

Choose 1 option.

Cloud Kicks (CK) tracks the support level of its customers on the account record page. CK wants to show a text notification on a case record page when the related account is a platinum-level customer.

How can an app builder meet this requirement?

- ☐ A. Clone the Case Lightning page.
Add a rich text component to the new page, and assign this page to platinum accounts.
- ☒ B. Add a rich text component to the Case Lightning page.
Set the component visibility of the rich text component to show when the account support level is platinum.
- ☐ C. Create a text-only custom Lightning Web Component.
Drag the custom Lightning Web Component into the Case page layout.
Set its visibility to show when the account support level is platinum.
- ☐ D. Create a text-only custom Lightning Web Component.
Clone the case page layout.
Drag the custom Lightning Web Component into the page, and assign the layout to platinum cases.

Question 2 of 65

Choose 1 option.

The marketing director is concerned that too many car parts were given away for free last year.

Which functionality should be used to ensure all free parts receive the marketing directors' sign-off?

- ☐ A. Slack post
- ☐ B. Automated email message
- ☒ C. Approval process
- ☐ D. Chatter approval

Question 3 of 65

Choose 1 option.

Universal Containers (UC) has several picklist fields on the Account object whose values are routinely modified to meet changing business requirements. Due to these revolving changes, UC has a high number of inactive picklist values that are impacting system performance and user experience.

What can the app builder do to alleviate this issue?

- ☐ A. Convert the picklist fields to a different field type that will still meet the business requirements.
- ☐ B. Remove upper bound on inactive picklist values in Picklist Settings.
- ☐ C. Establish upper bound on existing picklists in Picklist Settings.
- ☒ D. Set up Global Values in Picklist Value Sets.

Question 4 of 65

Choose 1 option.

Universal Containers has a requirement that an opportunity should have a field showing the value of its associated account's billing state. This value should be static after the opportunity has been created.

What is the recommended solution to configure this automation behavior?

- ☐ A. Roll-up summary field
- ☒ B. Formula field
- ☐ C. Flow
- ☐ D. Apex

Choose 1 option.

Universal Containers (UC) needs a picklist field called Status on three separate custom objects. UC has a requirement to share the list of values for this field across each object.

Which feature should an app builder use?

- ☐ A. Related Picklist
- ☐ B. Shared Custom Field
- ☒ C. Global Picklist Value Set
- ☐ D. Dependent Picklist

Question 6 of 65

Choose 2 options.

Ursa Major Solar (UMS) is planning to hire some new employees. UMS wants to allow a job candidate (Job_Candidate__c) for multiple open positions (Open_Position__c) and then be able to view the applications (Application__c) on the job record. UMS also wants to view all the applications for a specific open position.

What should an app builder recommend to meet these requirements?

- ☐ A. Create a master-detail relationship on Open_Position__c to Application__c.
- ☐ B. Create a master-detail relationship field on Job_Candidate__c to Application__c.
- ☒ C. Create a master-detail relationship field on Application__c to Job_Candidate__c.
- ☒ D. Create a master-detail relationship field on Application__c to Open_Position__c.

Choose 1 option.

Cloud Kicks asked the app builder to insert a list of 25,000 records using deduplication for the Delivery custom object.

Which tool should be used?

- ☐ A. Schema Builder
- ☐ B. Import Wizard
- ☒ C. Data Loader
- ☐ D. Lightning Object Creator

Question 8 of 65

Choose 1 option.

The CFO of Cloud Kicks needs a way for new vendors to accept terms on agreements for any new major retail store lease before the opportunity can be closed.

Which feature should be used to handle this requirement?

- ☐ A. Validation Rule
- ☐ B. Dynamic Action
- ☐ C. Email Alert
- ☒ D. Approval Process

Question 9 of 65

Choose 2 options.

An app builder is preparing to deploy a new app from the sandbox to production using change sets.

Which two considerations should an app builder keep in mind during this process?

- ☒ A. Transactions will revert if the deployment errors.
- ☐ B. Users should be logged out of production when receiving inbound change sets.
- ☒ C. Change sets do not include all components and may have to perform some changes manually.
- ☐ D. Salesforce Connect automatically establishes a link between environments.

Question 10 of 65

Choose 1 option.

What should an app builder consider when choosing a template for a new Lightning record page?

