

Salesforce Certified Data Cloud Consultant

1. Which two common use cases can be addressed with Data Cloud?

- A. Understand and act upon customer data to drive more relevant experiences.
- B. Govern enterprise data lifecycle through a centralized set of policies and processes.
- C. Safeguard critical business data by serving as a centralized system for backup and disaster recovery.
- D. Harmonize data from multiple sources with a standardized and extendable data model.

2. What is a reason to create a formula when ingesting a data stream?

- A. To transform a datetime field into a date field for use in data mapping
- B. To remove duplicate rows of data from the data stream
- C. To add a unique external identifier to an existing ruleset
- D. To concatenate files so they are ingested in the correct sequence

3. A consultant wants to build a new audience in Data Cloud.

Which three criteria can the consultant include when building a segment?

- A. Streaming insights
- B. Direct attributes
- C. Data stream attributes
- D. Related attributes
- E. Calculated insights

4. Cumulus Financial is currently using Data Cloud and ingesting transactional data from its backend system via an S3 Connector in upset mode. During the initial setup six months ago, the company created a formula field in Data Cloud to create a custom classification. It now needs to update this formula to account for more classifications.

What should the consultant keep in mind with regard to formula field updates when using the S3 Connector?

- A. Data Cloud will initiate a full refresh of data from S3 and will update the formula on all records.
- B. Data Cloud does not support formula field updates for data streams of type upset.
- C. Data Cloud will only update the formula on a go-forward basis for new records.

D. Data Cloud will update the formula for all records at the next incremental upset refresh.

5. The marketing manager at Cloud Kicks plans to bring in corporate phone numbers for its accounts into Data Cloud. They plan to use a custom field with data type set to Phone to store these phone numbers.

Which statement is true when ingesting phone numbers?

A. Text value can be accepted for ingestion into a phone data type field.

B. The phone number field should be used as a primary key.

C. The phone number field can only accept 10-digit values.

D. Data Cloud validates the format of the phone number at the time of ingestion.

6. A user is not seeing suggested values from newly-modeled data when building a segment.

What is causing this issue?

A. Value suggestion requires Data Aware Specialist permissions at a minimum.

B. Value suggestion is still processing and takes up to 24 hours to be available.

C. Value suggestion can only work on direct attributes and not related attributes.

D. Value suggestion will only return results for the first 50 values of a specific attribute.

7. A customer wants to create segments of users based on their Customer Lifetime Value. However, the source data that will be brought into Data Cloud does not include that key performance indicator (KPI).

Which sequence of steps should the consultant follow to achieve this requirement?

A. Ingest Data > Create Calculated Insight > Map Data to Data Model > Use in Segmentation

B. Ingest Data > Map Data to Data Model > Create Calculated Insight > Use in Segmentation

C. Create Calculated Insight > Map Data to Data Model > Ingest Data > Use in Segmentation

D. Create Calculated Insight > Ingest Data > Map Data to Data Model > Use in Segmentation

8. A consultant needs to publish segment data to the Audience DMO that can be retrieved using the Query APIs.

When creating the activation target, which type of target should the consultant select?

A. External Activation Target

B. Data Cloud

C. Marketing Cloud Personalization

D. Marketing Cloud

9. Northern Trail Outfitters (NTO) asks its Data Cloud consultant for a list of contacts who fit within a certain segment for a direct mail campaign.

How should the consultant provide this list to NTO?

A. Create a new file storage activation target, create the segment, and then activate the segment to the new activation target.

B. Create the segment and then activate the segment to NTO's Salesforce CRM.

C. Create the segment and then click Download to obtain the segment membership details to provide to NTO.

D. Create the segment, select Email as the activation target, and activate the segment directly to NTO.

10. Northern Trail Outfitters unifies individuals in its Data Cloud instance.

Which two features can the consultant use to validate the data on a specific unified profile?

A. Profile Explorer

B. Data Actions

C. Identity Resolution

D. Query API

11. Data Cloud receives a nightly file of all ecommerce transactions from the previous day. Several segments and activations depend upon calculated insights from the updated data in order to maintain accuracy in the customer's scheduled campaign messages.

What should the consultant do to ensure the ecommerce data is ready for use for each of the scheduled activations?

A. Set a refresh schedule for the calculated insights to occur every hour.

B. Use Flow to trigger a change data event on the ecommerce data to refresh calculated insights and segments before the activations are scheduled to run.

C. Ensure the activations are set to Incremental Activation and automatically publish every hour.

D. Ensure the segments are set to Rapid Publish and set to refresh every hour.

12. Northern Trail Outfitters (NTO) wants to connect their B2C Commerce data with Data Cloud and bring two years of transactional history into Data Cloud.

What should NTO use to achieve this?

A. Direct Sales Order entity ingestion

B. B2C Commerce Starter Bundles plus a custom extract

C. Direct Sales Product entity ingestion

D. B2C Commerce Starter Bundles

13. A retailer wants to unify profiles using Loyalty ID which is different than the unique ID of their customers.

Which object should the consultant use in identity resolution to perform exact match rules on the Loyalty ID?

- A. Party Identification object
- B. Contact Identification object
- C. Loyalty Identification object
- D. Individual object

14. What does the Source Sequence reconciliation rule do in identity resolution?

- A. Identifies which individual records should be merged into a unified profile by setting a priority for specific data sources
- B. Identifies which data sources should be used in the process of reconciliation by prioritizing the most recently updated data source
- C. Sets the priority of specific data sources when building attributes in a unified profile, such as a first or last name
- D. Includes data from sources where the data is most frequently occurring

15. A consultant needs to create a data graph based on several DLOs.

Which step should the consultant take to make this work?

- A. Batch transform the DLOs to multiple DMOs and activate these with the data graph.
- B. Use a data action to update the data graph with the DLO data.
- C. Map the DLOs directly to a data graph.
- D. Map the DLOs to DMOs and use these in the data graph.

16. What is the primary purpose of Data Cloud?

- A. Analyzing marketing data results
- B. Managing sales cycles and opportunities
- C. Integrating and unifying customer data
- D. Providing a golden record of a customer

17. Every day, Northern Trail Outfitters uploads a summary of the last 24 hours of store transactions to a new file in an Amazon S3 bucket, and files older than seven days are automatically deleted. Each file contains a timestamp in a standardized naming convention.

Which two options should a consultant configure when ingesting this data stream?

- A. Ensure the refresh mode is set to "Upsert".
- B. Ensure the refresh mode is set to "Full Refresh".
- C. Ensure the filename contains a wildcard to accommodate the timestamp.
- D. Ensure that deletion of old files is enabled.

18. A consultant is working in a customer's Data Cloud org and is asked to delete the existing identity resolution ruleset.

Which two impacts should the consultant communicate as a result of this action?

- A. Unified customer data associated with this ruleset will be removed.
- B. All individual data will be removed.
- C. Dependencies on data model objects will be removed.
- D. All source profile data will be removed.

19. Cumulus Financial created a segment called Multiple Investments that contains individuals who have invested in two or more mutual funds.

The company plans to send an email to this segment regarding a new mutual fund offering, and wants to personalize the email content with information about each customer's current mutual fund investments.

How should the Data Cloud consultant configure this activation?

- A. Include Fund Type equal to "Mutual Fund" as a related attribute. Configure an activation based on the new segment with no additional attributes.
- B. Choose the Multiple Investments segment, choose the Email contact point, and add related attribute Fund Type.
- C. Choose the Multiple Investments segment, choose the Email contact point, add related attribute Fund Name, and add related attribute filter for Fund Type equal to "Mutual Fund".

