

Question 1 of 65

Choose 1 option.

Cloud Kicks has configured Account Teams and is ready to go live in production.

How should the consultant migrate the Account Team Members records to production?

- ☐ A. Deploy them with change sets.
- ☐ B. Distribute them with packages.
- ☒ C. Migrate them via Data Loader.

Question 60 of 60

Choose 2 options.

Northern Trail Outfitters is using the Marketing Cloud Starter Data Bundles to bring Marketing Cloud data into Data Cloud.

What are two of the available datasets in Marketing Cloud Starter Data Bundles?

- ☐ A. Personalization
- ☒ B. MobileConnect
- ☒ C. MobilePush
- ☐ D. Loyalty Management

How should the Data Cloud consultant configure this activation?

- ☐ A. Include Fund Name and Fund Type by default for post processing in the target system.
- ☐ B. Include Fund Type equal to "Mutual Fund" as a related attribute. Configure an activation based on the new segment with no additional attributes.
- ☒ C. Choose the Multiple Investments segment, choose the Email contact point, add related attribute Fund Name, and add related attribute filter for Fund Type equal to "Mutual Fund".
- ☐ D. Choose the Multiple Investments segment, choose the Email contact point, and add related attribute Fund Type.

Question 59 of 60

Choose 1 option.

Cumulus Financial created a segment called Multiple Investments that contains individuals who have invested in two or more mutual funds.

The company plans to send an email to this segment regarding a new mutual fund offering, and wants to personalize the email content with information about each customer's current mutual fund investments.

How should the Data Cloud consultant configure this activation?

- ☐ A. Include Fund Name and Fund Type by default for post processing in the target system.
- ☐ B. Include Fund Type equal to "Mutual Fund" as a related attribute. Configure an activation based on the new segment with no additional attributes.
- ☒ C. Choose the Multiple Investments segment, choose the Email contact point, add related attribute Fund Name, and add related attribute filter for Fund Type equal to "Mutual Fund".

Question 58 of 60

Choose 1 option.

Cumulus Financial is experiencing delays in publishing multiple segments simultaneously. The company wants to avoid reducing the frequency at which segments are published, while retaining the same segments in place today.

Which action should a consultant take to alleviate this issue?

- ☒ A. Increase the Data Cloud segmentation concurrency limit.
- ☐ B. Adjust the publish schedule start time of each segment to prevent overlapping processes.
- ☐ C. Enable rapid segment publishing to all segments to reduce segment generation time.
- ☐ D. Reduce the number of segments being published.

Question 57 of 60

Choose 1 option.

A consultant is connecting sales order data to Data Cloud and considers whether to use the Profile, Engagement, or Other categories to map the DLO. The consultant chooses to map the DLO called Order-Headers to the Sales Order DMO using the Engagement category.

What is the impact of this action on future mappings?

- ☒ A. A DLO with category Engagement can be mapped to any DMO using either Profile, Engagement, or Other categories.
- ☐ B. Sales Order DMO gets assigned to both the Profile and Engagement categories when mapping a Profile DLO.
- ☐ C. Only Engagement category DLOs can be mapped to the Sales Order DMO. Sales Order gets assigned to the Engagement Category.
- ☐ D. When mapping a Profile DLO to the Sales Order DMO, the category gets updated to Profile.

Question 56 of 60

Choose 1 option.

A consultant notices that the unified individual profile is not storing the latest email address.

Which action should the consultant take to troubleshoot this issue?

- ☒ A. Check if the mapping of DLO objects is correct to Contact Point Email.
- ☐ B. Verify and update the email address in the source systems if needed.
- ☐ C. Remove any old email addresses from Salesforce CRM.
- ☐ D. Confirm that the reconciliation rules are correctly used.

Question 55 of 60

Choose 1 option.

Which functionality does Data Cloud offer to improve customer support interactions when a customer is working with an agent?

- ☐ A. Real-time data integration
- ☐ B. Enhanced reporting tools
- ☐ C. Automated customer service replies
- ☒ D. Predictive troubleshooting

Question 54 of 60

Choose 1 option.

Which information is provided in a .csv file when activating to Amazon S3?

- ☒ A. The activated data payload
- ☐ B. The manifest of origin sources within Data Cloud
- ☐ C. The metadata regarding the segment definition
- ☐ D. An audit log showing the user who activated the segment and when it was activated

Question 53 of 60

Choose 1 option.