- ☒ A. Page structure will automatically adapt to the device being used to view the record page.
- ☐ B. Select a new template for each type of device users use to view the record page.
- ☐ C. The template is unable to be changed after the initial save.
- ☐ D. To view the record page, users need "View All Data" permissions for the object.

Question 11 of 65

Choose 1 option.

Sales reps want the ability to see who can view their account records and how the people have access.

Which button should the app builder add to the Account page layout to enable this?

- ☐ A. Edit
- ☐ B. New Task
- ☐ C. Sharing Hierarchy
- ☒ D. Sharing

Question 12 of 65

Choose 1 option.

Universal Containers wants to create a custom checkbox formula field on the Opportunity object. This formula true if the following conditions are met:

- Stage is set to Negotiation/Review
- Close Date is less than 1 week away

Which formula meets these requirements?

- ☐ A. `AND(StageName = 'Negotiation/Review', CloseDate - 7 < TODAY() )`
- ☐ B. `AND(StageName = 'Negotiation/Review', CloseDate - DAY(7) < TODAY() )`
- ☐ C. `AND(ISPICKVAL(StageName, 'Negotiation/Review'), CloseDate - DAY(7) < TODAY() )`
- ☒ D. `AND(ISPICKVAL(StageName, 'Negotiation/Review'), CloseDate - 7 < TODAY() )`

Question 13 of 65

Choose 1 option.

DreamHouse Realty wants to track how many lifts are being installed into customer garages. The To Be Installed custom checkbox field on the custom Lift object should be checked and an external system should be notified via an outbound message the next day when a lift is sold.

Which automation tool should be used to complete this task?

- ☐ A. Assignment rule
- ☐ B. Validation rule
- ☐ C. Approval process
- ☒ D. Flow

Question 14 of 65

Choose 1 option.

An app builder wants to create a custom Sync button on Account that will call a Lightning Web Component that connects with an external system. This action should only be available if the custom Status field is set to Ready to Sync.

What should an app builder use to add this functionality to an Account record page?

- ☐ A. AppExchange product
- ☐ B. Custom link
- ☐ C. Formula field
- ☒ D. Dynamic action

Question 15 of 65

Choose 1 option.

A business user at Universal Containers wants to update an Account directly from an Opportunity record.

What should the app builder create to allow the business user to make these edits?

- ☐ A. Opportunity fields updated by a process.
- ☒ B. An update record action with a related record component.
- ☐ C. Formula fields displaying the Account fields.
- ☐ D. An update record action with a details component.

Question 16 of 65

Choose 1 option.

Cloud Kicks has created a custom object called Interests which is joined to Accounts by way of a junction object called Interest.

What is the impact to users attempting to view an Account and the associated Account Interest records if they are with access to the Interest object?

- ☐ A. Users will be unable to view Account records that have a related Account Interest record.
- ☒ B. Users will be unable to view the Account Interest records or the Interest records.
- ☐ C. Users will be able to view the Account Interest record, but unable to view the field or any information relating to the Interest record.
- ☐ D. Users will be able to view the Account Interest records and will have read-only access to the Interest records.

Question 17 of 65

Choose 3 options.

Which three options are available when activating a Lightning page from the Lightning App Builder?

- ☒ A. Make the page the org default.
- ☐ B. Assign the page to a combination of apps and permission sets.
- ☒ C. Make the page the default homepage for specific apps.
- ☐ D. Make the page the default homepage for specific roles.
- ☒ E. Assign the page to a combination of apps and profiles.

Question 18 of 65

Choose 1 option.

DreamHouse Realty wants to display a weather map component on a Lightning record page when a house is scheduled for a showing.

How should the app builder meet the requirement?

- ☐ A. Sharing rules
- ☒ B. Component visibility
- ☐ C. Field-level security
- ☐ D. Formula field

Question 19 of 65

Choose 1 option.

Northern Trail Outfitters has two custom objects that are part of a master-detail relationship.

What determines the ownership and sharing access of the detail record?

- ☐ A. The default owner is set in the parent object's settings.
- ☒ B. The Owner field on the Master record.
- ☐ C. The Owner field on the Detail record.
- ☐ D. The owner is set independently on the detail object's settings.

Question 20 of 65

Choose 1 option.

Universal Containers has several new fields they've requested for the Opportunity Product object.

What should an app builder be able to configure using a formula field?

