

Financial Services Cloud

1.

A new custom object has been created, and the records of this object will be created through integration with another system.

What should a consultant do to ensure the data is loading into the correct fields in Financial Services Cloud?

- A. Utilize a field mapping file with the external system data location and the corresponding field in Salesforce

- B. Create a junction object between the external system and the new customer object where the data will reside

- C. Ensure custom metadata is configured and each custom metadata record details where the data will be sent

- D. Use a CSV file with the data created and use Data Loader to map to the correct field

2. Cumulus Cloud Bank is asking the consultant to explain some tools available to integrate Salesforce into several of its back-end/core systems.

Which three capabilities should a consultant recommend?

- A. Industry Integration Solutions with the MuleSoft Anypoint Platform

- B. Data Processing Engine

- C. Data Consumption Framework

- D. OmniStudio Integration Procedures

- E. OmniStudio DataRaptors

3. In Financial Services Cloud, what is the criteria for commas and symbols to be displayed correctly on the Financial Account Summary component?

- A. User's locale and language must match user's currency.

- B. User currency must match org default currency.

- C. User's locale must match user's currency.

- D. Account currency must match org default currency.

4. Cumulus Cloud Bank must provide its customer service staff with real-time access to customer accounts, including the ability to view current transactions and balances. As a result, the bank expects a high volume of concurrent users at peak times.

Which option is most suitable?

- A. Use Salesforce Connect with External Objects to expose tables from the bank's core systems, and use custom Lightning web components to surface them in the Salesforce Lightning UI.

- B. Embed custom Lightning web components on the Account and Financial Account pages, and use custom Apex to make callouts to the core system services.

- C. Use the Data Consumption Framework to connect to the bank's middleware.

- D. Use Salesforce Connect with External Objects to expose tables from the bank's core systems, and use the standard user interface (UI) components to surface the records in Salesforce Lightning UI.

5. A wealth management firm is looking to start tracking its clients' hobbies for marketing purposes in Salesforce.

Which Financial Services Cloud feature is most suitable for this?

- A. Topics

- B. Interest Tags

- C. Alerts

- D. Engagement Topics

6. Choose 2 options.

A Bank of the Future customer calls the bank to update the address on their account. The call center agent handling the call needs to enter a new address into the system. The agent enters the new contact information using an OmniScript and then needs to generate a prefilled PDF with the new address that can be shared with the customer.

Which two OmniStudio tools should a consultant recommend to generate the prefilled PDF?

- A. Calculation Procedure
- B. Document Generation
- C. Integration Procedure
- D. OmniStudio Action
- E. DataRaptor

7. Choose 3 options.

Financial Services Cloud (FSC) contains a number of custom objects to model a client's financial information, and each object can be configured to appear as tabs in your org. For example, if a consultant wanted to create a financial goal for a customer, they could use the Financial Goal object in FSC.

What are three objects in FSC?

- A. Financial Goal
- B. Billing
- C. Financial Holding
- D. Inheritance
- E. Revenue

8. Choose 1 option.

An investment banker is looking to take detailed meeting notes and share them easily with his colleagues while specifying confidentiality and meeting attendees.

Which Financial Services Cloud feature should a consultant recommend in this scenario?

- A. Notes
- B. Events

C. Interaction Summary

D. Engagement Interaction

9. Choose 1 option.

Salesforce provides a robust set of automation features to help save time and resources. For example, a system administrator can use Flow Builder to automate most of an organization's repetitive business processes.

Which use case is a suitable fit for Flow Builder?

- A. Coordinate multiple flows and assign them to multiple teams or individuals.
- B. Suggest offers and actions to users that are tailored to meet an organization's unique business criteria.
- C. Collect input from internal users with a form placed on a Lightning page or launched by a button.
- D. Perform an operation for more records than schedule-triggered flows allow.

10. Choose 2 options.

A bank needs help with many of its processes taking too long to complete. Many of its challenges are due to issues with handoffs between teams. The challenges also include users transferring control to the wrong person or team or forgetting to transfer it at all.

Which two Financial Services Cloud capabilities should help address these challenges?

A. Roll-up Summaries

B. Financial Accounts

C. Action Plans

D. OmniScripts

11. Choose 1 option.

A Financial Services Cloud (FSC) administrator is assigning permission set licenses to users, including personal bankers.

Which permission set license is recommended for this set of users?

- A. FSC Standard permission set license
- B. FSC Basic permission set license
- C. FSC Foundations permission set license
- D. FSC Extension permission set license

12. Choose 1 option.

An administrator is logged into Data Loader with their own credentials to insert new Business Account records into their Salesforce environment. They forget to specify the Account Owner field in the import file.

Assuming there are no other issues, what should happen when the administrator uploads the import file?

- A. The import will succeed, and the administrator will be prompted to select a user.
- B. The import will succeed, and the Account Owner field will be left blank.
- C. The import will succeed, and the administrator will be named as the default Account Owner.
- D. The import will fail, since all records in Salesforce must have an owner.

13. Choose 1 option.

An insurance company aims to improve a call center's productivity. A detailed analysis discovered that agents spend a lot of time capturing data while adding and updating beneficiary details. Capturing premium payment details (payment date and frequency) is another time-consuming task.

Which action should a Financial Services Cloud consultant take to resolve the issue?

- A. Install an Insurance Data AppExchange package.

B. Provide a better user interface by building Lightning web components for beneficiary data and payment information.

C. Utilize Insurance Flow Templates.

D. Create an Action Plan Template for capturing beneficiary data and payment information.

14. Choose 3 options.

An investment bank is implementing Financial Services Cloud (FSC) to manage the deal pipeline. Each opportunity has confidential information that the deal team members must only view. In addition, each member needs the ability to take and share notes directly within Salesforce with others on the team.

Which three FSC features should be part of the solution design?

- A. Compliant Data Sharing

- B. Profiles

- C. Financial Deal Management

- D. Sharing Rules

- E. Interaction Summaries

15. Choose 3 options.

A company wants to convert its Salesforce Financial Services Cloud implementation from using the individual account model to using person accounts.

Which three things should a consultant do to prepare for the conversion?

A. Update all opportunities linked to individual account records to be owned by the individual account record's owner.

B. Ensure each account phone field in the individual account record is blank.

C. Ensure each individual account to be converted is not a parent account of any other account records.

D. Ensure all individual account records to be converted are only linked to exactly one contact record.

E. Test out the conversion in a sandbox, including all integrations and customizations.

16. Choose 3 options.

A wealth management division manages the financial assets of many wealthy clients.

Which three steps should the Financial Services Cloud consultant take to offer a high level of customization to boost user productivity?

A. Create a new type of person account so trust group details roll down to the beneficiaries level.

B. Assign the Custom Field Set to the Financial Summary component.

C. Assign the Custom Field Set to a Lightning component.

D. Create a Custom Field Set solely for the Wealth Managers without affecting the Investment Bankers.

17. Choose 1 option.

A financial services company needs to transform the individual data model to person accounts in Financial Services Cloud (FSC), and its consulting partner is helping decide the sequence of the user stories in the design phase.

What should the implementation team do as the top priority during planning?

- A. Perform a data backup.

- B. Configure Person Account record types.

- C. Enable person accounts in FS

- D. Enable person account in a sandbox.

18. Choose 1 option.

Cumulus Bank has branches in multiple countries that are required to report in local currency, while the corporate headquarters office wishes to see reports in a single currency (the corporate currency).

