

Question 1 of 65

Choose 1 option.

Universal Containers went live with Revenue Cloud 90 days ago. Since then, the sales team has been using Revenue Cloud to perform all of their business transactions, from New Sales to Renewals. Sales leaders requested the IT team to provide insights into trends like monthly and annual recurring revenue, renewal rates, accounts up for renewal, and the overall financial state of the accounts.

Which out-of-the-box dashboard should the IT team use for these insights?

- ☐ A. Order Analytics
- ☒ B. Subscription and Revenue Lifecycle Analytics
- ☐ C. Pricing Analytics

Question 2 of 65

Choose 1 option.

What are the steps a user should take to Renew an Asset?

- ☐ A. Create Renewal Quote with Asset, Create Contract, Activate Contract
- ☒ B. Create Renewal Quote with Asset, Create Order, Activate Order
- ☐ C. Create Renewal Quote with Asset, Create Order, Create Contract

Question 3 of 65

Choose 1 option.

A sales rep is beginning the process of renewing a customer's expired assets in Revenue Cloud.

What is the first step the sales rep should take?

- ☒ A. Override Renewal Term using the Managed Assets Component on the Account/Contract record.
- ☐ B. Update the Asset's Lifecycle End Date on the Current Asset State Period and Asset Action records.
- ☐ C. Create a new Quote/Order record and manually add the expired assetsTransaction Line Editor.

Question 4 of 65

Choose 1 option.

A Salesforce Consultant duplicated the amend, renew, and cancel Salesforce flow to customize it, allowing users to attach an existing Opportunity when clicking "Amend", "Renew", or "Cancel" on the Manage Asset Viewer. The new flow has been activated, but when users click any of the buttons, the original behavior still occurs.

Which step did the consultant likely miss?

- ☐ A. The consultant did not select the new flow in the Manage Asset Viewer component in the Lightning Record page.
- ☒ B. The consultant did not update the managing assets flow under Revenue Settings to point to the new flow.
- ☐ C. The consultant did not associate the new flow under the Product Discovery Settings.

Question 7 of 65

Choose 1 option.

A customer is integrating Revenue Cloud with their ecommerce website. Orders will be placed directly from the website and may include up to 1,000 products.

Which Revenue Cloud API will work for this integration?

- ☐ A. Create Order
- ☒ B. Place Sales Transaction
- ☐ C. Place Order

Question 6 of 65

Choose 1 option.

A Salesforce Consultant has been asked to identify and extract contract details and clauses from a PDF that holds the information of a historical signed contract. The consultant will use Contracts AI to achieve this requirement. A prerequisite to using Contracts AI is to set up a contract extraction template.

When creating a contract extraction template, which template details does the consultant need to fill in to allow the selection of an existing context definition?

- ☐ A. Record Type and Field Mapping
- ☐ B. Attribute Definition and Field Mapping
- ☒ C. Attribute Definition and Context Mapping

Question 5 of 65

Choose 1 option.

A company is implementing Revenue Cloud. The company uses complex and varying tax calculations, so some of its existing products have tax calculated in a custom application. A business decision was made to keep using the custom application for the existing products and use Revenue Cloud for any new product introductions.

How should the company generate and post invoices, including the taxes for the existing products?

- ☐ A. Integrate AppExchange apps of partners with the Billing TaxEngineAdapter Apex interface.
- ☐ B. Import External Tax Lines into Billing from the custom application via CSV.
- ☒ C. Integrate the custom app with the Billing TaxEngineAdapter Apex interface.

Question 10 of 65

Choose 1 option.

A sales rep creates a quote with a subscription product called 'Training' with a quantity of 50 and term of 1 year, followed by Order creation, activation, and assetization. The 'Training' asset is then amended on the same day to add eight more seats, followed by Order creation, activation, and assetization.

How many records will be present for Training for each Asset Action and Asset State Period?

- ☒ A. Two Asset Actions and two Asset State Periods
- ☐ B. Two Asset Actions and one Asset State Periods
- ☐ C. One Asset Actions and two Asset State Periods

Question 9 of 65

Choose 1 option.

A Revenue Cloud Consultant wants to customize the Transaction Line Editor to display an existing custom field, Estimated Delivery Date, for sales reps when they are working on Quote record pages.

What is the correct method to achieve this customization?

- ☒ A. Add Estimated Delivery Date as a selected field to the Transaction Line Editor component in the Quote Lightning Record page.
- ☐ B. Enable 'Instant Pricing' under Revenue Settings to automatically display all custom fields on the Transaction Line Editor.
- ☐ C. Add the Estimated Delivery Date field to the relevant Quote Line Item page layout to display the field in the Transaction Line Editor.

