

Question 1 of 60

Choose 1 option.

At Bloomington Caregivers, care coordinators can only view patient records they own in Health Cloud. Moving forward, a small subset of auditors need access.

What should a consultant do to expand this access?

- ☐ A. Create a restriction rule for the Person Account object.
- ☐ B. Create a user access policy with grant permissions.
- ☒ C. Create a criteria-based Account sharing rule.
- ☐ D. Update organization-wide default for Account and Contract to Public Read-Only.

Question 2 of 60

Choose 1 option.

A pharma company wants to leverage Provider Search to help patients find nearby infusion clinics.

Which Health Cloud tool should a consultant leverage to drive performance and scalability?

- ☐ A. Flow for Industries
- ☒ B. Data Processing Engine
- ☐ C. Pipeline Analytics
- ☐ D. Business Rules Engine

Question 3 of 60

Choose 2 options.

Which two data exchange standards support clinical data in Health Cloud?

- ☒ A. FHIR R4
- ☒ B. HL7 v2
- ☐ C. DICOM 3.0
- ☐ D. SDTM v3.2

Question 4 of 60

Choose 1 option.

A pharma customer requires a scheduling tool to book infusions with multiple steps as part of its Health Cloud implementation. It needs a solution for care coordinators to book appointments without having to manually check availability and resources themselves.

Which solution should a consultant recommend?

- ☐ A. Salesforce Scheduler
- ☐ B. Procedure Scheduling
- ☒ C. Advanced Therapy Management
- ☐ D. Intelligent Appointment Management

Question 5 of 60

Choose 3 options.

A healthcare provider with multiple clinics and specialties is struggling to manage its appointment scheduling process efficiently. Patients are experiencing long wait times on the phone and want to leverage self-service options.

Which three Health Cloud capabilities should a consultant recommend configuring to provide a solution to improve patient satisfaction?

- ☐ A. Assessments and Recommendations
- ☐ B. Intelligent Form Reader
- ☒ C. Experience Cloud for Health Cloud
- ☒ D. Intelligent Appointment Management
- ☒ E. Provider Search

Question 6 of 60

Choose 1 option.

A provider system wants to leverage Health Cloud to enable its care providers to conduct video visits with their patients to discuss socioeconomic factors that impact their care.

Which capability should a consultant recommend for this use case?

- ☐ A. Intelligent Appointment Management
- ☐ B. Integrated Care Management
- ☐ C. Telehealth
- ☒ D. Virtual Care

Question 7 of 60

Choose 1 option.

A customer wants to move its existing Patient-Reported Outcome Measures (PROMs) surveys to Health Cloud. It requires a solution that allows for question banks and version control for this standardized survey.

Which solution should a consultant recommend?

- ☐ A. Health Cloud Forms
- ☐ B. Discovery Framework
- ☐ C. Salesforce Feedback Management
- ☒ D. Salesforce Surveys

Question 8 of 60

Choose 2 options.

A payer needs to work with plan members and medical providers to influence decisions through a case-by-case review of the appropriateness of care.

When gathering requirements for this use case, which two Utilization Management processes should a consultant discuss with the client?

- ☐ A. Considering the number of intake agents who will be using Health Cloud
- ☒ B. Designing Care Requests to seek authorization from a health plan for drugs, services, and admissions
- ☐ C. Designing Next Best Action and Recommendations for the care management team
- ☒ D. Considering the Request Review Types; Prior Authorization Review, Concurrent Review, and Retrospective Review

Question 9 of 60

Choose 1 option.

While running user acceptance testing (UAT) for a customer, an end user is unable to view certain data on the Enhanced Timeline for Contact Center.

What should be the first step in troubleshooting this issue?

- ☐ A. Check the Health Cloud Data permission set assignment.
- ☒ B. Ensure the user has the right object permissions.
- ☐ C. Check the Enhanced Patient permission set assignment.
- ☐ D. Ensure the component has been activated.

Question 10 of 60

Choose 1 option.

Bloomington Caregivers needs to use the objects for the Clinical data model as part of its new Health Cloud implementation.

Which preference should Bloomington Caregivers' administrator ensure is enabled?

- ☐ A. FHIR-Aligned EHR Data Model org preference
- ☒ B. FHIR-Aligned Data Model org preference
- ☐ C. Clinical Data Model org preference
- ☐ D. Clinical R4 Model org preference

Question 11 of 60

Choose 1 option.

