

Question 156

Choose 3 options.

An administrator is planning the release process for the year. The team will be using change sets to process deployments to production.

Which three best practices should be considered?

- A. Make sure to deploy all dependent components.
- B. Be sure to test only after business hours the day after deployment.
- C. Plan your deployments around the production and sandbox maintenance schedules.
- D. Use matching names for global publisher layouts and Outlook publisher layouts.
- E. Make sure change sets are limited to 10,000 files.

Question 157

Choose 1 option.

An administrator is receiving cases that users are getting logged out of Salesforce without notice.

What should the administrator do to address this issue?

- A. Deselect disable session timeout warning popup.
- A. Enable Remember me until logout.
- B. Remove the session timeout settings.
- C. Select force logout on session timeout.

Question 158

Choose 1 option.

The administrator at AW Computing implements multi-factor authentication using the Salesforce Authenticator app downloaded on company-provided iPhones. A sales rep breaks their phone and needs to update an opportunity record.

How should the administrator grant access for the sales rep?

- A. Add the sales rep's IP address to the trusted IP ranges.
- B. Delegate multi-factor identification to the sales rep.
- C. Instruct the sales rep to log in from the company's VPN.
- D. Generate a temporary identity verification code for the rep.

Question 159

Choose 1 option.

Sales reps at AW Computing have been reporting that contact phone numbers sometimes revert back to an old value after being updated.

What should the administrator do to resolve this issue?

A. Consolidate automation tools.

- A. Add an invocable process.
- B. Schedule Apex jobs.
- C. Delete all workflow rules.

Question 160

Choose 1 option.

Northern Trail Outfitters (NTO) wants to change the current master-detail relationship between Shipments and Opportunities to a lookup relationship. The system administrator has made the necessary changes in a full sandbox and has successfully tested them against NTO's data.

Now that the changes are ready to implement in production, what action should the system administrator take next?

- A. **Add the components to an outbound change set and deploy it to production.**
- B. Make the custom field type changes directly in the production org.
- C. Create an Unmanaged Package to distribute to production.
- D. Use Data Loader to export the changes to the production org.

Question 161

Choose 2 options.

At Ursa Major Solar, several different planetary teams handle leads depending on which planet the lead is coming from. While most of the teams only need a few fields filled out to work the lead, the Jupiter team requires additional information to be filled out, such as which moon the lead is coming from. The administrator needs to automate which team is allocated the lead record based on the planet and ensure that every team has all of the information they need.

Which two features will satisfy these requirements?

- A. **Validation Rules**
- B. Workflow Rules
- A. Matching Rules
- C. **Assignment Rules**

Question 162

Choose 2 options.

Ursa Major Solar has a training sandbox with 160MB of test data that needs to be refreshed every other day.

Which two sandboxes should be used in this instance?

- A. Partial
- B. Developer Pro
- C. Full
- D. Developer

Question 163

Choose 2 options.

Cloud Kicks needs to automate several updates to lead records and update unrelated records. Select changes should happen every time a record is created or updated, but other changes should only happen when the record is updated.

Which two options should the administrator use to automate these updates?

- A. Use a Decision element with the "Only if the record that triggered the flow to run is updated to meet the condition requirements" option.
- B. Create a Process Builder that runs when a record is changed.
- C. Create a flow that runs when a record is created or updated.
- D. Use "formula evaluates to true" workflow rule with the ISCHANGED function to make changes when the record is updated.

Question 164

Choose 2 options.

Cloud Kicks has organization-wide sharing defaults on the opportunity set to private. However, members of the finance team need to see closed won opportunities. The finance team members all have roles under the finance director, while the sales team members have roles under the sales manager.

Which two options should the administrator use to meet these criteria?

- A. Share with roles and subordinates of the finance director role.
- B. Create an owner based sharing rule where the won field = true.
- C. Share with roles and subordinates of the sales manager role where the won field = true.
- A. Create a criteria-based sharing rule where the won field = true.

Question 165

Choose 1 option.

An administrator created and activated several record-triggered flows that are configured to run before the record is saved on the same object.

What should the administrator consider about the order of execution for flows?

