- C. Enable Duplicate Matching in the Data Management section in Setup and Activate the Lead-to-Lead scenario.
- D. Utilize a Lead Matching Rule and corresponding Duplicate Rule to block newly Created duplicate leads.

83 An app builder at DreamHouse Realty created a custom object which has Fields containing data from two different objects via related lookups. What is needed to create "with" or "without" reports on the new custom Object?

- A. Report Filters
- B. Row-Level Formula
- C. Report Bucket Field
- D. Custom Report Type

84 Universal Containers (UC) has a time-sensitive need for a custom Component to be built in 4 weeks. UC developers require additional Enablement to complete the work and are logged by several months. Which option should an app builder suggest to meet this requirement?

- A. Build a screen flow page.
- B. Use an AppExchange solution.
- C. Build a Lightning record page.
- D. Use a Bolt solution.

85 Universal Containers (UC) has a custom Invoice object and a custom Invoice Line Item Object. The Invoice Line Item object has a lookup relationship to the Invoice. UC would like to Convert the lookup relationship to a master-detail relationship but is unable to do so. Which two reasons could be preventing this relationship conversion?

Choose 2 answers

- A. There are already two master-detail relationships on the Invoice Line Item.
- B. Custom objects are unable to be on the detail side of a master-detail Relationship.
- C. Invoice Line Item records exist without having the Invoice lookup field Populate
- D. There is a roll-up summary field on the Invoice object.

86 Universal Containers generates leads from three different Sources: web, trade s, and partners. Some of the information Collected is applicable to all sources, there is also information that is unique To each type of lea What should an app builder configure to meet these requirements?

- A. Create three lead record types each with its own page layout containing the relevant Fields.
- B. Create three sections on the lead layout and instruct users to collapse the non- Relevant fields.
- C. Create a lead object on the partner community and a record type for web and trade leads.
- D. Create custom objects for each type of lead with each page layout only containing the Relevant fields.

87 Universal Containers has a Lightning record page that supportsBoth the mobile app and desktop. An app builder has downloaded a custom Lightning component from AppExchange, but users are unable to view the Component on mobile devices.

- A. The component needs to be activate
- B. The record page template is unable to support mobile devices.
- C. The component has been developed for Desktop Pages.
- D. The record page needs to be activate

88 Cloud Kicks wants to summarize the number of open Cases related to an Account, as well As the number of closed Cases to indicate whether customer support utilization is high, medium, or Low. Two number fields have been created: NUM_open_Cases_c and NUM_Closed Cases_ Which two solutions meet these business requirements?

Choose 2 answers

- A. Validation Rule
- B. Apex
- C. AppExchange
- D. Approval Process

89 Cloud Kicks (CK) wants to begin socializing and collaborating within Salesforce around Customer accounts to discuss various topics. CK would like all company employees to see these Conversations. Which two features of Chatter would meet CK's business needs?

Choose 2 answers

- A. Set up new public Chatter groups.
- B. Set up new private Chatter groups.
- C. Use Chatter actions to create tasks to complete.
- D. Use post action on the Account object.

90 Cloud Kicks wants to display the number of opportunities that Are Closed Won with a Close Date within the last year on the Account detail Page.

What should an app builder use to implement this?

- A. Activity timeline
- B. Formula field
- C. Validation rule
- D. Roll-up summary field

91 Universal Containers uses the Asset object to track products that Are installed at customer locations. A new object, Asset Inventory, has Been created to capture details about the asset. Which approach should the app builder take to Asset Inventory as a Related list on Asset?

- A. Create a lookup relationship on Asset Inventory to Asset. Add the Asset Inventory Related list to the Asset page layout.
- B. Create a roll-up on Asset. Add the Asset Inventory related list to the Asset page Layout.
- C. Create a master-detail relationship on Asset to Asset Inventory Add the Asset Inventory related list to the Asset page layout.
- D. Create a junction object to relate Asset Inventory and Asset. Add the Asset Inventory Related list to the Asset page layout.

92 DreamHouse Realty has a mentorship program that pairs Experienced Realtors with new Realtors. Each experienced Realtor can Mentor one or several new Realtors, and each new Realtor is required to Work with a single experienced Realtor they report to for a probationary Perio Which type of relationship would an app builder set up to meet this Specification?

- A. Indirect lookup
- B. Lookup
- C. Many-to-many
- D. Master-detail

93 An app builder wants to streamline the user experience by reflecting summarized calculations of Specific fields on various objects. Which three field types can be used in roll-up summary fields to accomplish this?

Choose 3 answers

- A. **Checkbox**
- B. Time
- C. **Currency**
- D. Date
- E. **Percent**

94 An app builder wants to update a field on the parent record When a child record connected via lookup is delete Which automation should the app builder use?

- A. **Record-triggered flow**
- B. Validation rule
- C. Autolaunched flow
- D. Quick action

95 At Ursa Solar Major, only users with the Outer Planets profile Need to see the Jupiter field on the Solar System object. How should the app builder satisfy this requirement?

- A. Classic encryption
- B. **Field-level security**
- C. Filtered view
- D. Sharing rules

96 The Universal Containers data manager has been complaining About the lack of data integrity on Contact records. Sales reps have not been filling out the Region fiel The data manager Wants the Region field filled out only for Contacts that are associated to Accounts that have been marked as 'High Priority' on the Customer Status Field

What can the app builder do to fulfil this requirement?

- A. Create a validation rule on Account.
- B. Make the Customer Status field required on Account.
- C. **Create a validation rule on Contact.**
- D. Make the Region field required on Contact.

97 An app builder wants to add the option to 'Send New Email' from Leads, Contacts, and Accounts for users on mobile. What is the benefit of using global actions to accomplish this?

- A. The global action's layout automatically clones the default page layout.
- B. Salesforce Lightning Component Library houses existing global actions prebuilt for use.
- C. Global actions are record-specific and are available when searching that particular Object.
- D. **Global actions can be accessed anywhere actions are available in mobile including Record detail pages, feed, and Chatter groups.**

98 Ursa Major Solar (UMS) uses Cases to track customer Complaints, an Issue _ c object to represent known problems with its solar Panels, and a Case_Issue _ c junction object to relate known problems to Customer complaints. Periodically, UMS conducts audits which require the Auditing users to view case_Issue _ c records. Which access levels must be configured to allow UMS users to access Case Issue _ c records?

- A. Read-Only access on Case and Issue _ c
- B. Read-Only access on Case and Case Issue _ e
- C. Read-Only access on Case Issue _ c
- D. Read-Only access on Issue _ c and Case Issue _ c

99 Where can an app builder edit an existing app to add Components to the utility bar?

- A. Lightning App Builder
- B. Lightning Record Page
- C. App Manager
- D. App Menu

100 Northern Trail Outfitters wants to change a master-detail Relationship on Account to a lookup relationship with a custom object Park. The app builder tries to reconfigure this but is unable to do so. What could be causing this?

- A. The Account is included in a flow process on the Park object.
- B. The park records have existing formulas on the Account.
- C. The Park object needs at least one Master-Detail field for reporting.
- D. The Account record includes Parks roll-up summary fields.

101 Universal Containers created a 'New Task' custom action on the Opportunity object. The action was added to all page layouts in the Mobile & Lightning Actions section. Which Lightning component should the app builder add to the layout to Display the action?

- A. Highlights panel
- B. Activities
- C. Related lists
- D. Related record

102 Properly installing managed packages helps prevent conflicts With customizations made by customers and partners. Which functionality should be used to set up packages?

- A. Namespace
- B. Help setting
- C. Description
- D. Allow sharing

103 After a deal is closed, Cloud Kicks (CK) wants to assign a user as A customer service manager (CSM) in addition to the account owner and Would like a new field to easily track and report which CSM is assigned to The Account. Which solution should an app builder use for this request?

- A. **Lookup field**
- B. Text field
- C. Picklist field
- D. Multi-select picklist field

104 The app builder at Northern Trail Outfitters created a report type For opportunities with or without shipments. The operations team wants to See the account rating information on the report. What should the app builder do to fulfill this request?

