

Question 1 of 60

Choose 1 option.

What is a reason to create a formula when ingesting a data stream?

- ☐ A. To remove duplicate rows of data from the data stream
- ☐ B. To add a unique external identifier to an existing ruleset
- ☒ C. To transform a datetime field into a date field for use in data mapping
- ☐ D. To concatenate files so they are ingested in the correct sequence

Question 2 of 60

Choose 1 option.

Cumulus Financial uses Service Cloud as its CRM and stores mobile phone, home phone, and work phone in three separate fields for its customers on the Contact record. The company plans to use Data Cloud and ingest the Contact object via the CRM Connector.

What is the most efficient approach that a consultant should take when ingesting this data to ensure all the different phone numbers are properly mapped and available for use in activation?

- ☐ A. Ingest the Contact object and then create a calculated insight to normalize the phone numbers, and then map to the Contact Point Phone data map object.
- ☐ B. Ingest the Contact object and map the Work Phone, Mobile Phone, and Home Phone to the Contact Point Phone data map object from the Contact data stream by adding custom fields for Work and Home Phone.
- ☒ C. Ingest the Contact object and use streaming transforms to normalize the phone numbers from the Contact data stream into a separate Phone data lake object (DLO) that contains three rows, and then map this new DLO to the Contact Point Phone data map object.
- ☐ D. Ingest the Contact object and create formula fields in the Contact data stream on the phone numbers, and then map to the Contact Point Phone data map object.

Question 3 of 60

Choose 1 option.

What does the Source Sequence reconciliation rule do in identity resolution?

- ☒ A. Sets the priority of specific data sources when building attributes in a unified profile, such as a first or last name
- ☐ B. Identifies which individual records should be merged into a unified profile by setting a priority for specific data sources
- ☐ C. Identifies which data sources should be used in the process of reconciliation by prioritizing the most recently updated data source
- ☐ D. Includes data from sources where the data is most frequently occurring

Question 4 of 60

Choose 1 option.

Which operator should a consultant use to create a segment for a birthday campaign that is evaluating

- ☐ A. Is Today
- ☐ B. Is Between
- ☒ C. Is Anniversary Of
- ☐ D. Is Birthday

Question 5 of 60

Choose 1 option.

A customer wants to use the transactional data from their data warehouse in Data Cloud. They are unable to export the data via an SFTP site.

How should the file be brought into Data Cloud?

- ☒ A. Ingest the file with the SFTP Connector.
- ☐ B. Manually import the file using the Data Import Wizard.
- ☐ C. Use Salesforce's Dataloader application to perform a bulk upload from a desktop.
- ☐ D. Ingest the file through the Cloud Storage Connector.

Question 6 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) asks its Data Cloud consultant for a list of contacts who fit within a certain segment for a direct mail campaign.

How should the consultant provide this list to NTO?

- ☐ A. Create the segment and then click Download to obtain the segment membership details to provide to NTO.
- ☐ B. Create the segment and then activate the segment to NTO's Salesforce CRM.
- ☒ C. Create the segment, select Email as the activation target, and activate the segment directly to NTO.
- ☐ D. Create a new file storage activation target, create the segment, and then activate the segment to the new activation target.

Question 7 of 60

Choose 1 option.

The marketing manager at Cloud Kicks plans to bring in corporate phone numbers for its accounts in Data Cloud. They plan to use a custom field with data type set to Phone to store these phone numbers.

Which statement is true when ingesting phone numbers?

- ☐ A. Data Cloud validates the format of the phone number at the time of ingestion.
- ☐ B. The phone number field should be used as a primary key.
- ☐ C. The phone number field can only accept 10-digit values.
- ☒ D. Text value can be accepted for ingestion into a phone data type field.

Question 8 of 60

Choose 1 option.

A retailer wants to unify profiles using Loyalty ID which is different than the unique ID of their customers.

Which object should the consultant use in identity resolution to perform exact match rules on the Loyalty ID?