Which solution should a consultant recommend to meet these requirements?

- A. Use a third party from AppExchange add-on to implement currency conversions.
- B. Allow users to set their preferred currency in their profile and design reports that convert currencies for the user running the report.
- C. Enable multiple currencies and advanced currency management, and set a corporate currency for the corporate headquarters office.
- D. Set the default currency for head office and have the regions download their reports to Excel and convert them manually.

19. Choose 3 options.

An insurance company wants to create a car insurance quote process for its website. The process should include the following functionality:

- The user has to enter contact and address information.
- The user has to enter the driver's age and the car model and year.
- The process should calculate an insurance quote based on the data the customer provided and save the offer to the client's record.

Which three OmniStudio tools should the consultant use to design a solution that meets these requirements?

- A. FlexCards
- B. APEX Code
- C. Integration Procedures
- D. OmniScripts
- E. Business Rules Engine

20. Choose 3 options.

A financial services company wants to track different categories of financial accounts in its org. Relationship managers must be able to see all of these financial accounts in one place on the customer's Account record page grouped by categories.

Which three steps should an administrator take to configure the Financial Account object and the Account Lightning record page to meet the design?

- A. Create a custom picklist on the Financial Account object to track the Typ
- B. Add the Financial Account List component to the Account Lightning record page.
- C. Configure Financial Account record types to match the required categories.
- D. Configure the Financial Account List components for each required category.

21. Choose 3 options.

- A. Streamlined the entire deal lifecycle with FSC, leveraging relationship maps and interaction history in business development/discovery to accelerate pipe management and research
- B. Improved customer onboarding experiences by fast-tracking and simplifying document tracking and approvals via FSC Action Plans
- C. Drove Advisor productivity with a daily task list, client life events, opportunities, and aggregated household information directly from the FSC Home Page
- D. Automated claims orchestration via straight through processing workflow rules from OmniStudio with minimal human intervention from insurance adjusters or underwriters, allowing claims to be completed faster and at scale
- E. Achieved higher CSAT and NPS scores attributed to personalized customer experiences driven by shorter waits due to decreased average case handle times and improved self-service solutions via Einstein Bots for FSC

22. Choose 3 options.

Cumulus Bank wants to use Interactions to capture conversations that investment bankers have with their clients. Due to the sensitive nature of the interactions, the bank needs to carefully limit access to the detailed notes for certain groups. Basic information about attendees and meeting dates is not sensitive.

Which three options should a consultant recommend?

- A. Enable Compliant Data Sharing for Interactions.
- B. Use Interaction Summary Participants to provide the right access to individuals or groups.

C. Disable Role-Hierarchy-Based Sharing for Engagement Interactions.

D. Enable Compliant Data Sharing for Interaction Summaries.

E. Disable Role-Hierarchy-Based Sharing for Interaction Summaries.

23. Choose 1 option.

A financial services company offers special deposit products for its employees. These employees have customer records in Salesforce so that they can be serviced like normal customers. Only customer service employees within a specific group should be able to see these special deposit products in Salesforce to protect the personal financial information of bank employees.

How should the administrator configure sharing rules in Financial Services Cloud to meet these requirements?

A. Create an Account sharing rule based on record owner.

B. Create a Financial Account sharing rule based on criteria.

C. Create a Financial Account sharing rule based on record owner.

D. Create Account sharing rules based on criteria.

24. Choose 1 option.

An asset management firm that is moving to Salesforce from its old CRM wants to be able to bring over its client data on drivers' licenses and passports.

Which Financial Services Cloud object should a consultant recommend?

A. Document Checklist Item

B. Identification Document

C. Identity Document

D. Received Document

25. Choose 1 option.

Cumulus Bank is migrating its CRM software from a legacy application to Salesforce Financial Services Cloud (FSC). The bank hired Salesforce Professional Services to configure/deploy the new Salesforce FSC org and migrate data.

Which order should a consultant follow when performing the data migrations?

- A. Financial Accounts, then Financial Account Transactions, then Financial Account Roles, then Individuals
- B. Individuals, then Financial Account Roles, then Financial Accounts, then Financial Account Transactions
- C. Individuals, then Financial Accounts, then Financial Account Roles, then Financial Account Transactions
- D. Financial Accounts, then Financial Account Roles, then Individuals, then Financial Account Transactions

26. Choose 3 options.

During the delivery stage of a Financial Services Cloud (FSC) implementation, a consultant needs to think about how to utilize FSC-related objects. Which three things should the consultant consider when adopting such objects?

- A. A. In a household, each of the household members is modeled as a Person Account and the household is modeled as an Account.
- B. In a household, each household member is modeled as a Contact, and the household is modeled as an Account.
- C. Interaction Summary is an enhancement of the standard Activity object. FSC implementations should use Interaction Summary as a replacement for the Activity object.
- D. Both the Financial Deal object and the Opportunity object support Compliant Data Sharing.
- E. Role Hierarchy-based sharing can be disabled for the Financial Deal object but can't be disabled for the Opportunity object.

27. When importing records from a system outside of Salesforce, which ID should be used to prevent the data import from creating duplicates?

- A. External ID
- B. User ID
- C. Org ID

- D. Data Load ID

28. A financial services company needs to add new values for how a customer can be related to a financial account.

Which object/field should the administrator add new values on?

- A. Object: Financial Account Role;

Field: Role

- B. Object: Financial Account;

Field: Primary Owner

- C. Object: Financial Account;

Field: Joint Owner

29. A financial institution has custom security and visibility rules where certain users need to see specific records even though they are not typically engaged in that Account. This includes legal and compliance members who must be engaged for particular deals.

Which Financial Services Cloud capability provides the ability to accommodate this request?

A. Business Rules Engine

B. Custom Sharing Rules

C. Compliant Data Sharing

D. Interaction Summaries

30. The system administrator of a U.S. global investment bank was trying to enable Multi-currency functionality for their new Sales and Trading business unit in Paris, France.

What are two reasons the French UAT tester could not see GBP currency values on any list views?

- A. The administrator did not include the Currency ISO Code on Page Layouts.

- B. GBP is not an active currency ISO code on this new Salesforce org.

- C. The administrator needed to set the Currency field on Advanced Currency Management.
- D. The system administrator has CAD as the default user currency.

31. What is a key step in identifying different business processes and outlining encompassing system flows based on the existing environment when setting up Salesforce Financial Services Cloud (FSC)?

- A. Implementing a generic, one-size-fits-all solution for all customers
- B. Creating a new Salesforce instance from scratch for the customer
- C. Conducting a gap analysis between the customer's current processes and Salesforce FSC capabilities
- D. Importing the customer's existing data into Salesforce FSC without any modifications

32. An advisor is setting up a Household in Financial Services Cloud for their new clients, Oliver and Macie Doggington. The advisor created a Person Account record for both Oliver and Macie, and a Household record for the Doggington household. While creating the Household group, the advisor attempted to input the below information but received an error.

Member Name: Oliver Doggington

Role in Group: Client

Primary Member: Enabled

Primary Group: Enabled

Activities and Objects to Roll Up: All

Member Name: Macie Doggington

Role in Group: Spouse

Primary Member: Enabled

Primary Group: Enabled

Activities and Objects to Roll Up: All

Based on the information provided, what caused the error that the advisor received?

