60 of 60. Universal Containers has expanded to sell virtual containers for data storage. Virtual container work orders are provisioned immediately by the system and therefore cannot be changed by a sales rep.

What is an optimal approach to implement these requirements?

- A. ☐ Implement a sharing rule that changes access for all Work Orders to Read.
- B. ☐ Change the Record Type/Page Layout assignment for Work Orders to Read Only.
- C. ☒ Remove the Work Order Edit permission from the Sales Representative profile.

59 of 60. Sales executives at Universal Containers (UC) want to create list views to filter opportunities for large at-risk opportunities. These list views should only be available to certain executives who specialize in closing problematic deals.

What should UC do to solve this requirement?

- A. ☒ Share the list views with the appropriate Public Group.
- B. ☐ Share the list views with the appropriate role in the Role Hierarchy.
- C. ☐ Share the list views with the appropriate individual users.

☐ Mark this item for later review.

58 of 60. Universal Containers (UC) sales managers are complaining that they cannot access their teams' Shipment records (a custom object). Initially, the admin suggested that this is happening due to a misconfigured Role Hierarchy (Shipment organization-wide default is Private). After investigation, they determined the Role Hierarchy for these users is correct.

What is the reason why UC sales managers are unable to see shipment records?

- A. ☒ The Grant Access Using Hierarchies option on Shipment Sharing Settings was incorrectly disabled by the admin.
- B. ☐ The Role Hierarchy implicit sharing was incorrectly disabled by the admin.
- C. ☐ The Ownership-based sharing rule for Shipment was incorrectly disabled by the admin.

Sales reps at Universal Containers (UC) complain about the manual activities they need to perform in order to grant access to supporting internal users (legal, engineering, finance, etc.) for customer records when they need help. In general, the sales reps involved in the deals will not change.

How should an architect help UC improve sales reps' productivity?

- A. ☐ Create a criteria-based sharing rule to grant access to other users.
- B. ☒ Leverage default Account team.
- C. ☐ Create a permission set with View All Data and assign to supporting users.

Assuming the organization-wide default of the Account object is Public Read-Only, what is the impact in the system?

- A. ☐ Existing AccountShare record is updated. Row Cause is "Manual" and Access Level is "Read/Write".
- B. ☒ New AccountShare record is created. Row Cause is "Manual" and Access Level is "Read/Write".
- C. ☐ New AccountShare record is created, Row Cause is "Owner" and Access Level is "Full".

How is this accomplished?

- A. ☐ Criteria based Sharing Rule on Case that shares to the Role Manager and above when a custom field Assigned Agent (subject of the complaint) is not blank.
- B. ☒ Case is owned by the subject of the complaint, so their manager in the role hierarchy can access the record. CRED permission are removed on Case so the agent cannot read the case record.
- C. ☐ Trigger on Case to lookup and share to the manager of an Assigned Agent custom field (the subject of the complaint) using Apex Managed Sharing.

53 of 60. The sales managers at Universal Containers requested their teams to define each user's role on their accounts in order to provide an easy way to establish accountability and collaboration. Sales managers also requested that sales associates should only get the following permissions: 1. Read access to the accounts. 2. Read access to cases related to the accounts. 3. No access to deals related to the accounts. The sales associates may be granted access to opportunities when needed.

Assuming the overall sharing model of the organization is Private and no sharing rules are configured on the Account object, how should an architect achieve these requirements?

- A. ☐ Use Account teams and sharing rules to share cases with sales associates. No change required to the Opportunity object.
- B. ☒ Use Account teams to define access to accounts as well as opportunities and cases related to accounts.
- C. ☐ Use Account teams and Case teams. No configuration required for the Opportunity object.

☐ Mark this item for later review.

50 of 60. Universal Containers uses the standard Case object to track various support requests sent to servicing agents. Currently, the Case object has more than 400 fields. Eight different types of case processes have been established, each with a unique combination of statuses. The Director of Customer Service wants to ensure that servicing agents see only the required information specific to the case type they are addressing.

Which option is recommended to implement this requirement?

- A. ☐ Use different Page Layouts per case type, each representing the relevant fields per case type.
- B. ☒ Use Dynamic Forms with different field sections representing the relevant fields per case type, and control visibility of sections by Case Record Type value.
- C. ☐ Use a custom LWC to override the View action of the Case object, and a Custom Metadata Type to define the relevant fields per case type.

Standard sales users at UC can see the records in search layout, but when they click to view the detail, only record name, created date, and last modified date are shown. When the system admin accesses it, he or she sees the full record detail with many more data fields.

What is the likely cause of this issue?

- A. ☐ A role-based sharing rule is missing and should be added for the sales user's role to grant access to the fields.
- B. ☐ The page layout assigned to Sales User profile has only Read-Only access to the fields.
- C. ☒ The Sales Users profile does not have access to the remaining fields.

18 of 60. A banking company wants their customers Date of Birth Field searchable by Banking Reps, but only editable by Customer Support Reps.

Which approach is recommended to meet this requirement?

- A. ☐ Create a Validation rule in the Date of Birth field so the rule returns true only when user.profilename matches Customer Support Rep.
- B. ☒ Set the Field Level Security for the Date of Birth field to be Visible to Customer Support Rep Profile, and set the Date of Birth field Visible and Readonly to Banking Rep profile.
- C. ☐ Add Date of Birth field to the Search layout of the Contact Object. Modify the Page layout assigned to Customer Support Rep and add Date of Birth field as Required.

How can this be accomplished?

- A. ☐ Trigger on Presenter junction object that adds the user to the Sales Team for the Presentation record.
- B. ☐ Give Edit rights to the Presentation record via a Permission set that is given to the Presenters for a record.
- C. ☒ Trigger on Presenter junction object that uses Apex Managed sharing to add or remove access to the related Presentation record.

However, based on a recent audit, the company's Privacy Team identified three additional fields in their Account Records (Billing Street, Billing City and Phone) that needs to be secure and protected.

How should an architect proceed with this new policy change?

- A. ☒ Use Encryption Policy and contact Salesforce to update the existing records so that their field values are encrypted.
- B. ☐ Use Classic Encryption to ensure all fields are protected and contact Salesforce for help with encryption verification.
- C. ☐ Use Encryption Policy and wait for an email from Salesforce indicating the field values are encrypted.