- ☒ A. Party Identification object
- ☐ B. Individual object
- ☐ C. Loyalty Identification object
- ☐ D. Contact Identification object

Question 9 of 60

Choose 3 options.

A consultant wants to build a new audience in Data Cloud.

Which three criteria can the consultant include when building a segment?

- ☒ A. Direct attributes
- ☒ B. Related attributes
- ☐ C. Data stream attributes
- ☐ D. Streaming insights
- ☒ E. Calculated insights

Question 10 of 60

Choose 1 option.

Northern Trail Outfitters (NTO), an outdoor lifestyle clothing brand, recently started a new line of business. The new business specializes in gourmet camping food. For business reasons as well as security reasons, it's important to NTO to keep all Data Cloud data separated by brand.

Which capability best supports NTO's desire to separate its data by brand?

- ☐ A. Data sources for each brand
- ☒ B. Data spaces for each brand
- ☐ C. Data streams for each brand
- ☐ D. Data model objects for each brand

Question 11 of 60

Choose 1 option.

A customer is concerned that the consolidation rate displayed in the identity resolution is quite low compared to their initial estimations.

Which configuration change should a consultant consider in order to increase the consolidation rate?

- ☒ A. Increase the number of matching rules.
- ☐ B. Include additional attributes in the existing matching rules.
- ☐ C. Reduce the number of matching rules.
- ☐ D. Change reconciliation rules to Most Occuring.

Question 12 of 60

Choose 1 option.

A consultant needs to publish segment data to the Audience DMO that can be retrieved using the Query APIs.

When creating the activation target, which type of target should the consultant select?

- ☒ A. Data Cloud
- ☐ B. Marketing Cloud
- ☐ C. Marketing Cloud Personalization
- ☐ D. External Activation Target

Question 13 of 60

Choose 1 option.

Which data stream category type should be assigned in order to use the dataset for date and time-based operations in segmentation and calculated insights?

- ☒ A. Profile
- ☐ B. Sales Order
- ☐ C. Engagement
- ☐ D. Individual

Question 14 of 60

Choose 1 option.

A consultant needs to minimize the difference between a Data Cloud segment population and Marketing Cloud data extension count to determine the true size of segments for campaign planning.

What should the consultant recommend to filter the segments by to accomplish this?

- ☐ A. User preferences for marketing outreach
- ☐ B. Business units
- ☐ C. Marketing Cloud Journeys
- ☒ D. Geographical divisions

Question 15 of 60

Choose 1 option.

Which method should a consultant use when performing aggregations in windows of 15 minutes on data collected via the Interactions SDK or Mobile SDK?

- ☐ A. Calculated insight
- ☐ B. Formula fields
- ☒ C. Streaming insight
- ☐ D. Batch transform

Question 16 of 60

Choose 1 option.

A Data Cloud consultant is working with data that is clean and organized. However, the various schemas refer to a person by multiple names – such as user, contact, and subscriber – and need a standard mapping.

Which term describes the process of mapping these different schema points into a standard data model?

- ☒ A. Harmonize
- ☐ B. Transform
- ☐ C. Segment
- ☐ D. Unify

Question 17 of 60

Choose 1 option.

A customer requests that their personal data be deleted.

Which action should the consultant take to accommodate this request in Data Cloud?

- ☐ A. Use Consent API to request deletion of the customer's information.
- ☐ B. Use Profile Explorer to delete the customer data from Data Cloud.
- ☐ C. Use a streaming API call to delete the customer's information.
- ☒ D. Use the Data Rights Subject Request tool to request deletion of the customer's information.

Question 18 of 60

Choose 1 option.

A customer has outlined requirements to trigger a journey for an abandoned browse behavior. Based on the requirements, the consultant determines they will use streaming insights to trigger a data action to Journey Builder every hour.

How should the consultant configure the solution to ensure the data action is triggered at the cadence required?