- A. **Use add fields related via lookup with the view set to opportunities.**
- B. Change the account/opportunity relationship to a master/detail relationship.
- C. Change the primary object of the custom report type to the Account object.
- D. Add the Account Rating field to the opportunity record page.

105 Universal Container wants customers to be able to open cases From a public-facing website. What should the app builder use to enable visitors to the website?

- A. **Web-to-case**
- B. Outbound message
- C. Screen flow
- D. Email-to-case

106 Ursa Major Solar (UMS) has a custom object where they track Galactic Vendors. The object has four custom fields for the Galactic Vendors's location:

Street

City

. Planet

. Galaxy

The UMS's leadership wants these fields to be combined into a single Formula field on two lines. Which formula fulfills this requirement?

- A. Street r (City & ",
- B. **Street & BR () & Planet Galaxy_) City_c & ", " & Planet_ca & Galaxy_0**
- C. Street & (City & ", " & Planet & "& Galaxy_0}
- D. Street r & BR () & City & ", " & Planet _ * && Galaxy_r

107 Universal Containers has Public Read/Write as the Account Organization-wide default (OWD) setting. Visitors to the customer Community site report that they can see all of the company's account Records. How should an app builder configure Account sharing so that community Users only see their own Account?

- A. Create an account record type for external accounts.
- B. Set the account external OWD to private.
- C. Define an owner-based sharing rule for external accounts.

108 Cloud Kicks (CK) increased its Salesforce development efforts so That it now has multiple custom development efforts happening in parallel. CK's developers and admins perform the customizations and have Complained that working in one sandbox has led to many problems. They Requested a solution in which they can work in at least 20 different Sandboxes at once, that all start with the same base configuration and Dat What should an app builder use to solve the problem?

- A. Sandbox cloning
- B. Partial copy sandboxes
- C. Full copy sandboxes
- D. Sandbox refreshes

109 An app builder wants to limit the amount of fields users see When creating a new Opportunity. Once they fill out the required fields and Save, the full record page with additional fields relevant to the Opportunity Type becomes available. How could this be accomplished?

- A. Make the Opportunity type a required field on the initial Opportunity page layout and Use automation to update the record type based on the Opportunity type.
- B. Use different page layouts for Opportunity types based on the user profile.
- C. Once the required fields are populated, use a sharing rule to share the new fields with The user.
- D. Hide additional sections on the page layout and the users how to manually Expand them when they want to fill in the fields in the hidden sections.

110 At Universal Containers, the VP of Service has requested a visual indicator flag on each case, based On the case priority. High-priority cases should be flagged red, medium-priority should be flagged Yellow, and low-priority cases should be flagged green. Which two formulas will accomplish this requirement?

Choose 2 answers

- A. `IMAGE( IF(ISPICKVAL(Priority, "Low"), "/img/samples/flag_green.gif", IF(ISPICKVAL(Priority, "Medium"), "/img/samples/flag_yellow.gif", IF(ISPICKVAL(Priority, "High"), "/img/samples/flag_re gif", "/s.gif"))), "Priority Flag")`
- B. `IMAGE( CASE( Priority, "Low", "/img/samples/flag_green.gif", "Medium", "/img/samples/flag_yellow.gif", "High", "/img/samples/flag_re gif", "/s.gif"), "Priority Flag")`

- C. IF(ISPICKVAL(Priority, "Low"), "/img/samples/flag_green.gif", IF(ISPICKVAL(Priority, "Medium"), "/img/samples/flag_yellow.gif", IF(ISPICKVAL(Priority, "High"), "/img/samples/flag_red.gif", "/s.gif")))
- D. CASE(Priority, "Low", "/img/samples/flag_green.gif", "Medium", "/img/samples/flag_yellow.gif", "High", "/img/samples/flag_red.gif", "/s.gif")

111 An app builder at Universal Containers has been asked to add The Chatter feed to a custom object record page. Which approach should the app builder use?

- A. Add a custom Chatter feed component.
- B. Add the standard related list component
- C. Add the standard Chatter feed component.
- D. Add the Chatter feed component from the AppExchange.

112 The brokers at DreamHouse Realty (DR) are having an issue When using the Salesforce mobile app on their iPhones. There are several Key fields on the contact record they need access to at a glance. Because Of the small screen, they currently have to scroll down the page to view the Information. What should the app builder at DR use to configure the Salesforce mobile App to these key fields at the top of the screen?

- A. Mobile navigation
- B. Record Detail component
- C. Compact layout
- D. Object specific action

113 A sales rep at AW Computing is unable to find what they are looking for While scrolling through their Chatter feed How can a filter be utilized to only posts from their key account and Opportunity records?

- A. Create Chatter Dookmarks.
- B. Create a Chatter stream.
- C. Create a Chatter notification.
- D. Create a Chatter group.

114 Which two features can be used to allow users to access Flows?

Choose 2 answers

- A. Flow Launcher
- B. Apex
- C. Approval Process
- D. Quick Action

115 Which two places can an app builder go to see a list of available Custom Lightning Components in their org?

Choose 2 answers

- A. Visualforce components in Setup
- B. Salesforce Optimizer App
- C. Lightning App Builder
- D. Lightning components in Setup

116 Nickname _c is a custom text field on a contact record that is Utilized to override the contact name appearing on an email template. This Field is not required and is not always filled in. Which formula should an app builder use to select the contact's preferred Name for email communications?

- A. IF (NOT (BLANKVALUE (Nickname _c)), Nickname _c, FirstName)
- B. IF(ISNULL(Nickname _c), Nickname _C, FirstName)
- C. IF (NOT (ISBLANK (Nickname _c)), Nickname _c, FirstName)
- D. IF (TEXT (Nickname _c), Nickname _c, FirstName)

117 An app builder at Cloud Kicks has been working on changes to a Custom Shoe Sales app in a sandbox and is ready to deploy their changes To production with a change set. Part of the work included updates to a Permission set. What should the app builder take into consideration when deploying the Change set to production?

- A. The existing permission set will be completely overwritten.
- B. The deployed permission set will only contain changes related to the change set.
- C. Changes to field-level security in the permission set will not be applie
- D. The deployed permission set will merge with the existing permission set.

118 A business user wants a quick way to edit a record's status and enter a Custom due date field from the record's feed in Salesforce Mobile App. What should be used to accomplish this?

- A. Custom quick access link
- B. Custom action
- C. Custom button

Choose 2 answers

- A. Select the correct record type.
- B. Use Import Wizard to update leads using the CSV file.

- C. Use Data Loader to update leads using the CSV file.
- D. Select Insert Null Values in Settings.

124 A recently refreshed partial sandbox at Cloud Kicks has no data in The custom object Shipping. Checking in production, there are two million Rows of data in the object. What could be the reason the data is missing?

- A. The sandbox was refreshed too early.
- B. The sandbox is still populating dat
- C. The selected objects in the sandbox template.
- D. The partial sandbox is at capacity.

7 of 65. Universal Container's sales reps can modify fields on an opportunity until it is close. The sales operations team has access to modify the Post-Close Follow-up Date and Post-Close Follow-up Comments fields after the Opportunity is close. After the opportunity is closed, the rest of the fields are read only. How should these requirements be met?

- A. Use field-level security on page layouts to restrict editing fields.
- B. Use field-level security on page layouts with record types to restrict editing fields.
- C. Use record types with field sets and restrict editing fields using field-level security.
- D. Use field-level security to mark fields as read-only on the Sales profile.

125 Cloud Kicks recently implemented the application lifecycle Management process to its release management strategy. Which category handles bug fixes and simple changes?

- A. Roll
- B. Major
- C. Minor
- D. Patch

126 Northern Trail Outfitters wants to initiate an automatic daily up of its Salesforce org. Which tool should an app builder recommend for this task?

- A. Refresh full copy sandbox
- B. Data Export Service
- C. AppExchange package
- D. Report export

127 Universal Containers deployed an app in a large change set from a Developer Sandbox to a Developer Pro Sandbox used for testing. After Testing, changes had to be made to several of the components in the Change set. How should an app builder move the new changes to the Developer Pro Sandbox?