- ☐ A. A combination of the Opportunity's Text and a Description fields.
- ☐ B. A mix of functions and concatenation of 10 Account fields and 10 Opportunity fields.
- ☐ C. A Rich Text area field that uses HTML to bold certain characters.
- ☒ D. A hyperlink to the parent Account of the parent Opportunity.

Question 21 of 65

Choose 1 option.

Universal Containers wants to track installation information once a container has been purchased on a custom object. Sales reps should have visibility of all the installations associated with their opportunities.

Which kind of relationship should this new object have to Opportunity?

- ☐ A. Many to Many
- ☒ B. Master-Detail
- ☐ C. Hierarchical
- ☐ D. Lookup

Question 22 of 65

Choose 2 options.

At Cloud Kicks when an opportunity close date is delayed by more than 60 days, the manager and the VP of Sales want to review the change.

Which two solutions will meet the requirement?

- ☐ A. Build a validation rule that does not allow a user to save the opportunity record.
- ☒ B. Create a flow that submits the record for an approval process.
- ☒ C. Build an approval process that requires unanimous approval from the manager and VP of Sales.
- ☐ D. Create a formula field that calculates if the close date is less than 60 days and then send an email alert.

Question 23 of 65

Choose 1 option.

An app builder is tasked with adding key performance indicators on client pages. They want to see a summary of the number of open Opportunities and the number of won Opportunities for each Account.

Where should the app builder go to build these new rollups?

- ☐ A. Opportunity Object
- ☐ B. Lightning App Builder
- ☒ C. Account Object
- ☐ D. Lightning Object Creator

Choose 1 option.

At Ursa Major Solar there is a requirement for a new field called Planet Details on the Planet object where users can write detailed descriptions that can include pictures and links.

Which field type should the app builder utilize to fulfill this requirement?

- ☐ A. Lightning web component
- ☐ B. Long text area
- ☒ C. Rich text area
- ☐ D. URL

Choose 1 option.

Universal Containers uses a custom object called Projects. When managers assign projects they set a custom field on the Project record called Estimated Hours. Once set, users should be able to decrease but not increase the value.

How can an app builder meet this requirement?

- ☐ A. Create a formula field that uses the PREVGROUPVAL function.
- ☐ B. Create a formula default value for the custom field.
- ☐ C. Create a validation rule that uses the ISCHANGED function.
- ☒ D. Create a validation rule that uses the PRIORVALUE function.

Choose 2 options.

An app builder has downloaded a component from the AppExchange successfully; however, they are unable to add it to the Lightning home page.

Which two reasons can be preventing the app builder from being able to add the custom component?

- ☒ A. The component is tagged for record pages instead of home pages and is not showing up in the App Builder.
- ☒ B. My Domain must be deployed to add custom components to the page with the App Builder.
- ☐ C. The component requires a developer permission to add it to the page with the App Builder.
- ☐ D. A custom tab must be created to add custom components to the page with the App Builder.

Question 27 of 65

Choose 2 options.

An app builder needs to change the data type of some custom fields.

Which two limitations should the app builder be aware of when changing the data type of a custom field?

- ☒ A. It is not possible to change the data type of field referenced by Apex code.
- ☒ B. It is not possible to change the data type of a formula field to any data type.
- ☐ C. It is not possible to change the data type of a field used as an External ID from number to text.
- ☐ D. It is not possible to change the data type of a Text Area (Long) field to Text.

Question 28 of 65

Choose 1 option.

Universal Containers uses a custom picklist field Account Region on the account record. They want this region related contact records and stay in sync if the value of this field changes on the Account.

How should an app builder meet this requirement?

- ☐ A. Create a formula field on the Contact object > Set the value of the formula to `ISPICKVAL(Account.Account_Region__c)`.
- ☐ B. Create a text field called 'Account Region' on Contact object > Create a Lookup Relationship to update the Account Region field on the Account is changed.
- ☒ C. Create a formula field on the Contact object > Set the value of the formula to `TEXT(Account.Account_Region__c)`.
- ☐ D. Create a picklist field called 'Account Region' on Contact object > Create a Lookup Relationship to update if the Account Region field on the Account is changed.

Question 29 of 65

Choose 1 option.