20. During a privacy law discussion with a customer, the customer indicates they need to honor requests for the right to be forgotten. The consultant determines that Consent API will solve this business need.

Which two considerations should the consultant inform the customer about?

- A. Data deletion requests are reprocessed at 30, 60, and 90 days.
- B. Data deletion requests submitted to Data Cloud are passed to all connected Salesforce clouds.
- C. Data deletion requests are submitted for Individual profiles.
- D. Data deletion requests are processed within 1 hour.

21. A healthcare client wants to make use of identity resolution, but does not want to risk unifying profiles that may share certain personally identifying information (PII).

Which matching rule criteria should a consultant recommend for the most accurate matching results?

A. Exact Last Name and Email

B. Party Identification on Patient ID

C. Email Address and Phone

D. Fuzzy First Name, Exact Last Name, and Email

22. A consultant has an activation that is set to publish every 12 hours, but has discovered that updates to the data prior to activation are delayed by up to 24 hours.

Which two areas should a consultant review to troubleshoot this issue?

A. Review data transformations to ensure they're run after calculated insights.

B. Review calculated insights to make sure they're run before segments are refreshed.

C. Review calculated insights to make sure they're run after the segments are refreshed.

D. Review segments to ensure they're refreshed after the data is ingested.

23. Which information is provided in a .csv file when activating to Amazon S3?

A. The metadata regarding the segment definition

B. The manifest of origin sources within Data Cloud

C. An audit log showing the user who activated the segment and when it was activated

D. The activated data payload

25. A customer requests that their personal data be deleted.

Which action should the consultant take to accommodate this request in Data Cloud?

A. Use Profile Explorer to delete the customer data from Data Cloud.

B. Use Consent API to request deletion of the customer's information.

C. Use the Data Rights Subject Request tool to request deletion of the customer's information.

D. Use a streaming API call to delete the customer's information.

26. What is the role of artificial intelligence (AI) in Data Cloud?

A. Enhancing customer interactions through insights and predictions

B. Automating data validation

C. Creating dynamic data-driven management dashboards

D. Generating email templates for use cases

27. What is a typical use case for Salesforce Data Cloud?

A. Storing CRM data on-premises

B. Data synchronization across the Salesforce ecosystem

C. Sending personalized emails at scale

D. Data harmonization across multiple platforms

28. Cumulus Financial uses Service Cloud as its CRM and stores mobile phone, home phone, and work phone as three separate fields for its customers on the Contact record. The company plans to use Data Cloud and ingest the Contact object via the CRM Connector.

What is the most efficient approach that a consultant should take when ingesting this data to ensure all the different phone numbers are properly mapped and available for use in activation?

A. Ingest the Contact object and then create a calculated insight to normalize the phone numbers, and then map to the Contact Point Phone data map object.

B. Ingest the Contact object and use streaming transforms to normalize the phone numbers from the Contact data stream into a separate Phone data lake object (DLO) that contains three rows, and then map this new DLO to the Contact Point Phone data map object.

C. Ingest the Contact object and create formula fields in the Contact data stream on the phone numbers, and then map to the Contact Point Phone data map object.

29. Northern Trail Outfitters wants to use some of its Marketing Cloud data in Data Cloud.

Which engagement channel data will require custom integration?

A. CloudPage

B. Email

C. Mobile push

D. SMS

30. A customer has outlined requirements to trigger a journey for an abandoned browse behavior. Based on the requirements, the consultant determines they will use streaming insights to trigger a data action to Journey Builder every hour.

How should the consultant configure the solution to ensure the data action is triggered at the cadence required?

A. Set the journey entry schedule to run every hour.

B. Set the insights aggregation time window to 1 hour.

C. Configure the data to be ingested in hourly batches.

D. Set the activation schedule to hourly.

31. A global fashion retailer operates online sales platforms across AMER, EMEA, and APAC. The data formats for customer, order, and product information vary by region, and compliance regulations require data to remain unchanged in the original data sources. They also require a unified view of customer profiles for real-time personalization and analytics.

Given these requirements, which transformation approach should the company implement to standardize and cleanse incoming data streams?

A. Use Apex to transform and cleanse data.

B. Implement batch data transformations.

C. Implement streaming data transformations.

D. Transform data before ingesting into Data Cloud.

32. A marketing manager at Northern Trail Outfitters wants to improve marketing return on investment (ROI) by tapping into insights from Data Cloud Segment Intelligence.

Which permission set does a user need to set this up?

A. Data Cloud User

B. Data Cloud Admin

C. Data Cloud Marketing Manager

D. Data Cloud Data Aware Specialist

33. Which operator should a consultant use to create a segment for a birthday campaign that is evaluated daily?

A. Is Anniversary Of

B. Is Birthday

C. Is Today

D. Is Between

34. A consultant is helping a travel company ingest its profile data into Data Cloud. The company's source data includes several fields, such as preferred car type, preferred airline, and favorite destination, that are not fields in the standard Individual data model object (DMO).

What should the consultant recommend to map this data to be used for both segmentation and identity resolution?

A. Create a custom DMO from scratch that has all fields that are needed.

B. Create custom fields on the standard Individual DMO.

C. Duplicate the standard Individual DMO and add the additional fields.

D. Create a custom DMO with only the additional fields and map it to the standard Individual DMO.

35. A user has built a segment in Data Cloud and is in the process of creating an activation. When selecting related attributes, they cannot find a specific set of attributes they know to be related to the individual.

Which statement explains why these attributes are not available?

A. The desired attributes reside on different related paths.

B. Activations can only include 1-to-1 attributes.

C. The segment is not segmenting on profile data.

D. The attributes are being used in another activation.

36. Northern Trail Outfitters (NTO) is getting ready to start ingesting its CRM data into Data Cloud.

While setting up the connector, which type of refresh should NTO expect when the data stream is deployed for the first time?

A. Partial refresh

B. Manual refresh

C. Full refresh

D. Incremental refresh

37. A customer notices that their consolidation rate is low across their account unification. They have mapped Account to the Individual and Contact Point Email DMOs.

What should they do to increase their consolidation rate?

A. Increase the number of matching rules.

B. Update their account address details in the data source.

C. Change reconciliation rules to Most Occurring.

D. Disable the individual identity ruleset.

38. How should a Data Cloud consultant successfully apply consent during segmentation?

A. Include the Consent Status for any applicable channels of engagement in the filter criteria for each segment.

B. Include the Unified Profile during segmentation for any applicable channels of engagement.

C. Include Party Identification for any applicable channels of engagement in the filter criteria for each segment.

D. Include the Consent Status from the golden record during activation for any applicable channels of engagement.

39. Which two requirements must be met for a calculated insight to appear in the segmentation canvas?

- A. The primary key of the segmented table must be a dimension in the calculated insight.
- B. The metrics of the calculated insights must only contain numeric values.
- C. The calculated insight must contain a dimension including the Individual or Unified Individual Id.
- D. The primary key of the segmented table must be a metric in the calculated insight.

40. Cumulus Financial uses Data Cloud to segment banking customers and activate them for direct mail via a Cloud File Storage activation. The company also wants to analyze individuals who have been in the segment within the last 2 years.

Which Data Cloud component allows for this?

- A. Nested segments
- B. Calculated insights
- C. Segment exclusion
- D. Segment membership data model object

41. Which method should a consultant use when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK or Mobile SDK?

- A. Streaming insight
- B. Formula fields
- C. Calculated insight
- D. Batch transform

42. Northern Trail Outfitters (NTO), an outdoor lifestyle clothing brand, recently started a new line of business. The new business specializes in gourmet camping food. For business reasons as well as security reasons, it's important to NTO to keep all Data Cloud data separated by brand.