- A. Rename the change set, add the changes and re-deploy.

- B. Clone the change set and re-deploy.
- C. Refresh the test sandbox and re-deploy the change set.
- D. Update the change set and re-deploy.

128 An app builder just added a lookup field to Account from the Existing custom object, Box. Which report type is automatically created?

- A. Boxes with Accounts
- B. Accounts with Boxes
- C. Boxes with or without Accounts
- D. Accounts with or without Boxes

129 The app builder at Cloud Kicks has created a custom object named Delivery_c to track the Details of products shipped to customers. Which two actions should the app builder take to prevent users in the shipping department from Deleting delivery records?

Choose 2 answers

- A. Remove the delete button from the Delivery page layout.
- B. Use a permission set to remove the Delete permission.
- C. Remove the Delete permission from the Shipper profile.
- D. Change the organization-wide default of deliveries to Private.

130 DreamHouse Realty wants to import its property records from an external system into Salesforce. The app builder will use an external ID field to house the property ID from the external System. Which two field types are allowed as an external ID?

Choose 2 answers

- A. Phone field
- B. URL field
- C. Text field
- D. Number field

131 DreamHouse Realty is building a custom Lightning app to track its expanding solar water collection business. The Lightning app currently contains a Custom Lightning record page with standard components. From which two resources should an app builder get custom components to bring into the new Lightning app?

Choose 2 answers

- A. Import Wizard
- B. AppExchange
- C. Apex Code
- D. Lightning Components

132 Northern Trail Outfitters (NTO) has created the custom objects Trail and Park in Salesforce to track trails and parks respectively. NTO wants to Track the total number of trails a park **has on the park record without writing any code**. Which two actions should an app builder take to accomplish this requirement?

Choose 2 answers

- A. Use a formula field on the Park record to the total number of trails.
- B. **Use a roll-up summary field on the Park record to the total number of Trails.**
- C. **Use a master-detail relationship between the Park and Trail objects.**
- D. Use a lookup relationship between the Park and Trail objects.

133 The VP of Sales at Universal Containers has asked the app builder to let sales reps create opportunity records directly from the account, with a Number of fields pre-populate Which feature should the app builder use to allow users to create the opportunity?

- A. Default action
- B. **Quick action**
- C. Custom button
- D. Custom link

134 Universal Containers wants to ensure that they are accepting clean data from their users and verify that important fields are entered. What should an app builder recommend to meet this requirement?

- A. Update the important fields to be required on the page layout.
- B. Create a Flow to clean any data that is formatted wrong.
- C. **Configure a validation to require a field for a specific record type.**
- D. Make a formula field to check the format of the important fields.

135 Universal Containers needs the 18-digit record ID from Opportunity records when exporting data to Excel in order to ensure each record is treated Uniquely. Which formula should an app builder use to create this new field?

- A. VALUE (14)
- B. **CASESAFEID (Id)**
- C. TEXT (Id)
- D. ISNUMBER (Id)

136 Universal Containers has the Account object's Organization-Wide Default set to Private. The marketing team owns Accounts; however, they also Need to be able to see the sales team's Accounts. Both the sales and marketing teams are in completely different branches of the role hierarchy. Which feature should be used to enable marketing to see sales-owned accounts?

- A. Sharing rules
- B. Public groups
- C. Aliases

- B. Use a private sharing model granting record access using hierarchy; manage field access with field-level security.
- C. Use a private sharing model granting record access using custom settings; manage field access with page layouts and field-level security.
- D. Use a private sharing model granting record access using hierarchy; manage field access with record types and field-level security.

143 AW Computing has a custom object for service plans. A service plan needs to be associated to one and only one contact. The support manager noticed if the wrong contact is associated, the reps are unable to Change the contact. The app builder already confirmed the user has correct access to the field and there are no validations associated with the service Plans. What could be causing the issue?

- A. The Read Only radio button, Allows users with at least Read access to the Master record to create, edit, or delete related Detail records, is selected
- B. The Allow reparenting checkbox, Child records can be reparented to other parent records after they are created, is unchecked
- C. The Read/Write radio button, Allows users with at least Read/Write access to the Master record to create, edit, or delete related Detail records, is selected

- D. The Allow reparenting checkbox, Child records can be reparented to other parent records after they are created, is checked

144 Cloud Kicks wants to set up a new opportunity approval process and execute various action items based on the initial submission. Which three action types should an app builder use in the approval process?

Choose 3 answers

- A. Realty wants to import its property records Task
- B. Email Alert
- C. Invocable Flow
- D. Outbound Message
- E. Decision Element

145 Due to the complexity of the Universal Containers sandbox release schedule and requirements, it is advised that change sets are used as often as possible to migrate from one environment to another. Which three common items can an app builder move when using a change set?

Choose 3 answers

- A. Web-to-lead
- B. Standard fields
- C. Custom object
- D. Apex class
- E. Custom field

146 An app builder installed a custom Lightning component from AppExchange. What should be done next in order to configure the component for use in a record page?

- A. Edit a record page using the Page Layout editor > Drag the Visualforce component onto the page.
- B. Edit a record page using Lightning App Builder > Drag the component onto the page.
- C. Edit a record page using App Manager > Drag the component onto the page.
- D. Edit a record page using the Page Layout editor > Drag the component onto the page.

147 An app builder has a custom component they want to make available on the utility bar, but the component is unavailable. How should the component be tagged?

- A. For use in App Manager.
- B. For use in Lightning App Builder.
- C. For use on record pages.
- D. For use on the utility bar.

148 The marketing director is concerned that too many car parts were given away for free last year. They want to track discounts, samples, and Giveaways by Sales Rep. The manager's sign-off on free parts also needs to be processed. Which functionality should an app builder use to meet these requirements?

- A. High Velocity Sales
- B. Quotes
- C. Approval process
- D. Check box

149. Universal Containers has deployed custom tabs to production via change sets, without including the profile settings or permission sets. What is the setting for the visibility of custom tabs?

- A. Custom tabs are hidden for all users.
- B. Custom tabs are default off for all users.
- C. Custom tabs are default on for all users.
- D. Custom tabs are NOT deployed

150 Universal Containers expects impacts to operations due to increased demand. The executive team will reach out to current customers and wants to see the number of open cases for the account and parent account. What should an app builder use to display the number of open cases on the account page?

- A. Approval Process
- B. Flow
- C. Custom object
- D. Roll-up summary

151 DreamHouse Realty (DR) is expanding into subsidized housing by partnering with local government entities. DR uses Sales Cloud and has enabled field history tracking on the Opportunity object. Due to increased information requirements, the App Dev team is changing Text Area (Long) fields to Rich Text fields to allow for up to 1,000 characters and better descriptions. Which two considerations should be made by the team?

Choose 2 answers

- A. Data loss may occur when changing custom field types.
- B. Audit Trail is available through REST API extracts.
- C. Rich text field values of all lengths are displayed fully in reports.
- D. Field History Tracking records value changes of 255 characters or less.

152 Service Agents are required to confirm a user's identity before providing support information over the phone. Which feature can an app builder use to help agents meet this requirement?

- A. Add Path to the top of the Case layout
- B. Case Validation Rules

- C. Include Surveys as a Case related list
- D. **Guided Action Flows on the record page**

153 Universal Containers wants users to have access to the pricing guidelines document when viewing a Contract related to an Account. Which feature should an app builder use to create easy access to the document?

- A. A custom detail page link on the Account object
- B. Quick Action on the Account object
- C. **A custom detail page link on the Contract object**
- D. Quick Action on the Contracts object

154 Universal Containers wants to collaborate with its customers within Salesforce and has decided to enable the Allow Customer Invitations in the Chatter Settings. Which permission is granted to customers when invited to a Chatter group?

- A. The ability to invite members to groups of which they are a member.
- B. **The ability to interact with members of their groups.**
- C. The ability to mention accounts of which they are a contact.
- D. The ability to request access to public groups.

