Universal Containers wants to automate responses to a high volume of common customer queries such as "What's my account number?" or "I need to reset my password." They require a solution that can operate 24/7, provide natural, conversational replies, and understand the context of the entire conversation.

What should the Service Cloud Consultant recommend?

- ☒ A. Implement Agentforce Service Agent with standard topics like "Account Management" and associated actions.
- ☐ B. Implement generative Search Answers on a customer-facing knowledge base.
- ☐ C. Implement public knowledge base in an Experience cloud and create users for each customer.

Support is divided by product line at Universal Containers. Each product line has its own support reps, queue, articles, and record types. Support reps only work within their product line. To help standardize communications with customers, the support administrator would like to implement quick texts. Quick texts are unique to each product line.

How should the administrator ensure support reps only have access to quick texts for their specific product line?

- ☐ A. Add a permission set for Read access to the appropriate product line.
- ☐ B. Set the organization-wide default to Private and create sharing rules to share them with roles.
- ☒ C. Create a folder for each product line and share them with public groups.