Question 8 of 65

Choose 1 option.

A customer is migrating asset data into Revenue Cloud, and needs to generate Asset Actions, Asset State Periods, and edit Lifecycle Asset fields.

Which permission does the customer need to achieve this?

- ☒ A. Customer Asset Lifecycle Management
- ☐ B. Lifecycle-managed asset
- ☐ C. InitiateAmend, InitiateCancellation, InitiateRenewal

Question 11 of 65

Choose 1 option.

A development team is designing a new Salesforce solution. During the design phase, a team member suggests incorporating a feature that was showcased on a future Salesforce product roadmap.

Given Salesforce's 'Safe Harbor' statement, how should the team approach this suggestion regarding their current design?

- ☐ A. The team can design and build the solution based on the future roadmap items as they will become available soon.
- ☒ B. All design elements must adhere to the current, generally available features and avoid any unreleased features shown on the roadmap.
- ☐ C. With verbal confirmation from a Salesforce Product Manager, the team can incorporate design elements based on roadmap items.

Question 12 of 65

Choose 1 option.

A customer wants to change specific line items of the order after it has been submitted but before it has been fulfilled. The system administrator has granted permissions to allow the order management team to make this change, but they are unable to do so.

What is the reason for this issue?

- ☐ A. The entire order is assetized.
- ☒ B. The entire order is activated.
- ☐ C. The entire order is decomposed.

Question 13 of 65

Choose 1 option.

A company sells a wide range of products across multiple business units. Each product must support different selling models, such as one-time, term-based, and evergreen. The company wants to bundle these products in configurable ways without duplicating product records. Additionally, product attributes should be reusable across offerings, and product teams need to maintain the catalog with minimal manual effort.

Given these requirements, how should a consultant design the product catalog in Revenue Cloud?

- ☐ A. Create separate product records for each business unit and selling model combination to handle variations independently.
- ☒ B. Use product classifications for attribute reuse and apply selling models at the product level to support flexibility.
- ☐ C. Use static bundles with hard-coded attributes for each selling model to simplify configuration.

Question 16 of 65

Choose 1 option.

A product designer is setting up a product bundle that consists of T-shirts and caps. They want to ensure customers can order a maximum of three T-shirts and three caps, but the total number of products should not exceed five.

How should the product designer set this up?

- ☐ A.
 - Define the local cardinality for T-shirts with a minimum quantity of three and a maximum quantity of three.
 - Define the local cardinality for caps with a minimum quantity of three and a maximum quantity of three.
 - Define a product group that contains both of these products, and set the group cardinality with a minimum quantity of one and a maximum quantity of six.
- ☒ B.
 - Define the local cardinality for T-shirts with a minimum quantity of one and a maximum quantity of three.
 - Define the local cardinality for caps with a minimum quantity of one and a maximum quantity of three.
 - Define a product group that contains both of these products, and set the group cardinality with a minimum quantity of one and a maximum quantity of five.
- ☐ C.
 - Define the local cardinality for T-shirts with a minimum quantity of one and a maximum quantity of three.

Question 15 of 65

Choose 1 option.

An administrator is configuring a subscription product in Revenue Cloud for a customer whose order starts on January 1. The finance team wants to collect payment before the service begins so that each invoice is sent on the 15th of the prior month.

Which Billing Type should the Billing Treatment Item have to meet this requirement?

- ☐ A. Arrear
- ☒ B. Advance
- ☐ C. None

Question 14 of 65

Choose 1 option.

A smartphone product is currently sold as a one-time upfront payment.

In order for it to be sold with equal monthly installment payments for 12 months, what should the consultant set up?

- ☒ A. Assign a product selling model option of Term Monthly to the product.
- ☐ B. Assign a product selling model option of Term Annual to the product.
- ☐ C. Assign a product selling model option of Evergreen Monthly to the product.

Question 19 of 65

Choose 1 option.

Universal Containers is expanding into French- and German-speaking regions. The team wants to ensure that product names and descriptions appear in the correct language when customers browse the catalog via APIs.

Which configuration is required to support this multilingual API response?

- ☒ A. Enable data translation and provide values via the Product List API and Product Details API.
- ☐ B. Provide data translations using standard Salesforce Product2 APIs and Product Details API.
- ☐ C. Use data translation via Translation Workbench to modify the metadata API and Product List API.

Question 18 of 65

Choose 1 option.