A Data Cloud consultant is evaluating the initial phase of the Data Cloud lifecycle for a company.

Which action is essential to effectively begin the Data Cloud lifecycle?

- ☐ A. Migrate the existing data into the Customer 360 Data Model.
- ☐ B. Analyze and logically partition the data into data spaces.
- ☒ C. Identify use cases and the required data sources and data quality.
- ☐ D. Use calculated insights to determine the benefits of Data Cloud for this company.

Question 52 of 60

Choose 1 option.

A customer has a Master Customer table from their CRM to ingest into Data Cloud. The table contains a name and primary email address, along with other personally identifiable information (PII).

How should the fields be mapped to support identity resolution?

- ☐ A. Map all fields to the Individual object, adding a custom field for the email address.
- ☒ B. Map name to the Individual object and email address to the Contact Point Email object.
- ☐ C. Create a new custom object with fields that directly match the incoming table.
- ☐ D. Map all fields to the Customer object.

Question 51 of 60

Choose 1 option.

Which permission setting should a consultant check if the custom Salesforce CRM object is not available in New Data Stream configuration?

- ☒ A. Confirm the View All object permission is enabled in the source Salesforce CRM org.
- ☐ B. Confirm the Ingest Object permission is enabled in the Salesforce CRM org.
- ☐ C. Confirm that the Modify Object permission is enabled in the Data Cloud org.
- ☐ D. Confirm the Create Object permission is enabled in the Data Cloud org.

Question 50 of 60

Choose 2 options.

A consultant has an activation that is set to publish every 12 hours, but has discovered that updates to the data prior to activation are delayed by up to 24 hours.

Which two areas should a consultant review to troubleshoot this issue?

- ☒ A. Review segments to ensure they're refreshed after the data is ingested.
- ☐ B. Review data transformations to ensure they're run after calculated insights.
- ☐ C. Review calculated insights to make sure they're run after the segments are refreshed.
- ☒ D. Review calculated insights to make sure they're run before segments are refreshed.

Question 49 of 60

Choose 1 option.

A consultant has an act
are delayed by up to 24 hours.

Which two areas should a consultant review to troubleshoot this issue?

- ☒ A. Review segments to ensure they're refreshed after the data is ingested.
- ☐ B. Review data transformations to ensure they're run after calculated insights.
- ☐ C. Review calculated insights to make sure they're run after the segments are refreshed.
- ☒ D. Review calculated insights to make sure they're run before segments are refreshed.

Question 49 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) asks its Data Cloud consultant for a list of contacts who fit within a certain segment for a direct mail campaign.

How should the consultant provide this list to NTO?

- ☐ A. Create the segment and then click Download to obtain the segment membership details to provide to NTO.
- ☐ B. Create a new file storage activation target, create the segment, and then activate the segment to the new activation target.
- ☐ C. Create the segment and then activate the segment to NTO's Salesforce CRM.
- ☒ D. Create the segment, select Email as the activation target, and activate the segment directly to NTO.

Noti

Question 48 of 60

Choose 1 option.

Sales Order Date	DateTime
Sales Store	Text
SKU ID	Text
SKU Quantity	Number

How should a consultant work with this data?

- ☐ A. Ingest the file three times and create different primary keys for each source DLO.
- ☐ B. Create three batch data transforms so each batch transform only has one output DLO.
- ☒ C. Map the single DLO to standard DMOs with the correct attributes mapped to the primary key of each DMO.
- ☐ D. Create one batch data transform with one source DLO and three output DLOs.

Question 48 of 60

Choose 1 option.

Below is a sample of a .csv file that a company wants to ingest into Data Cloud.

Field Name	Field Type
Customer ID	Text
First Name	Text
Last Name	Text
Email	Text
Sales Order ID	Text
Sales Order Date	DateTime
Sales Store	Text
SKU ID	Text
SKU Quantity	Number

How should a consultant work with this data?

Question 47 of 60

Choose 1 option.

Northern Trail Outfitters uploads new customer data to an Amazon S3 Bucket on a daily basis to be ingested in Data Cloud. Based on this, a calculated insight is created that shows the total spend per customer in the last 30 days.