Bloomington Caregivers wants to ensure it maintains the privacy of its users' data by enabling data protection details for leads, contacts, and person accounts during the initial Health Cloud install and configuration.

Which entity should the administrator enable within Data Protection and Privacy for Health Cloud to work in this scenario?

- ☐ A. Objects
- ☒ B. Records
- ☐ C. Fields
- ☐ D. Tasks

Question 12 of 60

Choose 1 option.

Bloomington Caregivers is implementing Health Cloud to streamline the process to register patients to care programs while capturing their consent. The company plans to leverage out-of-the-box Health Cloud features.

Which Health Cloud feature should a consultant recommend the company use in this scenario?

- ☐ A. Program Eligibility OmniScript
- ☐ B. Enrollment Consent OmniScript
- ☒ C. Program Enrollment Flow
- ☐ D. Care Plan Enrollment Flow

Question 13 of 60

Choose 1 option.

Bloomington Caregivers wants to share details about a patient's medical condition with a local hospital through an integration.

What should a consultant recommend as the appropriate method for the local hospital to access the information leveraging Health Cloud functionality?

- ☐ A. Use the FHIR Patient API through DataRaptor.
- ☐ B. Expose the MedicalCondition object through an Apex class.
- ☐ C. Leverage the MedicalCondition Integration Procedure.
- ☒ D. Integrate using the FHIR Clinical API.

Question 14 of 60

Choose 3 options.

What are three requirements for implementing patients or members in Health Cloud?

- ☐ A. Ensure the Parent Account field is blank.
- ☐ B. Ensure the Account is the Parent to Household Accounts.
- ☒ C. Ensure the Person Account object is used.
- ☒ D. Ensure the Parent Contact object is blank.
- ☒ E. Ensure 1-to-1 Account to Contact relationship.

Question 15 of 60

Choose 2 options.

A clinic is looking to manage its associated physicians within Health Cloud.

Which two objects support Salesforce's recommended approach to model the doctors in the clinic's Health Cloud org?

- ☐ A. Person Account
- ☒ B. Contact
- ☐ C. Healthcare Practitioner
- ☒ D. Healthcare Provider

Question 16 of 60

Choose 2 options.

When implementing Provider Search functionality, which two changes allow an external user to access search results?

- ☐ A. Give the site user profile Read access to the Data Pipeline object.
- ☐ B. Create a sharing rule on the Care Provider Searchable Field object to share with external users.
- ☒ C. Give the site user profile Read access to the Care Provider Searchable Field object.
- ☒ D. Use Experience Builder to add the Provider Search component to a page on the site.

Question 17 of 60

Choose 1 option.

A MedTech customer is looking to track surgical case visits for reps to sell their products, leveraging Intelligent Sales.

Which object should a consultant configure to track this visit type?

- ☐ A. Location
- ☐ B. Action Plan
- ☐ C. Visit
- ☒ D. Work Type

Question 17 of 60

Choose 1 option.

A MedTech customer is looking to track surgical case visits for reps to sell their products, leveraging Intelligent Sales.

Which object should a consultant configure to track this visit type?

- ☐ A. Location
- ☐ B. Action Plan
- ☐ C. Visit
- ☒ D. Work Type

Question 18 of 60

Choose 3 options.

Bloomington Caregivers would like to display patient information from both Salesforce standard objects and data from an external system.

Which three Health Cloud features should a consultant recommend the company use to display this on the patient record page?

- ☐ A. Visualforce Pages
- ☒ B. Integration Procedures
- ☒ C. DataRaptors
- ☒ D. FlexCards
- ☐ E. Salesforce Flows

Question 19 of 60

Choose 2 options.

A MedTech company needs to manage its run rate business to ensure contract compliance for its customers.

Which two features of Health Cloud should a consultant recommend the company use?

- ☒ A. Advanced Account Forecasting
- ☐ B. Remote Device Monitoring
- ☒ C. Sales Agreements
- ☐ D. MedTech Accelerator

Question 20 of 60

Choose 1 option.

A customer wants to view a patient's health conditions and clinical encounters as a sequence of events happening over time on the patient's Person Account page.

What should a consultant do to achieve this using the Enhanced Timeline functionality?