A product administrator needs to use the Constraint Modeling Language (CML) construct available in Advanced Configurator to define a relationship for a House with up to five rooms. The relationship also requires that a MediaRoom in the color blue must be included when the house has more than three rooms.

Which option should the administrator use to accomplish this?

- ☒ A. type House {
 relation rooms : Room[4,5];
 require(rooms.size > 3, rooms[MediaRoom]{color = "Blue"})
};
- ☐ B. type House {
 relation rooms : Room[0..5];
 require(rooms.size > 3, rooms[MediaRoom]{color = "Blue"})
};
- ☐ C. type House {
 relation rooms : Room[0..5];
 require(rooms.size > 3, House{MediaRoom=true, color = "Blue"})
};

Question 17 of 65

Choose 1 option.

A customer reaches out to the Billing Operations of a company requesting to change their monthly billing date. Their current billing date is the 15th of each month, but the customer would like it changed to the 20th of each month. On the forthcoming cycle, the customer has also requested to move the billing date to April 22 for this month only.

Which steps should Billing Operations take to meet this request?

- ☒ A. The Billing Operations user should select the Billing Schedule Group(s) (BSG) for that asset, and change the parameters on the transaction to the 20th for Billing Day of Month and to the 22nd of April for Override Next Billing Date by doing an inline edit.
- ☐ B. The Billing Operations user should process an Amendment canceling the existing Asset and creating a new Asset with the start date of 20th, and then update the Billing Schedule Group's Override Next Billing Date to 22nd April.
- ☐ C. The Billing Operations user should process a change order with Period Boundary Day on the Order Item as 20th and update the Override Next Billing Date on the Billing Schedule Group to 22nd of April by doing an inline edit.

Question 20 of 65

Choose 1 option.

A Revenue Cloud Consultant wants to automatically sync the family field (Family) from the Product2 object to the Quote Line custom field (Family__c) during quoting.

How should the consultant address this using only Revenue Cloud functionality?

- ☐ A. Create an Apex trigger on the quote line item to query the information from the Product2 'Family' field and write it back to the Quote Line.
- ☒ B. Update the Product Discovery Context by mapping the Catalog Product and the Product2 nodes and then mapping the Family and Family__c fields.
- ☐ C. Update the Pricing context definition by mapping the Catalog Product and the Product2 nodes and then mapping the Family and Family__c fields.

Question 21 of 65

Choose 1 option.

A software company wants to offer a Premium Suite bundle that includes multiple applications and support services at a discounted price compared to purchasing each component individually. The company also needs to apply different discounts to this bundle based on custom conditions.

Which pricing element must the company use to define the bundle pricing logic and then to calculate its price within a pricing procedure?

- ☐ A. Attribute-Based Price and Volume Discount
- ☒ B. Bundle-Based Price and Price Adjustment Matrix
- ☐ C. Bundle-Based Price and Product Selling Model

Question 22 of 65

Choose 1 option.

A Revenue Cloud Consultant is writing a constraint rule in Constraint Modeling Language (CML) to prevent customers from selecting a red laptop case if the selected laptop model is Executive Pro. The consultant anticipates that this color restriction might apply to other products in the future and wants to make the rule easier to maintain and reusable across multiple rules.

Which approach should the consultant take?

- ☐ A. Create a local variable called BlockedColor and assign it red in each rule.
- ☐ B. Hard code red directly in each constraint rule.
- ☒ C. Use a global constant for red so it can be referenced consistently across all constraint rules.

Question 25 of 65

Choose 1 option.

Sales leadership would like to see an accurate forecast of the sales pipeline based on the opportunity data. For this, they asked the sales team to make sure they take the necessary steps during the sales cycle to keep the forecast up to date at all times.

Which action should a sales rep take to ensure this?

- ☐ A. Set the Syncing field to True.
- ☒ B. Sync the Primary quote.
- ☐ C. Start Sync quick action.

Question 24 of 65

Choose 1 option.

A project is moving from the design phase to the build phase.

What should a Revenue Cloud Consultant do to ensure a successful build cycle?

- ☒ A. Set up environments for development, testing, and production, and choose a deployment tool.
- ☐ B. Build in the production environment, let users test it live, and provide feedback in real time.
- ☐ C. Write user stories, have user workshops to confirm requirements, and build test use cases.

Question 23 of 65

Choose 1 option.

A hardware company sells bundles that consist of commercial products. All products are required to be shipped, and they have a corresponding technical product called 'Shipping Service'. For some of the company's customers, multiple instances of fulfillment products are generated. The fulfillment designer does not want to ship each of those commercial products separately.