- A. Primary Member - two individuals cannot be designated as the Primary Member of the same Household.

- B. Spouse is not a valid Role within a Group.

- C. Primary Group - two individuals cannot designate the same Household as their Primary Group.

- D. Activities and Objects to Roll Up - two individuals cannot designate their activities to roll up to the same Household.

33. A financial institution is concerned about contacting clients or sharing their data when they have requested not to be contacted.

Which action should the consultant take in Financial Services Cloud to address the institution's concern?

- A. Hide the client's contact information and add an approval process for allowing a user to access it to contact the client.

- B. Enable and implement the appropriate Regulation checkbox on the client record to track their request.

- C. Integrate the Consent object with their Consent Platform to track it in Salesforce.

- D. Implement Consent Management for Financial Services Cloud.

34. A corporate investment banking associate at Cumulus Capital works with a trusted analyst to create pitch books, analyze market data, and generate reports. The banking associate is looking to capture sensitive deal information in Salesforce. They wish to share the deal information with the trusted analyst only, without giving access to Salesforce users up the management chain in the Role Hierarchy.

What should a consultant do in Salesforce to build the required sharing model for sensitive deal data?

- A. Use the Financial Deal object to capture the deal data and use Compliant Data Sharing to grant the analyst access.

- B. Use the Opportunity object to capture the deal data and use Compliant Data Sharing to grant the analyst access.

- C. Use the Financial Deal object to capture the deal data and use restriction rules to block user access above the banking associate in the Role Hierarchy.

35. Cumulus Insurance has created a Delegated Administrator group for its franchise users to reduce the workload on head office support staff.

Which three functions should be added to the Delegated Administrator group?

- A. Unlock users.
- B. Set organization-wide sharing defaults on custom objects.
- C. Create and manage membership of specified public groups.
- D. Assign or remove permission sets for users in their delegated groups.

36. What are the three building blocks of Flow Orchestration?

- A. Steps
- B. Stages
- C. Processes
- D. Work Items
- E. Blocks

37. A Financial Services Cloud (FSC) administrator wants to create a new FSC permission set that includes the Access Interest Tags for Financial Services Cloud permission.

Which two permission sets should be cloned to create this new permission set and give access to interest tags?

- A. FSC Standard permission set
- B. FSC Foundations permission set
- C. FSC Extension permission set
- D. FSC Basic permission set

38. Choose 2 options.

A system administrator at a financial services company wants to build a report to show Interest Tags.

Which two things should the administrator consider when configuring the report?

- A. The user must build a report using the Topics object to view Interest Tags in the report.
- B. When the user defines the custom report type, Tag Categories should be selected as the Primary Object.
- C. When the user defines the custom report type, Topics should be selected as the Primary Object.
- D. To show Interest Tags applied to specific objects, the user can add a filter in the report and select the object name.

39. Choose 3 options.

Which three related lists are visible within Actionable Relationship Center associated with the Account object?

- A. Household Financial Accounts
- B. Client Financial Goals
- C. Cases
- D. Notes and Attachments
- E. Financial Holdings

40. Choose 3 options.

The Compliant Data Sharing (CDS) feature lets administrators and compliance managers configure advanced data-sharing rules so that they can improve compliance with regulations and company policies.

Which three things should be considered when implementing CDS in Financial Services Cloud (FSC)?

- A. To get the benefits of CDS, administrators must set organization-wide sharing settings for supported objects to the Private access model.
- B. Users above the record owner in the Role Hierarchy and non-record owners with Edit access granted through CDS have the same ability/access as record owners.

- C. CDS in FSC allows record owners to grant access to their records to other FSC users.

- D. To disable CDS for an object, any Participant Roles associated with that object must be deleted first.

- E. CDS can only be applied to FSC objects and Account and Opportunity objects.

41. Choose 3 options.

During the design phase of a project, a consultant needs to provide a Financial Services Cloud (FSC) solution for a business requirement that forces a customer to answer a number of assessment questions to complete the onboarding process.

What are three things to consider regarding Discovery Framework?

- A. Discovery Framework is built based on Salesforce Flow.

- B. Discovery Framework can create both standard and hierarchical questions.

- C. Discovery Framework creates highly capable forms with integrations and advanced logic.

- D. Discovery Framework forms cannot be deployed to Communities.

42. Choose 3 options.

A large insurance company hired a consulting firm to improve customer experiences for customers that want to complete standard processes online, such as getting an insurance quote or submitting a claim.

Which three standard Insurance Platform components can digitally enable these core insurance operations?

- A. Quote, Rate, and Apply

- B. Quote Creation Toolbox

- C. Policy Administration

- D. Mobile Claim Submission

- E. Claims Management

43. A retail bank is using Financial Services Cloud to support its operations. The bank has received complaints that its clients' documentation is often submitted late and when clients call, customer service agents are struggling with multiple systems to determine where the documentation is.

Which solution should a consultant suggest the client explore?

- A. Process Builder to create automated document requests for missing items
- B. A Marketing Cloud integration to manage client communications
- C. The Send Documents flow for Retail Banking
- D. An APEX solution to leverage the SendMail capabilities of Salesforce

44. Choose 3 options.

A wealth client owns a boutique shoe store called Smith's Shoes. Their financial advisor would like to add this relationship to Financial Services Cloud (FSC) to track the complete picture of relationships related to the wealth client's household.

Which three options should the Financial Services Cloud consultant use when mapping this relationship in FSC?

- A. Contact object
- B. Account object - Business record type
- C. Account Contact Relationship object
- D. Account object - Household record type
- E. Account Account Relationship object

45. Choose 1 option.

How should developers configure customized nodes for display in Actionable Relationship Center (ARC)?

- A. Reference the Lightning web component in the Display properties of the custom ARC relationship graph.

- B. Select OmniScript from the node Actions tab to show the node in an OmniScript.
- C. Select Use FlexCard from the node Display tab to show the node in a FlexCard.
- D. Reference the FlexCard in the Display properties of the custom ARC relationship graph.

46. Choose 2 options.

Cumulus Bank has implemented Compliant Data Sharing in Financial Services Cloud. Which two things happen when an opportunity record that has opportunity participants with associated share table entries is set to Private?

- A. Share table records need to be manually deleted.
- B. The opportunity participant records are not deleted.
- C. All opportunity participant records are deleted.
- D. The share table records are deleted.

47. Choose 2 options.

Which two steps should an administrator take to ensure that all users can see person accounts but only specific users can view financial accounts?

- A. Change organization-wide defaults (OWD) sharing on the Financial Accounts object to Public Read Only.
- B. Edit the Lightning page assigned to the Financial Advisor Profile and remove the Financial Accounts tab.
- C. Change organization-wide defaults (OWD) sharing on the Person Accounts object to Public Read Only.
- D. Change organization-wide defaults (OWD) sharing on the Financial Accounts object to Private.

48. Choose 2 options.

A consultant advising Cumulus Bank wants to ensure that the bank is compliant with Identity Verification Regulations when customers contact the bank.

Which two features should a consultant leverage to design this business process?

- A. Process Builder
- B. Discovery Framework
- C. Screen Flows
- D. OmniStudio

49. Choose 3 options.

Which three record type options should an advisor configure for a Lead object configuration?