- ☒ A. Set the insights aggregation time window to 1 hour.
- ☐ B. Set the activation schedule to hourly.
- ☐ C. Configure the data to be ingested in hourly batches.
- ☐ D. Set the journey entry schedule to run every hour.

Question 19 of 60

Choose 1 option.

A consultant needs to create a data graph based on several DLOs.

Which step should the consultant take to make this work?

- ☒ A. Map the DLOs to DMOs and use these in the data graph.
- ☐ B. Use a data action to update the data graph with the DLO data.
- ☐ C. Map the DLOs directly to a data graph.
- ☐ D. Batch transform the DLOs to multiple DMOs and activate these with the data graph.

Question 20 of 60

Choose 2 options.

Which two impacts should the consultant communicate as a result of this action?

- ☐ A. All individual data will be removed.
- ☒ B. Dependencies on data model objects will be removed.
- ☐ C. All source profile data will be removed.
- ☒ D. Unified customer data associated with this ruleset will be removed.

Question 21 of 60

Choose 1 option.

An analyst from Cloud Kicks needs to get quick insights to determine the average sales per day during the past week.

What should a consultant recommend?

- ☐ A. Segment activation to Azure
- ☐ B. Salesforce flows
- ☒ C. Salesforce reports
- ☐ D. Lightning web component utilizing Query API

Question 22 of 60

Choose 2 options.

Northern Trail Outfitters unifies individuals in its Data Cloud instance.

Which two features can the consultant use to validate the data on a specific unified profile?

- ☒ A. Data Actions
- ☐ B. Profile Explorer
- ☐ C. Query API
- ☒ D. Identity Resolution

Question 23 of 60

Choose 2 options.

Every day, Northern Trail Outfitters uploads a summary of the last 24 hours of store transactions to a new file in an Amazon S3 bucket, and files older than seven days are automatically deleted. Each file contains a timestamp in a standardized naming convention.

Which two options should a consultant configure when ingesting this data stream?

- ☒ A. Ensure the filename contains a wildcard to accommodate the timestamp.
- ☒ B. Ensure the refresh mode is set to "Upsert".
- ☐ C. Ensure the refresh mode is set to "Full Refresh".
- ☐ D. Ensure that deletion of old files is enabled.

Question 24 of 60

Choose 1 option.

Northern Trail Outfitters wants to create a segment with customers that have purchased in the last 24 hours. The segment data must be as up to date as possible.

What should the consultant implement when creating the segment?

- ☐ A. Use standard segment with a publish interval of 30 minutes.
- ☐ B. Use Einstein segmentation optimization to collect data from the last 24 hours.
- ☐ C. Use rapid segments with a publish interval of 1 hour.
- ☒ D. Use streaming insights for near real-time segmentation results.

Question 25 of 60

Choose 1 option.

Data Cloud receives a nightly file of all ecommerce transactions from the previous day. Several segments and activations depend upon calculated insights from the updated data in order to maintain accuracy in the customer's scheduled campaign messages.

What should the consultant do to ensure the ecommerce data is ready for use for each of the scheduled activations?

- ☐ A. Ensure the activations are set to Incremental Activation and automatically publish every hour.
- ☐ B. Ensure the segments are set to Rapid Publish and set to refresh every hour.
- ☐ C. Set a refresh schedule for the calculated insights to occur every hour.
- ☒ D. Use Flow to trigger a change data event on the ecommerce data to refresh calculated insights and segments before the activations are scheduled to run.

Question 26 of 60

Choose 1 option.

Which statement about Data Cloud's Web and Mobile Application Connector is true?

- ☐ A. Any data streams associated with the connector will be automatically deleted upon deleting the app from Data Cloud Setup.
- ☐ B. A standard schema containing event, profile, and transaction data is created at the time the connector is configured.
- ☐ C. The connector schema can be updated to delete an existing field.
- ☒ D. The Tenant Specific Endpoint is auto-generated in Data Cloud when setting the connector.

Question 27 of 60

Choose 2 options.

Which two dependencies prevent a data stream from being deleted?