In which sequence should each process be run to ensure that freshly imported data is ready and available to use for any segment?

- ☒ A. Refresh Data Stream > Identity Resolution > Calculated Insight
- ☐ B. Identity Resolution > Refresh Data Stream > Calculated Insight
- ☐ C. Refresh Data Stream > Calculated Insight > Identity Resolution
- ☐ D. Calculated Insight > Refresh Data Stream > Identity Resolution

Ne

Lights

Question 46 of 60

Choose 1 option.

Cloud Kicks received a Request to be Forgotten by a customer.

In which way should a consultant use Data Cloud to honor this request?

- ☒ A. Use the Consent API to suppress processing and delete the individual and related records from source data streams.
- ☐ B. Delete the data from the incoming data stream and perform a full refresh.
- ☐ C. Use Data Explorer to locate and manually remove the Individual.
- ☐ D. Add the Individual ID to a headerless file and use the delete from file functionality.

Question 45 of 60

Choose 2 options.

A consultant is reviewing a recent activation using engagement-based related attributes but is not seeing any related attributes in their payload for the majority of their segment members.

Which two areas should the consultant review to help troubleshoot this issue?

- ☒ A. The correct path is selected for the related attributes.
- ☐ B. The activated profiles have a Unified Contact Point.
- ☒ C. The related engagement events occurred within the last 90 days.
- ☐ D. The related engagement events occurred within the last 24 months.

Question 44 of 60

Choose 1 option.

How does Data Cloud handle an individual's Right to be Forgotten?

- ☐ A. Deletes the specified Individual record and its Unified Individual Link record.
- ☐ B. Deletes the specified Individual and records from any data source object mapped to the Individual data model object.
- ☐ C. Deletes the records from all data source objects, and any downstream data model objects are updated at the next scheduled ingestion.
- ☒ D. Deletes the specified Individual and records from any data model object/data lake object related to the Individual.

Question 43 of 60

Choose 1 option.

An automotive dealership wants to implement Data Cloud.

What is a use case for Data Cloud's capabilities?

- ☐ A. Implement a full archive solution with version management.
- ☐ B. Build a source of truth for consent management across all unified individuals.
- ☐ C. Use browser cookies to track visitor activity on the website and display personalized recommendations.
- ☒ D. Ingest customer interaction across different touch points, harmonize, and build a data model for analytical reporting.

Question 42 of 60

Choose 1 option.

A company is seeking advice from a consultant on how to address the challenge of having multiple leads and contacts in Salesforce that share the same email address. The consultant wants to provide a detailed and comprehensive explanation on how Data Cloud can be leveraged to effectively solve this issue.

What should the consultant highlight to address this company's business challenge?

- ☐ A. Data Bundles
- ☐ B. Calculated Insights
- ☒ C. Identity Resolution
- ☐ D. Data Lake Objects

Question 41 of 60

Choose 2 options.

A customer has a requirement to be able to monitor its segmentation activity. They want to see things like the last time each segment was published, total population included in each segment, etc. within their Data Cloud org.

Which two features should the consultant recommend to best address this requirement?

- ☒ A. Report
- ☐ B. Calculated insights
- ☒ C. Dashboard
- ☐ D. Profile Explorer

Question 40 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) wants to send a promotional campaign for customers that have purchased within the past 6 months. The consultant created a segment to meet this requirement.

Now, NTO brings an additional requirement to suppress customers who have made purchases within the last week.

What should the consultant use to remove the recent customers?

- ☐ A. Related attributes
- ☐ B. Streaming insights
- ☒ C. Segmentation exclude rules
- ☐ D. Batch transforms

Question 39 of 60

Choose 1 option.

What should an organization use to stream inventory levels from an inventory management system into Data Cloud in a fast and scalable, near-real-time way?

- ☐ A. Cloud Storage Connector
- ☐ B. Commerce Cloud Connector
- ☒ C. Ingestion API
- ☐ D. Marketing Cloud Personalization Connector

Question 38 of 60

Choose 1 option.

Cumulus Financial (CF) wants to target loyal and engaged customers. When a platinum tier customer visits their investment pages more than three times in a 24-hour period, CF wants to immediately send an email that offers a private consultation.

What should a consultant recommend for this business requirement?