- A. General
- B. Adjustments
- C. Retirement Planning
- D. Opportunity
- E. Referral

50. How should developers configure customized nodes for display in ARC?

- A. Reference the FlexCard in the Display properties of the custom ARC relationship graph
- B. Select Use FlexCard from the node Display tab to show the node in a FlexCard
- C. Select Use LWC from the node Display tab to show the node in a Lightning Web Component
- D. Reference the Lightning Web Component in the Display properties of the custom ARC relationship graph

51. Choose 3 options.

A financial services company wants to plan ahead for designing the Financial Services Cloud (FSC) implementation.

Which three activities should the implementation team prioritize during planning?

- A. Enable and configure person accounts in FSC, and assign users with permission set licenses.
- B. Design the modifications to fields, picklists, layouts, and other required features to support business processes.

- C. Review the out-of-the-box capabilities and compare them to the company's current needs.
- D. Prepare for integrations with transactional systems, external data sources, custodians, and any other platforms that the company's business relies on.
- E. Beyond the preconfigured settings, evaluate whether they need advanced customizations.

52. Choose 3 options.

Which three permission sets grant access or extend permissions for record alerts in Financial Services Cloud (FSC)?

- A. OmniStudio Admin permission set
- B. OmniStudio User permission set
- C. FSC Basic permission set
- D. FSC Standard permission set
- E. FSC Foundations permission set

53. Rachel Addams belongs to two households:

1) The Addams household where Rachel lives with her spouse, Nigel Addams. Rachel is the client and, as such, is listed as the primary member of that household. This household is also Rachel's primary group.

2) The Symonds household. This household belongs to Rachel's parents, but Rachel manages their finances. Rachel is considered the beneficiary of this household.

In addition, Rachel's household has a related account, the Addams Charitable Trust, and a related contact, Ivan M. Kohl, attorney at law.

What should be the relationships between the parties when the Financial Services Cloud consultant sets up Rachel's person account?

- A. Primary Group Household - Symonds Household

Primary Member - Neil Symonds

Trustee - Addams Charitable Trust

Household - Addams Household

Primary Member - Rachel Addams

- B. Trustee - Addams Charitable Trust

Household - Addams Household

Primary Member - Nigel Addams

Spouse - Rachel Addams

Beneficiary - Rachel Addams

Related Accounts - Addams Charitable Trust

Related Contacts - Ivan M. Kohl

- C. Primary Group Household - Addams Household

Primary Member - Rachel Addams

Spouse - Nigel Addams

Trustee - Addams Charitable Trust

Household - Symonds Household

Primary Member - Neil Symonds

Beneficiary - Rachel Addams

Related Accounts - Addams Charitable Trust

Related Contacts - Ivan M. Kohl

- D. Primary Group Household - Addams Household

Primary Member - Rachel Addams

Spouse - Nigel Addams

54. A private equity company with only one administrator wants to upgrade Financial Services Cloud (FSC) from a Sales Cloud Unlimited Edition (UE) org. The company decided to install FSC greenfield on a new org to minimize the transfer of existing tech debt. In preparation for data migration, the administrator has been exporting backup files of the current org for a month.

What should the administrator do as part of the preparation for the data migration process?

- A. The administrator can ask the business manager on the investment bank team to review the file directly.

- B. To start, the administrator can run a daily backup data export for a week, then continue to run this job weekly until they are ready for data migration.

- C. As a dry run, the administrator can test this process via a data export request from the primary sandbox to the existing Sales Cloud UE org.

- D. After running the backup data export manually for 2 weeks, the administrator can schedule this job to run weekly rate.

55. Choose 2 options.

Cumulus Bank's mortgage department is currently using spreadsheets to gather client data for mortgage applications. The bank is interested in improving the efficiency of this process.

Which two features should a consultant suggest to Cumulus Bank to implement?

- A. A Data Import Wizard to upload the data collected in spreadsheets
- B. A "Mortgage Application" custom object to hold the collected client data
- C. Flow Builder to automate these business processes
- D. The standard mortgage flow templates to build a mortgage flow in Financial Services Cloud

56. Choose 3 options.

A banking client currently manages its onboarding process manually with paper forms. To optimize the process, the client wants to digitize and automate as much as possible. The bank wants its clients to manage the forms in a portal and leverage e-signatures for processing.

Which three steps are needed to document this requirement following the discovery session?

- A. Understand the journey for the multiple personas involved in the process.
- B. Design the solution using the Financial Services Cloud components.
- C. Determine the best e-signature solution to use.
- D. Document the business process flows.
- E. Create a visual flow diagram.

57. Choose 1 option.

A consulting firm is asked to add Events and Milestones to a Lightning record page to give financial advisors deeper insights into their customers' lives.

What should the consultant configure to enable advisors to capture Once-in-a-Lifetime events and, at the same time, prevent users from accidentally creating more than one event of such an event type?

- A. Special event types
- B. Unique event types
- C. Once-in-a-Lifetime event types
- D. Single event types

58. Choose 3 options.

A bank recently sold its wealth management division and wants to improve its customers' digital experience. The bank engaged Salesforce Professional Services to upgrade its existing Salesforce CRM to Financial Services Cloud and deliver its Bank of the Future vision.

Which three expected outcomes can serve as return on investment (ROI) justifications to the bank's chief financial officer (CFO) and investment committee?

- A. Simplify the client onboarding process with proper tools to streamline customer discovery and internal reviews through renewal.
- B. Manage policy holders' interactions with customer service agents intelligently through the underwriting process.
- C. Unify and improve team collaboration by sharing and managing customer leads and referrals across multiple lines of business at the bank to drive customers' financial needs and deepen client relationships.
- D. Modernize client-advisor experiences from engagement to relationship management to effectively drive long-term, trusted relationships.

59. Choose 3 options.

A financial services company needs to capture a new type of referral that has different required fields than what is currently configured in the org.

Which three steps should the administrator take to configure Financial Services Cloud correctly based on the scenario?

- A. Create a new record type "Referral" on the Lead object.
- B. Assign the record type to users.
- C. Create a custom Referral object.
- D. Create a new referral record type mapper record.

60. Choose 1 option.

OmniScript represents processes with fast, personalized, and consistent responses. This type extends the metadata type and inherits its fullname field.

To use the OmniScript metadata type, what should the administrator enable in the Salesforce org?

- A. Discovery Framework
- B. Custom Domain
- C. Einstein Relationship Insights

- D. Lightning Experience for Financial Services Cloud

61. Cumulus Cloud Bank needs help onboarding new customers. The business process requires updating the Know Your Customer (KYC) document checklist and performing internal tasks in a predefined order. However, during an internal audit, it was found that bankers often miss these tasks and still move to the next stage of the onboarding process.

What should a consultant recommend?

- A. Utilize Action Plan and Action Plan Template.

- B. Utilize Chatter notifications for reminders.

- C. Utilize Financial Services Cloud Flow Templates to flag missing items.

- D. Create an after-save trigger to generate reminder tasks.

62. A major Japanese bank is expanding geographically and opening additional branches in Asia. As such, they hired a regional consulting firm to implement Financial Services Cloud (FSC) locally.

What are the two expectations from implementing multi language features in FSC?

- A. Referrals in Singapore and Hong Kong will be shared in English, but in Macau, referrals will be shared in Portuguese.

- B. Bankers in Japan have been accessing FSC in Japanese, but the new bankers in China will be accessing FSC in Chinese.

- C. In Seoul, South Korea, the branch managers will be reviewing their FSC dashboards every morning in Korean, while their colleagues in Shanghai, China, will be doing so in Chinese.

