When gathering requirements for this use case, which two Utilization Management processes should a consultant discuss with the client?

257E2E9E0AFB83116ABD3C34EFC499FB

Choose 2 answers

- A. ☒ Designing Care Requests to seek authorization from a health plan for drugs, services, and admissions
- B. ☒ Considering the Request Review Types; Prior Authorization Review, Concurrent Review, and Retrospective Review
- C. ☐ Considering the number of intake agents who will be using Health Cloud
- D. ☐ Designing Next Best Action and Recommendations for the care management team

**9 of 60.**

Bloomington Caregivers has replaced its legacy Contact Center application with Health Cloud. During user acceptance testing (UAT), the call center team is reporting differences between current Identity Verification business processes and what was built in Health Cloud.

The call center manager has requested the following changes:

- Birth Date be available in results and as an optional verifier, but no longer required for verification purposes
- Add 'Bloomington ID', a custom field on Account, to search results and as a required verifier

What should a consultant do to meet these requirements?

257E2E9E0AFB83116ABD3C34EFC499FB

- A. ☐ Add two new Identity Verification Process Field records for 'Bloomington ID'; one with the Field Type set to Result Field and one with Field Type set to Optional Verifier. Delete the Birth Date record which has the Field Type value Required Verifier.
- B. ☐ Add 'Bloomington ID' to the picklist choices within the Identity Verification flow and mark it as required. Remove the Birth Date record from the required fields picklist and add Birth Date to the optional verifiers picklist.
- C. ☒ Add two new Identity Verification Process Field records for 'Bloomington ID'; one with Field Type set to Result Field and one with Field Type set to Required Verifier. Change the Birth Date record with Field Type value Required Verifier to Optional Verifier.
- D. ☐ Add two new Identity Verification Process Field records for 'Bloomington ID'. Set the Field Type to Result Field and set the Required field to true.