- ☒ A. Create a new Timeline record within Setup.
- ☐ B. Add a record to the HealthCloudTimelineConfig custom setting.
- ☐ C. Create a new Timeline View Configuration record.
- ☐ D. Clone the HCTimeline FlexCard for customization.

Question 21 of 60

Choose 3 options.

Bloomington Caregivers uses Health Cloud and has an integration setup with an external payer system.

Which three business level APIs should a consultant recommend to help the payer organization electronically receive requests for care services?

- ☐ A. Referral Request
- ☒ B. Benefit Verification
- ☐ C. Care Services
- ☒ D. Admission, Discharge, and Transfer (ADT)
- ☒ E. Prior Authorization

Question 22 of 60

Choose 1 option.

A payer needs to enable its agents to answer questions from members regarding their benefits coverage. The payer has already set up the required objects to be populated with the necessary information through an integration.

Which Health Cloud component should a consultant recommend for the Member record page?

- ☐ A. Eligibility Validation
- ☐ B. Coverage Confirmation
- ☐ C. Benefits Verification
- ☒ D. Benefits Coverage

Question 23 of 60

Choose 2 options.

A provider is looking to view a patient's insurance coverage, including co-pay and deductible information, prior to their appointment.

Using Health Cloud, which two steps should a consultant take to access this information in the Benefit Verification component?

- ☒ A. Create a named credential to support authenticated callouts.
- ☐ B. Create a new record for the HCBenVerConnect custom setting.
- ☒ C. Configure the Connection Label with the source system's API details.
- ☐ D. Configure the link to the clearinghouse's endpoint using a Uniform Resource Identifier (URI) path.

Question 24 of 60

Choose 3 options.

A consultant is implementing clinical assessments to track intake for a hospital leveraging the Discovery Framework.

Which three functions is the consultant able to leverage with Health Cloud?

- ☒ A. Question Bank
- ☒ B. Branching
- ☐ C. Image Analysis
- ☒ D. Scoring
- ☐ E. Encrypted Text

Question 25 of 60

Choose 3 options.

An agent at a MedTech company requires a UI component that displays customer data and contains a link to create a new order. Once clicked, the link starts a process to build a new order and displays the available products for purchase.

Which three OmniStudio capabilities are required to solve this use case?

- ☒ A. FlexCards
- ☒ B. Document Generation
- ☒ C. OmniScript
- ☐ D. DataRaptors
- ☐ E. Integration Procedures

Question 26 of 60

Choose 2 options.

Bloomington Caregivers is currently in the process of updating its systems as part of a corporate-wide digital transformation initiative.

Which two considerations should a consultant include when configuring security, sharing, and visibility rules in Health Cloud to meet a healthcare organization's needs?

- ☒ A. Ensure that data mask is used in production to appropriately manage protected health information (PHI).
- ☐ B. Review Salesforce documentation and implement a standardized security and visibility model.
- ☐ C. Regularly review and update security, sharing, and visibility settings in Health Cloud to align with evolving needs, regulations, and organizational policies.
- ☒ D. Understand customer needs, data security, privacy concerns, regulatory compliance, and sharing or visibility restrictions.

Question 27 of 60

Choose 1 option.

Bloomington Caregivers is implementing Home Health scheduling with Health Cloud. It must ensure that those who need to schedule the visits have the right permission set license.

Which permission set license should a consultant assign in this scenario?

- ☐ A. Execute Health Scheduling
- ☒ B. Healthcare Visit Manager
- ☐ C. Field Dispatch Scheduler
- ☐ D. Manage Home Health

Question 28 of 60

Choose 2 options.

A customer is implementing Intelligent Appointment Management in Health Cloud to eliminate swivel chair to other scheduling systems.

Which two connectivity options should a consultant leverage as the scheduling engine?

- ☒ A. Electronic Health Record (EHR) System
- ☐ B. Business Rules Engine
- ☐ C. Scheduler for Industries
- ☒ D. Salesforce Scheduler

Question 29 of 60

Choose 1 option.

Bloomington Caregivers wants to use patient or member lists for its care coordinators in its current implementation.

What is an important consideration when implementing this in Health Cloud?

- ☐ A. An administrator can create lists or add records to existing lists from the Campaign object.
- ☐ B. Filter logic for patient or member lists is controlled by formula fields on records.
- ☐ C. An administrator can create an override filter field on the person account.
- ☒ D. If a user cannot access a field used in a filter on a patient or member list, they will not be able to see the list.