- D. In Tokyo branches, the names of the Account, Prospect and Contact are in Japanese, but the package Advisor, Personal Banker, Relationship Manager, and Client Associate profiles are in English.

63. How are identification documents, other assets, liabilities, goals, and revenue modeled, in an existing Financial Services Cloud org using the individual account model?

- A. Custom objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the person account.

- B. The Attachment object is used to represent other assets, liabilities, and goals. In the individual model, these attachments are related to the Account object.

- C. Custom objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the Account object.

- D. Document, Note, and Attachment objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the person account.

64. A consultant is building an agent console for an insurance company using FlexCards to provide a 360-degree view of its customers. An Integration Procedure will be used to retrieve Account, Opportunity, and Contract data. The agent wants the following information displayed:

- Account information including account name, phone, and website
- Active opportunities related to the Account
- Active insurance policies related to the Account
- The ability to view and renew policies

How should the consultant design the FlexCards to meet these requirements?

- A. Parent FlexCard with multiple Children and different Card States
- B. Parent FlexCard with single Child and Card Actions
- C. Parent FlexCard with single Child and multiple Card States
- D. Parent FlexCard with multiple Child Flex Cards and Card Actions

65. Choose 3 options.

An investment bank client wants all its users to track client engagements with Interaction Summaries. In addition, those call logs need to be shared with specialists in other lines of business so they can assist in specific types of deals.

Which three Financial Services Cloud standard objects should be used to help accommodate these business requirements?

- A. Interaction Participant
- B. Participant Role
- C. Interaction Summary Participant
- D. Financial Deal Participant
- E. Opportunity Participant

66. An insurance company needs to ensure the record rollups aggregate information from related records for several objects in Financial Services Cloud at a client or group level.

What should the administrator configure to meet the requirement?

- A. To show all Primary Group member cases on a related list at the group level, the administrator should add Cases as a picklist value to the Rollup__c field on Account Contact Relationship.

- B. When the administrator enables record rollups at the group level, all corresponding records are stamped with the Primary Group in the Rollup__c lookup file!

- C. Client-level records are aggregated by setting up client-level rollups to all primary group members.

- D. To show all Primary Group member opportunities on a related list at the group level, the administrator should add Opportunities as a picklist value to the Household__c field on Account Contact Relationship.

67. Early in the discovery and solution meetings, it was determined that the client would primarily use out-of-the-box Financial Services Cloud (FSC) objects and components with minimal custom objects needed. In addition, it was decided that records should be private, but the managerial chain would require visibility into all their direct reports' records.

Which three security settings must be set up in Salesforce to meet these requirements?

- A. Only Custom Profiles should be configured and assigned to all users to use FSC components and field-level security. The administrator should configure custom profiles and assign them to all users

- B. Each object sharing should be set up, explicitly sharing each user's record with the manager.

- C. Organization-wide sharing defaults should be set to meet sharing requirements for all objects in use.

- D. Custom permission sets and out-of-the-box FSC permission sets should be configured or updated and assigned to all users for the use of FSC components and field-level security.

68. A consultant is configuring a demo for a customer but cannot create new residential loan application records.

What is prohibiting the consultant from creating a new residential loan application?

- A. The Residential Loan Application flow was not enabled in the setup.

- B. The user does not have "Mortgage User" checked in their user record.

- C. The administrator did not enable "Allow Mortgage Access" in Setup.

- D. The administrator did not assign the Mortgage permission set to the user.

69. One administrator user at a financial services company needs to help management build reports and gain insights into business performance by including branch management reportable objects.

Which two considerations should the administrator include when configuring the report?

- A. The reportable objects include Banker, Branch Unit, Branch Unit Related Records, and Branch Unit Customer.

- B. Bankers with Branches with Opportunities, Accounts, Leads, and Contacts report types are available for creating reports with Branch Unit Related Records.

- C. When Branch Unit is the primary object, the administrator can select Branch Unit Customers or Branch Unit Related Records as related objects.

- D. Branch Unit Related Record report types have related object names including Lead, Account, and Contact but exclude Financial Account.

70. While working for an insurance client implementing Financial Services Cloud, an API integration between Salesforce and a risk control system has been configured. The consultant is asked to ensure the correct profiles and permissions were set up for this connection.

Which two steps should the consultant take?

- A. Create a new custom profile and ensure API Only is selected.

- B. Create a dedicated Integration User.

- C. Update the System Administrator profile to include the API Only User.

- D. Assign the integration user to the System Administrator profile.

71. The Bank of the Future wants its call center agents to be able to see person accounts but wants to restrict access to financial accounts to protect the privacy of its clients.

Which two steps should an administrator take to ensure that all users can see person accounts but only specific users can view financial accounts?

- A. Change organization-wide defaults (OWD) sharing on the Financial Accounts object to Public Read Only.

- B. Change organization-wide defaults (OWD) sharing on the Person Accounts object to Public Read Only.

- C. Edit the Lightning page assigned to the Financial Advisor Profile and remove the Financial Accounts tab.

- D. Change organization-wide defaults (OWD) sharing on the Financial Accounts object to Private.

72. During a Financial Services Cloud implementation at an insurance company, a consultant needs to design a broker data model for the broker web portal. The given requirements are:

1. Brokers are treated individually, even if they are associated with the same company.
2. Brokers should never have access to other brokers' data.
3. Brokers can nominate their assistants to access the broker portal.
4. An assistant can sometimes work for multiple brokers.

Which two considerations should the consultant consider regarding the data model?

- A. Brokers need to be modeled as Account and Contact individually, as each broker is a legal entity in Salesforce. Then, use a Group Account to model their company.

- B. The Broker Assistant should be modeled as a Contact. Then, use Contact to Contact association if they need work for multiple Brokers.

- C. Brokers should be modeled as Contact and the Broker company should be modeled as Account, even if they're a legal entity individually.

- D. The Broker Assistant should be modeled as a Contact. Then, leverage Contact to Multiple Account features if this assistant needs to work for multiple brokers.

73. The Bank of the Future wants its call center agents to be able to see person accounts but wants to restrict access to financial accounts to protect the privacy of its clients.

**Which two steps should an administrator take to ensure that all users can see person accounts but only specific users can view financial accounts?

A. Change organization-wide defaults (OWD) sharing on the Person Accounts object to Public Read Only

B. Edit the Lightning page assigned to the Financial Advisor Profile and remove the Financial Accounts tab

C. Change organization-wide defaults (OWD) sharing on the Financial Accounts object to Private

D. Change organization-wide defaults (OWD) sharing on the Financial Accounts object to Public Read Only

74. Which three processes are part of Claims Management?**

****Choose 3 answers****

A. Underwriting

B. Payment

C. Reserve Management

D. Quoting

E. Auto Adjudication

75. An insurance company wants to create a car insurance quote process for its website. The process should include the following functionality:**

****The user has to enter contact and address information.****

****The user has to enter the driver's age and the car model and year.****

****The process should calculate an insurance quote based on the data the customer provided and save the offer to the client's record.****

****Which three OmniStudio tools should the consultant use to design a solution that meets these requirements?****

****Choose 3 answers****

A. OmniScripts

D. Business Rules Engine

E. Integration Procedures

B. FlexCards

C. APEX Code

76. A wealth advisor is trying to relate a client to their attorney using the Add Contact option on the Relationship Tree, but can't find any reciprocal roles displayed in the related role lookup.