The Recruiting team at AW Computing captures the job acceptance and date of hire of a candidate on the Job Application object. Once the candidate accepts the recruiter's job offer, the date of hire should be entered and not be changed on record edits.

Which validation formula should the app builder use?

- ☒ A. `NOT (ISBLANK (Job_Accepted__c)) && ISCHANGED (Hire_Date__c)`
- ☐ B. `NOT (ISBLANK (Job_Accepted__c)) || ISCHANGED (Hire_Date__c)`
- ☐ C. `(ISBLANK (Job_Accepted__c) && NOT (ISCHANGED (Hire_Date__c))`
- ☐ D. `(ISBLANK (Job_Accepted__c) || NOT (ISCHANGED (Hire_Date__c))`

Question 30 of 65

Choose 1 option.

A production org includes custom objects containing confidential information. A sandbox is needed that includes data records, excludes all of the confidential objects, and can be refreshed weekly.

Which steps should an app builder take to meet these requirements?

- ☐ A. Create a Full Copy Sandbox and use a sandbox template.
- ☐ B. Create a Developer Sandbox and schedule Data Loader to download selected object data weekly.
- ☐ C. Create a Developer Pro Sandbox and schedule Data Loader to download selected object data weekly.
- ☒ D. Create a Partial Copy Sandbox and use a sandbox template.

Question 31 of 65

Choose 1 option.

The sales team receives a list of approximately 800 leads each morning from the marketing team. The marketing team does not know if any of the leads are currently in the pipeline and sends the entire list each morning.

Which tool should be used to import these leads into Salesforce while preventing the duplicates from being inserted?

- ☒ A. Data Import Wizard
- ☐ B. Manual entry
- ☐ C. Dataloader.io
- ☐ D. Data Loader

Question 32 of 65

Choose 1 option.

An app builder at Ursa Major Solar has been working on a new custom app in a sandbox that has been upgraded to the next major Salesforce version, and their production instance is still on the current Salesforce version. The development is complete and the app builder is ready to deploy a change set.

What should the app builder consider when planning the deployment?

- ☐ A. The deployment is not possible due to different versions.
- ☒ B. It will fail if there is a feature only available in the next version.
- ☐ C. The change set will be automatically deployed when production is upgraded.
- ☐ D. The change set components will be upgraded to the next version in production.

Choose 1 option.

AW Computing uses a private sharing model for opportunities. Whenever an opportunity with a type of Service Agreement is created, all users in the Service Manager role should be able to view the opportunity.

Which tool should AW Computing use to accomplish this?

- ☐ A. Manual sharing
- ☐ B. Owner-based sharing rules
- ☒ C. Criteria-based sharing rules
- ☐ D. Apex sharing rules

Question 34 of 65

Choose 1 option.

Northern Trail Outfitters wants the field sales team to only see the accounts that they own. Separate North American and European marketing teams should only see accounts in their respective regions. The inside sales team needs to see all accounts in Salesforce.

How can this be accomplished?

- ☐ A. Set the Organization-Wide Default to Public for accounts. Create profiles for each marketing team, and create an Inside Sales Team role that is at the top of the Role Hierarchy.
- ☐ B. Set the Organization-Wide Default to Private for accounts. Create permission sets for each marketing team, and create an Inside Sales Team profile with the "View All" setting for accounts.
- ☐ C. Set the Organization-Wide Default to Public for accounts. Create criteria-based sharing rules for each marketing team, and create an Inside Sales Team permission set with the "View All" setting for accounts.
- ☒ D. Set the Organization-Wide Default to Private for accounts. Create criteria-based sharing rules for each marketing team, and create an Inside Sales Team profile with the "View All" setting for accounts.

Question 35 of 65

Choose 1 option.

Universal Containers (UC) delivers purchased containers to remote construction sites. Customers supply UC with crossroads or location markers.

Which field type should the app builder use to capture this information?

- ☐ A. Number
- ☐ B. External Lookup
- ☒ C. Geolocation
- ☐ D. Reference

Question 36 of 65

Choose 1 option.

Shipments at Cloud Kicks (CK) are created and updated by the warehouse staff in a shipping application. The information is pushed into Salesforce on a regular basis. CK's app builder creates a custom object called `Delivery__c` to store shipment information.

How can the app builder prevent creating duplicate delivery records and update the correct existing records with information from the shipping application?