Which capability best supports NTO's desire to separate its data by brand?

- A. Data spaces for each brand
- B. Data model objects for each brand
- C. Data streams for each brand
- D. Data sources for each brand

43. Luxury Retailers created a segment targeting high value customers that it activates through Marketing Cloud for email communication. The company notices that the activated count is smaller than the segment count.

What is a reason for this?

A. Marketing Cloud activations only activate those individuals that already exist in Marketing Cloud. They do not allow activation of new records.

B. Marketing Cloud activations apply a frequency cap and limit the number of records that can be sent in an activation.

C. Data Cloud enforces the presence of Contact Point for Marketing Cloud activations. If the individual does not have a related Contact Point, it will not be activated.

D. Marketing Cloud activations automatically suppress individuals who are unengaged and have not opened or clicked on an email in the last six months.

44. A consultant needs to minimize the difference between a Data Cloud segment population and Marketing Cloud data extension count to determine the true size of segments for campaign planning.

What should the consultant recommend to filter the segments by to accomplish this?

A. User preferences for marketing outreach

B. Marketing Cloud Journeys

C. Geographical divisions

D. Business units

45. Northern Trail Outfitters is using the Marketing Cloud Starter Data Bundles to bring Marketing Cloud data into Data Cloud.

What are two of the available datasets in Marketing Cloud Starter Data Bundles?

A. MobileConnect

B. Loyalty Management

C. MobilePush

D. Personalization

46. A customer wants to use the transactional data from their data warehouse in Data Cloud. They are only able to export the data via an SFTP site.

How should the file be brought into Data Cloud?

A. Digest the file with the SFTP Connector.

B. Use Salesforce's Databader application to perform a bulk upload from a desktop.

C. Digest the file through the Cloud Storage Connector.

D. Manually import the file using the Data Import Wizard.

47. Northern Trail Outfitters uploads new customer data to an Amazon S3 Bucket on a daily basis to be ingested in Data Cloud. Based on this, a calculated insight is created that shows the total spend per customer in the last 30 days.

In which sequence should each process be run to ensure that freshly imported data is ready and available to use for any segment?

- A. Refresh Data Stream > Identity Resolution > Calculated Insight
- B. Identify Resolution > Refresh Data Stream > Calculated Insight
- C. Calculated Insight > Refresh Data Stream > Identity Resolution
- D. Refresh Data Stream > Calculated Insight > Identity Resolution

48. Which two dependencies prevent a data stream from being deleted?

- A. The underlying data lake object is mapped to a data model object.
- B. The underlying data lake object is used in segmentation.
- C. The underlying data lake object is used in activation.
- D. The underlying data lake object is used in a data transform.

49. A customer is concerned that the consolidation rate displayed in the identity resolution is quite low compared to their initial estimations.

Which configuration change should a consultant consider in order to increase the consolidation rate?

- A. Include additional attributes in the existing matching rules.
- B. Change reconciliation rules to Most Occuring.
- C. Increase the number of matching rules.
- D. Reduce the number of matching rules.

50. How does identity resolution select attributes for unified individuals when there is conflicting information in the data model?

- A. Leverages reconciliation rules
- B. Creates additional rulesets
- C. Creates additional contact points
- D. Leverages match rules

51. The leadership team at Cumulus Financial has determined that customers who deposited more than \$250,000 in the last five years and are not using advisory services will be the central focus for all new campaigns in the next year.

Which features support this use case?

- A. Streaming insight and segment
- B. Calculated insight and data action
- C. Streaming insight and data action
- D. Calculated insight and segment**

52. A Data Cloud consultant is working with data that is clean and organized. However, the various schemas refer to a person by multiple names – such as user, contact, and subscriber – and need a standard mapping.

Which term describes the process of mapping these different schema points into a standard data model?

- A. Unify
- B. Harmonize**
- C. Transform
- D. Segment

53. Which data stream category type should be assigned in order to use the dataset for date and time-based operations in segmentation and calculated insights?

- A. Sales Order
- B. Engagement
- C. Individual
- D. Profile**

54. Which statement about Data Cloud's Web and Mobile Application Connector is true?

- A. A standard schema containing event, profile, and transaction data is created at the time the connector is configured.
- B. The Tenant Specific Endpoint is auto-generated in Data Cloud when setting the connector.**
- C. The connector schema can be updated to delete an existing field.
- D. Any data streams associated with the connector will be automatically deleted upon deleting the app from Data Cloud Setup.

55. A Data Cloud consultant recently discovered that their identity resolution process is matching individuals that share email addresses or phone numbers, but are not actually the same individual.

What should the consultant do to address this issue?

- A. Modify the existing ruleset to use fewer matching rules, run the ruleset and review the updated results, then adjust as needed until the individuals are matching correctly.

B. Create and run a new ruleset with stricter matching criteria, compare the two rulesets to review and verify the results, and then migrate to the new ruleset once approved.

C. Modify the existing ruleset with stricter matching criteria, run the ruleset and review the updated results, then adjust as needed until the individuals are matching correctly.

D. Create and run a new ruleset with fewer matching rules, compare the two rulesets to review and verify the results, and then migrate to the new ruleset once approved.

56. Northern Trail Outfitters wants to create a segment with customers that have purchased in the last 24 hours. The segment data must be as up to date as possible.

What should the consultant implement when creating the segment?

A. Use streaming insights for near real-time segmentation results.

B. Use rapid segments with a publish interval of 1 hour.

C. Use standard segment with a publish interval of 30 minutes.

D. Use Einstein segmentation optimization to collect data from the last 24 hours.

57. An analyst from Cloud Kicks needs to get quick insights to determine the average sales per day during the past week.

What should a consultant recommend?

A. Salesforce reports

B. Segment activation to Azure

C. Lightning web component utilizing Query API

D. Salesforce flows

58. A consultant at Northern Trail Outfitters is implementing Data Cloud and creating an activation target for their segment.

For activation membership, which object should the consultant choose?

A. Data Model Object

B. Data Activation Object

C. Data Segmentation Object

D. Data Lake Object

59. A retail customer wants to bring customer data from different sources and wants to take advantage of identity resolution so that it can be used in segmentation.

On which entity should this be segmented for activation membership?

A. Unified Contact

B. Individual

C. Unified Individual

D. Subscriber

60. Cumulus Financial created a segment called High Investment Balance Customers. This is a foundational segment that includes several segmentation criteria the marketing team should consistently use.

Which feature should the consultant suggest the marketing team use to ensure this consistency when creating future, more refined segments?

A. Create new segments by cloning High Investment Balance Customers.

B. Package High Investment Balance Customers in a data kit.

C. Create new segments using nested segments.

D. Create a High Investment Balance calculated insight.

61. A customer has a Master Customer table from their CRM to ingest into Data Cloud. The table contains a name and primary email address, along with other personally identifiable information (PII).

How should the fields be mapped to support identity resolution?

A. Create a new custom object with fields that directly match the incoming table.

B. Map name to the Individual object and email address to the Contact Point Email object.

C. Map all fields to the Individual object, adding a custom field for the email address.

D. Map all fields to the Customer object.

62. Cumulus Financial (CF) wants to target loyal and engaged customers. When a platinum tier customer visits their investment pages more than three times in a 24-hour period, CF wants to immediately send an email that offers a private consultation.

What should a consultant recommend for this business requirement?