- ☒ A. Streaming insight with a data action into a journey in Marketing Cloud Engagement
- ☐ B. Standard segment with activation into Marketing Cloud Engagement
- ☐ C. Rapid segment to a data action journey in Marketing Cloud Engagement
- ☐ D. Calculated insight with a data action to a Marketing Cloud Engagement transactional email

Question 37 of 60

Choose 1 option.

Cloud Kicks plans to do a full deletion of one of its existing data streams and its underlying data lake object (DLO).

What should the consultant consider before deleting the data stream?

- ☒ A. The data stream can be deleted without implicitly deleting the underlying DLO.
- ☐ B. The underlying DLO can be used in a data transform.
- ☐ C. The data stream must be associated with a data kit.
- ☐ D. The underlying DLO cannot be mapped to a data model object.

Choose 1 option.

A financial services firm specializing in wealth management contacts a Data Cloud consultant with an identity resolution request. The company wants to enhance its strategy to better manage individual client profiles within family portfolios.

Family members often share addresses and sometimes phone numbers but have distinct investment preferences and financial goals. The firm aims to avoid blending individual family profiles into a single entity to maintain personalized service and accurate financial advice.

Which identity resolution strategy should the consultant put in place?

- ☐ A. Configure a single match rule with a single connected contact point based on address.
- ☐ B. Use multiple contact points without individual attributes in the match rules.
- ☒ C. Use a more restrictive design approach to ensure the match rules perform as desired.
- ☐ D. Configure a single match rule based on a custom identifier.

- ☐ C. Use a data action to send each ride as an event to Marketing Cloud Engagement, then use AMPscript to summarize this data in the email.
- ☐ D. Create five calculated insights for the activation and add dimension filters.

Question 35 of 60

Choose 1 option.

A rideshare company wants to send an email to customers that provides a year-in-review with five "fun" trip statistics, such as top destination, distance traveled, etc. This raw data arrives into Data Cloud and is not aggregated at source.

The company creates a segment of customers that had at least one ride in the last 365 days.

Following best practices, which solution should the consultant recommend in Data Cloud to personalize the content of the email?

- ☐ A. Include related attributes in the activation for the last 365 days.
- ☒ B. Use a data transform to aggregate the statistics and map them to direct attributes on Individual to include in the activation.
- ☐ C. Use a data action to send each ride as an event to Marketing Cloud Engagement, then use AMPscript to summarize this data in the email.

Question 34 of 60

Choose 1 option.

A consultant is preparing to implement Data Cloud.

Which ethic should the consultant adhere to regarding customer data?

- ☐ A. Collect and use all of the data to create more personalized experiences.
- ☐ B. Map sensitive data to the same DMO for ease of deletion.
- ☐ C. Allow senior leaders in the firm to access customer data for audit purposes.
- ☒ D. Carefully consider asking for sensitive data such as age, gender, or ethnicity.

Question 33 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) owns and operates six unique brands, each with their own set of customers, transactions, and loyalty information. The marketing director wants to ensure that segments and activations from the NTO Outlet brand do not reference customers or transactions from the other brands.

What is the most efficient approach to handle this requirement?

- ☐ A. Separate the Outlet brand into a data space.
- ☒ B. Use Business Unit Aware activation.
- ☐ C. Create a batch data transform to generate a DLO for the Outlet brand.
- ☐ D. Separate the brands into six different data spaces.

Question 32 of 60

Choose 1 option.

A user wants to be able to create a multi-dimensional metric to identify unified individual lifetime value (LTV).

Which sequence of data model object (DMO) joins is necessary within the calculated insight to enable this calculation?

- ☐ A. Unified Individual > Individual > Sales Order
- ☐ B. Sales Order > Individual > Unified Individual
- ☐ C. Sales Order > Unified Individual
- ☒ D. Unified Individual > Unified Link Individual > Sales Order

Question 31 of 60

Choose 2 options.

When trying to disconnect a data source an error will be generated if it has which two dependencies associated with it?

- ☐ A. Activation
- ☒ B. Data stream
- ☒ C. Activation target
- ☐ D. Segment

Question 30 of 60

Choose 1 option.

During an implementation project, a consultant completed ingestion of all data streams for their customer.

Prior to segmenting and acting on that data, which additional configuration is required?

- ☐ A. Data Activation
- ☐ B. Data Mapping
- ☐ C. Calculated Insights
- ☒ D. Identity Resolution to create a data graph

Question 29 of 60

Choose 1 option.