- ☐ A. Use the Import Wizard and match on the Salesforce ID.
- ☐ B. Create a duplicate/match rule and use Dataloader.
- ☒ C. Create a unique External ID field and use Dataloader.
- ☐ D. Use the Import Wizard and match on the tracking number.

Choose 1 option.

Universal Containers wants to embed a chart of all related Opportunities, by stage, on the Account detail page.

Which type of report should an app builder create to add to the Account page layout?

- ☐ A. A tabular report on the Account object
- ☐ B. A tabular report on the Opportunity object
- ☒ C. A summary report on the Opportunity object
- ☐ D. A summary report on the Account object

Question 38 of 65

Choose 3 options.

An app builder needs to deploy a new account detail page layout from sandbox to production.

Which three components should an app builder include in the Change Set to ensure it deploys successfully and as expected?

- ☐ A. System administrator profile
- ☐ B. Custom actions
- ☒ C. Custom fields
- ☒ D. Detail page layout
- ☒ E. Lightning App Builder

Question 39 of 65

Choose 1 option.

An app builder has created a new report type but users are unable to select it from the Report Type list when making a new report for records they own.

What could be causing this issue?

- ☒ A. The report type is in a status of In Development.
- ☐ B. Access to Create and Customize Reports is disabled.
- ☐ C. Access to the necessary object is unavailable.
- ☐ D. The report type is in a status of Deployed.

Question 40 of 65

Choose 1 option.

Universal Containers utilizes opportunities and a custom object called Detailed_Sales__c. The company would like to metrics up to an opportunity for only Detailed_Sales__c records that have their picklist status set to Active.

What is the recommended method for the app builder to achieve this request?

- ☐ A. Utilize Apex code to roll up the desired amounts.
- ☒ B. Create a master-detail relationship between the parent and child object with a roll-up summary field that filters on the status field.
- ☐ C. Create a lookup relationship between the parent and child object with a roll-up summary field that filters on the status field.
- ☐ D. Utilize the AppExchange to download a third-party application that can roll up the sales dollars with the appropriate filter.

Question 41 of 65

Choose 1 option.

DreamHouse Realty has a policy that requires the phone number on Contact to be deleted when the DoNotCall checkbox is checked.

Which automation tool should the app builder recommend?

- ☐ A. If-then rule
- ☐ B. Quick action
- ☒ C. Flow
- ☐ D. Validation rule

Choose 1 option.

When a sales rep submits an account for approval, Universal Containers wants the user to answer additional questions via a popup window to populate additional record fields.

What should an app builder use to achieve the desired result?

- ☐ A. Visualforce page
- ☐ B. Custom object
- ☐ C. Custom Lightning component
- ☒ D. Custom button and Flow

Question 43 of 65

Choose 1 option.

DreamHouse Realty requires that field value changes for certain fields such as `Asking_Price__c` and `Real_Estate_Agent__c` on their `House__c` custom object show up prominently on Chatter.

Which Chatter feature should the app builder use?

- ☐ A. Topics
- ☒ B. Feed Tracking
- ☐ C. Publisher Actions
- ☐ D. Pin Field

Question 44 of 65

Choose 1 option.

The finance manager at Universal Containers wants to receive a new business notification email each time a new client is won. The sales manager wants to receive a task letting them know to onboard the new client unless it is a top-tier client.

Which automation tool should an app builder use to best address all these requests?

- ☐ A. Screen flow
- ☐ B. Apex
- ☒ C. Record-triggered flow
- ☐ D. Approval process

Question 45 of 65

Choose 1 option.

Northern Trail Outfitters uses a custom object to track travel requests. Rangers want to have automatic posts on a record whenever a travel request has been approved.

Which feature should be used to accomplish this?

- ☐ A. Feed quick action
- ☒ B. Feed tracking
- ☐ C. Auto-response rule
- ☐ D. Approval process

Question 46 of 65

Choose 1 option.

Sales reps at Universal Containers use Salesforce on their mobile devices. They want a way to add new contacts quickly and then follow up later to complete the additional information necessary.

Which mobile solution should an app builder recommend to create the new contact?

- ☐ A. Add a compact layout to Contacts.
- ☐ B. Use Path and set pre-defined values.
- ☐ C. Customize the mobile menu to move Contacts to the top.
- ☒ D. Build a global action to create Contacts.

Question 47 of 65

Choose 1 option.