A. Calculated insight with a data action to a Marketing Cloud Engagement transactional email

B. Streaming insight with a data action into a journey in Marketing Cloud Engagement

C. Standard segment with a data action into Marketing Cloud Engagement

D. Rapid segment to a data action journey in Marketing Cloud Engagement

63. A customer has a requirement to be able to monitor its segmentation activity. They want to see things like the last time each segment was published, total population included in each segment, etc. within their Data Cloud org.

Which two features should the consultant recommend to best address this requirement?

A. Dashboard

B. Profile Explorer

C. Report

D. Calculated insights

64. A customer has a custom Customer_Email__c object related to the standard Contact object in Salesforce CRM. This custom object stores the email address for a Contact that they want to use for activation.

To which data entity is this mapped?

A. Custom Customer_Email__c object

B. Individual

C. Contact

D. Contact Point Email

65. Cumulus Financial is experiencing delays in publishing multiple segments simultaneously. The company wants to avoid reducing the frequency at which segments are published, while retaining the same segments in place today.

Which action should a consultant take to alleviate this issue?

A. Enable rapid segment publishing to all segments to reduce segment generation time.

B. Increase the Data Cloud segmentation concurrency limit.

C. Reduce the number of segments being published.

D. Adjust the publish schedule start time of each segment to prevent overlapping processes.

66. Which permission setting should a consultant check if the custom Salesforce CRM object is not available in New Data Stream configuration?

A. Confirm the Create Object permission is enabled in the Data Cloud org.

B. Confirm the View All object permission is enabled in the source Salesforce CRM org.

C. Confirm that the Modify Object permission is enabled in the Data Cloud org.

D. Confirm the Digest Object permission is enabled in the Salesforce CRM org.

67. How can a consultant modify attribute names to match a naming convention in Cloud File Storage targets?

A. Update field names in the data model object.

B. Use a formula field to update the field name in an activation.

C. Set preferred attribute names when configuring activation.

D. Update attribute names in the data stream configuration.

68. A consultant is building a segment to announce a new product launch for customers that have previously purchased black pants.

How should the consultant place the attributes for product color and product type from the Order Product object to meet this criteria?

- A. Place the attributes for product color and product type as direct attributes.
- B. Place the attribute for product color in one container and the attribute for product type in another container.
- C. Place an attribute for the "black pants" calculated insight to dynamically apply.
- D. Place the attributes for product color and product type in a single container.

69. Field Name	Field Type
----------------	------------

Customer ID	Text
-------------	------

First Name	Text
------------	------

Last Name	Text
-----------	------

Email	Text
-------	------

Sales Order ID	Text
----------------	------

Sales Order Date	DateTime
------------------	----------

Sales Store	Text
-------------	------

SKU ID	Text
--------	------

SKU Quantity	Number
--------------	--------

How should a consultant work with this data?

- A. Create one batch data transform with one source DLO and three output DLOs.
- B. Create three batch data transforms so each batch transform only has one output DLO.
- C. Digest the file three times and create different primary keys for each source DLO.
- D. Map the single DLO to standard DMOs with the correct attributes mapped to the primary key of each DMO.

70. A finance company that uses Data Cloud wants to simplify how its users can view all the various channels a customer engages with.

Which feature should the consultant recommend to meet this requirement?

- A. Use calculated insights to determine when and how to engage with various customers.

B. Use Data Cloud to ingest data from various available data sources.

C. Use Data Cloud to connect with analytic tools, like Tableau.

D. Create segments based on the ingested data and insights to activate in Marketing Cloud.

71. What is a key functionality of Data Cloud?

A. To build insights on unified profiles

B. To give a persistent ID for unified profiles

C. To create a master data management (MDM) strategy

D. To help users build a heat map using their data

72. A Data Cloud consultant is evaluating the initial phase of the Data Cloud lifecycle for a company.

Which action is essential to effectively begin the Data Cloud lifecycle?

A. Use calculated insights to determine the benefits of Data Cloud for this company.

B. Analyze and logically partition the data into data spaces.

C. Migrate the existing data into the Customer 360 Data Model.

D. Identify use cases and the required data sources and data quality.

73. During discovery, which feature should a consultant highlight for a customer who has multiple data sources and needs to match and reconcile data about individuals into a single unified profile?

A. Data Cleansing

B. Data Consolidation

C. Harmonization

D. Identity Resolution

74. What are the two minimum requirements needed when using the Visual Insights Builder to create a calculated insight?

A. At least one measure

B. At least two objects to join

C. At least one dimension

D. A WHERE clause

75. Northern Trail Outfitters (NTO) creates a calculated insight to compute recency, frequency, monetary (RFM) scores on its unified individuals. NTO then creates a segment based on these scores that it activates to a Marketing Cloud activation target.

Which two actions are required when configuring the activation?

- A. Add additional attributes.
- B. Add the calculated insight in the activation.
- C. Choose a segment.
- D. Select contact points.

76. During an implementation project, a consultant completed ingestion of all data streams for their customer.

Prior to segmenting and acting on that data, which additional configuration is required?

- A. Data Activation
- B. Identity Resolution to create a data graph
- C. Data Mapping
- D. Calculated Insights

77. Northern Trail Outfitters (NTO) wants to send a promotional campaign for customers that have purchased within the past 6 months. The consultant created a segment to meet this requirement.

Now, NTO brings an additional requirement to suppress customers who have made purchases within the last week.

What should the consultant use to remove the recent customers?

- A. Batch transforms
- B. Segmentation exclude rules
- C. Streaming insights
- D. Related attributes

78. What should a user do to pause a segment activation with the intent of using that segment again?

- A. Stop the publish schedule.
- B. Delete the segment.
- C. Skip the activation.
- D. Deactivate the segment.

79. A financial services firm specializing in wealth management contacts a Data Cloud consultant with an identity resolution request. The company wants to enhance its strategy to better manage individual client profiles within family portfolios.

Family members often share addresses and sometimes phone numbers but have distinct investment preferences and financial goals. The firm aims to avoid blending individual family profiles into a single entity to maintain personalized service and accurate financial advice.

Which identity resolution strategy should the consultant put in place?

A. Configure a single match rule with a single connected contact point based on address.

B. Use a more restrictive design approach to ensure the match rules perform as desired.

C. Configure a single match rule based on a custom identifier.

D. Use multiple contact points without individual attributes in the match rules.

80. A consultant notices that the unified individual profile is not storing the latest email address.

Which action should the consultant take to troubleshoot this issue?

A. Check if the mapping of DLO objects is correct to Contact Point Email.

B. Remove any old email addresses from Salesforce CRM.

C. Confirm that the reconciliation rules are correctly used.

D. Verify and update the email address in the source systems if needed.

81. What does the Ignore Empty Value option do in identity resolution?

A. Ignores empty fields when running match rules

B. Ignores Contact Point object records with empty fields when running identity resolution rules.

C. Ignores Individual object records with empty fields when running identity resolution rules

D. Ignores empty fields when running reconciliation rules

82. Northern Trail Outfitters (NTO) owns and operates six unique brands, each with their own set of customers, transactions, and loyalty information. The marketing director wants to ensure that segments and activations from the NTO Outlet brand do not reference customers or transactions from the other brands.

What is the most efficient approach to handle this requirement?

A. Separate the brands into six different data spaces.

B. Separate the Outlet brand into a data space.

C. Create a batch data transform to generate a DLO for the Outlet brand.

D. Use Business Unit Aware activation.

83. A user wants to be able to create a multi-dimensional metric to identify unified individual lifetime value (LTV).

Which sequence of data model object (DMO) joins is necessary within the calculated insight to enable this calculation?