155 Universal Containers created a custom object called Component to capture details about products sold. Which approach should an app builder take to show Component as a related list on Product?

- A. Create a junction object to relate Component and Product. Add the Component related list to the Product page layout.
- B. Create a roll-up on Product. Add the Component related list to the Product page layout.
- C. **Create a lookup relationship on Component to Product. Add the Component related list to the Product page layout.**
- D. Create a master-detail relationship on Product to Component. Add the Component related list to the Product page layout.

156 Managers at Universal Containers want a quick way to create additional accounts to form a hierarchy from a Parent Account record. They want to auto-populate five fields based on the parent to make it easier for users to create the child accounts quickly. What should the app builder recommend?

- A. Customize a Global Quick Action
- B. Add Path on Account hierarchy
- C. Add a custom link on Account
- D. **Create a custom action**

157 Universal Containers has a single Contact Lightning record page. A component takes up a lot of room on the page and is NOT needed by users With a Marketing profile. What should the app builder use to solve this issue?

- A. **Component visibility filter**
- B. AppExchange
- C. Detail page layouts
- D. Field-level security

158 Cloud Kicks (CK) wants to track orders against inventory, ensuring its ability to fulfill order requests. CK created a junction object called Request Inventory to enable many-to-many relationships with the Inventory and Order objects.

What does the app builder need to provide to ensure users can view Request Inventory records?

- A. Apex-based sharing on the first master object.
- B. **Read access to both master objects.**
- C. Sharing rules on Request Inventory object.
- D. Read access to the first master object.

159 Cloud Kicks is redefining its entire business process to convert the Manager Notes field from a long text area field. The goal is to encourage Managers to be more concise in their comments and stay at 255 characters or less. There is preexisting information in the Manager Notes field that often is well beyond the character limit. What would happen to any existing information if the app builder tries to convert a preexisting long text area field to text area?

- A. **Preexisting information will truncate to the first 255 characters.**
- B. Preexisting information will cause an error message to pop up.
- C. Preexisting information will remain even if it was over 255 characters.
- D. Preexisting information in the field will be completely lost.

160 A user is unable to use inline editing on a list view. A quick check verifies the user should be able to perform inline editing as they have been Assigned the appropriate permissions.

Which condition should the app builder review?

- A. If the list view selected is locked by another user
- B. **If the list view restricts sharing for the user**
- C. If the list view contains a chart created by the user
- D. If the list view contains more than one record type

161 An app builder needs a custom solution and is considering using either AppExchange or their local developer community. The app builder wants To minimize the need for manual maintenance. What should the app builder consider?

- A. An open-source unmanaged package

- B. An unmanaged package from AppExchange
- C. An open-source custom development
- D. A managed package from AppExchange

162 Cloud Kicks wants to display the number of Opportunity records associated with each Account. Which solution should be used?

- A. Formula field
- B. AppExchange offering
- C. Lookup field
- D. Roll-up summary field

163 Cloud Kicks wants to display 12 key fields at once in a separate section at the top of opportunity records on the desktop. Which component should an app builder add to the record page to enable this functionality?

- A. Custom Lightning Web Component
- B. Highlights Panel
- C. Path
- D. Accordion

164 Sales reps at Cloud Kicks (CK) forget to submit for approval when CK needs orders reviewed before close won. CK wants to automatically submit Opportunities into the Secure Commitment Stage to eliminate manual submission.

Which feature meets the business requirements?

- A. Record-Triggered flow optimized for Fast Field Updates
- B. Custom button and screen flow
- C. Platform Event-Triggered flow
- D. Record-Triggered flow optimized for Actions and Related Records

165 Cloud Kicks wants to make sure that users without the Marketing role are unable to update the Contact Retail Opt In picklist field to Yes. Which validation rule should an app builder use to prevent other users from making this update?

- A. AND #UserRole.Name Marketing, Retail Opt_In_e="Yes")
- B. AND UserRole.Name Marketing", Retail Opt_In_e="Yes")
- C. AND UserRole.Name = "Marketing', ISCHANGED (Retail Opt_In_c), ISPICKVAL (Retail Opt_In_c, "Yes"))
- D. AND UserRole.Name Marketing', ISPICKVAL (Retail Opt_In_e, "Yes"))

166 An app builder is creating a custom object called Testimonial_c and wants to connect Testimonial_c records with both the submitter's Contact record and Account record. If the Account is deleted, the Testimonial_c records should also be deleted. If the Contact is deleted, but the Account remains, the Testimonial_c records should remain.

How should this be accomplished?

- A. Create a lookup relationship from Testimonial_c to Account and a master-detail relationship from Testimonial_c to Contact.
- B. Make Testimonial_c a junction object between Account and Contact using master-detail relationships.
- C. Create a master-detail relationship from Testimonial_c to Account and a lookup relationship from Testimonial_c to Contact.
- D. Make both the Contact and Account fields required on the Testimonial object and create lookup relationships from Testimonial_c to Contact and to Account.

167 Universal Containers (UC) wants to test code against a subset of production data that is under 5 GB. Additionally, UC wants to refresh this sandbox every weekend. Which type of sandbox should be used to accomplish this?

- A. Developer Pro
- B. Partial Copy
- C. Full Copy
- D. Developer

168 Cloud Kicks (CK) wants to quickly insert a list of over 1 million new Accounts. The template based on CK's data model was used to populate the list. Which tool should be used?

- A. Data Loader
- B. Import Wizard
- C. Schema Builder
- D. Lightning Object Creator

169 DreamHouse Realty (DR) asks for some improvements in case management. They want to enforce process compliance so that cases are unable to be reverted to an earlier case status, and to ensure that certain fields are required when specific case criteria are met. Which solution should an app builder implement to meet these requirements?

- A. Configure validation rules with help text.
- B. Create dependent picklist fields and set them as required.
- C. Use an approval process to check if field criteria are met.
- D. Make the fields required on the page layout.

170 Sales Managers want to be automatically notified any time there is a change to an Opportunity Close Date and want these changes to be tracked on the Opportunity. Which two configurations should an app builder recommend?

Choose 2 answers

- A. Enable Feed Tracking on Opportunities.
- B. Create an Opportunity outbound message.
- C. Activate Historical Trending for Opportunities.
- D. Use a record-triggered flow on Opportunity and a Chatter post action.

171 A Cloud Kicks employee submitted an opportunity for approval by their manager. What will happen if the employee attempts to edit the description field after submission?

- A. User will be able to edit the description field only.
- B. User will be presented with a 'Record Lock' notification.
- C. User will be able to edit the name, but unable to edit the description.
- D. User will see the record is now owned by their manager.

172 Ursa Major Solar wants to automate a welcome email to new clients and include a customized survey about their buying experience. An app Builder is tasked with this project and has very little time to build the solution from scratch, but still needs to be able to fully customize the solution. What should the app builder do to meet the deadline and custom requirements?

- A. Work with a developer to create custom Apex code and a Lightning web component survey to meet the criteria
- B. Use Salesforce flow to build the survey declaratively to meet the criteria and send it to the customer as an email.
- C. Choose a managed package from AppExchange that closely meets the requirements of the project, restricts programmatic development, but allows declarative development.
- D. Choose an unmanaged package from AppExchange that closely meets the requirements of the project and allows programmatic development.

173 When an opportunity has a closed date that is pushed more than 30 days, manager approval is require An approval process is in place but Reps frequently forget to submit for approval to run the process. How can an app builder ensure that these opportunities are submitted into the approval process?

- A. Change the entry criteria on the approval process to criteria are met and lock the record on initial submission.
- B. Use a validation rule and an email alert to the manager requesting approval.
- C. Submit the record for approval from an automated process.
- D. Give the manager the "API Enabled" permission to permit approval responses by email.

174 What are the limitations of Schema Builder when creating a custom object?

- A. Fields and relationships can be created, but they will be unable to add the fields to the page layout from the canvas.
- B. Custom fields can be added to any custom objects, excluding formula field types.