Universal Containers wants to dynamically display a component on a Lightning record page for an account based on the related contact.

Which solution should an app builder use to fulfill this requirement?

- ☐ A. Hide the component behind a tab on the page layout.
- ☒ B. Set the component visibility to display based on an advanced filter type, using the contact field(s) to define the dynamic criteria.
- ☐ C. Set the filter type on the component visibility to display based on user permissions, using custom permissions to define the dynamic criteria.
- ☐ D. Add a related record component to the page layout.

Question 48 of 65

Choose 2 options.

To increase adoption, Universal Containers is proposing changes to its Salesforce data model to allow easier visibility for sales reps into key metrics. The proposal has three custom objects related to the Account object, one with a master-detail, and two that are not. Each of these objects has 15 fields they would like to summarize on the Account object.

What are two considerations for this proposal?

- ☒ A. Roll-up summaries are limited to master-detail relationships.
- ☒ B. An object can have 25 roll-up summaries.
- ☐ C. Roll-up summaries allow MAX, MIN, SUM, COUNT, and AVG.
- ☐ D. An object can have 20 object references.

Question 49 of 65

Choose 2 options.

Duplicate management for Leads has been implemented at Universal Containers but it seems duplicate leads are still being created. The Org Wide Default (OWD) is set to "Private" for Leads.

Which two actions help prevent duplicate Leads from being created?

- ☒ A. Change the Lead Duplicate Rule details to Bypass Sharing Rules.
- ☐ B. Change OWD for Leads to Public Read.
- ☐ C. Change the Lead Assignment Rule to check for duplicates.
- ☒ D. Change the Lead Duplicate actions to Block on Create.

Question 50 of 65

Choose 1 option.

How should an app builder configure access to a contact's Twitter profile for Salesforce mobile app users?

- ☐ A. Add an AppExchange Lightning Component to the mobile app.
- ☐ B. Add a Twitter Quick Action to the mobile navigation.
- ☒ C. Add the Twitter component to mobile view Lightning pages.
- ☐ D. Add a formula field to the Contact page layout.

Question 51 of 65

Choose 1 option.

What is the process to upgrade an unmanaged package that is currently installed in production?

- ☒ A. Uninstall the current version and install the new version.
- ☐ B. Click the update link on the Installed Packages page.
- ☐ C. Install the new version to a Developer org then deploy to production.
- ☐ D. Use the Install Wizard to install the upgrade to production.

Question 52 of 65

Choose 1 option.

Sales reps at Universal Containers create multiple quotes per opportunity.

Which automation tool should an app builder recommend to delete rejected quotes?

- ☐ A. Approval process
- ☒ B. Flow
- ☐ C. Einstein Next Best Action
- ☐ D. Validation rule

Question 53 of 65

Choose 1 option.

Universal Containers uses a custom object called Reviews to capture information generated by interviewers during the candidate process. The Review records are visible to any user that has access to the related custom Candidate record. The VP of Human Resources wants the comment field on the Review to be private to anyone outside of the HR department.

How should the app builder meet this requirement?

- ☐ A. Create an Apex sharing rule to share the field with users that have "HR" in their role.
- ☐ B. Create a page layout with the field for HR users and another page layout without the field for all other users.
- ☐ C. Create a sharing rule to share the field with the VP of HR with Role and Subordinates.
- ☒ D. Create a page layout with the field and use field-level security to hide the field from all other users.

Question 54 of 65

Choose 1 option.

DreamHouse Realty (DR) has many properties for sale and wants to identify the highest value of all `offer__c` records on each `Property__c` record.

Which solution should the app builder use to meet DR's needs provided that there is a master-detail relationship between the objects?

- ☒ A. Roll-up Summary
- ☐ B. Rich Text Area
- ☐ C. Text Area (Long)
- ☐ D. Multi-select Picklist

Question 55 of 65

Choose 1 option.

A new app builder on the Cloud Kicks team is getting familiar with the data model. They want to see how standard objects and custom objects relate.

Which functionality should the app builder use to view these relationships?

- ☐ A. Fields & Relationships
- ☐ B. Object Manager
- ☐ C. Lightning App Builder
- ☒ D. Schema Builder

Question 56 of 65

Choose 1 option.

Universal Containers manages leads in a Lead qualification queue where sales reps can accept ownership of the Lead. Campaign members are required to have a sales owner.