A. Unified Individual > Unified Link Individual > Sales Order

B. Sales Order > Individual > Unified Individual

C. Unified Individual > Individual > Sales Order

D. Sales Order > Unified Individual

84. Cloud Kicks plans to do a full deletion of one of its existing data streams and its underlying data lake object (DLO).

What should the consultant consider before deleting the data stream?

A. The underlying DLO cannot be mapped to a data model object.

B. The data stream must be associated with a data kit.

C. The underlying DLO can be used in a data transform.

D. The data stream can be deleted without implicitly deleting the underlying DLO.

85. Northern Trail Outfitters (NTO) is configuring an identity resolution ruleset based on Fuzzy Name and Normalized Email.

What should NTO do to ensure the best email address is activated?

A. Set the default reconciliation rule to Last Updated.

B. Include Contact Point Email object Is Active field as a match rule.

C. Ensure Marketing Cloud is prioritized as the first data source in the Source Priority reconciliation rule.

D. Use the source priority order in activations to make sure a contact point from the desired source is delivered to the activation target.

86. Cloud Kicks received a Request to be Forgotten by a customer.

In which way should a consultant use Data Cloud to honor this request?

A. Delete the data from the incoming data stream and perform a full refresh.

B. Use Data Explorer to locate and manually remove the Individual.

C. Use the Consent API to suppress processing and delete the individual and related records from source data streams.

D. Add the Individual ID to a headerless file and use the delete from file functionality.

87. A consultant is reviewing a recent activation using engagement-based related attributes but is not seeing any related attributes in their payload for the majority of their segment members.

Which two areas should the consultant review to help troubleshoot this issue?

A. The related engagement events occurred within the last 24 months.

B. The correct path is selected for the related attributes.

C. The related engagement events occurred within the last 90 days.

D. The activated profiles have a Unified Contact Point.

88. A company is seeking advice from a consultant on how to address the challenge of having multiple leads and contacts in Salesforce that share the same email address. The consultant wants to provide a detailed and comprehensive explanation on how Data Cloud can be leveraged to effectively solve this issue.

What should the consultant highlight to address this company's business challenge?

A. Data Lake Objects

B. Identity Resolution

C. Data Bundles

D. Calculated Insights

89. A consultant is connecting sales order data to Data Cloud and considers whether to use the Profile, Engagement, or Other categories to map the DLO. The consultant chooses to map the DLO called Order-Headers to the Sales Order DMO using the Engagement category.

What is the impact of this action on future mappings?

A. When mapping a Profile DLO to the Sales Order DMO, the category gets updated to Profile.

B. Only Engagement category DLOs can be mapped to the Sales Order DMO. Sales Order gets assigned to the Engagement Category.

C. A DLO with category Engagement can be mapped to any DMO using either Profile, Engagement, or Other categories.

D. Sales Order DMO gets assigned to both the Profile and Engagement categories when mapping a Profile DLO.

90. What should an organization use to stream inventory levels from an inventory management system into Data Cloud in a fast and scalable, near-real-time way?

A. Cloud Storage Connector

B. Marketing Cloud Personalization Connector

C. Commerce Cloud Connector

D. Ingestion API

91. A rideshare company wants to send an email to customers that provides a year-in-review with five "fun" trip statistics, such as top destination, distance traveled, etc. This raw data arrives into Data Cloud and is not aggregated at source.

The company creates a segment of customers that had at least one ride in the last 365 days.

Following best practices, which solution should the consultant recommend in Data Cloud to personalize the content of the email?

- A. Create five calculated insights for the activation and add dimension filters.
- B. Include related attributes in the activation for the last 365 days.
- C. Use a data action to send each ride as an event to Marketing Cloud Engagement, then use AMPscript to summarize this data in the email.

D. Use a data transform to aggregate the statistics and map them to direct attributes on Individual to include in the activation.

92. A consultant is ingesting a list of employees from their human resources database that they want to segment on.

Which data stream category should the consultant choose when ingesting this data?

- A. Contact Data
- B. Engagement Data

C. Profile Data

D. Other Data

93. A consultant at Northern Trail Outfitters is attempting to ingest a field from the Contact object in Salesforce CRM that contains both yyyy-mm-dd and yyyy-mm-dd hh:mm:s values. The target field is set to Date datatype.

Which statement is true in this situation?

- A. The target field will throw an error and store null values.
- B. The target field will only hold the time part and ignore the date part.

C. The target field will only hold the date part and ignore the time part.

D. The target field will be able to hold both types of values.

94. An automotive dealership wants to implement Data Cloud.

What is a use case for Data Cloud's capabilities?

- A. Implement a full archive solution with version management.

B. Ingest customer interaction across different touch points, harmonize, and build a data model for analytical reporting.

C. Build a source of truth for consent management across all unified individuals.

D. Use browser cookies to track visitor activity on the website and display personalized recommendations.

95. How does Data Cloud handle an individual's Right to be Forgotten?

A. Deletes the specified Individual and records from any data model object/data lake object related to the Individual.

B. Deletes the specified Individual and records from any data source object mapped to the Individual data model object.

C. Deletes the specified Individual record and its Unified Individual Link record.

D. Deletes the records from all data source objects, and any downstream data model objects are updated at the next scheduled ingestion.

96. When trying to disconnect a data source an error will be generated if it has which two dependencies associated with it?

A. Data stream

B. Segment

C. Activation target

D. Activation

97. Cloud Kicks wants to be able to build a segment of customers who have visited its website within the previous 7 days.

Which filter operator on the EngagementDate field fits this use case?

A. Is Between

B. Last Number of Days

C. Greater than Last Number of Days

D. Next Number of Days

98. What is the result of a segmentation criteria filtering on City | Is Equal To | 'San José'?

A. Cities only containing 'San Jose' or 'san jose'

B. Cities only containing 'San José' or 'San Jose'

C. Cities containing 'San José', 'San Jose', 'san José', or 'san José'

D. Cities only containing 'San José' or 'san José'

99. A consultant is preparing to implement Data Cloud.

Which ethic should the consultant adhere to regarding customer data?

- A. Carefully consider asking for sensitive data such as age, gender, or ethnicity.
- B. Collect and use all of the data to create more personalized experiences.
- C. Allow senior leaders in the firm to access customer data for audit purposes.
- D. Map sensitive data to the same DMO for ease of deletion.

100. The Salesforce CRM Connector is configured and the Case object data stream is set up. Subsequently, a new custom field named Business Priority is created on the Case object in Salesforce CRM. However, the new field is not available when trying to add it to the data stream.

Which statement addresses the cause of this issue?

- A. The Salesforce Integration User is missing Read permissions on the newly created field.
- B. The Salesforce Data Loader application should be used to perform a bulk upload from a desktop.
- C. Custom fields on the Case object are not supported for ingesting into Data Cloud.
- D. After 24 hours when the data stream refreshes, it will automatically include any new fields that were added to the Salesforce CRM.

101. When creating a segment on an individual, what is the result of using two separate containers linked by an AND as shown below?

GoodsProduct | Count | At Least | 1

Color | Is Equal To | red

AND

GoodsProduct | Count | At Least | 1

PrimaryProductCategory | Is Equal To | shoes

- A. Individuals who purchased at least one of any 'red' product and also purchased at least one pair of 'shoes'
- B. Individuals who purchased at least one of any 'red' product or purchased at least one pair of 'shoes'
- C. Individuals who purchased at least one 'red shoes' as a single line item in a purchase
- D. Individuals who made a purchase of at least one 'red shoes' and nothing else

102. Northern Trail Outfitters wants to implement Data Cloud and has several use cases in mind.

Which two use cases are considered a good fit for Data Cloud?

