

Question 1 of 60

Choose 1 option.

A consultant is setting up Data Cloud for a multi-brand organization and is using data spaces to segregate its data for various brands. While starting the mapping of a data stream, the consultant notices that they cannot map the object for one of the brands.

What should the consultant do to make the object available for a new data space?

- ☐ A. Create a batch transform to split data between different data spaces.
- ☐ B. Copy data from the default data space to a new DMO using the Data Copy feature and link this DMO to the new data space.
- ☒ C. Navigate to the Data Space tab and select the object to be included in the new data space.
- ☐ D. Create a new data stream and map the second data stream to the data space.

Choose 1 option.

Northern Trail Outfitters (NTO) wants to send a promotional campaign for customers that have purchased within the past 6 months. The consultant created a segment to meet this requirement.

Now, NTO brings an additional requirement to suppress customers who have made purchases within the last week.

What should the consultant use to remove the recent customers?

- ☐ A. Streaming insights
- ☐ B. Batch transforms
- ☐ C. Related attributes
- ☒ D. Segmentation exclude rules