- ☒ A. The underlying data lake object is used in a data transform.
- ☐ B. The underlying data lake object is used in segmentation.
- ☒ C. The underlying data lake object is mapped to a data model object.
- ☐ D. The underlying data lake object is used in activation.

Question 28 of 60

Choose 1 option.

A healthcare client wants to make use of identity resolution, but does not want to risk unifying profiles that may share certain personally identifying information (PII).

Which matching rule criteria should a consultant recommend for the most accurate matching results?

- ☒ A. Party Identification on Patient ID
- ☐ B. Fuzzy First Name, Exact Last Name, and Email
- ☐ C. Email Address and Phone
- ☐ D. Exact Last Name and Email

Question 29 of 60

Choose 1 option.

A global fashion retailer operates online sales platforms across AMER, EMEA, and APAC. The data formats for customer, order, and product information vary by region, and compliance regulations require data to remain unchanged in the original data sources. They also require a unified view of customer profiles for real-time personalization and analytics.

Given these requirements, which transformation approach should the company implement to standardize and cleanse incoming data streams?

- ☐ A. Use Apex to transform and cleanse data.
- ☐ B. Transform data before ingesting into Data Cloud.
- ☒ C. Implement streaming data transformations.
- ☐ D. Implement batch data transformations.

Question 30 of 60

Choose 1 option.

What is the role of artificial intelligence (AI) in Data Cloud?

- ☐ A. Generating email templates for use cases
- ☐ B. Automating data validation
- ☐ C. Creating dynamic data-driven management dashboards
- ☒ D. Enhancing customer interactions through insights and predictions

Question 31 of 60

Choose 1 option.

A user has built a segment in Data Cloud and is in the process of creating an activation. When selecting related attributes, they cannot find a specific set of attributes they know to be related to the individual.

Which statement explains why these attributes are not available?

- ☐ A. The attributes are being used in another activation.
- ☐ B. The segment is not segmenting on profile data.
- ☒ C. The desired attributes reside on different related paths.
- ☐ D. Activations can only include 1-to-1 attributes.

Question 32 of 60

Choose 1 option.

A marketing manager at Northern Trail Outfitters wants to improve marketing return on investment (ROI) by tapping into insights from Data Cloud Segment Intelligence.

Which permission set does a user need to set this up?

- ☐ A. Data Cloud Data Aware Specialist
- ☒ B. Data Cloud Admin
- ☐ C. Data Cloud User
- ☐ D. Data Cloud Marketing Manager

Question 33 of 60

Choose 1 option.

Cumulus Financial created a segment called High Investment Balance Customers. This is a foundational segment that includes several segmentation criteria the marketing team should consistently use.

Which feature should the consultant suggest the marketing team use to ensure this consistency when creating future, more refined segments?

- ☐ A. Package High Investment Balance Customers in a data kit.
- ☐ B. Create new segments by cloning High Investment Balance Customers.
- ☒ C. Create new segments using nested segments.
- ☐ D. Create a High Investment Balance calculated insight.

Question 34 of 60

Choose 2 options.

Northern Trail Outfitters is using the Marketing Cloud Starter Data Bundles to bring Marketing Cloud data into Data Cloud.

What are two of the available datasets in Marketing Cloud Starter Data Bundles?

- ☐ A. Personalization
- ☐ B. Loyalty Management
- ☒ C. MobileConnect
- ☒ D. MobilePush

Question 35 of 60

Choose 1 option.

Cumulus Financial created a segment called Multiple Investments that contains individuals who have invested in two or more mutual funds.

The company plans to send an email to this segment regarding a new mutual fund offering, and wants to personalize the email content with information about each customer's current mutual fund investments.

How should the Data Cloud consultant configure this activation?

- ☐ A. Include Fund Name and Fund Type by default for post processing in the target system.
- ☐ B. Choose the Multiple Investments segment, choose the Email contact point, and add related attribute Fund Type.
- ☐ C. Include Fund Type equal to "Mutual Fund" as a related attribute. Configure an activation based on the new segment with no additional attributes.
- ☒ D. Choose the Multiple Investments segment, choose the Email contact point, add related attribute Fund Type, and add related attribute filter for Fund Type equal to "Mutual Fund".