- A. To create and orchestrate cross-channel marketing messages
- B. To ingest and unify data from various sources to reconcile customer identity
- C. To use harmonized data to more accurately understand the customer and business impact
- D. To eliminate the need for separate business intelligence and IT data management tools

103. Which functionality does Data Cloud offer to improve customer support interactions when a customer is working with an agent?

- A. Automated customer service replies
- B. Enhanced reporting tools
- C. Predictive troubleshooting
- D. Real-time data integration

104. A consultant is setting up Data Cloud for a multi-brand organization and is using data spaces to segregate its data for various brands. While starting the mapping of a data stream, the consultant notices that they cannot map the object for one of the brands.

What should the consultant do to make the object available for a new data space?

- A. Create a batch transform to split data between different data spaces.
- B. Navigate to the Data Space tab and select the object to be included in the new data space.
- C. Create a new data stream and map the second data stream to the data space.
- D. Copy data from the default data space to a new DMO using the Data Copy feature and link this DMO to the new data space.

105. Cumulus Financial segregates its sales CRM data based on Region for its Data Cloud users. Multiple data spaces are configured: a default space and two additional spaces tailored for EMEA and APAC regions.

EMEA sales reps who need temporary access to visualize data for both regions say that they cannot visualize APAC data. APAC sales reps can visualize the corresponding segmented data.

Which statement describes the cause of this issue?

- A. The APAC data space is not associated with any profile.
- B. The EMEA sales reps have not been assigned to the profile associated with the APAC data space.
- C. The EMEA sales reps have not been assigned to the permission set associated with the APAC data space.
- D. The APAC data space is not associated with any permission set.

106. How does Data Cloud ensure high availability and fault tolerance for customer data?

- A. By implementing automatic data recovery procedures
- B. By limiting data access to essential personnel
- C. By distributing data across multiple regions and data centers
- D. By using a data center with robust backups

107. A marketing manager at Northern Trail Outfitters wants to improve marketing return on investment (ROI) by tapping into insights from Data Cloud Segment Intelligence.

Which permission set does a user need to set this up?

- A. Data Cloud Data Aware Specialist
- B. Data Cloud Admin
- C. Data Cloud User
- D. Data Cloud Marketing Manager

108. Which solution provides an easy way to ingest Marketing Cloud subscriber profile attributes into Data Cloud on a daily basis?

- A. Automation Studio and Profile API
- B. Marketing Cloud Connect API
- C. Marketing Cloud Data Extension Data Stream
- D. Email Studio Starter Data Bundle

109. Which two steps should a consultant take if a successfully configured Amazon S3 data stream fails to refresh with a “NO FILE FOUND” error message?

- A. Check if the file exists in the specified bucket location.
- B. Check if the Amazon S3 data source is enabled in Data Cloud Setup.
- C. Check if correct permissions are configured for the Data Cloud user.
- D. Check if correct permissions are configured for the S3 user.

110. A consultant wants to ensure that every segment managed by multiple brand teams adheres to the same set of exclusion criteria, that are updated on a monthly basis.

What is the most efficient option to allow for this capability?

- A. Create a segment and copy it for each brand.
- B. Create a reusable container block with common criteria.**
- C. Create a nested segment.
- D. Create, publish, and deploy a data kit.

111. Cumulus Financial wants to segregate Salesforce CRM Account data based on Country for its Data Cloud users.

What should the consultant do to accomplish this?

- A. Use streaming transforms to filter out Account data based on Country and map to separate data model objects accordingly.
- B. Use the data spaces feature and apply filtering on the Account data lake object based on Country.**
- C. Use formula fields based on the Account Country field to filter incoming records.
- D. Use Salesforce sharing rules on the Account object to filter and segregate records based on Country.

112. A customer has two Data Cloud orgs. A new configuration has been completed and tested for an Amazon S3 data stream and its mappings in one of the Data Cloud orgs.

What is recommended to package and promote this configuration to the customer's second org?

- A. Use the Salesforce CRM connector.
- B. Use the Metadata API.
- C. Create a data kit.**
- D. Package as an AppExchange application.

113. A new user of Data Cloud only needs to be able to review individual rows of ingested data and validate that it has been modeled successfully to its linked data model object. The user will also need to make changes if required.

What is the minimum permission set needed to accommodate this use case?

- A. Data Cloud Admin
- B. Data Cloud Data Aware Specialist**
- C. Data Cloud User
- D. Data Cloud Marketing Specialist

114. A customer has a requirement to receive a notification whenever an activation fails for a particular segment.

Which feature should the consultant use to solution for this use case?

- A. How
- B. Activation alert**
- C. Disallowed
- D. Report

115. How does Data Cloud ensure high availability and fault tolerance for customer data?

- A. By using a data center with robust backups
- B. By limiting data access to essential personnel
- C. By distributing data across multiple regions and data centers**
- D. By implementing automatic data recovery procedures

116. The recruiting team at Cumulus Financial wants to identify which candidates have browsed the jobs page on its website at least twice within the last 24 hours. They want the information about these candidates to be available for segmentation in Data Cloud and the candidates added to their recruiting system.

Which feature should a consultant recommend to achieve this goal?

- A. Streaming Insight**
- B. Send bias transform

C. Streaming bias transform

D. Calculated insight

117. Cumulus Financial wants to be able to track the daily transaction volume of each of its customers in real time and send out a notification as soon as it detects volume outside a customer's normal range.

What should a consultant do to accommodate this request?

A. Use a streaming insight paired with a data action.

B. Use streaming data transform with a flow.

C. Use streaming data transform combined with a data action.

D. Use a calculated insight paired with a flow.

118. Cumulus Financial wants to service agents to view a display of all cases associated with a unified individual on a contact record.

Which two features should a consultant consider for this use case?

A. Lightning Web Components

B. Query API

C. Profile API

D. Data Action

119. Northern Trail Outfitters wants to be able to calculate each customer's lifetime value (LTV) but also create breakdowns of the revenue sourced by website, mobile app, and retail channels.

What should a consultant use to address this use case in Data Cloud?

A. Nested segments

B. Measures on metrics

C. Streaming data transform

D. Flow orchestration

120. . A bank collects customer data for its loan applicants and high net worth customers. A customer can be both a loan applicant and a high net worth customer, resulting in duplicate data.

How should a consultant ingest and map this data in Data Cloud?

A. Use a data transform to consolidate the data into one DLO and then map it to the individual and Contact Point Email DMOs.

B. Ingest the data into two DLOs and map each to the individual and Contact Point Email DMOs.

C. Ingest the data into two DLOs and then map to two custom DMOs.

D. Ingest the data into one DLO and then map to one custom DMO.

121. A user needs permissions to access Data Cloud to create, manage, and activate segments. However, the user should not be allowed to create reports or manage data sources.

Which permission set should the consultant assign?

A. Data Cloud Marketing Specialist

B. Data Cloud Marketing Manager

C. Data Cloud Data Aware Specialist

D. Data Cloud User

122. Which data model subject area defines the revenue or quantity for an opportunity by product family?

A. Sales Order

B. Engagement

C. Product

D. Party

123. What does it mean to build a trust-based, first-party data asset?

A. To treat sensitive data carefully and provide clear exchange of value for data

B. To obtain competitive data from reliable sources through interviews, surveys, and polls

C. To ensure opt-in consents are collected for all email marketing as required by law

D. To provide trusted, first-party data in the Data Cloud Marketplace that follows all compliance regulations

124. A consultant needs to package Data Cloud components from one organization to another.

Which two Data Cloud components should the consultant include in a data kit to achieve this goal?