What are two reasons for this?

Choose 2 answers

A. Reciprocal roles have not been created in the org

B. The user should be using the Member Relationship button under Actionable Relationship Center

C. The user should be using the Edit Group button to access reciprocal roles

D. Sharing rules have not been set up for reciprocal roles

77. A regional bank is implementing Financial Services Cloud (FSC). Today, relationship managers receive email reminders 2 days, 2 weeks, and 2 months after a new customer opens their first bank account to contact the customer for feedback. The bank also wants relationship managers to track and report on progress in FSC.**

What should the administrator do when designing the future state business process using FSC features?

D. When an account status is changed to "Customer", create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.

A. When a lead or referral is converted, create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.

B. When an account status is changed to "Customer", send emails to the Account Owner to follow up in 2 days, 2 weeks, and 2 months.

C. When creating an account, create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.

78. How are identification documents, other assets, liabilities, goals, and revenue modeled in an existing Financial Services Cloud (FSC) org using the Individual Account model?**

A. Custom objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the Account object.

B. The Attachment object is used to represent other assets, liabilities, and goals. In the individual model, these attachments are related to the Account object.

C. Custom objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the person account.

D. Document, Note, and Attachment objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the person account.

79. Which three insurance processes are managed by the Policy Administration component in Financial Services Cloud or an integrated insurance solution?**

Choose 3 answers

A. Payments

C. Commissions

D. Endorsements

B. Approvals

E. Underwriting

80. To access all Financial Services Cloud (FSC) features, a consultant must install both the FSC Managed Package and the Unmanaged Extension Packages.**

Which two functionalities are included in the FSC Unmanaged Extension Packages?

Choose 2 answers

B. Predefined list views of clients and households

C. Field sets that configure how fields display in the client and household profiles

A. Custom objects to track Financial Accounts and Household

D. The Commercial Banking dashboard

81. A consultant is looking to create a guided screen to be used by customer service agents answering the phone to authenticate the caller and positively identify them. The agent will ask the caller to provide their full name and the last four digits of their social security number, which is not stored in Salesforce. The agent will enter the provided information into a form, and upon clicking submit, a web service call is made to an external authentication service to authenticate the caller.**

What should the consultant do to fulfill the needed requirements?

A. Create a Canvas app to surface the external authentication module.

B. Create a screen flow.

C. Create a Lightning web component.

D. Create an OmniScript flow.

82. A financial services company is migrating a legacy customer relationship management system to Financial Services Cloud (FSC). The company is requesting that its consulting partner introduce specific customer interaction features mapped to its business processes.**

What should the consultant consider when introducing the FSC features?

A. If there is a business process for taking detailed notes for client meetings and adding action items, the Action Plan component is recommended to use.

B. If there is a business process for tracking the customer life events and milestones, and timely reminding of opportunities, the Action Plan component is recommended to use.

- C. If there is a business process for showing common interests and needs across the company's clients, the Interaction Summaries component is recommended to use.
- D. If there is a business process for limiting role-based data visibility, the Interaction Summaries component is recommended to use.

83. What are two language-related limitations of Financial Services Cloud?**

****Choose 2 answers****

A. Referral record type labels are supported only in English.

B. Flows are available only in English.

C. Predefined reciprocal roles are available only in English.

D. Custom component labels are supported only in English.

84. Cumulus Cloud Bank, a major financial services provider, has engaged Salesforce Professional Services to transform its operations with Financial Services Cloud (FSC).**

****The Addams family are wealth management clients with the following relationships:****

**** - The wife and her husband are part of the Addams Household.****

**** - The wife is the primary member, and together the couple run the Addams Charitable Trust.****

**** - The wife is also part of the Symonds Household with her father as the primary member.****

****Which tool should the Salesforce FSC consultant recommend so a wealth manager could make sense of this complex data to provide impeccable service to the Addams family and discover new business opportunities?****

A. Financial Services Cloud Einstein

B. Data Filtering and Sorting in Tableau Desktop

C. Data Visualization with Marketing Cloud Intelligence

D. Actionable Relationship Center (ARC), an advanced visualization engine

85. Which three objects should a Financial Services Cloud administrator use when planning to use the Mortgage Data Model to integrate with external Loan Origination and Customer Onboarding applications to accurately track the pipeline?**

****Choose 3 answers****

A. Account

B. Assets and Liabilities

C. Financial Account

D. Opportunity

E. Case

86. It has been determined that integration with an external system is required, as the data needed by a wealth management client resides in another system. This data will be sent from the external system via an API, and Salesforce needs to be configured in preparation for the data.**

Which two items should be configured?

Choose 2 answers

A. An Integration User and Integration Profile to enable the connection

B. A Lightning web component to restrict data from users

C. A flow to get the data into Salesforce

D. Objects and fields to store the data

87. A financial services company must add details to the default business hours record. For company-wide holidays, the company wants the option to skip non-work days in Action Plan when setting task completion dates.**

What should the administrator configure to meet the requirement?

A. Add non-work days to the date offset when calculating the task completion date is automatic; no setup is required.

B. Omit the day's start and end time fields when the administrator wants to indicate a non-working day.

C. Configure the day without business hours, it is considered a non-work day, even if the day is a recurring holiday.

D. Select Recurring Holidays as Action Plans and consider recurring holidays when determining the non-work days to skip.

88. A consultant is working with a new customer and has gained a firm understanding of their business processes and systems in preparation for implementing Salesforce Financial Services Cloud.**

****What should the consultant create as a deliverable for the current state business process?****

- A. An end-to-end visual map of the process using personas, systems, inputs, and outcomes
- B. A PowerPoint deck with screenshots of the current systems and callouts to what is happening on each slide
- C. An Excel spreadsheet with steps of the process as rows, and systems and personas in columns
- D. A Word document telling the story of the process from the user's perspective

89. A financial services company needs to alert advisors about changes in client records that require action.

****What should the administrator consider when configuring Record Alerts?****

- A. When the admin creates a value for the Severity field, the warning icon is associated with the field automatically, and advisors cannot change the icon.
- B. With permissions for Record Alerts, users can create record alerts on all custom objects and standard objects such as Financial Account.
- C. When the administrator adds a new Record Alert Category, the severity value in the alert category is the default value on the record alerts advisors create and cannot be changed.
- D. Record alert categories are not required when creating a record alert, but they help keep alerts organized.

90. Cumulus Insurance's business processes are quite complex, and steps in the process may vary depending on the information captured.

****Which three actions regarding functionality and features should a consultant suggest exploring to help guide Cumulus Insurance users through these processes?****

****Choose 3 answers****

- A. Build custom Lightning pages that correspond to each stage of the business process.
- B. Configure Dynamic Actions for Lightning pages.
- C. Use flows to remove the need for complex Lightning pages.
- D. Configure Dynamic Lightning pages.
- E. Enable In-App Guidance to provide walk-throughs.

91. Which three processes are part of Claims Management?

Choose 3 answers

A. Underwriting

B. Payment

C. Reserve Management

D. Quoting

E. Auto Adjudication

92. A Salesforce administrator updating a record page to add a Chatter component to the Action Plan Lightning record page is unable to find the Chatter components for selection.

What is the reason for this?