- A. The flow type will determine the order of execution.
- B. The last created date of the flow will determine the order.
- C. The flows will execute in alphabetical order based on their names.
- D. The order of flow execution is unpredictable.

Question 166

Choose 1 option.

Cloud Kicks has received feedback that customers are frustrated with the amount of time it takes to reach a support agent by area of expertise according to product information after a new case has been submitted.

Which feature should the administrator configure in order to improve the case management process?

- A. Macros
- B. Escalation Rules
- C. Knowledge Component
- D. Omni Channel

Question 167

Choose 1 option.

Cloud Kicks has a custom object called Membership Details that records information about customers' preferences for their memberships. Depending on the membership level, different data needs to be displayed.

- When the running user has the Marketing profile, all data should be visible.
- When the running user has the Support profile, only the Support preference fields should be visible.
- Both Marketing and Support users should be able to report on all data.

How should the administrator deliver this solution?

- A. Create two record types and two page layouts.
- B. Make a permission set with a Muting permission.
- C. Use Field-Level Security to control data access.
- D. Set up Dynamic Forms to conditionally show data.

Question 168

Choose 2 options.

Cloud Kicks wants to force its users to set a value for a custom field called Tier by answering a series of questions.

What two functions should the administrator use to ensure that users cannot bypass answering these questions in order to determine their Tier value?

- A. Use a screen flow to ask the questions.
- B. Set up a restriction rule on the field.
- C. Make the field Read Only on the page layout.
- D. Set up a list view for the list of questions.

Question 169

Choose 1 option.

What should an administrator use as an alternative to a Process Builder to expedite the time required to update the records?

- A. Before Save Flow Trigger
- B. Batch Update
- C. Workflow Rule Field Change
- D. Screen Flow

Question 170

Choose 1 option.

AW Computing is running a special bundle deal on monitors and keyboards. Normally, discounts need VP approval, but this special bundle is pre-approved.

What should the administrator recommend for these requirements?

- A. Implement CPQ.

- B. Create a separate price book.
- C. Remove the approval process.
- D. Enable Subscriptions.

Question 171

Choose 1 option.

Northern Trail Outfitters (NTO) wants to start using Salesforce for its HR recruiting process. NTO needs to ensure that every application is linked to both a job posting and an applicant. Applicants can apply for more than one job posting, and each job posting can have more than one applicant.

How should an administrator configure the objects?

- A. Make Job Applications as a junction object with a master-detail relationship to Applicants and a lookup relationship to Job Postings.
- B. Create Applicants as a junction object with a master detail relationship to Job Postings and a lookup relationship to Job Applications.
- C. **Configure Job Applications as a junction object with master detail relationships to both Applicants and Job Postings.**
- D. Add Applicants as a junction object with master-detail relationships to both Job Postings and Job Applications.

Question 172

Choose 2 options.

AW Computing uses a custom Invoice object to track invoices related to accounts. The administrator wants to use roll-up summary fields to view high-level information at a glance on the account record.

Which two considerations should an administrator remember about roll-up summary fields?

- A. Roll-up summary fields are created on the master side of a master-detail relationship.
- B. **Roll-up types include COUNT, SUM, and AVG.**
- C. **Roll-up summary fields prevent the conversion of a master-detail relationship to a lookup.**
- D. Rollup fields are calculated prior to save.

Question 173

Choose 1 option.

Cloud Kicks (CK) has a field called Shoe Type Preference. CK's product team wants to see a report that groups specific picklist values together into one of two lists.

What functionality should the administrator use to fulfill the team's request?

- A. Summary Formula
- B. PREVGROUPVALUE
- C. Matrix Report
- D. **Bucket field**

Question 174

Choose 1 option.

How should an administrator ensure the appropriate number of digits are entered into the custom encrypted field created to capture credit card numbers on the Opportunity object?

- A. Define the number of mask characters.
- B. Create a flow to update the masked characters.
- C. Use the credit card number mask type.
- D. **Create a validation rule to ensure the length.**

Question 175

Choose 2 options.

Cloud Kicks has organization-wide sharing defaults on the opportunity set to private. However, members of the finance team need to see closed won opportunities. The finance team members all have roles under the finance director, while the sales team members have roles under the sales manager.