Question 36 of 60

Choose 1 option.

A customer wants to create segments of users based on their Customer Lifetime Value. However, the source data that will be brought into Data Cloud does not include that key performance indicator (KPI).

Which sequence of steps should the consultant follow to achieve this requirement?

- ☒ A. Ingest Data > Map Data to Data Model > Create Calculated Insight > Use in Segmentation
- ☐ B. Create Calculated Insight > Ingest Data > Map Data to Data Model > Use in Segmentation
- ☐ C. Create Calculated Insight > Map Data to Data Model > Ingest Data > Use in Segmentation
- ☐ D. Ingest Data > Create Calculated Insight > Map Data to Data Model > Use in Segmentation

Question 37 of 60

Choose 1 option.

Cumulus Financial uses Data Cloud to segment banking customers and activate them for direct mail via a Cloud File Storage activation. The company also wants to analyze individuals who have been in the segment within the last 2 years.

Which Data Cloud component allows for this?

- ☐ A. Segment exclusion
- ☐ B. Calculated insights
- ☒ C. Segment membership data model object
- ☐ D. Nested segments

Question 38 of 60

Choose 1 option.

Northern Trail Outfitters uploads new customer data to an Amazon S3 Bucket on a daily basis to be ingested in Data Cloud. Based on this, a calculated insight is created that shows the total spend per customer in the last 30 days.

In which sequence should each process be run to ensure that freshly imported data is ready and available to use for any segment?

- ☐ A. Calculated Insight > Refresh Data Stream > Identity Resolution
- ☐ B. Identity Resolution > Refresh Data Stream > Calculated Insight
- ☒ C. Refresh Data Stream > Identity Resolution > Calculated Insight
- ☐ D. Refresh Data Stream > Calculated Insight > Identity Resolution

Question 39 of 60

Choose 1 option.

Cumulus Financial is currently using Data Cloud and ingesting transactional data from its backend system via an S3 Connector in upsert mode. During the initial setup six months ago, the company created a formula field in Data Cloud to create a custom classification. It now needs to update this formula to account for more classifications.

What should the consultant keep in mind with regard to formula field updates when using the S3 Connector?

- ☐ A. Data Cloud will only update the formula on a go-forward basis for new records.
- ☐ B. Data Cloud will update the formula for all records at the next incremental upsert refresh.
- ☐ C. Data Cloud does not support formula field updates for data streams of type upsert.
- ☒ D. Data Cloud will initiate a full refresh of data from S3 and will update the formula on all records.

Question 40 of 60

Choose 1 option.

Luxury Retailers created a segment targeting high value customers that it activates through Marketing Cloud for email communication. The company notices that the activated count is smaller than the segment count.

What is a reason for this?

- ☐ A. Marketing Cloud activations apply a frequency cap and limit the number of records that can be sent in an activation.
- ☐ B. Marketing Cloud activations automatically suppress individuals who are unengaged and have not opened or clicked on an email in the last six months.
- ☐ C. Marketing Cloud activations only activate those individuals that already exist in Marketing Cloud. They do not allow activation of new records.
- ☒ D. Data Cloud enforces the presence of Contact Point for Marketing Cloud activations. If the individual does not have a related Contact Point, it will not be activated.

Question 41 of 60

Choose 2 options.

A consultant has an activation that is set to publish every 12 hours, but has discovered that updates to the data prior to activation are delayed by up to 24 hours.

Which two areas should a consultant review to troubleshoot this issue?

- ☐ A. Review calculated insights to make sure they're run after the segments are refreshed.
- ☒ B. Review calculated insights to make sure they're run before segments are refreshed.
- ☒ C. Review segments to ensure they're refreshed after the data is ingested.
- ☐ D. Review data transformations to ensure they're run after calculated insights.