Choose 2 answers

A. Calculate insights

B. Identify resolution rulesets

C. Data model objects

D. Segments

125. A company wants to test its marketing campaigns with different target populations.

What should the consultant adjust in the Segment Canvas Interface to get different populations?

A. Population filters and direct attributes

B. Segmentation filters, direct attributions, and data sources

C. Direct attributes, related attributes, and population filters

D. Direct attributes and related attributes

126. Northern Trail Outfitters has the following customer data to ingest into Data Cloud and use for segmentation.

1. Propensity to purchase
2. Has active membership
3. Work email address

Which data types should the consultant use when ingesting this data?

- A. Percent, Number, Email
- B. Percent, Boolean, Email
- C. Number, Boolean, Text
- D. Number, Text, URL

127. Cumulus Financial offers both business and personal loans. Records in the Contact DLO can be useful for both groups since individual customers may have both business and personal loans. However, for legal reasons, the two groups must be kept separate.

How should Cumulus Financial solve this business requirement?

- A. Create two identity resolution rules in the same data space.
- B. Use two data spaces.
- C. Duplicate the Contact DLO.
- D. Duplicate the Individual DMO.

128. The Data Cloud admin at Northern Trail Outfitters (NTO) wants to be proactively and immediately informed via Slack and email if any of the data streams fail for any reason. If this happens, a case should also be triggered as part of NTO's existing support and triage process, and reflected in its global monitoring dashboard.

What should a consultant recommend for these requirements?

A. Salesforce flows

B. Data actions

C. Salesforce reports and documents

D. Data Cloud Query Editor

129. A company wants to include certain personalized fields in an email by including related attributes during the activation in Data Cloud. It notices that some values, such as purchased product names, do not have consistent casing in Marketing Cloud Engagement. For example, purchased product names appear as follows: Jacket, Jacket, shoes, SHOES. The company wants to normalize all names to proper case and replace any null values with a default value.

How should a consultant fulfill this requirement within Data Cloud?

A. Use formula fields when accessing at the data stream level.

B. Create one batch data transform that creates a new DLO.

C. Create one batch data transform per data stream.

D. Create a streaming module with a data action.

130. A consultant wants to confirm the identity resolution they just set up.

Which two features can the consultant use to validate the data on a unified profile?

A. Data Explorer

B. Data Actions

C. Identity Resolution

D. Query

131. Which statement is true related to batch ingestions from Salesforce CRM?

A. When a column is added or removed, the CRM connector performs a full refresh.

B. The CRM connector performs an incremental refresh when 600K or more deletion records are detected.

C. The CRM connector synchronization times can be customized to up to 15-minute intervals.

D. CRM data cannot be manually refreshed and must wait for the next scheduled synchronization.

132. When performing segmentation or activation, which time zone is used to publish and refresh data?

- A. Time zone set by the Salesforce Data Cloud org
- B. Time zone of the user creating the activity
- C. Time zone specified on the activity at the time of creation
- D. Time zone of the Data Cloud Admin user

133. A consultant is discussing the benefits of Data Cloud with a customer that has multiple disjointed data sources.

Which two functional areas should the consultant highlight in relation to managing customer data?

- A. Master Data Management
- B. Data Harmonization
- C. Data Marketplace
- D. Unified Profiles

134. What is Data Cloud's primary value to customers?

- A. To create personalized campaigns by listening, understanding, and acting on customer behavior
- B. To connect all systems with a golden record
- C. To create a single source of truth for all anonymous data
- D. To provide a unified view of a customer and their related data

135. A customer creates a large segment of customers that placed orders in the last 30 days, and adds related attributes from the Sales Order DMO to the activation. Upon checking the activation in Marketing Cloud, they notice it contains orders that are older than 30 days.

What should a consultant do to resolve this issue?

- A. Use data graphs that contain only 30 days of data.
- B. Apply a data space filter to exclude orders older than 30 days.
- C. Apply a filter to Purchase Order Date to exclude orders older than 30 days.
- D. Use SQL in Marketing Cloud Engagement to remove orders older than 30 days.

136. Where is value suggestion for attributes in segmentation enabled when creating the DMO?

- A. Data Stream Setup
- B. Segment Setup
- C. DMO Properties tab
- D. Data Transformation

137. An organization wants to enable users with the ability to identify and select text attributes from a picklist of options.

Which Data Cloud feature should help with this use case?

- A. Value suggestion
- B. Global picklists
- C. Data harmonization
- D. Transformation formula

138. Northern Trail Outfitters asks its consultant to extract the runner profiles and activity logs from its Track My Run mobile app and load them into Data Cloud. The marketing

department also indicates that they need the last 90 days of historical data and want all new and updated data as it becomes available on a go-forward basis.

As best practice, which sequence of actions should the consultant use to implement this request?

A. Use bulk ingestion to first load the last 90 days of data, and then subsequently use bulk ingestion to synchronise the future data as it becomes available.

B. Use bulk ingestion to first load the last 90 days of data, and then subsequently use streaming ingestion to synchronise future data as it becomes available.

C. Use streaming ingestion to first load the last 90 days of data, and then subsequently use streaming ingestion to synchronise future data as it becomes available.

D. Use streaming ingestion to first load the last 90 days of data, and then use bulk ingestion to synchronise future data as it becomes available.

139. A client wants to bring in loyalty data from a custom object in Salesforce CRM that contains a point balance for accrued hotel points and airline points within the same record. The client wants to split these point systems into two separate records for better tracking and processing.

What should a consultant recommend in this scenario?

A. Create the data source object.

B. Create a data file from the data files object and deploy it to the same Data Cloud org.

C. Write a function object in Salesforce CRM and modify the ingestion strategy.

D. Create a function object in Salesforce CRM and modify the ingestion strategy.

140. If a data source does not have a field that can be designated as a primary key, what should the consultant do?

A. Remove duplicates from the data sources and then select a primary key.

B. Create a completed key by combining two or more vector fields through a formula field.

- C. Use the default primary key recommended by Data Cloud.
- D. Select a field as a primary key and then add a key outfilter.

141. A Data Cloud consultant tries to save a new 1-to-1 relationship between the Account DMO and Contact Point Address DMO but gets an error.

What should the consultant do to fix this error?

- A. Make sure that the total account records are high enough for identity resolution.
- B. Map additional fields to the Contact Point Address DMO.**
- C. Change the cardinality to many-to-one to accommodate multiple contacts per account.
- D. Map Account to Contact Point Email and Contact Point Phone also.

142. A consultant wants to make sure address details from customer orders are selected as best values to save to the unified profile.

What should the consultant do to achieve this?

- A. Select the address details on the Contact Point Address. Change the reconciliation rules for the specific address attributes to Source Priority and move the individual DMO to the bottom.
- B. Use the default reconciliation rules for Contact Point Address.
- C. Change the default reconciliation rules for Individual to Source Priority.
- D. Select the address details on the Contact Point Address. Change the reconciliation rules for the specific address attributes to Source Priority and move the Order DMO to the top.**

143. A segment fails to refresh with the error "Segment references too many data like objects (DIOs)".

Which two troubleshooting tips should help remedy this issue?

- A. Spouse out the segment schedules to reduce DLO load.
- B. Use calculated insights in order to reduce the complexity of the segmentation query.
- C. Solid the segment into smaller segments.
- D. Refine segmentation criteria to limit up to five custom data model objects (DMOs).

