Bloomington Caregivers has decided to enable Integrated Care Management so that its end users can leverage Health Cloud Assessments. Administrators must now configure their org to be able to use Assessments.

Which three steps should the administrator take as part of the org setup to enable Assessments?

- ☐ A. Download and Install OmniStudio.
- ☒ B. Add the Assessment component to the Patient page.
- ☒ C. Update sharing settings in Setup.
- ☒ D. Enable users to view and complete Assessments.
- ☐ E. Enable Discovery Framework in Setup.

Question 54 of 60

Choose 1 option.

A payer needs to connect an electronic health record (EHR) to Health Cloud to display key clinical data to Health Cloud users. The data in the source system is aligned to FHIR R4 standards, but some transformation is anticipated.

Which approach should a consultant use to set up this integration?

- ☐ A. A point-to-point API connection from the EHR to Health Cloud
- ☐ B. A scheduled batch job that retrieves a file from an SFTP
- ☐ C. A "swivel-chair" standard operating procedure document that will be distributed to users
- ☒ D. A middleware integration solution that can handle data transformation if necessary

Question 55 of 60

Choose 3 options.

Bloomington Caregivers has identified the need to encrypt data to comply with the Health Insurance Portability and Accountability Act (HIPAA).

What are three key considerations when complying with HIPAA regulations using Salesforce Shield in conjunction with Bloomington Caregivers' data strategy?

- ☐ A. Using third-party data backup solutions to store backups of sensitive data off-site
- ☒ B. Configuring data retention policies to ensure that records are retained for the appropriate length of time
- ☒ C. Implementing audit trails and regularly reviewing them to detect unauthorized access attempts
- ☐ D. Providing access to third-party auditors to regularly review Shield implementation settings
- ☒ E. Ensuring that sensitive data is encrypted both in transit and at rest