What should the Decomposition Scope be for all these products to allow all products to ship together?

- ☐ A. Account
- ☐ B. Bundle
- ☒ C. Order

Question 28 of 65

Choose 1 option.

After activating an order for a usage-based analytics subscription, a billing specialist wants to confirm that the system has generated the necessary components to support usage tracking, entitlement enforcement, and billing readiness.

Which set of records is created automatically as part of the usage management process?

- ☐ A. Asset, Entitlement Policy, Wallet
- ☐ B. Product Consumption Summary, Rate Adjustment Entry, Billing Event
- ☒ C. Usage Entitlement Account, Usage Entitlement Bucket, Wallet

Question 27 of 65

Choose 1 option.

A company selling hardware and software needs to implement a 2-day delay for software provisioning after hardware delivery in its order-to-cash process. While configuring the Dynamic Revenue Orchestrator (DRO) plan, the Fulfillment Designer notices the option for adding this delay is not visible on the provisioning task.

What should the Revenue Cloud Consultant enable to add this option for the Fulfillment Designer?

- ☒ A. Future-Dated Steps in the DRO settings
- ☐ B. Modify All Data permission in the Fulfillment Designer's profile
- ☐ C. Link Task to Step Source button in the DRO settings

Question 26 of 65

Choose 1 option.

A sales rep needs to renew multiple assets. Some assets will be renewed at the same prices, so negotiations are unnecessary and the rep can directly create a renewal order. Some assets need to be renewed at higher prices, so the rep needs to create a quote for negotiation. When the sales rep starts the renewal process, they are not able to choose whether to create a quote or an order.

How should a Revenue Cloud Consultant address the sales rep's issue?

- ☐ A. Override the standard Salesforce flow to allow renewal quote and order creation.
- ☐ B. Customize the Manage Asset component to allow renewal quote and order creation.
- ☒ C. Change the Revenue Cloud settings to allow renewal quote and order creation.

Question 29 of 65

Choose 1 option.

During a quote-to-contract conversion process, a popup is displayed that asks the user to select the appropriate quote prices or discounts to be added to the contract. The Revenue Cloud Consultant is tasked with removing the 'None' option from this popup.

How should the consultant remove this option?

- ☒ A. Modify the screen flow Create Contract From Quote.
- ☐ B. Modify the Contract Item Price object's Discount Type field picklist values.
- ☐ C. Modify the Lightning web component corresponding to the popup.

Question 30 of 65

Choose 1 option.

A customer needs to migrate existing active subscriptions from Salesforce CPQ to Revenue Cloud.

What should the customer do to accomplish this?

- ☒ A. Convert the subscriptions to order lines and use the Create or Update Asset From Order Item Action API.
- ☐ B. Convert the subscriptions to orders and create assets using Place Sales Transaction API.
- ☐ C. Convert the subscriptions to assets using the Initiate Amendment Action API.

Question 31 of 65

Choose 1 option.

A Revenue Cloud Consultant is defining relationships in Constraint Modeling Language (CML) to model a house that must contain rooms. The house must have at least one and at most five rooms, and exactly two bathrooms. The consultant also wants the system to instantiate rooms in a specific order – first a Living Room, then a Bedroom – when rooms are created.

Which script correctly defines these relationships in CML?

- ☐ A. type House {
 relation rooms : Room[0..5] order (Bedroom, LivingRoom);
 relation bathrooms : Bathroom[2];
}
type Room;
type LivingRoom : Room;
type Bedroom : Room;
type Bathroom : Room;
- ☒ B. type House {
 relation rooms : Room[1..5] order (LivingRoom, Bedroom);
 relation bathrooms : Bathroom[2];
}
type Room;
type LivingRoom : Room;
type Bedroom : Room;
type Bathroom : Room;

Question 34 of 65

Choose 1 option.

Universal Containers (UC) sells its products and services to other businesses, and provides an automatic discount to businesses that buy in bulk. UC is now expanding its selling channels and plans to sell directly to end users. A key requirement is to ensure that bulk discounts are only applicable to businesses and not individual buyers.

How should the Revenue Cloud Consultant solve this requirement?

- ☐ A. By using Quote Transaction Type and Volume-Based Pricing
- ☒ B. By using Sales Transaction Type and Volume-Based Pricing
- ☐ C. By using Order Transaction Type and Volume-Based Pricing

Question 33 of 65

Choose 1 option.