- C. Relationships can be made to any custom objects, but any relationships to standard objects should be built in Lightning Object Manager.
- D. "Save" should be clicked each time a new object, field, or relationship is create

175 Universal Containers is setting up Salesforce for the first time. Management wants the sales and marketing teams to have different navigation menus in The Salesforce Mobile App. Which option is available to an app builder to satisfy this requirement?

- A. Create public groups for sales and marketing and create mobile navigation menus for each group.
- B. Create sales and marketing apps and assign the respective profiles to each app.
- C. Create roles for sales and marketing and assign a custom homepage layout for each role.
- D. Create mobile navigation menus for both the sales and marketing profiles.

176 Ursa Major Solar wants to provide sales console users with an incredible experience, with the most-used components easily accessible at all Times.

Which solution can enable reps to see and access these components from anywhere within the app without leaving the page where the team is working?

- A. Utility bar
- B. Home page
- C. Favorites
- D. Global actions

177 An app builder at Northern Trail Outfitters created a sandbox template for Accounts, Projects, and Project Milestones to reconfigure some flows for the project management app. Which type of testing environment should the app builder create?

- A. Partial Copy
- B. Scratch Org
- C. Developer
- D. Developer Pro

178 A new field has been added to the Applicant object that is part of an unmanaged package. A recruiter ran the Position with or without Applicants Report and noticed that the new field was missing as an option to add as a column. How should an app builder troubleshoot this issue?

- A. Add the field to the custom report type field layout.
- B. Adjust the field level security to include in the report type.
- C. Check Allow Reports for the position and applicant objects.
- D. Update the profile with the Manage Public Reports permission.

179 Universal Containers (UC) has large data volumes and is nearing data storage limits. The planned solution is to archive historical data to reduce Data storage in Salesforce; however, UC would still like to use reports, queries, and lookups on the archived information. Which two options could meet this requirement?

Choose 2 answers

- A. Related objects
- B. Custom objects
- C. External objects
- D. Big objects

180 DreamHouse Realty (DR) employees started using company-owned airplanes for work travel after Ursa Major Solar was acquire DR executives Want to automate the submission travel request forms to enforce the internal policy. How should an app builder automate travel requests based on these criteria?

- A. Assignment rule
- B. Validation rule
- C. Apex
- D. Approval process

181 The Director of Customer Service wants to receive a notification when a case stays in the new status for more than four business hours. Which two automation processes should be used to accomplish this?

Choose 2 answers

- A. Validation Rule
- B. Flow Builder
- C. Scheduled Apex
- D. Escalation rules

182 The app builder at Ursa Major Solar created a master-detail relationship between a parent object Galaxy_c and child object star_ What is the effect of creating this type of relationship if users want to report on Galaxy_c with star_c?

- A. A Star_c report type with Galaxy_c as a field will be automatically create
- B. A new custom report type will need to be created for Galaxy_c with Star_
- C. A Galaxy_c with Star_c report type will be automatically create
- D. A new custom report type will need to be created for Staz_c with lookup fields from Galaxy__

183 After utilizing the Lightning Object Creator to create a new object, its fields, and to insert all of the data, an app builder now needs to set up the Lightning Record Page. Which component should the app builder have on their Lightning Record Page to see all of the fields from the page layout?

- A. Highlights Panel
- B. Recommendations
- C. Record Detail
- D. Path

184 Cloud Kicks (CK) switched to Lightning Experience and started using Chatter across its global workforce to support its fast-paced sales cycle. CK Loves Chatter but struggle with gathering feed from core team members, including understanding who is available to respond. Which two ways could CK use Chatter to solve this problem?

Choose 2 answers

- A. Streams
- B. Topics
- C. Polls
- D. Out of Office

185 A new field is being created on a custom object. However, the app builder does not want the field to appear on pre-existing custom report Types. What should the app builder do on the custom field setup to fulfill this requirement?

- A. Remove the new field from all page layouts.
- B. Remove visibility to all report profiles.
- C. Grant read-only access to all report profiles.
- D. Deselect auto add to custom report type.

186 Cloud Kicks has a sales rep who is stating that their Contact is unavailable for other users to see within Salesforce. In which three ways can an app builder troubleshoot this issue?

Choose 3 answers

- A. Review the Contact record and ensure it is linked to an Account.
- B. Create a new Contact and have the users try again.
- C. Verify the users with the issue have access to the Contact object.
- D. Create an Account Sharing Rule to give the users access to all records.
- E. Confirm whether Default Organization-Wide Sharing Settings provide access to the Account.

187 Ursa Major Solar's service department gets requests for several types of services, such as installation, repair, and maintenance. Service Managers need to be able to tell when maintenance was last done on an asset to help determine if they are meeting contract agreements, but the last Maintenance date can be difficult to determine when there are many work orders related to the asset. They think it would be helpful to have a field auto-populated on the Asset record when a maintenance work order gets close. Which tool should an app builder recommend to help meet this requirement?

- A. Flow

- B. Einstein Next Best Action
- C. Roll-up Summary
- D. Apex Trigger

188 At Ursa Major Solar, there is a single Lightning record page for the Celestial Bodies custom object; however, there is a Lightning component the

App builder wants to restrict to mobile app users.

Which feature in the Lightning app builder should be utilized?

- A. Form factor checkboxes
- B. Highlights panel
- C. Related list quick links
- D. Component visibility filter

189 Cloud Kicks wants to know the total value of all won Opportunities for Accounts and display it on the record.

Which type of summary should the app builder use in the roll-up summary field?

- A. Count
- B. Total
- C. Aggregate
- D. Sum

190. An app builder installs an unmanaged package in a full copy sandbox that is an exact match for production, and now they are ready to install it in production. The app builder attempts to install the package in production, and it fails.

Why did the package fail to install?

- A. Internet license types
- B. Apex unit test failures
- C. Package features set compatible
- D. Object items exceeded

191. DreamHouse Realty wants to make sure an Opportunity has a field, `Expected\_Close\_Data\_c`, populated before it is allowed to enter the qualified stage.

How should an app builder solution this request?

- A. Record Type
- B. Active History

- C. Open Layout
- D. Validation Rule

192. An app builder wants to create a formula field on an Account to include data from related Contacts but is unable to find the relationship in the formula editor.

What is a limitation of formulas that could be causing the issue?

- A. Control and Account objects: 0.00 or 1 have a Master-Detail Relationship.
- B. Store Data: 3000 characters in the formula.
- C. Formula field that reached on the Account object.
- D. unable to reference the child records.

193. An app builder is loading data into Salesforce. To link the new records back to the legacy system, a field will be used to track the legacy ID on the Account object. For future data loads this ID will be used when upsetting records.

Which two field attributes should be selected?

Choose 2 answers

- A. Text (encrypted)
- B. External ID
- C. Unique
- D. Request

194. An app builder at Universal Containers has been asked to add the Chatter feed to a custom object record page.

Which approach should the app builder use?

- A. Add a custom Chatter feed component.
- B. Add the standard Chatter feed component.
- C. Add the Chatter feed component from the App College.
- D. Add the standard related list component.

195. Ursa Major Solar has a lookup relationship between a custom `delay\_` object and a custom `Size\_` object. An app builder wants to create a roll-up summary field that counts the total number of `Size\_` records related to each `delay\_` record.

How would the current configuration impact the ability to achieve the desired result?

- A. The roll-up summary can be achieved by creating a formula field on the `delay\_` object.
- B. This lookup relationship will need to be converted to a master-detail relationship before a roll-up summary field can be created.
- C. A roll-up summary field will need to be created on the `delay\_` object with a field filter that selects all related `Size\_` records.
- D. The roll-up summary can be achieved by creating a formula field on the `Size\_` object.

196. Universal Containers wants to understand return on investment for the latest advertising buy. They currently use a private security model for all objects.

What should an app builder recommend?

- A. On an opportunities pipeline report
- B. Online Account Hierarchies and Raft Up Summary fields
- C. Configure Campaign Hierarchies and Campaign stasmics
- D. Change to a public security model

197. Cloud Kicks has a custom object with a private sharing setting. The business wants to share individual records with specific people or departments on a case-by-case basis.