A consultant is ingesting a list of employees from their human resources database that they want to segment on.

Which data stream category should the consultant choose when ingesting this data?

- ☐ A. Engagement Data
- ☐ B. Contact Data
- ☒ C. Profile Data
- ☐ D. Other Data

Question 28 of 60

Choose 1 option.

A global fashion retailer operates online sales platforms across AMER, EMEA, and APAC. The data formats for customer, order, and product information vary by region, and compliance regulations require data to remain unchanged in the original data sources. They also require a unified view of customer profiles for real-time personalization and analytics.

Given these requirements, which transformation approach should the company implement to standardize and cleanse incoming data streams?

- ☐ A. Transform data before ingesting into Data Cloud.
- ☐ B. Use Apex to transform and cleanse data.
- ☐ C. Implement batch data transformations.
- ☒ D. Implement streaming data transformations.

Question 27 of 60

Choose 1 option.

Which operator should a consultant use to create a segment for a birthday campaign that is evaluated daily?

- ☐ A. Is Birthday
- ☐ B. Is Today
- ☐ C. Is Between
- ☒ D. Is Anniversary Of

Question 26 of 60

Choose 1 option.

A consultant is setting up Data Cloud for a multi-brand organization and is using data spaces to segregate its data for various brands. While starting the mapping of a data stream, the consultant notices that they cannot map the object for one of the brands.

What should the consultant do to make the object available for a new data space?

- ☐ A. Create a new data stream and map the second data stream to the data space.
- ☐ B. Create a batch transform to split data between different data spaces.
- ☐ C. Copy data from the default data space to a new DMO using the Data Copy feature and link this DMO to the new data space.
- ☒ D. Navigate to the Data Space tab and select the object to be included in the new data space.

N

Question 25 of 60

Choose 2 options.

What are the two minimum requirements needed when using the Visual Insights Builder to create a calculated insight?

- ☒ A. At least one measure
- ☒ B. At least one dimension
- ☐ C. At least two objects to join
- ☐ D. A WHERE clause

Choose 1 option.

Cumulus Financial segregates its sales CRM data based on Region for its Data Cloud users. Multiple data spaces are configured: a default space and two additional spaces tailored for EMEA and APAC regions.

EMEA sales reps who need temporary access to visualize data for both regions say that they cannot visualize APAC data. APAC sales reps can visualize the corresponding segmented data.

Which statement describes the cause of this issue?

- ☐ A. The APAC data space is not associated with any permission set.
- ☐ B. The EMEA sales reps have not been assigned to the profile associated with the APAC data space.
- ☐ C. The APAC data space is not associated with any profile.
- ☒ D. The EMEA sales reps have not been assigned to the permission set associated with the APAC data space.

Question 23 of 60

Choose 1 option.

What does the Ignore Empty Value option do in identity resolution?

- ☐ A. Ignores Contact Point object records with empty fields when running identity resolution rules.
- ☐ B. Ignores empty fields when running match rules
- ☐ C. Ignores Individual object records with empty fields when running identity resolution rules
- ☒ D. Ignores empty fields when running reconciliation rules

Question 22 of 60

Choose 2 options.

Northern Trail Outfitters (NTO) creates a calculated insight to compute recency, frequency, monetary (RFM) scores on its unified individuals. NTO then creates a segment based on these scores that it activates to a Marketing Cloud activation target.

Which two actions are required when configuring the activation?

- ☐ A. Add the calculated insight in the activation.
- ☒ B. Choose a segment.
- ☒ C. Select contact points.
- ☐ D. Add additional attributes.

Question 21 of 60

Choose 1 option.

When creating a segment on an individual, what is the result of using two separate containers linked by an AND as shown below?

GoodsProduct | Count | At Least | 1
Color | Is Equal To | red
AND
GoodsProduct | Count | At Least | 1
PrimaryProductCategory | Is Equal To | shoes

- ☐ A. Individuals who made a purchase of at least one 'red shoes' and nothing else
- ☐ B. Individuals who purchased at least one 'red shoes' as a single line item in a purchase
- ☒ C. Individuals who purchased at least one of any 'red' product and also purchased at least one pair of 'shoes'
- ☐ D. Individuals who purchased at least one of any 'red' product or purchased at least one pair of 'shoes'

Question 20 of 60

Choose 1 option.