A sales rep at an SaaS company observes that a recent renewal quote for a premium software subscription, which includes several add-on modules and usage-based tiers, is displaying an unexpected total price. The customer is disputing the amount, stating it is higher than anticipated based on their contracted terms. The pricing consultant suspects an issue with how the pricing rules are being applied.

What is the first diagnostic step the consultant should take to investigate the pricing calculation?

- ☐ A. Manually adjust the disputed total price on the quote to the customer's anticipated amount.
- ☐ B. Deactivate the entire pricing procedure and then reactivate it to force a re-evaluation.
- ☒ C. Use the pricing procedure's Simulate functionality to trace the price waterfall.

Question 32 of 65

Choose 1 option.

A Revenue Cloud Consultant needs to update the flow used to browse the catalog. The consultant made the changes and activated the flow but is not seeing the changes during testing.

Which step did the consultant miss?

- ☐ A. Adding the Flow Name in the Pricing Settings Setup.
- ☒ B. Adding the Flow Name in the Product Discovery Setup.
- ☐ C. Adding the Flow Name in the Revenue Settings Setup.

Question 37 of 65

Choose 1 option.

A Revenue Cloud requirement states that when the "Terabyte" Attribute of "Product A" is greater than 100, a warning message should appear.

How should a consultant address this in Revenue Cloud?

- ☐ A. Create a constraint rule in the Constraint Model at the Quote Level.
- ☒ B. Create a constraint rule in the Constraint Model at the Product Level.
- ☐ C. Create a custom lighting web component to validate the attribute quantity.

Question 36 of 65

Choose 1 option.

A company is implementing Revenue Cloud to automate its subscription renewals. A Revenue Cloud Consultant needs to configure the system to allow sales reps to initiate the renewal process for a customer's active assets directly from a record page.

Which component must the consultant implement to provide this one-click renewal capability?

- ☐ A. An Apex trigger on the Contract object that automatically clones the contract and its assets when the end date is approaching
- ☒ B. A screen flow that utilizes the InitiateRenewal invocable action, which can then be exposed as a quick action on the Account or Contract record page
- ☐ C. A custom Renewal checkbox field on the Asset object that, when checked, triggers a Process Builder to create a renewal opportunity

Question 35 of 65

Choose 1 option.

A Salesforce Developer is using Postman to retrieve a JSON response with Product2 IDs to develop a Lightning web component.

Which query parameters are valid when using the Products List (POST) API to retrieve a list of products for the component?

- ☐ A.
 - Pricebook IDs
 - Catalog IDs
 - Category IDs
- ☐ B.
 - Product2 IDs
 - Catalog IDs
 - Category IDs
- ☒ C.
 - Catalog IDs
 - ProductClassification IDs
 - Category IDs

Question 38 of 65

Choose 1 option.

A company purchased Revenue Cloud. The project scope includes the entire Product-to-Cash lifecycle including Dynamic Revenue Orchestrator and Contract Lifecycle Management (CLM). As part of CLM, the company would like to perform internal and external collaborative redlining.

With which cloud computing provider does Salesforce need to integrate?

- ☐ A. Google Cloud Platform (GCP)
- ☒ B. Microsoft Azure
- ☐ C. Amazon Web Services (AWS)

Question 39 of 65

Choose 1 option.

A customer currently owns subscription products with a term of 3 years. A ramped deal was configured to sell the products with a quantity of 20 in year one, 30 in year two, and 40 in year three. The list price of the product is US\$1,000 per year.

The subscription started on June 24, 2025, and will end on June 23, 2028. Today's date is January 15, 2026.

What is the formula to calculate the current Monthly Recurring Revenue (MRR)?

- ☒ A. $MRR = (20 * \$1000) / 12$
- ☐ B. $MRR = (20 * \$1000) / 36$
- ☐ C. $MRR = ((20 * \$1000) + (30 * \$1000) + (40 * \$1000)) / 36$

Question 40 of 65

Choose 1 option.

A sales user created a quote with one line item last week, and new features were deployed to production over the weekend.

This week, the sales user observed several issues while configuring the quote: The Browse Catalog is not showing products, and configuring any of the existing line items is showing the error "Something went wrong while processing your configuration changes."

What is a reason for the issues?

- ☐ A. The context definition for the pricing procedure must use the context definition selected on the Revenue Settings page.
- ☒ B. The context definition for the pricing procedure must use the context definition selected on the Product Discovery Settings page.
- ☐ C. The context definition for the pricing procedure must use the context definition selected on the Pricing Setup page.

Question 43 of 65

Choose 1 option.

A Revenue Cloud Consultant needs to deploy a custom decision table into a staging sandbox.

What is the correct sequence of activities required for this deployment?