Which three options does the business user have to manually share individual records?

Choose 3 answers

- A. Permission Set Groups
- B. Roles and Subscriptions
- C. Public Groups
- D. ID Users
- E. Private Groups

198. Universal Containers (UC) has several large customers that sell their products through dealers. UC identifies and works with a single individual at each customer and at each dealer.

Separate bills are sent to each customer and each dealer. These details need to be stored in a format that clearly displays the business entities and their appropriate representatives.

How should an app builder implement these requirements?

- A. Create a single parent record, add each rep as a contact to the parent account and add each dealer as a child/group.
- B. Create both customer and dealer as accounts, add each rep as a contact to the corresponding account and create an account hierarchy.
- C. Create a single account record, add each rep as a contact and create a custom dealer object.
- D. Create both customer and dealer as accounts, create account teams on each account and associate the dealer records with the parent account.

199. Ursa Major Solar wants to create a relationship between the standard Contact object and a custom Solar Project object. Contacts can potentially be related to multiple Solar Project objects, and a Solar Project can have multiple Contracts associated with it.

How should an app builder configure the data model?

- A. One Lookup relationship on Contact and our Lookup relationship on Solar Project
- B. The Lookup relationship on a new custom object
- C. Two master-detail relationship on a new custom object
- D. Our Master-About relationship on Contact and our Master-About relationship on Solar Project

200. Ursa Major Solar (UNS) uses a public sharing model for accounts. UNS would like to move to a more restrictive sharing model but wants the Sales team to continue to have access to all account records with the sales record type.

Which two actions should an app builder complete to implement this change?

Choose 2 answers

- A. Create a custom-based sharing rule.
- B. Update the organization-wide defaults.
- C. Update the Sales profile.
- D. Create an owner-based sharing rule.

201. Universal Containers wants users to have access to the pricing guidelines document when viewing a Contract related to an Account.

Which feature should an app builder use to create easy access to the document?

- A. A custom detail page link on the Contract object
- B. Quick Action on the Account object
- C. A custom detail page link on the Account object
- D. Quick Action on the Contracts object

202. Cloud Kicks has a custom object with a private sharing setting. The business wants to share individual records with specific people or departments on a case-by-case basis.

Which three options does the business user have to manually share individual records?

Choose 3 answers

- A. Public Groups
- B. Private Groups
- C. Permission Set Groups
- D. Roles and Subordinates
- E. Users

203. Ursa Major Solar wants to create a relationship between the standard Contact object and a custom Solar Project object. Contacts can potentially be related to multiple Solar Project objects, and a Solar Project can have multiple Contacts associated with it.

How should an app builder configure the data model?

- A. Two Master-detail relationships on a new custom object
- B. One Master-detail relationship on Contact and one Master-detail relationship on Solar Project
- C. Two Lookup relationships on a new custom object
- D. One Lookup relationship on Contact and one Lookup relationship on Solar Project

204. An app builder wants to create a new field using Schema Builder.

Who will get access to the new field by default?

- A. No profiles

- B. All profiles
- C. Internal profiles
- D. Standard profiles

205. An app builder installs an unmanaged package in a full copy sandbox that is an exact match for production, and now they are ready to install it in production. The app builder attempts to install the package in production, and it fails.

Why did the package fail to install?

- A. Incorrect license types
- B. Object limits successful
- C. Apex unit test failures
- D. Package features not compatible

206. An app builder at Universal Containers has been asked to add the Chatter feed to a custom object record page.

Which approach should the app builder use?

- A. Add the standard related list component.
- B. Add the standard Chatter feed component.
- C. Add a custom Chatter feed component.
- D. Add the Chatter feed component from the AppExchange.

207. Universal Containers has created two custom objects called Seminars and Attendees. Organization-wide defaults for these objects have been set to Private. Universal Containers wants to set up a new junction object between these custom objects. A select group of users should be able to edit records in the junction object.

Which two steps should an app builder take to configure the proper security?

Choose 2 answers

- A. Create owner-based sharing rules that give Read access to the master objects.
- B. Set lookup filters on both junction object relationship fields.
- C. Set Sharing Settings to Read Only on both Master-Detail relationship fields.
- D. Create an owner-based sharing rule that gives Read access to the junction object.

208. An app builder is loading data into Salesforce. To link the new records back to the legacy system, a field will be used to track the legacy ID on the Account object. For future data loads this ID will be used when upsetting records.

Which two field attributes should be selected?

Choose 2 answers

- A. Unique
- B. Text (encrypted)
- C. Required
- D. External ID

209. An app builder wants to create a formula field on an Account to include data from related Contacts but is unable to find the relationship in the formula editor.

What is a limitation of formulas that could be causing the issue?

- A. Formula field limit reached on the Account object.
- B. Unable to reference the child records.
- C. Contact and Account objects DO NOT have a Master-Detail Relationship.
- D. More than 5,000 characters in the formulae.

210. Universal Containers (UC) has several large customers that sell their products through dealers. UC identifies and works with a single individual at each customer and at each dealer. Separate bills are sent to each customer and each dealer. These details need to be stored in a format that clearly displays the business entities and their appropriate representatives.

How should an app builder implement these requirements?

- A. Create both customer and dealer as accounts, create account teams on each account and associate the dealer records with the parent account.
- B. Create a single account record, add each rep as a contact and create a custom dealer object.
- C. Create a single parent record, add each rep as a contact to the parent account and add each dealer as a child record.
- D. Create both customer and dealer as accounts, add each rep as a contact on the corresponding account and create an account hierarchy.

211. DreamHouse Realty wants to make sure an Opportunity has a field, Expected_Close_Date__c, populated before it is allowed to enter the qualified stage.

How should an app builder solution this request?

- A. Page Layout
- B. Validation Rule
- C. Activity History
- D. Record Type

212. Sales managers at Cloud Kicks would like to standardize what information sales reps are gathering.

Sales reps want recommendations, sales strategies and to know what key fields need to be completed at each step of the sales process on the opportunity record.

Which feature should an app builder use to provide this functionality?

- A. Path
- B. Other Red
- C. Approval Process
- D. Global Action

213. The Service Manager provided the app builder with color code requirements for case age on open cases.

- New cases populate a green circle.
- Day-old cases populate a yellow circle.
- Three day-old cases populate a red circle.

How should an app builder implement this requirement?

- A. Custom Button
- B. Quick Action
- C. Formula Field
- D. Lightning Web Component

214. Ursa Major Solar wants to see the Type field from the parent object Galaxy listed on the child record Star. The app builder is receiving an error stating "Picklist values are only supported in certain functions".

Which formula should an app builder use to achieve the desired result?

- A. TEXT(BRIs (Bilding)_=Type_0)
- B. WATER(Bilding)_=Type_0
- C. TEXT(Bilding)_=Type_0
- D. FEED(Bilding)_=Type_0

215. Universal Containers require different fields to be filled out at each stage of the Opportunity sales process.

Which configuration steps can an app builder use to meet this requirement?

- A. Create a validation rule to prevent the user for field information.
- B. Set asset format required inside based on the current stages.
- C. Define record types and agree formats for each stage.
- D. Add the Path component to the Lightning record page.

216. An app builder has created a custom Lightning App and wants to make it available to the internal users at Universal Containers.

Which two steps are necessary to accomplish this task?

Choose 2 answers:

- A. Asking new options.
- B. Build a Custom Tab for the app.
- C. Add the app to a Vendor or page.
- D. Make it the app to Static Position.

217. Universal Containers uses a custom picklist called 'Account_Region__' or the Account object. The vice president of sales has asked that the value of this field is visible on Opportunities.

How should an app builder create this solution?

- A. Field History tacking

- B. Cross-object formula
- c. Linking field
- D. Field-level security

218. Cloud Kicks (CK) has a formula field `specialty\_\_` on Opportunity that gets its value from the `specialty\_\_` field on the related Account. CK has changed its processes to allow opportunities to have different values for `Specialty\_\_` than their Account.

