

Question 1 of 50

Choose 3 options.

A company wants to convert its Salesforce Financial Services Cloud implementation from using the individual account model to using person accounts.

Which three things should a consultant do to prepare for the conversion?

- ☒ A. Test out the conversion in a sandbox, including all integrations and customizations.
- ☐ B. Ensure each account.phone field in the individual account record is blank.
- ☒ C. Ensure all individual account records to be converted are only linked to exactly one contact record.
- ☒ D. Ensure each individual account to be converted is not a parent account of any other account records.
- ☐ E. Update all opportunities linked to individual account records to be owned by the individual account record's owner.

Question 7 of 50

Choose 1 option.

A private equity company with only one administrator wants to upgrade Financial Services Cloud (FSC) from a Sales Cloud Unlimited Edition (UE) org. The company decided to install FSC greenfield on a new org to minimize the transfer of existing tech debt. In preparation for data migration, the administrator has been exporting backup files of the current org for a month.

What should the administrator do as part of the preparation for the data migration process?

- ☐ A. The administrator can ask the business manager on the investment bank team to review the file directly.
- ☒ B. To start, the administrator can run a daily backup data export for a week, then continue to run this job weekly until they are ready for data migration.
- ☐ C. As a dry run, the administrator can test this process via a data export request from the primary sandbox to the existing Sales Cloud UE org.

☐ D. After running the backup data export manually for 2 weeks, the administrator can schedule this job to run weekly.

Question 42 of 50

Choose 1 option.

A financial services company offers special deposit products for its employees. These employees have customer records in Salesforce so that they can be serviced like normal customers. Only customer service employees within a specific group should be able to see these special deposit products in Salesforce to protect the personal financial information of bank employees.

How should the administrator configure sharing rules in Financial Services Cloud to meet these requirements?

- ☐ A. Create an Account sharing rule based on record owner.
- ☒ B. Create a Financial Account sharing rule based on criteria.
- ☐ C. Create Account sharing rules based on criteria.
- ☐ D. Create a Financial Account sharing rule based on record owner.

Question 43 of 50

Choose 1 option.

A corporate investment banking associate at Cumulus Capital works with a trusted analyst to create pitch books, analyze market data, and generate reports. The banking associate is looking to capture sensitive deal information in Salesforce. They wish to share the deal information with the trusted analyst only, without giving access to Salesforce users up the management chain in the Role Hierarchy.

What should a consultant do in Salesforce to build the required sharing model for sensitive deal data?

- ☐ A. Use the Opportunity object to capture the deal data and use Compliant Data Sharing to grant the analyst access.
- ☒ B. Use the Financial Deal object to capture the deal data and use restriction rules to block user access above the banking associate in the Role Hierarchy.
- ☐ C. Use the Opportunity object to capture the deal data and use manual sharing to grant the analyst access.
- ☐ D. Use the Financial Deal object to capture the deal data and use Compliant Data Sharing to grant the analyst access.

Question 49 of 50

Choose 2 options.

During a Financial Services Cloud implementation at an insurance company, a consultant needs to design a broker data model for the broker web portal. The given requirements are:

1. Brokers are treated individually, even if they are associated with the same company.
2. Brokers should never have access to other brokers' data.
3. Brokers can nominate their assistants to access the broker portal.
4. An assistant can sometimes work for multiple brokers.

Which two considerations should the consultant consider regarding the data model?

- ☒ A. Brokers need to be modeled as Account and Contact individually, as each broker is a legal entity in Salesforce. Then, use a Group Account to model their company.
- ☐ B. The Broker Assistant should be modeled as a Contact. Then, use Contact to Contact association if they need work for multiple Brokers.