144. Cumulus Financial wants to create a segment of individuals based on transaction history data. This data has been mapped in the data model and is accessible via multiple container paths for segmentation.

What happens if the optimal container path for this use case is not selected?

- A. Alternate container paths will be suggested before the segment is published.
- B. The resulting segment may be sensitive or longer than expected.
- C. Data Cloud segmentation will automatically select the optimal container path.
- D. The resulting segment will not be generated.

145. A consultant is integrating an Amazon S3 activated campaign with the customer's destination system.

In order for the destination system to find the metadata about the segment, which file on the S3 will contain this information for processing?

- A. The .java file
- B. The .txt file
- C. The .zip file
- D. The .dev file

146. A Data Cloud consultant is in the process of setting up data streams for a new service-based data source.

When ingesting Case data, which field is recommended to be associated with the Event Time field?

- A. Disclaimer Date
- B. Consider Date
- C. Resolution Date
- D. Last Modified Date**

147. A customer is trying to activate data from Data Cloud to an Amazon S3 Cloud File Storage Bucket.

Which authentication type should the consultant recommend to connect to the S3 bucket from Data Cloud?

- A. Use as S3 Access Key and Search Key.**
- B. Use as S3 Encrypted Username and Password.
- C. Use a JWT Token generated on S3.
- D. Use as S3 Private Key Certificates.

148. A consultant needs to update a field in CRM as soon as a record gets updated in the DMO.

Which feature should the consultant use?

- A. Data share target
- B. Data actions**
- C. Rapid segments

D. Streaming data transform

149. A Data Cloud customer wants to adjust their identity resolution rules to increase their accuracy of matches. Rather than matching on email address, they want to review a rule that joins their CRM Contains with the Marketing Controls, where both use the CRM ID as their primary key.

Which two steps should the consultant take to address this new use case?

A. Has the primary key from the two systems to Party Identification, using CRM ID as the identification name for both.

B. Has the primary key from the two systems to party Identification, using CRM ID as the identification name for individuals coming from the CRM, and Marketing ID as the identification name for individuals coming from the marketing platform.

C. Create a matching rule based on party identification that matches on CRM ID as the party identification name.

D. Create a custom matching rule for an exact match on the Individual ID attribute.

150. A customer has a calculated insight about lifetime value.

What does the consultant need to be aware of if the calculated insight needs to be modified?

A. Exiting measures can be removed.

B. New dimensions can be added.

C. Exiting dimensions can be removed.

D. New measures can be added.

151. A customer notices that their consultation rate has recently increased. They contact the consultant to ask why:

What are two likely explanations for the increase?

A. Identify resolution rules have been added to the ruleset to increase the number of matched profiles.

B. New data sources have been added to Data Cloud that largely overlaps with the existing profiles.

C. Qualcodes have been removed from source system data streams.

D. Identify resolution rules have been removed to reduce the number of matched profiles.

152. Which tool allows users to visualize and analyze unified customer data in Data Cloud?

A. Flexible

B. Diskless

C. Intelligence Reports advanced

D. Salesforce CLI

153. A company stores customer data in Marketing Cloud and uses the Marketing Cloud Connector to ingest data into Data Cloud.

Where does a request for data deletion or right to be forgotten get submitted?

A. Through Convert API

B. On the individual data profile in Data Cloud

C. In Marketing Cloud settings

D. In Data Cloud settings

154. Cumulus Financial needs to create a composite key on an incoming data source that combines the fields Customer Region and Customer Identifier. Which formula function should a consultant use to create a composite key when a primary key is not available in a data stream?

A. CONCEPT

B. COMBINER

C. COMEASURE

D. CASE

155. A Data Cloud customer wants to adjust their identity resolution rules to increase their accuracy of matches. Rather than matching on email address, they want to review a rule that joins their CRM contacts with their Marketing Contacts, where both use the CRM ID as their primary key. Which two steps should the consultant take to address this new use case?

A. Create a matching rule based on party identification that matches on CRM ID as the party identification name.

B. Apply the name for key functions into systems to party identification, using CRM ID as the identification name for individuals coming from the CRM, and Marketing ID as the identification name for individuals coming from the marketing agency.

C. Map the primary key from the two systems to Party identification, using CRM ID as the identification name for both.

D. Create a custom matching rule for an exact match on the individual ID attribute.

156. A client wants to bring in loyalty data from a custom object in Salesforce CRM that contains a point balance for accrued hotel points and airline points within the same record. The client wants to split these point systems into two separate records for better tracking and processing. What should a consultant recommend in this scenario?

A. Clone the data source object.

B. Use batch transforms to create a second data lake object.

C. Create a junction object in Salesforce CRM and modify the ingestion strategy.

D. Create a data kit from the data lake object and deploy it to the same Data Cloud org.

157. A Data Cloud consultant is in the process of setting up data streams for a new service-based data source. When ingesting Case data, which field is recommended to be associated with the Event Time field?

A. Resolution Date

B. Escalation Date

C. Last Modified Date

D. Creation Date

158. Which tool allows users to visualize and analyze unified customer data in Data Cloud?

A. Salesforce CLI

B. Tableau

C. Heroku

D. Intelligence Reports Advanced

159. A consultant is setting up a data stream with transactional data. Which field type should the consultant choose to ensure that leading zeros in the purchase order number are preserved?

A. Number

B. Text

C. Decimal

D. Total

160. A Data Cloud consultant recently added a new data source and mapped some of the data to a new custom data model object (DMO) that they want to segment on. However, they cannot view the newly created DMO when trying to create a new segment. What is the cause of this issue?

A. The new DMO is not of category Profile.

B. The new DMO does not have a relationship to the Individual DMO.

C. Data has not yet been ingested into the DMO.

D. Segmentation is only supported for the Individual and Unified Individual DMOs.

162. Northern Trail Outfitters uses B2C Commerce and is exploring implementing Data Cloud to get a unified view of its customers and all their order transactions. What should the consultant keep in mind with regard to historical data when ingesting order data using the B2C Commerce Order Bundle?

A. The B2C Commerce Order Bundle ingests 12 months of historical data.

B. The B2C Commerce Order Bundle does not ingest any historical data and only ingests new orders from that point on.

C. The B2C Commerce Order Bundle ingests 6 months of historical data.

D. The B2C Commerce Order Bundle ingests 30 days of historical data.

163. What does the Source Sequence reconciliation rule do in identity resolution?

A. Determines which data source's records should be merged into a unified profile based on a priority assigned to specific data sources.

B. Determines which data source's value should be used for a specific attribute on a unified profile, such as a URL or phone number.

C. Determines which data sources should be used in the process of consolidating customer profiles.

D. Includes data from sources where the data is most recently updated.

164. A consultant is troubleshooting a segment error. Which error message is solved by using calculated insights instead of nested segments?

A. Segment is too complex.

B. Segment acquisition count failed.

C. Multiple population counts are in progress.

D. Segments can't be published.

165. A customer notices that their consolidation rate has recently increased. They contact the consultant to ask why. What are two likely explanations for the increase? Choose 2 answers

A. Identity resolution rules have been added to the ruleset to increase the number of matched profiles.

B. New data sources have been added to Data Cloud that largely overlap with the existing profiles.

C. Duplicates have been removed from source systems data streams.

D. Identity resolution rules have been removed to reduce the number of matched profiles.

166. A customer has a requirement to be able to track its segmentation activity. They want to see things like the last time each segment was published, total population included in each segment, etc. within their org. Which two features should the consultant recommend to best address this requirement? Choose 2 answers

A. Filter Explorer

B. Reports

C. Dashboards

D. Calculated Insights