Question 30 of 60

Choose 1 option.

A provider wants to get a comprehensive view of a patient's prescriptions, including history, to improve health outcomes.

Which Health Cloud capability should a consultant leverage to assist the provider?

- ☐ A. Intelligent Appointment Management
- ☐ B. Virtual Care
- ☒ C. Medication Management
- ☐ D. Integrated Care Management

Question 31 of 60

Choose 1 option.

Bloomington Caregivers want to offer its patients remote monitoring to bring data from patient devices into Health Cloud.

Which set of records should an administrator populate to implement this functionality?

- ☐ A. Code Sets, Biometrics, Care Observations, Chart Metrics
- ☒ B. Code Sets, Units of Measure, Care Metric Targets, Care Observations
- ☐ C. Units of Measure, Remote Monitoring Device Types, Care Observations, Code Sets
- ☐ D. Units of Measure, Code Sets, Remote Monitoring Device Types, Care Episodes

Question 32 of 60

Choose 1 option.

A payer needs to connect an electronic health record (EHR) to Health Cloud to display key clinical data to Health Cloud users. The data in the source system is aligned to FHIR R4 standards, but some transformation is anticipated.

Which approach should a consultant use to set up this integration?

- ☐ A. A point-to-point API connection from the EHR to Health Cloud
- ☒ B. A middleware integration solution that can handle data transformation if necessary
- ☐ C. A scheduled batch job that retrieves a file from an SFTP
- ☐ D. A "swivel-chair" standard operating procedure document that will be distributed to users

Question 33 of 60

Choose 1 option.

As part of a post-visit summary, a client wants to send patients information documenting their visit and care plan. A patient advocate will select from templates to create personalized documents to send.

Which tool should a developer use to provide the necessary functionality?

- ☒ A. OmniStudio Document Generation
- ☐ B. Salesforce PDF Generator
- ☐ C. Contract Lifecycle Management
- ☐ D. Health Cloud Email Manager

Question 34 of 60

Choose 1 option.

Users need to analyze their patient or member referrals through a prebuilt dashboard that includes reports on important aspects of their referral management.

What should a consultant do in this case?

- ☒ A. Install the unmanaged extension package that delivers Health Cloud Reports for Patient Referral Management.
- ☐ B. Upload a Provider Referral Dashboard Template and enable the action bar so that users can generate a Patient Referral Management report.
- ☐ C. Install the add-on package that delivers Health Cloud Reports for Utilization Management and Health Cloud for Patient Referral Management.
- ☐ D. Add extra picklist values to Account record type and add fields on the page layout for patient referral data for CRM Analytics to generate a Patient Referral Management report.

Question 35 of 60

Choose 1 option.

A provider wants its care coordinators to track a series of problems, goals, and interventions (PGIs) related to a patient's care in a repeatable, efficient way.

Which approach should a consultant recommend?

- ☐ A. Coach the care coordinators to quickly create tasks using a checklist.
- ☐ B. Create care program templates and assign them to patients.
- ☐ C. Configure an action plan template with tasks for each PGI.
- ☒ D. Define a PGI Library and care plan templates using the library.

Question 36 of 60

Choose 2 options.

A call center agent at Bloomington Caregivers wants the ability to look up providers by location and specialty, to schedule an appointment on behalf of their patients.

Which two capabilities should a consultant recommend to enable this requirement?

- ☒ A. Provider Search
- ☐ B. Experience Cloud for Health Cloud
- ☐ C. Integrated Care Management
- ☒ D. Intelligent Appointment Management

Question 37 of 60

Choose 1 option.

How should a consultant at a large provider system model a patient in Health Cloud?

- ☐ A. Leverage Contact-Contact
- ☐ B. Configure Contact
- ☒ C. Leverage Person Account
- ☐ D. Configure Account

Question 38 of 60

Choose 1 option.

A customer wants to leverage dependent intervention tasks as part of their care coordination solution using Integrated Care Management.

Which feature should a consultant configure to accomplish this task?

- ☐ A. Intervention Templates
- ☐ B. Industry Template Library
- ☐ C. Care Plan Task Templates
- ☒ D. Action Plan Templates

Question 39 of 60

Choose 1 option.