- ☐ A.
 - 1. Deploy the custom object and decision table into the staging sandbox.
 - 2. Map the decision table in the default pricing recipe.
 - 3. Import the data for the custom object, then sync Pricing.
- ☒ B.
 - 1. Deploy the custom object and decision table into the staging sandbox.
 - 2. Map the decision table in the default pricing recipe.
 - 3. Refresh the decision table or sync Pricing.
- ☐ C.
 - 1. Deploy the decision table into the staging sandbox.
 - 2. Map the decision table in the default pricing recipe.
 - 3. Import the data for the decision table, then refresh the decision table.

Question 42 of 65

Choose 1 option.

An order fulfillment orchestrator designer is setting the decomposition scope to Order Line Item at the product record level. The designer created the necessary decomposition rules in a Dynamic Revenue Orchestrator (DRO)-enabled sandbox. To test the changes, an order is created with line items that have the same product for which the decomposition rules exist.

What will happen when the order is activated?

- ☒ A. For every order line item that decomposes, one instance of the fulfillment order line item is created per order item.
- ☐ B. For every order line item that decomposes, multiple instances of the fulfillment order line item are created per order item.
- ☐ C. For every order line item that decomposes, a single instance of the fulfillment order line item is created combining all order items.

Question 41 of 65

Choose 1 option.

A new order is created with these details:

1. The account has a default Billing Profile with a billing address in San Francisco.
2. An order is created associated with this account with a billing address in New York.
3. The order has a billing account attached with a billing address in Chicago.

When billing processes the order, which city will be used?

- ☐ A. New York
- ☒ B. Chicago
- ☐ C. San Francisco

Question 46 of 65

Choose 1 option.

A Revenue Cloud Consultant needs to add a new custom field to the pricing context definition and use it in a pricing procedure. The consultant added the attribute to the context definition, but it is not available in the pricing procedure.

Which step did the consultant miss?

- ☐ A. Add a tag to the field attribute.
- ☒ B. Activate the context definition.
- ☐ C. Clone the pricing procedure.

Question 45 of 65

Choose 1 option.

A customer currently uses the standard Quote and Order objects and wants to distinguish the records created by Revenue Cloud.

How should a Revenue Cloud Consultant differentiate the records created by Revenue Cloud from other processes?

- ☐ A. Find a related record for the Application Usage Assignment object with the value of Revenue Lifecycle Management.
- ☐ B. Verify that the Record Type of Quote and Order are set to Revenue Lifecycle Management.
- ☒ C. Check Quote and Order Transaction Type field picklist value to be Revenue Lifecycle Management.

Question 44 of 65

Choose 1 option.

A Revenue Cloud Consultant is configuring a product catalog in Salesforce Revenue Cloud for an electronics manufacturer. The team requires real-time product filtering during the quote process, based on customer tier, location, and purchase history. The consultant needs to use a context definition to pass the required data to the qualification rule.

Which configuration correctly uses a context definition for this customer?

- ☒ A. Configure a Product Discovery context definition with nodes and attribute mappings for account tier and location, so this data can be evaluated by the rules during Browse Catalog.
- ☐ B. Create a Sales Transaction context definition to control which products are visible in the catalog based on the user's profile, leveraging context tags to enforce record visibility.
- ☐ C. Use the Product2 object to create custom fields and assign page layouts that dynamically control product availability using context definition tags and validation rules.

Question 47 of 65

Choose 1 option.

An approval administrator has enabled Smart Approvals and configured it for finance approval by checking Use Smart Approval. The sales manager reports that the new functionality of Smart Approvals does not work.

What is causing the issue?

- ☐ A. The condition in the stage is the same as the condition on the step.
- ☒ B. The condition in the stage is not same as the condition on the step.
- ☐ C. There are two conditions on the stage, but only one condition in the step.

Question 48 of 65

Choose 1 option.

A company has a policy requiring all new business quotes to be automatically associated with an Opportunity to ensure accurate forecasting.

How should a consultant enforce this policy so that users are unable to create a quote without an Opportunity?

- ☐ A. Create a validation rule on the Quote object to ensure OpportunityId is not null.
- ☐ B. Update Opportunity Settings and enable 'Require Quotes on Opportunities'.
- ☒ C. Update Quote Settings and set 'Create Quotes Without a Related Opportunity' to False.

Question 51 of 65

Choose 1 option.

A global enterprise is implementing Salesforce Revenue Cloud to simplify collaboration between sales, finance, and legal teams throughout the revenue lifecycle. The organization's key goal is to have a single source of truth to understand where the order is in its lifecycle without relying on disconnected tools or manual handoffs.