A consultant at Northern Trail Outfitters is attempting to ingest a field from the Contact object in Salesforce CRM that contains both yyyy-mm-dd and yyyy-mm-dd hh:mm:ss values. The target field is set to Date datatype.

Which statement is true in this situation?

- ☐ A. The target field will be able to hold both types of values.
- ☐ B. The target field will only hold the time part and ignore the date part.
- ☐ C. The target field will throw an error and store null values.
- ☒ D. The target field will only hold the date part and ignore the time part.

Question 19 of 60

Choose 1 option.

A retailer wants to unify profiles using Loyalty ID which is different than the unique ID of their customers.

Which object should the consultant use in identity resolution to perform exact match rules on the Loyalty ID?

- ☐ A. Contact Identification object
- ☐ B. Loyalty Identification object
- ☐ C. Individual object
- ☒ D. Party Identification object

Question 18 of 60

Choose 2 options.

Northern Trail Outfitters wants to implement Data Cloud and has several use cases in mind.

Which two use cases are considered a good fit for Data Cloud?

- ☐ A. To eliminate the need for separate business intelligence and IT data management tools
- ☒ B. To use harmonized data to more accurately understand the customer and business impact
- ☐ C. To create and orchestrate cross-channel marketing messages
- ☒ D. To ingest and unify data from various sources to reconcile customer identity

Question 17 of 60

Choose 1 option.

A finance company that uses Data Cloud wants to simplify how its users can view all the various channels a customer engages with.

Which feature should the consultant recommend to meet this requirement?

- ☒ A. Use Data Cloud to connect with analytic tools, like Tableau.
- ☐ B. Create segments based on the ingested data and insights to activate in Marketing Cloud.
- ☐ C. Use Data Cloud to ingest data from various available data sources.
- ☐ D. Use calculated insights to determine when and how to engage with various customers.

Question 16 of 60

Choose 1 option.

A customer notices that their consolidation rate is low across their account unification. They have mapped Account to the Individual and Contact Point Email DMOs.

What should they do to increase their consolidation rate?

- ☐ A. Disable the individual identity ruleset.
- ☒ B. Increase the number of matching rules.
- ☐ C. Change reconciliation rules to Most Occurring.
- ☐ D. Update their account address details in the data source.

Question 15 of 60

Choose 1 option.

Data Cloud receives a nightly file of all ecommerce transactions from the previous day. Several segments and activations depend upon calculated insights from the updated data in order to maintain accuracy in the customer's scheduled campaign messages.

What should the consultant do to ensure the ecommerce data is ready for use for each of the scheduled activations?

- ☐ A. Ensure the segments are set to Rapid Publish and set to refresh every hour.
- ☐ B. Ensure the activations are set to Incremental Activation and automatically publish every hour.
- ☐ C. Set a refresh schedule for the calculated insights to occur every hour.
- ☒ D. Use Flow to trigger a change data event on the ecommerce data to refresh calculated insights and segments before the activations are scheduled to run.

Question 14 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) is configuring an identity resolution ruleset based on Fuzzy Name and Normalized Email.

What should NTO do to ensure the best email address is activated?

- ☐ A. Include Contact Point Email object Is Active field as a match rule.
- ☐ B. Set the default reconciliation rule to Last Updated.
- ☒ C. Use the source priority order in activations to make sure a contact point from the desired source is delivered to the activation target.
- ☐ D. Ensure Marketing Cloud is prioritized as the first data source in the Source Priority reconciliation rule.

Question 13 of 60

Choose 1 option.

What is the result of a segmentation criteria filtering on City | Is Equal To | 'San José'?

- ☐ A. Cities only containing 'San José' or 'san josé'
- ☐ B. Cities only containing 'San José' or 'San Jose'
- ☐ C. Cities containing 'San José', 'San Jose', 'san josé', or 'san jose'
- ☒ D. Cities only containing 'San Jose' or 'san jose'

Question 12 of 60

Choose 1 option.

How can a consultant modify attribute names to match a naming convention in Cloud File Storage targets?

- ☐ A. Update attribute names in the data stream configuration.
- ☐ B. Update field names in the data model object.
- ☐ C. Use a formula field to update the field name in an activation.
- ☒ D. Set preferred attribute names when configuring activation.