Which two options should the administrator use to meet these criteria?

- A. **Share with roles and subordinates of the finance director role.**
- B. **Create an owner based sharing rule where the won field = true.**
- C. Share with roles and subordinates of the sales manager role where the won field = true.
- D. Create a criteria-based sharing rule where the won field = true.

Question 176

Choose 1 option.

Ursa Major Solar's administrator has configured multiple record-triggered flows to run before or after the record is saved on the Account object.

What should the administrator consider when a record triggered flow executes first?

- A. The flow with the longest execution time will execute first.
- B. The flow with the shortest execution time will execute first.
- C. The order in which those flows are executed is not guaranteed.
- D. Assign the highest priority to the record triggered flow which should execute first.

Question 177

Choose 1 option.

An administrator has created a flow that sends platform events whenever an opportunity is updated. An Apex developer has been tasked to write code that listens for these events. When reviewing the debug logs for a user, the developer can see that the flow ran, but the debug information is missing.

What should the administrator recommend to assist with debugging?

- A. Set a debug log on the Automated Process entity.
- B. Platform events are unavailable for debugging.
- C. Search the AppExchange to find a tool that assists with debugging.
- D. Select the Debug Enabled checkbox on platform events.

Question 178

Choose 1 option.

An administrator has a request to write a report listing accounts that have sales from this year and that have a completed activity in the last 30 days.

What reporting feature should the administrator employ to provide only the list of accounts, without listing the details of the opportunities?

- A. Joined Report
- B. Filter Logic
- C. Cross-Filter
- D. Summary Report

Question 179

Choose 1 option.

An administrator is creating a custom Opportunity record page for Sales users for new logo opportunities. They need to control what fields display on the record when a sales user is viewing the opportunity.

Where should the administrator edit what fields display in the details of the record page?

- A. Custom Lightning Component
- B. Record Types
- C. Schema Builder
- D. Page Layout

Question 180

Choose 2 options.

A sales rep needs to help cross-sell an opportunity but is unable to make updates on the record or update the opportunity team.

Which two options would be required for a sales rep to add a rep to the opportunity team?

- A. A role above the Opportunity owner in the role hierarchy
- B. A role above the Account owner in the role hierarchy
- C. Transferred ownership of the Account to the sales rep
- D. Transferred ownership of the Opportunity to the sales rep

Question 181

Choose 1 option.

Cloud Kicks has a very large Knowledge base in Salesforce. Service reps are having a hard time finding the most relevant articles because there are too many search results.

What should the administrator do to help service reps quickly narrow down the number of articles?

- A. Delete and remove old Knowledge articles.
- B. Implement and configure Data Categories.
- C. Activate and configure Einstein Search.
- D. Update Knowledge to auto search the case's subject.

Question 182

Choose 1 option.

An administrator created a new custom object. When trying to upload new records to the custom object using Data Loader, they are unable to see the new custom object in the list of available objects.

What should the administrator do to resolve the issue?

- A. Ensure Allow Sharing is checked on the custom object.
- A. Assign a permission set to give them access to the new object.
- B. Check the Field-Level Security of the new custom object's Name field.
- C. Confirm the object is marked as deployed and not in development.

Question 183

Choose 2 options.

The administrator at AW Computing has received an email for a system error indicating that their organization has reached its hourly limit for processing workflow time triggers.

Which two processes should the administrator review?

- A. Apex Triggers
- B. Time-Based Workflows
- C. Paused Flow Interviews
- D. Debug Logs

Question 184

Choose 1 option.

The sales VP noticed several sales reps generating a contract too early in the sales stage. To help correct this behavior, the VP has requested the Create Contract button only be available when the opportunity reaches the negotiation stage.

How should the administrator meet this requirement?

- A. Create a validation rule.
- B. Modify page layout.
- C. Configure dynamic action.
- D. Create a custom permission.

Question 185

Choose 1 option.

The administrator at Cloud Kicks is troubleshooting an issue one user is having with a flow. They have decided to add a debug log

to that user.

What debug log category should be used?

- A. Callout
- B. Database
- C. Workflow
- D. System