How can sales reps enter values for the `specialty\_\_` field on Opportunity, while preserving the values on existing opportunities?

- A. Extend the data, convert the field to `GETTING` and mount the data.
- B. Convert the field to a text field and the values in the left.
- C. Create a new text field and keep using the existing formula field.
- D. **Create a new text field and import the formula field values in it.**

219. Cloud Kicks has five years of sales data and would like to track when customers made their first purchase.

How should an app builder use a roll-up summary to meet the requirements?

- A. Create a new date field called First Order Date, then create roll-up summary to update the field using Type MIN.
- B. **Create a new roll-up summary field called First Order Date, Using type MIN on the Opportunity Close Date with a filter where iswon = TRUE.**
- C. Create a new date field called First Order Date, then set the date using a roll-up summary on Opportunity Close Date.
- D. Create a new roll-up summary field called First Order Date using type SUM on Opportunity Close Date.

220. Cloud Kicks (CK) captures all shipping information in a custom object called Shipments__c. CK's app builder is tasked with creating an approval process to ensure department members can approve all overnight shipments.

Where should the app builder route the approval request?

- A. Role
- B. Queue

C. Hierarchy field

D. Public group

221. An app builder at Cloud Kicks created a custom object and related fields in the schema builder.

Which next steps should the app build take

to ensure users can access the new object and fields?

A. Add the fields to the page layout on the object

B. Allow reporting for the object and fields.

C. Create a permission set for access to the object and fields.

D. Assign data types to the fields on the object,

222. An app builder needs to create new automation on an object.

Which best practice should the app builder follow when building out automation?

A. On Flow per object

B. On validation rule per object

C. One invocable process per object

D. One record change process per object

223. Universal Containers has purchased a lightning component on the AppExchange.

In which two areas can these components be used?

Choose 2 answers

A. Lightning App Builder

B. Time Failure

C. Validation Rule

D. Quick Action

224. Universal Containers have changes that need to be deployed from Sandbox to Production.

Where should an app builder look to verify that a Change Set can be deployed?

- A. Deployment Settings
- B. Unbound Change Sets
- C. Deployment Status
- D. Unbound Change Sets

225. Sales representatives want to capture custom Feedback record details related to each Account. The sales reps want to accomplish this with minimal clicks on mobile.

Which two solutions should be recommended in order to meet this requirement?

Choose 2 answers

- A. Create a single-specific action in Account
- B. Create a feedback object as a parent of Account
- C. Create a global action on Account
- D. Create predefined values for most of the fields

226. A manager built out a new Account report and wants to add a chart of the data to account records. An app builder tried to use the Report Chart component but was unable to find the manager's report.

What are two reasons the app builder is unable to see the report?

Choose 2 answers

- A. The report has no data in it.
- B. The app builder did not create the report.
- C. The report is in the manager's Private reports folder
- D. The report does not have a chart.

227. The Cloud Kicks (CK) sales team is currently using a sales app in Lightning Experience. CK is planning a Salesforce mobile app rollout next month to increase productivity for reps while out in the field. After reviewing the mobile app, the sales operations manager asks about ways to create an enhanced user experience.

Which two solutions could an app builder suggest?

Choose 2 answers

- A. Allow mobile users to support Account Upstream Agent Closets.

- B. Include Today as a guide from in line size.
- C. Set up different mobile menu configurations of different types of users.
- D. Create a custom app page and Assign to the mobile menu.

228. On the Account Lightning record page, users need to see ten fields and the ability to sort and wrap text on their Related Lists.

Which Related List type should the app builder select for the Related List Lightning component?

- A. List View
- B. List Class
- C. Enhanced List
- D. Basic List

229. The app builder at AW Computing needs to capture information about sales rep help requests for sales engineering. Some Opportunities are more complex and require many different requests for help. Additionally, the date of the most recent request should be displayed on the Opportunity page.

What should the app builder use to accomplish this?

- A. Opportunity with Master-detail field to custom object
- B. Custom object with Lookup field to Opportunity
- C. Custom object with Master-detail field to Opportunity
- D. Opportunity with Lookup field to custom object

230. Which two solutions prevent a formula field from being referenced by a Roll-Up Summary field?

Choose 2 answers

- A. The NOW() function in the formula field
- B. A cross-object formula updating a field referenced by the formula field
- C. The CASE() function in the formula field
- D. A cross-object field referenced in the formula field

231. An app builder needs to modify an existing Process Builder that automates some of the work being done by the sales team.

What are three capabilities of Process Builder that improve productivity?

Choose 3 answers

- A. Create a child record.
- B. Start an additional message.
- C. Update a related record.
- D. Send an email alerts.
- E. Delete a related record.

232. Ursa Major Solar has received complaints about inconsistent customer service experiences and wants to provide its agents with a checklist of items that must be accomplished when servicing a case.

What should an app builder use to implement this?

- A. Business component
- B. Actions & Recommendations component
- C. Activity Timeline component
- D. Highlights Panel component

233. A service coordinator (SC) for Ursa Major Solar (UMS) does a final review of work orders owned by a technician for a specific region before the records are submitted for an invoice. Before closing out the work order, the SC needs to modify data or remove attachments that were added by mistake. The SC also needs access to any other related records owned by the technician.

Which solution provides the required access, given a private data model?

- A. Close an assignment via that update record record by technicians in that region with the SC.
- B. Create a SC activity list with a corresponding audit group.
- C. Give the SC a permission set with the Modify All Data system permission.
- D. Change work order access on the SC's profile to Modify all'.

234. The CFO of Cloud kicks needs to sign off on any major shoe retail deal that has a discount of more than 30% before the deal can be closed.

Which feature should be used to handle this requirement?

- A) Slack message
- B) Approval Process
- C) Email Alert
- D) Field Update

235. An app builder has created a change set and deployed a report from their development sandbox to a partial sandbox for User Acceptance Testing. When the app builder runs the report, no data is returned.

What can be a reason for this?

- A) Data is deployed when added to a change sets.
- B) Data is unable to be deployed with change sets.
- C) Reports have to be manually re-created in each environment.
- D) Reports have to be deployed with Salesforce OK.

236. An app builder wants to configure a sandbox environment for users to perform user acceptance testing of the latest features from developers. The sandbox should include about 500MB worth of data configured via a template. Also, the sandbox should be refreshed weekly.

Which sandbox meets the requirements?

- A) Full sandbox
- B) Developer File sandbox
- C) Developer sandbox
- D) Partial Copy sandbox

237. After discovering a second sun in the solar system, Ursa Major Solar wants to change the field relationship between `Sun\_c` and `Planet\_c` to a lookup rather than a master-detail.

What should an app builder consider about the effect on reporting before making this change?

A. Existing reports created under the `Sun\_c` with `Planet\_c` report type made by Salesforce will be unusable, but not deleted.

B. Existing roll-up summary fields will be deleted from the `Sun\_c` object and from any reports where they were added.

C. Existing roll-up summary fields will remain on the `Sun\_c` object and available for reporting, but will no longer update.

D. Existing reports created under the `Sun\_c` with `Planet\_c` report type made by Salesforce will be deleted.

238. At AW Computing, the Candidate object has a checkbox field for Previous Experience and a number field for Years of Previous Experience. The recruiting team wants the number field to display only if the Previous Experience field is checked.

Which functionality should the app builder use to meet this requirement?

A. Create two different page layouts and a process to change the layout if Previous Experience is checked.

B. Create a dependency between the Previous Experience and Years of Previous Experience fields.

C. Use Dynamic Forms to display the Years of Previous Experience field if Previous Experience is checked.

D. Use a Visualforce component on the candidate page layout to conditionally display the fields.

239. A sales manager at Cloud Kicks wants the team to spend more time in the field and less time manually entering the information found on the business cards they collect.

What should an app builder do to help achieve this goal without sacrificing data quality?