Question 42 of 60

Choose 1 option.

The leadership team at Cumulus Financial has determined that customers who deposited more than \$250,000 in the last five years and are not using advisory services will be the central focus for all new campaigns in the next year.

Which features support this use case?

- ☐ A. Streaming insight and data action
- ☐ B. Streaming insight and segment
- ☐ C. Calculated insight and data action
- ☒ D. Calculated insight and segment

Question 43 of 60

Choose 1 option.

A customer notices that their consolidation rate is low across their account unification. They have mapped Account to the Individual and Contact Point Email DMOs.

What should they do to increase their consolidation rate?

- ☒ A. Increase the number of matching rules.
- ☐ B. Update their account address details in the data source.
- ☐ C. Change reconciliation rules to Most Occurring.
- ☐ D. Disable the individual identity ruleset.

Question 44 of 60

Choose 2 options.

Which two common use cases can be addressed with Data Cloud?

- ☒ A. Understand and act upon customer data to drive more relevant experiences.
- ☐ B. Govern enterprise data lifecycle through a centralized set of policies and processes.
- ☒ C. Harmonize data from multiple sources with a standardized and extendable data model.
- ☐ D. Safeguard critical business data by serving as a centralized system for backup and disaster recovery.

Question 45 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) is getting ready to start ingesting its CRM data into Data Cloud.

While setting up the connector, which type of refresh should NTO expect when the data stream is deployed for the first time?

- ☐ A. Partial refresh
- ☒ B. Full refresh
- ☐ C. Incremental refresh
- ☐ D. Manual refresh

Question 46 of 60

Choose 1 option.

Which information is provided in a .csv file when activating to Amazon S3?

- ☒ A. The activated data payload
- ☐ B. An audit log showing the user who activated the segment and when it was activated
- ☐ C. The manifest of origin sources within Data Cloud
- ☐ D. The metadata regarding the segment definition

Question 47 of 60

Choose 1 option.

How does identity resolution select attributes for unified individuals when there is conflicting information in the data model?

- ☐ A. Leverages match rules
- ☐ B. Creates additional contact points
- ☐ C. Creates additional rulesets
- ☒ D. Leverages reconciliation rules

Question 48 of 60

Choose 1 option.

What is the primary purpose of Data Cloud?

- ☐ A. Managing sales cycles and opportunities
- ☐ B. Analyzing marketing data results
- ☐ C. Providing a golden record of a customer
- ☒ D. Integrating and unifying customer data

Question 49 of 60

Choose 1 option.

A consultant is helping a travel company ingest its profile data into Data Cloud. The company's source data includes several fields, such as preferred car type, preferred airline, and favorite destination, that are not fields in the standard Individual data model object (DMO).

What should the consultant recommend to map this data to be used for both segmentation and identity resolution?

- ☐ A. Create a custom DMO from scratch that has all fields that are needed.
- ☐ B. Duplicate the standard Individual DMO and add the additional fields.
- ☒ C. Create custom fields on the standard Individual DMO.
- ☐ D. Create a custom DMO with only the additional fields and map it to the standard Individual DMO.

Question 50 of 60

Choose 2 options.

During a privacy law discussion with a customer, the customer indicates they need to honor requests for the right to be forgotten. The consultant determines that Consent API will solve this business need.

Which two considerations should the consultant inform the customer about?

- ☐ A. Data deletion requests are reprocessed at 30, 60, and 90 days.
- ☐ B. Data deletion requests are processed within 1 hour.
- ☒ C. Data deletion requests are submitted for Individual profiles.
- ☒ D. Data deletion requests submitted to Data Cloud are passed to all connected Salesforce clouds.

Question 51 of 60

Choose 2 options.

Which two requirements must be met for a calculated insight to appear in the segmentation canvas?

- ☐ A. The metrics of the calculated insights must only contain numeric values.
- ☐ B. The primary key of the segmented table must be a metric in the calculated insight.
- ☒ C. The calculated insight must contain a dimension including the Individual or Unified Individual Id.
- ☒ D. The primary key of the segmented table must be a dimension in the calculated insight.