A pharma company wants the ability to:

- Upload a patient's insurance card, including automatic Member Plan record creation
- Run a benefits verification check
- Schedule on behalf of the patient with a provider

Which set of Health Cloud capabilities should enable the company to build this business process?

- ☐ A. Virtual Care, Intelligent Appointment Management, Intelligent Document Automation, Intelligent Document Reader
- ☐ B. Utilization Management, Care Management, Intelligent Document Automation, Intelligent Appointment Management
- ☐ C. Intelligent Appointment Management, Benefits Verification, Intelligent Document Automation, eFax Integration

Question 39 of 60

Choose 1 option.

- Run a benefits verification check
- Schedule on behalf of the patient with a provider

Which set of Health Cloud capabilities should enable the company to build this business process?

- ☐ A. Virtual Care, Intelligent Appointment Management, Intelligent Document Automation, Intelligent Document Reader
- ☐ B. Utilization Management, Care Management, Intelligent Document Automation, Intelligent Appointment Management
- ☐ C. Intelligent Appointment Management, Benefits Verification, Intelligent Document Automation, eFax Integration
- ☒ D. Intelligent Document Automation, Intelligent Appointment Management, Intelligent Document Reader, Benefits Verification

Question 40 of 60

Choose 3 options.

A consultant needs to implement Health Cloud and is in the discovery stage of the project.

Which three approaches should the consultant consider to collect information to understand where Health Cloud fits within the application architecture?

- ☒ A. Create business process diagrams to understand information flow.
- ☒ B. Identify personas involved and their existing pain points.
- ☐ C. Build an architecture diagram depicting Health Cloud integrations.
- ☐ D. Start writing Apex code to customize Health Cloud.
- ☒ E. Identify key stakeholders and how they measure success.

Question 41 of 60

Choose 3 options.

A medical device organization needs to track account information and its geographical details to provide information to representatives onsite.

Which three objects support this scenario?

- ☒ A. Account
- ☒ B. Location
- ☐ C. Clinic Location
- ☐ D. Facility Address
- ☒ E. Healthcare Facility

Question 42 of 60

Choose 1 option.

A provider wants to capture non-clinical factors that impact its patient population, such as food insecurity and lack of transportation.

Which approach should a consultant take to meet this requirement?

- ☐ A. Use the electronic health record (EHR) data model to meet client requirements.
- ☐ B. Extend the Care Plan data model to meet client requirements.
- ☐ C. Build a custom entity to address client requirements.
- ☒ D. Leverage the Social Determinants data model in Health Cloud and extend it as needed.

Question 43 of 60

Choose 1 option.

A pharma company is implementing Health Cloud and trying to track insurance details related to its patients. The company wants to track:

- A list of all payer organizations
- The plans offered by a given payer
- The standard benefits available under a plan
- Which plan a given patient is enrolled in and their specific insurance details

Which set of objects should a consultant implement to meet these requirements?

- ☐ A. Purchaser, Insurance Plan, Insurance Benefit, Plan Detail
- ☐ B. Payer, Plan Offering, Coverage Benefit, Member Plan
- ☒ C. Account, Purchaser Plan, Plan Benefit, Member Plan

Question 44 of 60

Choose 1 option.

When accessing a person account record within Health Cloud, the user must have access to the entire account.

What should a consultant do in this scenario, according to Health Cloud implementation best practice?

- ☐ A. Set the organization-wide default to Public Read Write for the Account object.
- ☐ B. Set Modify All on the Account object at the Profile level.
- ☒ C. Set Contacts to Controlled by Parent.
- ☐ D. Set Private for the Contact object.

Question 45 of 60

Choose 1 option.

Bloomington Caregivers has more than 1 million patients and each patient has an average of 10 claims a year, which are maintained in an external claims system. Management would like their agents to view all the claims of patients in Salesforce on demand when they open the patient's record.

What should a consultant recommend as the appropriate integration pattern to achieve this?

- ☒ A. Configure the claims system as an external data source and leverage external objects with the claims data.
- ☐ B. Add a nightly job to fetch all the claims from the external system and store them in Salesforce.
- ☐ C. Use an Enterprise Service Bus (ESB) to load all the claims data from the external system into Salesforce.
- ☐ D. Make a callout on demand to the external system and store the claims data against the patient record.

Question 46 of 60

Choose 1 option.

A customer compliance department requires encryption at rest, notification of activities, and extensive field tracking.