A. Post daily to the Cluster feed any relevant fields that need to be populated.

B. Use Flow to create a data entry related to automatic data entry.

C. Research and evaluate data enrichment products on the Applications to automatic data entry.

D. Use a formula field to populate key fields for the sales user.

240. The training team at Northern Trail Outfitters uses a custom Training object to track customer training sessions. An app builder needs to create a relationship between the Training object and the related Students' record.

Which two behaviors should an app builder take into consideration?

Choose 2 answers

- A. On Student record, users can set up Roll-up summary field on Training records.
- B. Cross-object field updates behavior Training and Student records are not supported.
- C. On Training record, the Student Lookup field can be made optional.
- D. On Training record, users can only delete Students, if they have access to it.

241. The Sales Operations team at AW Computing deletes accounts for a variety of reasons. The sales ops director is worried that the Sales team may delete accounts that sales reps are actively selling into.

How should the app builder keep accounts with open opportunities from being deleted?

- A. Remove the Delete permission from the Sales Rep profile.
- B. Remove the delete button on the account layout.
- C. Create a validation rule on the Account object.
- D. Create an Apps Trigger on the Account object.

242. Northern Trail Outfitters (NTO) has created the custom objects Trail and Park in Salesforce to track parks and trails respectively. NTO wants to track the total number of trails a park has on the park record without writing any code.

Which two actions should an app builder take to accomplish this requirement?

Choose 2 answers

- A. Use a master-detail relationship between the Park and Trail objects.
- B. Use a lookup relationship between the Park and Trail objects.
- C. Use a roll-up summary field on the Park record to show the total number of trails.
- D. Use a formula field on the Park record to show the total number of trails.

243. Cloud Kicks (CK) wants to set up a custom child object to track gift cards issued to a customer. A key requirement is to track the total number of gift cards opened and gift cards issued on an Account. CK wants to permanently ensure the gift cards are unable to be moved across any other Account once it is created.

On the gift card object, which field type should be created to support this requirement?

- A. Lookup relationship

B. Master-details relationship

C. Roll-up summary

D. Formula

244. An app builder wants to deploy a new version of an auto-launched flow to production in an active state so that the new functionality is immediately available to users.

What should the app builder take into consideration when planning the deployment?

A. User access needs to be granted to the flow.

B. Verify there is an Apps test that provides test coverage for the flow.

C. Flow test coverage must be 100%.

D. Honestly activate the flow after deployment.

245. Cloud Kicks built a process that is supposed to update record ownership based on several different criteria. Some users report that

they are not getting the expected level of access to accounts and contacts.

Which two considerations should an app builder be aware of that could be causing the issue?

Choose 2 answers

A. Processes that update record owners do not transfer child records.

B. Processes use the first value if the Owner field is updated multiple times.

C. Processes will fall om records owned by inactive users.

D. Processes will only run if the most current version is active.

246. Cloud Kicks has a custom object with a private sharing setting. The business wants to share individual records with specific people or departments on a case-by-case basis.

Which three options does the business user have to manually share individual records?

Choose 3 answers

A. Permission Set Groups

B. Private Groups

C. Users

D. Public Groups

E. Roles and Subordinates

247. An app builder wants to create a formula field on an Account to include data from related Contacts but is unable to find the relationship in the formula editor.

What is a limitation of formulas that could be causing the issue?

- A. More than 5,000 characters in the formula.
- B. Contact and Account objects DO NOT have a Master-Detail Relationship,
- C. Unable to reference the child records.
- D. Formula field limit reached on the Account object,

248. Ursa Major Solar (UHS) uses a public sharing model for accounts. UHS would like to move to a more restrictive sharing model but wants the Sales team to continue to have access to all account records with the sales record type.

Which two actions should an app builder complete to implement this change?

Choose 2 answers

- A. Create an owner-based sharing rule.
- B. Create a criteria-based sharing rule.
- C. Update the organization-wide defaults.
- D. Update the Sales profile.

249. DreamHouse Realty wants to make sure an Opportunity has a field, Expected_Close_Date_c, populated before it is allowed to enter the qualified stage.

How should an app builder solution this request?

- A. Record Type
- B. Page Layout
- C. Validation Rule
- D. Activity History

250. An app builder installs an unmanaged package in a full copy sandbox that is an exact match for production, and now they are ready to install it in production. The app builder attempts to install the package in production, and it fails.

Why did the package fail to install?

- A. Internet Service Type
- B. Object limits executed
- C. Package Features not comparable
- D. Apps unit test failures

251. Northern Trail Outfitters wants to initiate a daily backup of its Salesforce org.

Which tool should an app builder recommend for this task?

- A. Refresh full copy sandbox
- B. Add/Change package
- C. Data Expert Service
- D. Support expert

252. An app builder is loading data into Salesforce. To link the new records back to the legacy system, a field will be used to track the legacy ID on the Account object. For future data loads this ID will be used when upsetting records.

Which two field attributes should be selected?

****Choose 2 answers****

- A. Required
- B. Turn (encrypted)
- C. Unique
- D. External ID

253. Uras Major Solar wants to create a relationship between the standard Contact object and a custom Solar Project object. Contacts can potentially be related to multiple Solar Project objects, and a Solar Project can have multiple Contacts associated with it.

How should an app builder configure the data model?

- A. One Master-serial relationship on Contact and one Master-serial relationship on Solar Project
- B. Two Lookup relationships on a new custom object
- C. Two Master-serial relationships on a new custom object

D. One Lookup relationship on Contact and one Lookup relationship on Solar Project

254. Universal Containers wants to understand return on investment for the latest advertising buy. They currently use a private security model for all objects.

What should an app builder recommend?

- A. **Configure Campaign Interactions and Campaign statistics**
- B. Utilize Account Interactions and Rule Up Summary Fields
- C. Change to a public security model
- D. Run an opportunities pipeline report

255. An app builder at Universal Containers has been asked to add the Chatter feed to a custom object record page.

Which approach should the app builder use?

- A. Add the standard related first component.
- B. Add the Chatter feed component from the AppleChange.
- C. **Add the standard Chatter feed component.**
- D. Add a custom Chatter feed component.

256. Ursa Major Solar has a lookup relationship between a custom `Galaxy\_` object and a custom `Star\_` object. An app builder wants to create a roll-up summary field that counts the total number of `Star\_` records related to each `Galaxy\_` record.

How would the current configuration impact the ability to achieve the desired result?

- A. The roll-up summary can be achieved by creating a formula field on the `Galaxy\_` object.
- B. **The lookup relationship will need to be converted to a master-client relationship before a roll-up summary field can be created.**
- C. The roll-up summary can be achieved by creating a formula field on the `Star\_` object.
- D. A roll-up summary field will need to be created on the `Galaxy\_` object with a field filter that reflects all related `Star\_` records.

257. An app builder wants to create a new field using Schema Builder.

Who will get access to the new field by default?

- A. All profiles.
- B. Standard profiles.
- C. Internal profiles.
- D. No profiles.

258. The app builder at AW Computing has been asked to track the number of times a case has been reopened.

Which solution should the app builder utilize to help with this request?

- A. Screen Flow
- B. Apex Trigger
- C. Record-triggered flow
- E. Scheduled Triggered flow

259. DreamHouse Realty wants to import its property records from an external system into Salesforce. The app builder will use an external ID field to house the property ID from the external system.

Which two details should the app builder know when using external ID fields?

- A. Each org can have up to 25 custom external ID fields.
- B. Each object can have up to 25 custom external ID fields.
- C. An external ID field can be a URL field.
- E. An external ID field can be an auto-number field.

260:

Choose 3 options.

Cloud Kicks wants to set up a new opportunity approval process and execute various action items based on the initial submission.

Which three action types should an app builder use in the approval process?

A. Invocable Flow

B. Decision Element

C. Email Alert

D. Task

F. Outbound Message

260. Ursa Major Solar is ramping up the sales team to meet increased demand. As part of the short ramp up for these new reps, the manager wants to provide a help guide to enable reps to easily get help where needed during the different sales processes.

Which solution should an app builder recommend?

A. Path

B. Chatter Publisher

C. Journey Builder

D. Flow