Which validation rule should an app builder configure?

- ☐ A. `AND ( ISNEW ( ) , ISBLANK ( Lead.Owner:User.Id ) )`
- ☐ B. `AND ( ISBLANK ( Lead.Owner.Id ) )`
- ☒ C. `NOT ( ISBLANK ( Lead.Owner:Queue.Id ) )`
- ☐ D. `NOT ( ISNEW ( ) && ISBLANK ( Lead.Owner:Queue.Id ) )`

Choose 2 options.

Service agents at Ursa Major Solar want a more condensed case view. Service agents also want to be able to modify the associated contact and account records from the case page layout on the Lightning record page.

Which two components should an app builder use to meet these requirements?

- ☐ A. Path
- ☒ B. Related record
- ☒ C. Tabs
- ☐ D. Rich text

Question 58 of 65

Choose 1 option.

Cloud Kicks works on an annual subscription model. When a sales rep marks an opportunity as closed won, a new opportunity should automatically be created for the renewal. The contracts team works outside of Salesforce but also needs to be notified about closed deals in order to initiate the contract process with the customer.

Which automation solution would meet these requirements?

- ☒ A. Outbound Message
- ☐ B. Record-triggered flow
- ☐ C. Approval Process
- ☐ D. Validation Rule

Question 59 of 65

Choose 1 option.

Universal Containers wants sales reps to get permission from their managers before deleting Opportunities.

What can be used to meet these requirements?

- ☒ A. Approval process with a record-triggered flow
- ☐ B. Schedule-triggered flow with Submit for Approval action
- ☐ C. Two-step approval process
- ☐ D. Approval process and flow with a scheduled path

Choose 1 option.

Universal Containers has a custom object that holds over 100 fields. The app builder wants to break up the fields into separate tabs on the lightning page.

Which Lightning component is most appropriate to fulfill this requirement?

- ☐ A. Highlights panel
- ☐ B. Record detail
- ☒ C. Accordion
- ☐ D. Field section

Question 61 of 65

Choose 1 option.

DreamHouse Realty (DHR) recently acquired Cloud Kicks (CK), a company that is still on Salesforce Classic. DHR is keeping the CK Salesforce org; however, it will migrate this org to Lightning Experience.

Where should the app builder find prebuilt resources to help with this project and overall adoption?

- ☐ A. Import Wizard
- ☒ B. AppExchange
- ☐ C. Flow Builder
- ☐ D. Lightning Object Creator

Question 62 of 65

Choose 1 option.

Universal Containers is adding drone delivery to service offerings. The developer wrote and tested the code and the change set is ready to go. However, the deployment window will occur when the developer is on vacation.

What can the app builder do to help ensure the code will successfully deploy to production?

- ☐ A. Use a metadata package set.
- ☒ B. Validate the inbound change set.
- ☐ C. Validate the outbound change set.
- ☐ D. Remove Apex classes from inbound change set.

Question 63 of 65

Choose 1 option.

The Director of Marketing at Northern Trail Outfitters wants the app builder to create a formula field that tracks how many days have elapsed since a contact was sent a marketing communication. The director is only interested in whole units.

Which function should be used to return a date for calculating the difference?

- ☐ A. NOW()
- ☐ B. DATEVALUE()
- ☐ C. DATETIMEVALUE()
- ☒ D. TODAY()

Choose 1 option.

Cloud Kicks wants to start tracking how many shoe subscriptions have been sold for each shoe catalog. A master-detail relationship exists between the `Subscription__c` and the `Shoe__c` objects.

Which type of field should an app builder create?

- ☐ A. Lookup field
- ☒ B. Roll-up summary field
- ☐ C. Sum field
- ☐ D. Master-detail field

Question 65 of 65

Choose 3 options.

The appraisal team at DreamHouse Realty wants to leverage Salesforce mobile app.

What are three things an app builder should do to optimize mobile experience?

- ☐ A. Create individual customized layouts for different phone operating systems.
- ☐ B. Avoid using default field values so that the user is required to fill in all fields on the screen.
- ☒ C. Put the most important fields in the compact layout so they are easy to find.
- ☒ D. Use Global Actions to make it easy to perform vital functionality on mobile.
- ☒ E. Minimize the amount of formula fields and lookup fields to reduce page load time.