Question 52 of 60

Choose 1 option.

A consultant at Northern Trail Outfitters is implementing Data Cloud and creating an activation target for their segment.

For activation membership, which object should the consultant choose?

- ☐ A. Data Lake Object
- ☐ B. Data Model Object
- ☐ C. Data Segmentation Object
- ☒ D. Data Activation Object

Question 53 of 60

Choose 1 option.

Northern Trail Outfitters wants to use some of its Marketing Cloud data in Data Cloud.

Which engagement channel data will require custom integration?

- ☐ A. SMS
- ☒ B. CloudPage
- ☐ C. Mobile push
- ☐ D. Email

Question 54 of 60

Choose 1 option.

Northern Trail Outfitters (NTO) wants to connect their B2C Commerce data with Data Cloud and bring two years of transactional history into Data Cloud.

What should NTO use to achieve this?

- ☐ A. B2C Commerce Starter Bundles
- ☒ B. B2C Commerce Starter Bundles plus a custom extract
- ☐ C. Direct Sales Order entity ingestion
- ☐ D. Direct Sales Product entity ingestion

Question 55 of 60

Choose 1 option.

A Data Cloud consultant recently discovered that their identity resolution process is matching individuals that share email addresses or phone numbers, but are not actually the same individual.

What should the consultant do to address this issue?

- ☐ A. Create and run a new ruleset with fewer matching rules, compare the two rulesets to review and verify the results, and then migrate to the new ruleset once approved.
- ☐ B. Modify the existing ruleset to use fewer matching rules, run the ruleset and review the updated results, then adjust as needed until the individuals are matching correctly.
- ☒ C. Create and run a new ruleset with stricter matching criteria, compare the two rulesets to review and verify the results, and then migrate to the new ruleset once approved.
- ☐ D. Modify the existing ruleset with stricter matching criteria, run the ruleset and review the updated results, then adjust as needed until the individuals are matching correctly.

Question 56 of 60

Choose 1 option.

How does Data Cloud ensure high availability and fault tolerance for customer data?

- ☐ A. By implementing automatic data recovery procedures
- ☐ B. By limiting data access to essential personnel
- ☒ C. By distributing data across multiple regions and data centers
- ☐ D. By using a data center with robust backups

Question 57 of 60

Choose 1 option.

A retail customer wants to bring customer data from different sources and wants to take advantage of identity resolution so that it can be used in segmentation.

On which entity should this be segmented for activation membership?

- ☐ A. Individual
- ☐ B. Subscriber
- ☒ C. Unified Individual
- ☐ D. Unified Contact

Question 58 of 60

Choose 1 option.

What is a typical use case for Salesforce Data Cloud?

- ☒ A. Data harmonization across multiple platforms
- ☐ B. Storing CRM data on-premises
- ☐ C. Data synchronization across the Salesforce ecosystem
- ☐ D. Sending personalized emails at scale

Question 59 of 60

Choose 1 option.

A user is not seeing suggested values from newly-modeled data when building a segment.

What is causing this issue?

- ☐ A. Value suggestion can only work on direct attributes and not related attributes.
- ☒ B. Value suggestion is still processing and takes up to 24 hours to be available.
- ☐ C. Value suggestion will only return results for the first 50 values of a specific attribute.
- ☐ D. Value suggestion requires Data Aware Specialist permissions at a minimum.

Question 60 of 60

Choose 1 option.

How should a Data Cloud consultant successfully apply consent during segmentation?

- ☐ A. Include Party Identification for any applicable channels of engagement in the filter criteria for each segment.
- ☐ B. Include the Consent Status from the golden record during activation for any applicable channels of engagement.
- ☐ C. Include the Unified Profile during segmentation for any applicable channels of engagement.
- ☒ D. Include the Consent Status for any applicable channels of engagement in the filter criteria for each segment.