Question 10 of 60

Choose 1 option.

A customer is concerned that the consolidation rate displayed in the identity resolution is quite low. Which configuration change should a consultant consider in order to increase the consolidation rate?

Which configuration change should a consultant consider in order to increase the consolidation rate?

- ☐ A. Include additional attributes in the existing matching rules.
- ☒ B. Increase the number of matching rules.
- ☐ C. Change reconciliation rules to Most Occuring.
- ☐ D. Reduce the number of matching rules.

Question 10 of 60

Choose 1 option.

The Salesforce CRM Connector is configured and the Case object data stream is set up. Subsequently, a new custom field named Business Priority is created on the Case object in Salesforce CRM. However, the new field is not available when trying to add it to the data stream.

Which statement addresses the cause of this issue?

- ☐ A. After 24 hours when the data stream refreshes, it will automatically include any new fields that were added to the Salesforce CRM.
- ☒ B. The Salesforce Integration User is missing Read permissions on the newly created field.
- ☐ C. Custom fields on the Case object are not supported for ingesting into Data Cloud.
- ☐ D. The Salesforce Data Loader application should be used to perform a bulk upload from a desktop.

No

Question 9 of 60

Choose 1 option.

A consultant is building a segment to announce a new product launch for customers that have previously purchased black pants.

How should the consultant place the attributes for product color and product type from the Order Product object to meet this criteria?

- ☐ A. Place the attribute for product color in one container and the attribute for product type in another container.
- ☐ B. Place an attribute for the "black pants" calculated insight to dynamically apply.
- ☐ C. Place the attributes for product color and product type as direct attributes.
- ☒ D. Place the attributes for product color and product type in a single container.

Question 8 of 60

Choose 2 options.

A consultant is working in a customer's Data Cloud org and is asked to delete the existing identity resolution ruleset.

Which two impacts should the consultant communicate as a result of this action?

- ☐ A. All individual data will be removed.
- ☐ B. All source profile data will be removed.
- ☒ C. Unified customer data associated with this ruleset will be removed.
- ☒ D. Dependencies on data model objects will be removed.

Question 7 of 60

Choose 1 option.

Cumulus Financial uses Data Cloud to segment banking customers and activate them for direct mail via a Cloud File Storage activation. The company also wants to analyze individuals who have been in the segment within the last 2 years.

Which Data Cloud component allows for this?

- ☐ A. Nested segments
- ☒ B. Segment membership data model object
- ☐ C. Calculated insights
- ☐ D. Segment exclusion

Question 6 of 60

Choose 1 option.

Cloud Kicks wants to be able to build a segment of customers who have visited its website within the previous 7 days.

Which filter operator on the EngagementDate field fits this use case?

- ☐ A. Next Number of Days
- ☐ B. Is Between
- ☒ C. Last Number of Days
- ☐ D. Greater than Last Number of Days

Question 5 of 60

Choose 1 option.

During discovery, which feature should a consultant highlight for a customer who has multiple data sources and needs to match and reconcile data about individuals into a single unified profile?

- ☐ A. Data Consolidation
- ☒ B. Identity Resolution
- ☐ C. Data Cleansing
- ☐ D. Harmonization

Question 5 of 60

Choose 1 option.

During discovery, which feature should a consultant highlight for a customer who has multiple data sources and needs to match and reconcile data about individuals into a single unified profile?

- ☐ A. Data Consolidation
- ☒ B. Identity Resolution
- ☐ C. Data Cleansing
- ☐ D. Harmonization

Question 4 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) wants to connect their B2C Commerce data with Data Cloud and bring two years of transactional history into Data Cloud.

What should NTO use to achieve this?

- ☐ A. Direct Sales Product entity ingestion
- ☒ B. B2C Commerce Starter Bundles plus a custom extract
- ☐ C. B2C Commerce Starter Bundles
- ☐ D. Direct Sales Order entity ingestion

Question 3 of 60

Choose 1 option.

What is a key functionality of Data Cloud?

- ☒ A. To build insights on unified profiles
- ☐ B. To create a master data management (MDM) strategy
- ☐ C. To help users build a heat map using their data
- ☐ D. To give a persistent ID for unified profiles

Question 2 of 60

Choose 1 option.