- A. Feed tracking has to be enabled for the Action Plan object.
- B. Chatter has to be enabled for Action Plans via Chatter settings in setup.
- C. Admin user has to be assigned the Action Plans permission set.
- D. Salesforce is yet to roll out Chatter for the Action Plan object.

93. Which Salesforce Financial Services Cloud feature enables financial advisors to track and manage client accounts?

- A. Performance reporting
- B. Client onboarding
- C. Financial accounts management
- D. Opportunity management

94. Agents for an insurance company need to know the current and past weather conditions when creating customer claims. The consultant implements a FlexCard for weather conditions in the console to ensure the agents can access the information. The FlexCard needs to provide fields extracted from a weather API and an account field from Salesforce.

Which method should the consultant use, according to best practices?

- A. DataRaptor Extract
- B. Streaming API
- C. Integration Procedure
- D. APEX classes

95. Which step is required to give a group of users access to a Financial Deal?

- A. Update Industries Settings to give users access to the Financial Deal object.
- B. Change organization-wide defaults (OWD) sharing on the Financial Deal object to Public Read/Write.
- C. Create a Financial Deal permission set and assign it to the users that should have access to Financial Deals.
- D. Share a financial deal record with a group by adding them as participants to the record from the Financial Deal Participants related list.

96. A wealth advisor is trying to relate a client to their attorney using the Add Contact option on the relationship tree but can't find any reciprocal roles displayed in the related role lookup. What are two reasons for this?

Choose 2 answers

- A. Reciprocal roles have not been created in the org.
- B. The user should be using the Member Relationship button under Actionable Relationship Center.
- C. The user should be using the Edit Group button to access reciprocal roles.
- D. Sharing rules have not been set up for reciprocal roles.

97. A financial services company needs a custom field for reporting when relating two business accounts to each other.

Which object should the administrator configure the custom field on?

- A. Account
- B. Account Account Relationship
- C. Contact-Contact Relationship

- D. Account Contact Relationship

98. A regional bank is implementing Financial Services Cloud (FSC). Today, relationship managers receive email reminders 2 days, 2 weeks, and 2 months after a new customer opens their first bank account to contact the customer for feedback. In addition, the bank wants the ability for relationship managers to track and report on progress in FSC.

What should the administrator do when designing the future state business process using FSC features?

- A. When a lead or referral is converted, create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.
- B. When an account status is changed to "Customer", send emails to the Account Owner to follow up in 2 days, 2 weeks, and 2 months.
- C. When creating an account, create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.
- D. When an account status is changed to "Customer", create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.

99. Which three insurance processes are managed by the Policy Administration component?

Choose 3 answers

- A. Payments
- B. Approvals
- C. Commissions
- D. Endorsements
- E. Underwriting

100. How should developers configure customized nodes for display in ARC?

- A) Select Use LWC from the node Display tab to show the node in a Lightning Web Component
- B) Select Use FlexCard from the node Display tab to show the node in a FlexCard
- C) Reference the Lightning Web Component in the Display properties of the custom ARC relationship graph
- D) Reference the FlexCard in the Display properties of the custom ARC relationship graph

101. A Financial Services Cloud (FSC) administrator is setting up a permission set for Actionable Relationship Center.

Which license should the administrator select on the Permission Set setup page?

- A. FSC Basic
- B. FSC Standard
- C. OmniStudio
- D. FSC Extension

102. The investor relations director of a large insurance company just published a press release after the company's Quarterly Earnings Call to report about its digital transformation implementing Salesforce Financial Services Cloud (FSC).

Which three value outcomes should the company's stakeholders expect?

Choose 3 answers

- A. Prove Advisor productivity with a daily task list, client life events, opportunities, and aggregated household information directly from the FSC Home Page
- B. Automated claims orchestration via straight through processing workflow rules from OmniStudio with minimal human intervention from insurance adjusters or underwriters, allowing claims to be completed faster and at scale
- C. Improved customer onboarding experiences by fast-tracking and simplifying document tracking and approvals via FSC Action Plans
- D. Achieved higher CSAT and NPS scores attributed to personalized customer experiences driven by shorter waits due to decreased average case handle times and improved self-service solutions via Einstein Bots for FSC
- E. Streamlined the entire deal lifecycle with FSC, leveraging relationship maps and interaction history in business development/discovery to accelerate pipe management and research

103. A financial services company wants to use the Financial Services Cloud Person Account data model. The company needs two Person Account record types, one to represent Individual customer and one to represent Individual independent advisors that send referrals.

What should the administrator do to set up the new record types?

- A. Create custom fields on the Person Account object.
- B. Configure "Individual Record Type Mapper" custom metadata.
- C. Enable "Use Person Account" custom setting.
- D. Create a record type on the Contact object.

104. Culumus Insurance has a franchise business model with a large number of franchisees who operate independently but report to regional managers who are Cumulus employees. The company would like the franchise owners and their employees to have access to the Culumus Salesforce Financial Services Cloud (FSC) instance. The company plans to use the Role Hierarchy and sharing rules to implement this.

What should the architect at Cumulus Insurance be aware of for this solution?

- A. Franchise users will need to switch their browsers to a platform that supports Lightning Web Components.
- B. The administrator can define up to 300 total sharing rules for each object.
- C. Franchise users can have multiple roles in the hierarchy.
- D. Salesforce FSC only allows 1,024 public groups.

105. **Choose 3 options.**

Which three types of preassembled flows can be utilized from the Financial Services Cloud (FSC) packages and the Lightning Flow for FSC package?

- A. Mortgage flow
- B. Retail Banking flow
- C. Commercial Banking flow
- D. Insurance flow
- E. Institutional Banking flow

106. Choose 3 options.**

During a project's design phase, a consultant must provide a Financial Services Cloud solution that can support Compliant Data Sharing (CDS).

What are three things the consultant should consider regarding CDS?

- A. Compliance managers and Salesforce administrators can enable CDS for Account and Opportunity objects.
- B. Participant Roles provide another way to grant data access without overwriting sharing behavior from existing sharing features.

- C. Role Hierarchy–based sharing is disabled by default in CDS.

- D. Activities related to an Opportunity provide independent sharing, so call details for an Opportunity record will not automatically be shared up the hierarchy.

- E. In a standard Salesforce org, Role Hierarchy for Account and Opportunity objects is enabled by default and can't be turned off.

107. Choose 1 option. **

The system administrator team at a retail consumer bank just received data migration instructions and guidance on Data Loader from their Salesforce architect to upgrade the existing Service Cloud org to a Financial Services Cloud (FSC) org.

In what order should the Salesforce objects be uploaded during an FSC data migration?

- A. 1. Accounts and contacts

2. Financial accounts

3. Account groups and households

- B. 1. Households

2. Financial accounts

3. Person accounts

- C. 1. Financial accounts

2. Accounts and contacts

3. Account groups

108. Choose 3 options.

During a project's design phase, a consultant must provide a Financial Services Cloud solution that can support Compliant Data Sharing (CDS).

What are three things the consultant should consider regarding CDS?

- A. Participant Roles provide another way to grant data access without overwriting sharing behavior from existing sharing features.

- B. Activities related to an Opportunity provide independent sharing, so call details for an Opportunity record will not automatically be shared up the hierarchy.

- C. Role Hierarchy-based sharing is disabled by default in CDS.

109. A financial services company would like its users to be able to relate two business accounts.

What should the administrator configure to meet the requirement?

