

## Question 1 of 50

Choose 1 option.

A new custom object has been created, and the records of this object will be created through integration with another system.

What should a consultant do to ensure the data is loading into the correct fields in Financial Services Cloud?

- ☒ A. Utilize a field mapping file with the external system data location and the corresponding field in Salesforce
- ☐ B. Create a junction object between the external system and the new customer object where the data will reside
- ☐ C. Ensure custom metadata is configured and each custom metadata record details where the data will be sent
- ☐ D. Use a CSV file with the data created and use Data Loader to map to the correct field