How does Dynamic Revenue Orchestrator (DRO) help meet these goals?

- ☐ A. DRO automates the revenue lifecycle.
- ☒ B. DRO automates the order lifecycle and streamlines fulfillment.
- ☐ C. DRO automates the entire quote-to-order lifecycle.

Question 50 of 65

Choose 1 option.

Universal Containers (UC) sells complex Enterprise Connectivity Suites made up of physical hardware, cloud software, and services. Each component demands a unique fulfillment process, but UC's current system's uniform order treatment leads to delays and errors in tailored delivery. UC needs to break down these complex orders, apply custom fulfillment plans for each distinct product, and ensure a tailored delivery experience.

Which Revenue Cloud capability should solve UC's problems with accurate order fulfillment?

- ☐ A. Product Configurator
- ☐ B. Salesforce Experience Cloud for customer portals
- ☒ C. Dynamic Revenue Orchestrator (DRO)

Question 49 of 65

Choose 1 option.

A company's IT team is planning to implement Revenue Cloud. Their team consists of business analysts and administrators. The company plans to solve a complex and major use case of omni-channel selling, allowing its customers to buy directly from its third-party website as well as via its sales reps. The company also plans to hire new staff to support this project.

Which skill set does the IT team need to successfully implement this project?

- ☐ A. Expertise in Salesforce flows
- ☒ B. Expertise in Salesforce Integration, including REST APIs
- ☐ C. Expertise in Apex and Lightning Web Component development

Question 54 of 65

Choose 1 option.

A Global System Integrator (GSI) provides consulting services by offering a variety of roles and skills based on the needs of the customers. The GSI has a global workforce of 30,000 consultants with expertise in many different technologies.

Currently, the GSI uses standard Salesforce functionality to quote using Opportunities, Quotes, and Pricebooks. As its consultants have so many different roles and skills, it maintains a large product catalog with upward of a million SKUs. A new product is created each time a new skill is added.

How should the GSI use Revenue Cloud to solve its SKU proliferation issue?

- ☐ A. Use Product Attributes to rationalize the product catalog.
- ☒ B. Use Product Classification to rationalize the product catalog.
- ☐ C. Use Product Category to rationalize the product catalog.

Question 53 of 65

Choose 1 option.

A sales user has a customer with varying quantities (upsells) and subscription prices throughout their last contract term. The customer is ready to renew, and the sales user wants to maintain the same prices for their renewal.

What should the sales user do in Asset Management to keep the prices the same?

- ☐ A. Customize Assetize Order flow.
- ☒ B. Set Pricing Source on Asset to Last Negotiated Price.
- ☐ C. Enable Lot-based or As-Is Renewals.

Question 52 of 65

Choose 1 option.

A pricing administrator aims to configure pricing for a smartphone so that the monthly installment price varies based on the selected memory options (128 GB, 256 GB, 512 GB) and contract term options (12 months, 24 months). The price should be equally divided for each month, considering the combinations of memory and contract term as price-impacting attributes, with no interest charges applied.

How many records need to be present in the Attribute-Based Adjustments pricing schedule to satisfy this scenario?

- ☒ A. 6
- ☐ B. 3
- ☐ C. 5

Question 55 of 65

Choose 1 option.

A Revenue Cloud Consultant needs to display a list of products to be shown in the browse phase of a guided selling journey.

Which Product Catalog Management business API should the consultant use to retrieve a list of products that belong to a specific catalog?

- ☐ A. Products List (GET)
- ☐ B. Product Related Records List (POST)
- ☒ C. Products List (POST)

Question 56 of 65

Choose 1 option.

A product administrator creates a product by associating it with a product class that has three attributes assigned. Two of these attributes are to be used for attribute-based pricing only for this product.

How should the product administrator ensure that these two attributes can be used for attribute-based pricing?

- ☐ A. Edit the attribute associated to a product classification and set the 'Is Price Impacting' flag.
- ☒ B. Edit the attribute definition and set the 'Is Price Impacting' flag.
- ☐ C. Edit the inherited attributes at the product level and set the 'Is Price Impacting' flag.

Question 57 of 65

Choose 1 option.

A Revenue Cloud Consultant wants to restrict the ability to cancel subscriptions via the cancel button in the Account > Managed Assets view. The consultant wants to ensure that only a select group of super users has access to this functionality.

Which change does the consultant need to apply for this requirement?