What are some key considerations and recommended practices for supporting compliance in Salesforce?

- ☐ A. Enable Salesforce Shield to monitor data access and usage, configure Data Classification for sensitive data, and use Event Monitoring to track user activity.
- ☐ B. Use the Salesforce Security Health Check to identify vulnerabilities, implement custom profiles and permission sets to control data access, and configure Data Loss Prevention policies to prevent data leakage.
- ☐ C. Use Role Hierarchy to control data access, implement password policies for user accounts, and use IP Restrictions to limit access to trusted networks.
- ☒ D. Enable Field Audit Trail, implement encryption for sensitive data, and configure two-factor authentication for all users.

Question 47 of 60

Choose 3 options.

A developer needs to modify the out-of-the-box Advanced Patient Card to display the Category, SubjectID, and Date for active Clinical Alerts.

Which three steps should the developer take to accomplish this?

- ☒ A. Create a DataRaptor to extract necessary data.
- ☐ B. Define session variables to control visibility of clinical data.
- ☒ C. Change the child card state to show active.
- ☒ D. Create and activate a new child card.
- ☐ E. Clone the parent card.

Question 48 of 60

Choose 3 options.

A customer that already has Service Cloud is onboarding a new business unit, which needs to use Health Cloud.

Which three organization-wide default settings should an administrator change to ensure the original business unit that leverages Service Cloud does not have visibility into protected health information (PHI)?

- ☒ A. Set Person Accounts to Private.
- ☐ B. Set related clinical objects to Controlled by Parent or Private.
- ☒ C. Set Contact to Controlled by Parent.
- ☐ D. Set Health Details to Controlled by Parent or Private.
- ☒ E. Set Account and Contract to Private.

Question 49 of 60

Choose 1 option.

Bloomington Caregivers has set up Health Cloud and needs to analyze patient referrals through Salesforce reports and dashboards.

Which Health Cloud unmanaged package should a consultant recommend to deliver a prebuilt dashboard and reports?

- ☒ A. Health Cloud Reports for Patient Referral Management
- ☐ B. Health Cloud Network Management Reports
- ☐ C. Health Cloud Member Referral Management Reports
- ☐ D. Health Cloud Referral Management Reports

Question 50 of 60

Choose 2 options.

A new user story requires an OmniScript to update an existing field on a custom SObject.

Which two components should a consultant use to satisfy the requirement?

- ☐ A. SOQL Query
- ☐ B. API Actions
- ☒ C. Integration Procedures
- ☒ D. DataRaptors

Question 51 of 60

Choose 1 option.

A pharmaceutical company is looking to support patients throughout their clinical journey. One of the factors the company needs to track is the socioeconomic and cultural barriers that could hinder a patient's process.

Which Health Cloud capability should a consultant implement to fulfill this requirement?

- ☐ A. Care Blockers
- ☐ B. Clinical Barriers
- ☐ C. Utilization Management
- ☒ D. Social Determinants of Health

Question 52 of 60

Choose 1 option.

A payer needs to manage requests for concurrent review of prior authorizations within Health Cloud and wants to use out-of-the-box record types and page layouts. However, the payer's Salesforce administrator does not see any preconfigured record types or page layouts for prior authorizations in the payer's Salesforce org.

What should a consultant recommend to the Salesforce administrator to expedite implementation?

- ☒ A. Install the Health Cloud Care Request Extensions package.
- ☐ B. Build custom page layouts and record types to support the requirement.
- ☐ C. Install the Health Cloud Claims unmanaged package.
- ☐ D. Install an AppExchange prior authorization package.

Question 55 of 60

Choose 3 options.

Bloomington Caregivers has identified the need to encrypt data to comply with the Health Insurance Portability and Accountability Act (HIPAA).

What are three key considerations when complying with HIPAA regulations using Salesforce Shield in conjunction with Bloomington Caregivers' data strategy?

- ☒ A. Ensuring that sensitive data is encrypted both in transit and at rest
- ☐ B. Using third-party data backup solutions to store backups of sensitive data off-site
- ☒ C. Implementing audit trails and regularly reviewing them to detect unauthorized access attempts
- ☐ D. Providing access to third-party auditors to regularly review Shield implementation settings
- ☒ E. Configuring data retention policies to ensure that records are retained for the appropriate length of time