- A. Create a new Contact Reciprocal Role for the required value.
- B. Update the Role picklist on the Account-Contact Relationship object with new value.
- C. Update the Role picklist on the Account-Account Relationship object with new value.
- D. Create a new Account Reciprocal Role for the required value.

110. A financial services company has found that more than two-thirds of customer onboarding processes are manually done by client specialists, consuming large amounts of time and resulting in errors in the sales process. The company contacts a consultant to learn how to leverage Financial Services Cloud features to improve the current state.

What should the consultant consider from a customer onboarding perspective?

- A. If the company struggles with the low efficiency of collecting data in questionnaires and meeting compliance with the company policies, Discovery Framework can be used to improve the current state.
- B. If the company struggles with the low efficiency of tracking required documents for its customers and creating templates for checklists, Action Plan is recommended to improve the current state.
- C. If the company struggles with the low efficiency of tracking required documents for its customers and creating templates for checklists, Discovery Framework is recommended to improve the current state.
- D. If the company struggles with the low efficiency of collecting data in questionnaires and meeting compliance with the company policies, Action Plan can be used to improve the current state.

111. The system administrator team at a retail consumer bank just received data migration instructions and guidance on Data Loader from their Salesforce architect to upgrade the existing Service Cloud org to a Financial Services Cloud (FSC) org.

In what order should the Salesforce objects be uploaded during an FSC data migration?

- A. 1. Households
- 2. Financial accounts
- 3. Person accounts

- B. 1. Accounts and contacts

2. Financial accounts

3. Account groups and households

112. Which three types of preassembled flows can be utilized from the Financial Services Cloud (FSC) packages and the Lightning Flow for FSC package?

- A. Commercial Banking flow

- B. Mortgage flow

- C. Institutional Banking flow

- D. Insurance flow

113. Cumulus Insurance has a franchise business model with a large number of franchisees who operate independently but report to regional managers who are Cumulus employees. The company would like the franchise owners and their employees to have access to the Cumulus Salesforce Financial Services Cloud (FSC) instance. The company plans to use the Role Hierarchy and sharing rules to implement this.

What should the architect at Cumulus Insurance be aware of for this solution?

- A. The administrator can define up to 300 total sharing rules for each object.

- B. Franchise users can have multiple roles in the hierarchy.

- C. Franchise users will need to switch their browsers to a platform that supports Lightning Web Components.

114. A financial services company wants to use the Financial Services Cloud Person Account data model. The company needs two Person Account record types, one to represent Individual customer and one to represent Individual independent advisors that send referrals.

What should the administrator do to set up the new record types?

- A. Enable "Use Person Account" custom setting.

- B. Create custom fields on the Person Account object.

- C. Create a record type on the Contact object.

- D. Configure "Individual Record Type Mapper" custom metadata.

115. A financial services company works to track different categories of financial accounts in its app. Relationship managers must be able to see all of these financial accounts in one place on the customer's Account record page grouped by categories.

Which three steps should an administrator take to configure the Financial Account object and the Account Lightning record page to meet the design?

- A. Cross a custom picklist on the Financial Account object to track the Type
- B. Configure Financial Account record types to match the required categories.
- C. Add the Financial Account List component to the Account Lightning record page.
- D. Create Account lookup fields on the Financial Account object to link the Financial Accounts to an Account.
- E. Configure the Financial Account List components for each required category.

116. Choose 3 options.**

The Complaint Data Sharing (CDS) feature lets administrators and compliance managers configure advanced data sharing rules so that they can improve compliance with regulations and company policies.

Which three things should be considered when implementing CDS in Financial Services Cloud (FSC)?

- A. CDS in FSC allows record owners to grant access to their records to other FSC users.
- B. Users above the record owner in the Role Hierarchy and non-record owners with Edit access granted through CDS have the same ability/access as record owners.
- C. CDS can only be applied to FSC objects and Account and Opportunity objects.
- D. To disable CDS for an object, any Participant Rules associated with that object must be deleted first.
- E. To get the benefits of CDS, administrators must set organization-wide sharing settings for supported objects to the Private access model.

117. Choose 3 options.**

During the design phase of a project, a consultant needs to provide a Financial Services Cloud (FSC) solution for a business requirement that forces a customer to answer a number of assessment questions to complete the embedding process.

What are these things to consider regarding Discovery Framework?

- A. Discovery Framework is built based on Salesforce Flow.
- B. Discovery Framework forms cannot be deployed to Communications.
- C. Discovery Framework can create both standard and hierarchical questions.
- D. Discovery Framework creates highly capable forms with integrations and advanced logic.
- E. FSC Discovery Framework allows archiving questions.

118. Choose 2 options.**

Which three objects should a Financial Services Cloud administrator use when planning to use the Mortgage Data Model to integrate with external Loan Origination and Customer Onboarding applications to accurately track the pipeline?

A. Assets and Liabilities

B. Case

C. Opportunity

D. Financial Account

E. Account

119. Choose a option.**

An exact management firm that is moving to Subadvisor from its old CMM wants to be able to bring over its client data on drivers' licenses and passports.

Which Financial Services Cloud object should a consultant recommend?

A. Document Checklist Item

B. Resolved Document

C. Identity Document

D. Identification Document

120. Choose 1 option.**

A consultant is working with a new customer and has joined a firm understanding of their business processes and systems in preparation for implementing Salesforce Financial Services Cloud.

What should the consultant create as a deliverable for the current stable business process?

- A. An end-to-end visual map of the process using personas, systems, inputs, and outcomes

- B. A Powerpoint deck with screenshots of the current systems and callbacks to what is happening on each slide

- C. A Voice document telling the story of the process from the user's perspective

- D. An Excel spreadsheet with steps of the process as news, and systems and personas in columns

121. Choose 1 option.**

How are identification documents, other assets, liabilities, goals, and revenue modeled, in an existing Financial Services Cloud org. using the individual account model?

- A. Custom objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the Account object.

- B. The Attachment object is used to represent other assets, liabilities, and goals. In the individual model, these attachments are related to the Account object.
- C. Documents, Notes, and Attachment objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the person account.
- D. Custom objects are used to represent other assets, liabilities, and goals. In the individual model, these objects are related to the person account.

122. A regional bank is implementing Financial Services Cloud (FSC). Today, relationship managers receive email members 2 days, 2 weeks, and 2 months for a new customer upon the first bank account to contact the customer for feedback. In addition, the bank wants the ability for relationship managers to track and report on progress in FSC.

What should the administrator do when designing the future sales business process using FSC features?

- A. When a lead or referral is converted, create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.
- B. When an account status is changed to "Customer", send emails to the Account Owner to follow up in 2 days, 2 weeks, and 2 months.
- C. When an account status is changed to "Customer", create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.
- D. When creating an account, create an action plan with tasks to follow up in 2 days, 2 weeks, and 2 months.

123. Cornfuls Bank has branches in multiple countries that are required to report in local currency, while the corporate headquarters office wishes to see reports in a single currency (the corporate currency).

Which solution should a consultant recommend to meet these requirements?

- A. Allow users to set their preferred currency in their profile and design reports that connect currencies for the user running the report.
- B. Use a third party from AppExchange add-on to implement currency conversions.
- C. Enable multiple currencies and advanced currency management, and set a corporate currency for the corporate headquarters office.
- D. Set the default currency for head office and have the regions download their reports to Excel and convert them manually.