- ☐ A. Inactivate the Amend, Renew, and Cancel Assets screen flow for users who should not have access to the cancel button.
- ☒ B. Unassign InitiateCancellation API permission for users who should not have access to the cancel button.
- ☐ C. Modify the Managed Asset Viewer page layout for users who should not have access to the cancel button.

Question 60 of 65

Choose 1 option.

A Revenue Cloud customer sells products that have a large number of attributes. The customer wants to change certain price-impacting attributes without making additional changes to the contract, such as quantity change, addition of new products, etc.

How should a consultant do this using out-of-the-box Revenue Cloud functionality?

- ☐ A. Perform a Cancel/Replace.
- ☒ B. Perform a Standard Amendment.
- ☐ C. Perform an Early Renewal.

Question 59 of 65

Choose 1 option.

A Revenue Cloud Consultant wants to inherit all the standard components of the standard context `SalesTransactionContext`, such as nodes, attributes, and mappings from a standard context definition, and customize the definition by adding new components.

The consultant also wants to ensure that they can easily obtain the upgraded standard components as needed, based on the latest version, without losing any of the customizations that were made.

What should the consultant do to achieve this?

- ☐ A. Upgrade `SalesTransactionContext`.
- ☒ B. Extend `SalesTransactionContext`.
- ☐ C. Clone `SalesTransactionContext`.

Question 58 of 65

Choose 1 option.

A product administrator notices that the price of a warranty product is not being calculated correctly. It should be calculated as 10% of another equipment product's list price, but only when the products are purchased together in the same quote or order. This calculation works correctly for other products, but not for this specific warranty product.

How should the product administrator resolve this issue?

- ☐ A. Find the Derived Price element and add the appropriate input/output variables in the pricing procedure.
- ☒ B. Find the Derived Price record where Product = Warranty and set the Derived Pricing Scope to Transactional.
- ☐ C. Find the price book entry of the equipment product and enable the Is Derived checkbox.

Question 61 of 65

Choose 1 option.

A solution is being designed for migrating a customer's install base to Revenue Cloud. The customer states that it is extremely critical for the installed base to work fine in Revenue Cloud so that there is no business disruption, as a large part of their business is Amendments and Renewals.

Apart from the Product, Product Selling Model, and Pricebook, which other key objects should be included in the discovery to help design this migration?

- ☐ A. Quote, Quote Line, Order, Order Product
- ☐ B. Asset, Subscription, Subscribed Asset, Order
- ☒ C. Asset, Asset Action, Asset State Period, Asset Action Source

Question 62 of 65

Choose 1 option.

A product designer created a new simple product and ensured that the product is active, has a product selling model, has a price book entry, and has a category. Few other settings are enabled in the organization's Set Up Advanced Configuration Rules and Constraints, Use Indexed Data for Product Listing and Search, Guided Product Selection, and Ramp Deals. The new product is not appearing in Browse Catalog.

Which step did the product designer miss?

- ☐ A. Rebuild Constraint Model.
- ☐ B. Rebuild Ramp Segment.
- ☒ C. Rebuild Index.

Question 63 of 65

Choose 1 option.

A customer wants to remove the option to override the renewal term during an asset renewal process initiated from the Account > Managed Assets view.

How should a Revenue Cloud Consultant fulfill this requirement?

- ☐ A. Modify the Lightning web component corresponding to the renew assets page and remove the option for early renewal.
- ☐ B. Modify the flow Amend, Renew, and Cancel Assets screen component for renewal term and remove the option for early renewal.
- ☒ C. Modify the flow Renew Assets screen component for renewal term and remove the option for early renewal.

Question 64 of 65

Choose 1 option.

A Revenue Cloud Consultant is helping a customer cancel a portion of their subscription for a product that was purchased multiple times over the past year, each at a different price point. When the cancellation is processed, the refund or credit amount will be based on the purchase price of the product.

Which pricing strategy is being used to determine the cancellation value?

- ☒ A. FIFO (First In, First Out) – Uses the earliest asset's price to determine the refund or credit.
- ☐ B. Average Cost – The system averages the prices of all purchases to calculate the cancellation value.
- ☐ C. LIFO (Last In, First Out) – Uses the most recent asset's price to determine the refund or cancellation credit.

Question 65 of 65

Choose 1 option.

When a Ramped Asset is renewed using the InitiateRenew API, what happens to its quote line(s) in a renewal quote?

- ☐ A. A quote line for each ramp segment is created but not ramped.
- ☒ B. The Ramped Quote lines are recreated onto the renewal quote.
- ☐ C. One quote line is created for the Asset, and it is no longer ramped.
